FOREWORD	12
LIST OF CHANGES AND CLARIFICATIONS GROUPED BY GENERAL TOPIC	12
POLICY AND GUIDANCE DOCUMENTS INCORPORATED AND SUPERSEDED	14
GUIDANCE DOCUMENTS SUMMARIZED AND REFERENCED	15
INTRODUCTION	16
I. Public Assistance Program Overview	16
II. Authorities	16
A. Statutes	16
B. Regulations	17
III. Document Purpose and Use	17
IV. Scope	18
V. Applicability	18
VI. Document Management and Maintenance	18
CHAPTER 1: PRE-AWARD ACTIVITIES	19
I. Preliminary Damage Assessment	19
II. Declaration Request	19
III. Declaration Evaluation	20
A. State Governments	20
B. Tribal Governments	21
IV. Presidential Declaration	21
A. Type of Incident	22
B. Incident Period	22
C. Designated Areas	22
D. Types of Assistance	22
E. Federal Cost Share	23

V.	Recipient Administrative Requirements	24
A.	FEMA-State/Tribe Agreement	24
B.	Application for Federal Assistance	24
C.	Payment Management System	25
D.	Administrative Plan	25
E.	Hazard Mitigation Plan.....	25
CHAPTER 2: OPERATIONAL COORDINATION		27
I.	Operational Priorities	28
A.	Community Lifelines	28
B.	Incident Action Plan	28
II.	Response and Recovery Coordination	29
A.	Response Coordination.....	29
B.	Recovery Coordination.....	30
1.	Field Operations	30
C.	Public Assistance Coordination and Planning.....	31
CHAPTER 3: APPLICANT COORDINATION AND ELIGIBILITY		33
I.	Public Assistance Web-based Systems	33
II.	Applicant Briefing	34
III.	Request for Public Assistance.....	34
IV.	Written Correspondence	35
V.	Eligibility Determinations.....	36
A.	Requests for Information	37
B.	Notification of an Ineligibility Determination.....	37
C.	Appeal Rights and Requirements	37
1.	Appeal Deadlines.....	38
2.	Appeal Content	38
3.	Appeal Review	38
4.	Appeals for Alternative Procedures Projects.....	39
D.	Arbitration	39
VI.	Applicant Eligibility.....	40
A.	State Governments.....	40
B.	Tribal Governments.....	40
C.	Local Governments	40
D.	Private Nonprofit Organizations.....	41
1.	Private Nonprofit Critical Services	43
2.	Private Nonprofit Essential Social Services	44
3.	Private Nonprofit Ineligible Services	45

4. Private Nonprofit Application Documentation Requirements	45
VII. Exploratory Call.....	46
VIII.Recovery Scoping Meeting.....	47
IX. Damage Inventory.....	48
A. Damage Inventory Information	49
CHAPTER 4: GENERAL WORK AND FACILITY ELIGIBILITY	50
I. General Work Eligibility.....	50
A. Categories of Work.....	50
B. Minimum Work Eligibility Criteria.....	50
1. Result of Declared Incident	50
2. Within Designated Area	51
3. Legal Responsibility.....	51
C. Environmental and Historic Preservation Requirements	53
II. Facility Eligibility	54
A. Public Facility.....	54
B. Private Nonprofit Facility.....	55
1. Mixed-Use Facility.....	55
2. Small Business Administration Loan Requirement	56
C. Inactive or Partially Inactive Facility	57
D. Facility Scheduled for Repair or Replacement.....	58
CHAPTER 5: DAMAGE DESCRIPTION DEVELOPMENT	59
I. Grouping Damage into Projects.....	59
A. Standard Project Grouping	59
1. Emergency Work Grouping	59
2. Permanent Work Grouping.....	59
B. Special Project Grouping.....	61
II. Site Inspections and Obtaining Essential Elements of Information.....	61
A. Essential Elements of Information	61
B. Site Inspections.....	62
CHAPTER 6: COST ELIGIBILITY	63
I. Reasonable Costs	63
A. Analysis	63
II. Applicant (Force Account) Labor	66
A. Labor Policies	67
B. Eligibility Criteria Based on Type of Employee and Work Performed	67

1. Reassigned Employees	68
2. Reassigned Employees Funded from an External Source	68
3. Backfill Employees	68
4. Essential Employees Called Back from Furlough.....	69
5. Supervisors	69
6. Other	69
7. Standby Time.....	69
III. Applicant-Owned Equipment and Purchased Equipment.....	70
A. FEMA Rates	71
B. State or Tribal Rates	71
C. Local Rates	71
D. Equipment with No Established Rate.....	72
IV. Leased Equipment.....	72
V. Supplies.....	73
VI. Disposition of Purchased Equipment and Supplies	74
A. Disposition of Purchased Equipment	74
B. Disposition of Purchased Supplies	74
VII. Disposition of Real Property.....	75
VIII. Procurement and Contracting Requirements	75
A. Procurement and Contracting Requirements for State Government Entities	75
1. Procurement.....	75
2. Contracting	76
B. Procurement and Contracting Requirements for Tribal and Local Government Agencies and Private Nonprofits.....	76
1. Pre-procurement Considerations	76
2. General Federal Procurement Requirements	77
3. Procurement Methods.....	79
4. Contract Types.....	81
5. Additional Contracting Considerations	82
C. Required Contract Clauses	82
D. Documentation Requirements	83
IX. Mutual Aid.....	84
A. Post-Incident Agreements	84
B. Eligibility.....	84

X.	Prisoners.....	85
XI.	National Guard.....	86
XII.	Direct Federal Assistance	86
XIII.	Increased Federal Cost Share for a Limited Timeframe	86
XIV.	Donated Resources	87
A.	Offset Amounts	88
B.	Documentation Requirements	90
XV.	Project Management and Design Services.....	90
XVI.	Public Assistance Grant Management and Administration.....	90
XVII.	Surveys to Assess or Locate Damage or Debris Impacts	91
XVIII.	Duplication of Benefits	91
A.	Insurance Proceeds	91
B.	Non-Federal Grants and Cash Donations	93
C.	Third-Party Liability.....	93
D.	Other Federal Awards.....	93
XIX.	Duplication of Funding Between FEMA Programs	94
XX.	Interest on Loans.....	94
XXI.	Ineligible Costs.....	94
A.	Loss of Revenue	94
B.	Loss of Useful Service Life.....	94
C.	Tax Assessments	95
D.	Increased Operating Costs.....	95
CHAPTER 7: EMERGENCY WORK ELIGIBILITY		96
I.	Debris Removal (Category A)	98
A.	Alternative Procedures for Debris Removal.....	100
B.	Hazardous Limbs, Trees, and Stumps	100
1.	Broken Limb or Branch Removal	100
2.	Tree Removal	101
3.	Stump Removal	101
4.	Documentation Requirements for Hazardous Limbs, Trees, and Stumps.....	102
C.	Waterways	102
1.	Navigable Waterways.....	102
2.	Non-navigable Waterways, Including Flood Control Works and Natural Waterways	103

3. Identifying Debris Impact Locations	103
D. Privately Owned Vehicles and Vessels on Public Property	104
E. Debris Removal from Private Property	104
1. Approval Process	104
2. Removal from Private Roads.....	105
3. Removal from Private Residential Property	105
4. Removal from Commercial Property (Requires FEMA's Pre-approval).....	106
5. Duplication of Benefits.....	106
F. Disposal	106
1. Recycling Revenue	107
2. Temporary Staging Sites	107
3. Hand-Loaded Trucks and Trailers	107
4. Landfills and Tipping Fees	108
G. Monitoring Contracted Debris Removal Operations.....	108
 II. Emergency Protective Measures (Category B).....	 109
A. Saving Lives and Protecting Public Health and Safety	109
B. Protecting Improved Property	110
C. Emergency Protective Measures on Private Property	111

FOREWORD

On behalf of the Federal Emergency Management Agency (FEMA), I am pleased to issue this Fourth Edition (Version 4) of the *Public Assistance Program and Policy Guide* (PAPPG). FEMA has archived previous editions at www.fema.gov/media-library/assets/documents/111781. FEMA applies this Version 4 to incidents declared on or after January 1, 2020. This version supersedes Version 3.1.

As part of this version of the PAPPG, FEMA has incorporated the *Public Assistance Alternative Procedures for Permanent Work Pilot Policy* (FP 104-009-7). This establishes Alternative Procedures as the first option considered for all large permanent work projects in order to ensure the ability of Applicants to drive their own recovery. It standardizes a single process for the development and consideration of fixed cost estimates for all permanent work projects. Applicants will be able to agree to a fixed cost estimate or choose to pursue funding under standard, actual cost procedures. This approach maximizes Applicant awareness of the opportunities and benefits provided by the Alternative Procedures, which include, but are not limited to:

- Flexibility in meeting post-disaster recovery needs, as opposed to being limited to rebuilding back to what existed prior to the disaster.
- Ability to share funds across all Alternative Procedures Permanent Work Projects.
- Ability to retain and use excess funds to reduce risk and improve future disaster operations (subject to timely closeout).
- Eligibility for cost-effective hazard mitigation on replacement projects.

Appendix M: *Alternative Procedures for Permanent Work Pilot*, provides additional information along with a summary of benefits in comparison to the standard Public Assistance (PA) procedures.

Additionally, this PAPPG Version 4 incorporates the following:

List of Changes and Clarifications Grouped by General Topic

Administrative
Reorganized and simplified language
Incorporated the entire Program Delivery Process
Added language on Outcome-Driven Recovery
Incorporated key Grants Management language and requirements such as work completion definition and deadline requirements
Allowing Small Project completed work to be estimated and certified
Moved documentation checklists to relevant sections and specified required documents
Defined policy on logical grouping of damage
Incorporated Documentation Retention Requirement
Incorporated Appeal policy (supersedes requirements stated in FEMA's <i>Recovery Directorate Directive, Public Assistance Program Appeals and Recovery Directorate Manual, Public Assistance Program Appeal Procedures</i>)
Incorporated Determination Memo and Administrative Record guidance

Added Closeout policy and documentation requirements
Added standard Request for Information deadlines
Added FEMA validation of Applicant-submitted damage or debris documentation
Added requirement for all documentation to be submitted within 90 days of work completion regardless of obligation status

Applicant Eligibility
Added animal control services, center-based child care, and food banks to eligible private nonprofit (PNP) list
Pro-ration of emergency work on PNP mixed-use facilities
Clarified that PNP facilities that provide flood control are ineligible
Clarified requirements for PNPs exempt from 501c requirement
Clarified Community Development District requirement to serve the public
Moved public broadcasting to PNP critical service table based on Stafford Act.

Emergency Work Eligibility
Summarized Debris Pilot and eliminated details
Clarified demolition versus debris
Added reference to Operation Blue Roof
Clarified that FEMA may provide exceptions to demolish commercial structures in limited, extraordinary circumstances
Clarified and aligned standby time and pre-positioning of resources
Removed “temporary” from emergency repair language
Clarified debris clearance vs. debris removal
Adjusted list of services eligible for temporary relocation and examples of eligible and ineligible support services
Clarified that Mosquito Abatement may be eligible if any one of the bullet scenarios exists
Eliminated requirement to make at least 10 percent of sheltering capacity available in Host-State sheltering
Refined beach eligibility language
Clarified language on essential employees being called-back from leave
Clarified that the return of evacuees is eligible
Clarified language regarding damage caused during Emergency Work

Permanent Work Eligibility
Eliminated Alternate Project reduction elimination
Clarified that replacement of moldy construction materials is only eligible as Permanent Work
Clarified cost-effective mitigation for low slope roofs
Refined beach eligibility language
Clarified eligibility of Americans with Disability Act requirements
Refined hazard mitigation policy language

Defined which **Flood Control Works** are under authority of the Natural Resources Conservation Service

Cost Eligibility
Clarified PNP cost ineligibility when a PNP declines or misses the deadline to apply for a disaster loan from the Small Business Administration
Clarified Small Business Administration loan requirement for PNP mixed-use facilities
Added language on cost share matching with Other Federal Agency funds
Incorporated additional language on procurement and contracting
Clarified eligibility of costs related to pursuing insurance proceeds
Added language on what costs are covered by increased cost shares
Clarified that the minimum threshold does not apply to Donated Resource or Management Cost Project Worksheets
Clarified that project thresholds are determined after the actual insurance proceeds, not anticipated
Incorporated increased operating cost clarifications , including ineligibility of costs related to transportation of students to alternate schools or temporary facilities, staff being held-over to cover shifts, and new landfills
Added language on eligibility of interest on loans
Added language conveying that FEMA does not re-evaluate reasonable costs on Alternative Procedure Permanent Work Pilot projects
Explained difference between project management and grant management costs

FEMA Recovery Policy FP 104-11-2, <i>Public Assistance Management Costs (Interim)</i>

FEMA makes updates to the PAPPG at www.fema.gov/public-assistance-policy-and-guidance on an annual basis when necessary and conducts a comprehensive review no less than every three years. We look forward to your feedback to help inform the next version. FEMA staff may send policy recommendations through the PA Change Control Tool at portalapps.fema.net/apps/ORR/NewPA/Pages/SubmitRequest-CCT-P3.aspx. Recipients and Applicants may request changes via email at FEMA-PA-Grants@fema.dhs.gov.

Keith Turi
Assistant Administrator
Recovery Directorate

INTRODUCTION

I. Public Assistance Program Overview

The mission of the Federal Emergency Management Agency's (FEMA's) Public Assistance (PA) Program is to provide assistance to State, Tribal, and local governments, and certain types of private nonprofit (PNP) organizations so that communities can quickly respond to and recover from major disasters or emergencies declared by the President. Through the PA Program, FEMA provides supplemental Federal disaster grant assistance for debris removal, emergency protective measures, and the restoration of disaster-damaged, publicly owned facilities and specific facilities of certain PNP organizations. The PA Program also encourages protection of these damaged facilities from future incidents by providing assistance for hazard mitigation measures. FEMA provides this assistance based on authority in statutes, executive orders (EOs), regulations, and policies.

II. Authorities

A. Statutes

Statutes are Federal laws passed by the U.S. Congress and signed by the President. All PA Program assistance must comply with all applicable statutes. The statute that authorizes FEMA to provide assistance via the PA Program is the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as Amended (Stafford Act), Title 42 of the United States Code (U.S.C.) § 5121 et seq.¹ The following sections of the Stafford Act specifically authorize the assistance FEMA provides under the PA Program:

- Title I – Findings, Declarations and Definitions
- Title III – Major Disaster and Emergency Assistance Administration
 - 311, Insurance
 - 312, Duplication of Benefits
 - 324, Management Costs
- Title IV – Major Disaster Assistance Programs (applies to Major Disaster Declarations)
 - 403, Essential Assistance
 - 406, Repair, Restoration, and Replacement of Damaged Facilities
 - 407, Debris Removal
 - 428, Public Assistance Program Alternative Procedures

Section 428 of the Stafford Act authorizes FEMA to provide specific exceptions, or “Alternative Procedures,” to PA Program regulations.² FEMA is currently piloting these Alternative Procedures as optional procedures. These procedures are available to each Applicant on a voluntary basis. The specific alternatives are presented throughout this document, where applicable.

- Title V – Emergency Assistance Programs (applies to Emergency Declarations)

¹ www.fema.gov/robert-t-stafford-disaster-relief-and-emergency-assistance-act-public-law-93-288-amended.

² The Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93-288, as Amended (Stafford Act) § 428, Title 42 of the United States Code (U.S.C.) § 5189f.

- 502, Federal Emergency Assistance
- Title VII – Miscellaneous
 - 705, Disaster Grant Closeout Procedures

B. Regulations

Regulations are Federal rules with the force and effect of law that implement a statute based on a Federal agency's interpretation of that statute.³ FEMA and any entity receiving PA assistance must comply with all applicable Federal Regulations.⁴

FEMA publishes PA Program rules in the following parts of Title 44 of the Code of Federal Regulations (C.F.R.), Emergency Management and Assistance:⁵

- Part 206 Subpart G, Public Assistance Project Administration;
- Part 206 Subpart H, Public Assistance Eligibility; and
- Part 206 Subpart I, Public Assistance Insurance Requirements.

The Office of Management and Budget establishes regulations regarding administrative requirements, cost principles, and audit requirements in 2 C.F.R. Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.

III. Document Purpose and Use

FEMA issues policy to articulate the Agency's intent and direction in applying statutory and regulatory authority to achieve desired outcomes. The purpose of the *Public Assistance Program and Policy Guide* (PAPPG) is to define FEMA's PA Program and its policy and procedural requirements. Only the Assistant Administrator of Recovery at FEMA Headquarters has the authority to modify or waive PA Policy.

The PAPPG provides high-level cradle-to-grave program delivery information and describes important PA functions that occur throughout the program delivery lifecycle.

FEMA staff use the PAPPG to guide decision-making and ensure consistent implementation of the PA Program across the Nation. Separate FEMA policies and guidance documents that apply to the PA Program are referenced where applicable and listed in the [References and Resources](#) section at the end of the PAPPG.

³ Stafford Act § 321, 42 U.S.C. § 5164.

⁴ Title 44 of the Code of Federal Regulations (C.F.R.) § 206.200(b). The electronic version of the C.F.R. is available at www.ecfr.gov.

⁵ Stafford Act § 325, 42 U.S.C. § 5165c; 44 C.F.R. § 1.4.

IV. Scope

The PAPPG provides comprehensive PA policy to use when evaluating eligibility. It includes FEMA's policy statements and provides a summary of each step of the PA Program lifecycle beginning with pre-declaration activities through closure of the PA Program award for a declared incident. The PAPPG references and provides weblinks to other FEMA policies and documents such as standard operating procedures and job aids that provide detailed instructions for individuals involved with implementing each of the various steps.

V. Applicability

FEMA applies Version 4 of the PAPPG to incidents declared on or after January 1, 2020. Individuals who have responsibilities managing, implementing, or pertaining to the PA Program should refer to the PAPPG for PA policy and procedural requirements.

VI. Document Management and Maintenance

FEMA generally publishes proposed PA policy language for public comment prior to publishing in this document.⁶ When the policy is deemed significant, FEMA publishes it in the *Federal Register*.⁷ FEMA conducts a comprehensive review of this publication no less than every three years. FEMA staff may send policy recommendations through the PA Change Control Tool at portalapps.fema.net/apps/ORR/NewPA/Pages/SubmitRequest-CCT-P3.aspx. Recipients and Applicants may request changes via email at FEMA-PA-Grants@fema.dhs.gov.

⁶ Stafford Act § 325, 42 U.S.C. § 5165c.

⁷ FEMA is required to publish policies for comment if they are deemed "significant" by the Office of Management and Budget, pursuant to Executive Order 12866.

CHAPTER 1: PRE-AWARD ACTIVITIES

The Stafford Act⁸ authorizes the President to provide Federal assistance when the magnitude of an incident or threatened incident exceeds the affected State,⁹ Indian Tribal,¹⁰ and local¹¹ government capabilities to respond or recover. This chapter explains procedures and requirements for activities that occur during the pre-award phase, including the process for requesting a Presidential declaration, FEMA's evaluation criteria, the contents of the declaration, and the initial administrative requirements for a State or Tribal government to receive assistance.

I. Preliminary Damage Assessment

When a State or Tribal Government determines that an incident may exceed State, Tribal, and local government capabilities to respond, it requests a joint Preliminary Damage Assessment (PDA) with FEMA.¹² Federal, State, Tribal, local government, and certain PNP organization officials work together to estimate and document the impact and magnitude of the incident.¹³ Accurate and comprehensive PDAs are critical to enabling efficient response and recovery. FEMA's *Damage Assessment Operations Manual*¹⁴ provides detailed information to assist staff involved with damage assessments and describes how FEMA utilizes the information when evaluating requests for Major Disaster Declarations.

II. Declaration Request

The Governor¹⁵ or Tribal Chief Executive¹⁶ may request a declaration from the President through FEMA. A Tribal Government may elect to be a Recipient¹⁷ or a Subrecipient¹⁸ under a

⁸ www.fema.gov/robert-t-stafford-disaster-relief-and-emergency-assistance-act-public-law-93-288-amended.

⁹ Stafford Act § 102(4), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(a)(22), State governments include the District of Columbia, American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Islands.

¹⁰ Stafford Act § 102(6), 42 U.S.C. § 5122; 44 C.F.R. § 206.201(i), an Indian Tribal Government is any Indian or Alaska Native tribe, band, nation, pueblo, village, or community listed as an Indian Tribe under the Federally Recognized Indian Tribe List Act of 1994. Hereinafter referred to as Tribal Government.

¹¹ Stafford Act § 102(8), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(a)(16), local governments include counties, municipalities, cities, towns, townships, local public authorities, school districts, special districts established under State law, intrastate districts, councils of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under State law), regional or interstate government entities, agencies or instrumentalities of a local government; State-recognized Tribes; and rural communities, unincorporated towns or villages, or other public entities, for which an application for assistance is made by a State or political subdivision of a State.

¹² 44 C.F.R. § 206.33(a).

¹³ 44 C.F.R. § 206.33(b).

¹⁴ www.fema.gov/media-library/assets/documents/109040.

¹⁵ Stafford Act § 102(5), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(12).

¹⁶ Stafford Act § 102(12), 42 U.S.C. § 5122.

¹⁷ 44 C.F.R. § 206.201(e). Per 2 C.F.R. § 200.86, A Recipient is an entity that receives a Federal award directly from a Federal awarding agency to carry out an activity.

¹⁸ Per 2 C.F.R. § 200.93, a Subrecipient is an Applicant that receives a subaward from a pass-through entity to carry out part of a Federal program.

State declaration or request its own declaration as a Recipient.¹⁹ The Governor, and/or the Tribal Chief Executive if the Tribal Government wishes to be its own Recipient, must submit the request no later than 30 days after the incident occurs.²⁰ FEMA may extend the deadline if the Governor or Tribal Chief Executive submits a written time extension request within 30 days of the incident stipulating the reason for the delay.²¹ When a severe or catastrophic incident occurs, the Governor or Tribal Chief Executive may submit a declaration request prior to completion of the PDA.²² This is referred to as an expedited declaration request. In such circumstances, assistance is generally limited to that which would address immediate needs based on rapid assessments until the PDA is completed.

Terminology: Recipients, Subrecipients, and Applicants

When an entity applies for PA funding, it is the **Applicant**. Once the Applicant receives funding, it is either the **Recipient**, **pass-through entity** or a **Subrecipient**. For simplicity, FEMA uses the term Applicant throughout this document when referring to the responsible entity for a project rather than making distinctions between an entity as the Applicant, Recipient, pass-through entity, or Subrecipient. FEMA uses the terms Recipient and Subrecipient when necessary to differentiate between the two entities.

III. Declaration Evaluation

FEMA uses PDA information to evaluate the need for assistance under the PA Program.

A. State Governments

For State Governments, FEMA's evaluation is based on six primary factors:

- Estimated cost of assistance
- Insurance coverage
- Other Federal agency programs
- Localized impacts
- Hazard mitigation
- Recent multiple disasters²³

FEMA reviews the facility and cost information to ensure that the estimated costs include all appropriate insurance reductions and do not include costs related to facilities under the authority of another Federal agency. FEMA then compares the estimated eligible amounts to the established annual per capita indicators. To account for localized impacts when the statewide per

¹⁹ A Tribal Governmental may also receive one type of assistance under a State declaration and another type of assistance under its own declaration, provided there is no duplication of benefits. Additional information for Tribal declarations is available at www.fema.gov/tribal-declaration-and-disaster-assistance-resources.

²⁰ Stafford Act §§ 401 and 501, 42 U.S.C. §§ 5170 and 5191; 44 C.F.R. §§ 206.35 and 206.36. For Emergency Declarations, the Governor or Tribal Chief Executive must submit the request within 5 days after the need for assistance becomes apparent. For Major Disaster Declarations, the Governor or Tribal Chief Executive should submit the request as soon as possible after completion of the Joint PDA. Information and forms for Presidential declaration requests are available at www.fema.gov/media-library/assets/documents/28122, and for Tribal governments specifically, www.fema.gov/tribal-declarations-pilot-guidance.

²¹ 44 C.F.R. §§ 206.35(a) and 206.36(a).

²² 44 C.F.R. § 206.33(d).

²³ 44 C.F.R. § 206.48(a).

capita impact is low, FEMA evaluates whether there are extraordinary concentrations of damage resulting in significantly high per capita impacts at the local government level.

To encourage hazard mitigation, FEMA considers whether State or local government mitigation measures taken prior to the incident likely reduced the damage impacts, especially if such mitigation averted damage that would have increased the estimated eligible cost above the per capita indicator.

Understanding that the effects of multiple disasters in a confined period of time can affect response and recovery capabilities, FEMA also evaluates the overall impacts of both Federal and State declarations that have occurred within the past 12 months and the extent to which the State has spent its own funds. If there were disasters prior to the 12-month period that still have substantial impacts on State or local governments, FEMA may also consider impacts from these disasters.

B. Tribal Governments

Tribal governments requesting a declaration have different declaration factors than State Governments. PA declaration factors for tribes include:

- Estimated cost of assistance (minimum damage amount of \$250,000)
- Insurance coverage
- Other Federal agency programs
- Hazard mitigation
- Recent multiple disasters (previous 24 months)
- Types and amounts of damage
- Economic impact of the damage to the community and government
- Tribal resources available for response and recovery
- Demographics of the impacted community
- Impact on community infrastructure
- Unique conditions that affect Tribal governments (e.g., remoteness, economy, cultural considerations)
- Other relevant information

Additional detail is provided in the [Tribal Declaration Pilot Guidance](#).²⁴

IV. Presidential Declaration

For FEMA to provide assistance, the President must declare that an emergency or major disaster exists. The declaration²⁵ establishes the:

- Type of incident
- Incident period
- Designated areas
- Types of assistance
- Federal cost share
- Federal Coordinating Officer (FCO)

²⁴ www.fema.gov/tribal-declarations-pilot-guidance.

²⁵ Each Presidential declaration is available at www.fema.gov/disaster.

A. Type of Incident

The declaration designates the type of incident (e.g., hurricane, tsunami, or earthquake). For Emergency Declarations, an incident is any instance that the President determines warrants supplemental emergency assistance to save lives and protect property and public health and safety, or to lessen or avert the threat of a catastrophe.²⁶ For Major Disaster Declarations, an incident is any natural catastrophe (including any hurricane, tornado, storm, high water, wind driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion.²⁷ Major Disaster Declarations may include a combination of incident types, such as storms and landslides.

B. Incident Period

The declaration designates the incident period. The incident period is the span of time during which the federally declared incident occurs.²⁸ This period varies in length, depending on the incident.

C. Designated Areas

The declaration designates which areas (e.g., county, parish, city, or Tribal Government) are eligible to receive Federal assistance.²⁹ FEMA may add additional areas after the initial designation. However, for FEMA to consider adding an additional area, the Governor or Governor's Authorized Representative (GAR)³⁰ or, for Tribal declarations, the Tribal Chief Executive or Tribal Authorized Representative (TAR) must request the addition within 30 days of the declaration date or the end of the incident period, whichever is later.³¹ FEMA may extend the deadline if the Governor, GAR, Tribal Chief Executive, or TAR submits a written time extension request within the 30-day deadline with justification of the inability to meet the deadline.³²

D. Types of Assistance

The declaration designates the types of Federal assistance authorized.³³ The President may authorize assistance to individuals, households, and State, Tribal, and local governments, and certain types of PNP organizations. FEMA provides assistance to individuals and households via its Individual Assistance (IA) programs. FEMA provides assistance to State, Tribal, and local governments and certain types of PNP organizations via its PA Program. The type of assistance authorized may vary among designated areas. FEMA may add additional types of assistance after the declaration. However, for FEMA to consider adding additional types of assistance, the Governor or GAR or, for Tribal declarations, the Tribal Chief Executive or TAR must request the assistance within 30 days of the declaration date or the end of the incident period, whichever is later.³⁴ FEMA may extend the deadline if the Governor, GAR, Tribal Chief Executive, or TAR

²⁷ Stafford Act § 102(2), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(a)(17).

²⁸ 44 C.F.R. § 206.32(f).

²⁹ 44 C.F.R. §§ 206.2(a)(6) and 206.40(b).

³⁰ 44 C.F.R. §§ 206.2(a)(13) and 206.41(d).

³¹ 44 C.F.R. § 206.40(c).

³² 44 C.F.R. § 206.40(d).

³³ 44 C.F.R. § 206.40(a).

³⁴ 44 C.F.R. § 206.40(c).

submits a written time extension request within the 30-day deadline with justification of the inability to meet the deadline.³⁵ Tribal governments may receive one type of assistance under a State declaration as a Subrecipient and another type of assistance under its own declaration as a Recipient, provided there is no duplication of benefits.

FEMA Regional Administrators (RAs)³⁶ have the authority to issue Fire Management Assistance Grant (FMAG) declarations for wildfires that threaten such destruction that would constitute a major disaster.³⁷ The FMAG Program is separate and distinct from the PA Program. FMAG declaration criteria, eligibility, and other program information are available at 44 C.F.R. Part 204, Fire Management Assistance Grant Program, and in FEMA's *Fire Management Assistance Grant Program Guide* (FEMA P-954).³⁸

Terminology

A project is a logical grouping of work required as a result of the declaration. The damage description, scope of work, and costs are documented on a Project Worksheet, which is the basis for PA funding. 44 C.F.R. § 206.201(k). FEMA uses the terms “**Project**” and “**Project Worksheet**” interchangeably throughout this document.

If significant damage occurs as a result of one or more FMAG fire incidents, the Governor or Tribal Chief Executive may subsequently request a Major Disaster Declaration for the fire incident(s). FEMA evaluates such requests based on damage and costs not covered under the FMAG Program, such as public infrastructure damage. If the President declares a Major Disaster and authorizes the PA Program, FEMA usually funds all costs related to those fire incidents under the PA Program for efficiency in administration of assistance and to avoid a duplication of benefits between programs.

E. Federal Cost Share

The assistance FEMA provides through its PA Program is subject to a cost share.³⁹ The cost share ensures local interest and involvement through financial participation. The Federal share is not less than 75 percent of the eligible costs.⁴⁰ FEMA may recommend an increase up to 90 percent if actual Federal obligations, excluding administrative costs, meet or exceed a qualifying threshold.⁴¹

For Emergency Work specifically, the Federal cost share may be increased in limited circumstances, and for limited periods of time, if warranted.⁴² See [Chapter 6:XIII, Increased Federal Cost Share for a Limited Timeframe](#), for details on how FEMA applies the increased Federal cost share.

The Applicant can only apply other Federal award funds toward the PA non-Federal cost share if the other Federal agency has specific statutory authority allowing its funds to be used to meet

³⁵ 44 C.F.R. § 206.40(d).

³⁶ 44 C.F.R. § 206.2(a)(21).

³⁸ www.fema.gov/media-library/assets/documents/92379.

³⁹ 44 C.F.R. § 206.203(b).

⁴⁰ Stafford Act §§ 403(b), 406(b), 407(d), and 503(a), 42 U.S.C. §§ 5170b, 5172, 5173, 5193; 44 C.F.R. §§ 206.47(a) and 206.65.

⁴¹ 44 C.F.R. § 206.47(b).

⁴² 44 C.F.R. § 206.47(d).

cost-share requirements.⁴³ For example, the U.S. Department of Housing and Urban Development's (HUD's) Community Development Block Grant (CDBG) program may be used for the non-Federal share on PA projects if certain requirements are met. FEMA applies the cost share at the Project Worksheet (PW) level. Therefore, any other agency's Federal funds must be applied at the PW level and may not be used across multiple PWs (with exception of Permanent Work Alternative Procedure projects as described in [Chapter 8:VIII, Capped Projects](#)). Further, if the Applicant uses funds from another Federal agency to meet the non-Federal share, it must meet all requirements of the other agency as well as all PA Program requirements. The Applicant cannot apply PA funds toward the non-Federal cost share of other Federal agency awards.

V. Recipient Administrative Requirements

When the Presidential declaration authorizes assistance to State, Tribal, and local governments and certain types of PNP organizations, FEMA implements the PA Program. The Recipient is responsible for completing an application for assistance and submitting required documents before FEMA can provide PA funding. This section describes the required documents. The Recipient may upload these documents into PA Grants Portal at the Event Level (see Chapter 3:I, *Public Assistance Web-based Systems*). If the document is related to multiple disasters, such as a Hazard Mitigation Plan, the Recipient should upload it to its Organizational Profile.

Recipient-Led Public Assistance Disasters

FEMA may approve a Recipient to manage PA disasters. Recipients may choose a scalable approach by performing only one or more of the following key functions: customer service, site inspections, and scoping and costing. The *State-Led Public Assistance Guide* provides guidance on the processes, resources, and capabilities required (www.fema.gov/media-library/assets/documents/136089).

A. FEMA-State/Tribe Agreement

After every declaration, the applicable State or Tribal Government enters into an agreement with FEMA regarding the understanding, commitments, and conditions under which FEMA provides assistance (FEMA-State/Tribe Agreement). FEMA and the Governor or Tribal Chief Executive must sign this agreement before FEMA provides assistance. If necessary, because of exigent circumstances, FEMA may authorize essential emergency services or housing assistance under the Individuals and Households Program (IHP) while the agreement is in process for signature.⁴⁴

B. Application for Federal Assistance

The declared State or Tribal Government must complete and submit Standard Form (SF) 424, Application for Federal Assistance, and SF-424D, Assurances for Construction Programs⁴⁵ before FEMA provides assistance. The SF-424 defines the period of performance (POP) for the PA disaster award (referred to as the prime award). The prime award POP begins on the first day of the incident period and initially extends four years from the declaration date.

⁴³ Stafford Act § 312, 42 U.S.C. § 5155.

⁴⁴ 44 C.F.R. § 206.44(a).

⁴⁵ www.grants.gov/web/grants/forms/sf-424-family.html.

C. Payment Management System

FEMA provides PA funding to Recipients via the U.S. Department of Health and Human Services (HHS) Payment Management System. Therefore, if a Tribal Government is a Recipient for the first time, it must submit a Payment Management System Access Form and a Direct Deposit Form (SF-1199A) to obtain a FEMA-specific account before FEMA can provide funding.⁴⁶

D. Administrative Plan

Recipients must have a FEMA-approved Administrative Plan that describes how it intends to administer the PA Program before FEMA provides PA funding for any project. At a minimum, the Administrative Plan must include:

- The agencies responsible for program administration;
- Identification of staffing functions, the source of staff to fill the functions, the management and oversight responsibilities of each function;
- Procedures for:
 - Notifying potential Applicants of the availability of the PA Program;
 - Conducting Applicant Briefings
 - Assisting FEMA in determining Applicant eligibility
 - Participating with FEMA in conducting PDAs
 - Participating with FEMA in establishing PA mitigation and insurance requirements
 - Processing appeals, time extension requests, and other project-related correspondence
 - Complying with Environmental and Historic Preservation (EHP) requirements
 - Complying with PA administrative requirements including, but not limited to, procurement, contracting, and closeout
 - Complying with audit requirements
 - Requesting reimbursement or advanced funds
 - Determining staffing and budgeting requirements for proper management of the PA Program

A Recipient must submit its Administrative Plan to FEMA on an annual basis and an amendment for each incident that occurs within the year if needed to meet current policy guidance or to address the specifics of the new incident. The Recipient must incorporate the approved Administrative Plan into its State or Tribal emergency plan.⁴⁷

E. Hazard Mitigation Plan

Hazard mitigation is most effective when implemented under a comprehensive, long-term mitigation plan. State, Tribal, and local governments engage in hazard mitigation planning to identify risks and vulnerabilities associated with natural disasters and develop long-term strategies for protecting people and property from future incidents. Recipients must have a FEMA-approved Hazard Mitigation Plan before FEMA can provide PA funding for any

⁴⁶ The Payment Management System Access Form and the SF-1199A are available at pms.psc.gov/.

⁴⁷ 44 C.F.R. § 206.207(b). A template for an administrative plan is available at www.fema.gov/media-library/assets/documents/31208.

Permanent Work.⁴⁸ The plan must show how the Recipient intends to reduce risks from natural hazards and must be updated every 5 years.

Tribal Governments must meet the requirements of 44 C.F.R. § 201.7, *Tribal Mitigation Plans*. States must meet the requirements of 44 C.F.R. § 201.4, *Standard State Mitigation Plans* or have an Enhanced Mitigation Plan that meets the requirements of 44 C.F.R. § 201.5, *Enhanced State Mitigation Plans*.⁴⁹

⁴⁸ 44 C.F.R. § 201.3(c)(1) and (e)(1).

⁴⁹ Additional information about the mitigation plan requirement is available at www.fema.gov/hazard-mitigation-planning.

CHAPTER 2: OPERATIONAL COORDINATION

FEMA leads implementation of Stafford Act authorities and coordination of Federal assistance to disaster impacted communities. FEMA's goal is to help communities recover by focusing on their desired goals and outcomes. FEMA refers to this as Outcome Driven Recovery. This is a problem-solving approach that promotes unity of effort among stakeholders to identify recovery needs, vision, and goals, and to resource holistic recovery solutions. It emphasizes the need for integration of all partners in recovery, appropriate and consistent coordination, and transparency to ensure that a community can set its own goals and priorities, identify strategies to access funding and other resources to meet its goals, and effectively implement projects. This chapter describes how Federal, State, and Tribal leadership coordinate during response and recovery operations to ensure successful outcomes.

FEMA conducts incident operations based on the national comprehensive, systematic approach set forth by the National Incident Management System (NIMS).⁵⁰ NIMS is designed to ensure that local jurisdictions retain command, control, and authority over response and recovery activities for their jurisdictional areas. It establishes consistent structure, concepts, principles, processes, and language at a national level enabling efficient coordination of emergency management operations across all levels of government.

The *National Response Framework* (NRF)⁵¹ and *National Disaster Recovery Framework* (NDRF)⁵² build upon NIMS by defining the core capabilities necessary for response and recovery and fostering a holistic, collaborative approach, emphasizing the need for the involvement of the whole community (individuals, families, households, communities, private and nonprofit sectors, faith-based organizations, and all levels of government). The NRF and NDRF detail Federal, State, Tribal, and local government roles and responsibilities during response and recovery operations.

Incident Command System

The Incident Command System (ICS) is a key component of NIMS and is the organizing principle for Federal response and recovery operations. Refer to the *Incident Management Handbook* for more information on how FEMA applies ICS.

Basic elements of ICS include:

- Establishes common terminology
- Allows organizational structures to be scalable based on the size, complexity, and needs of the operation.
- Establishes a common set of objectives to develop strategies, issue assignments, establish tactics, and document results.
- Utilizes a centralized, coordinated Incident Action Plan (IAP) to guide all activities and manage all resources including personnel, teams, equipment, supplies, and facilities.
- Promotes effective management by ensuring:
 - Unity-of-command;
 - Chain-of-command; and
 - Span-of-control.

⁵⁰ www.fema.gov/national-incident-management-system.

⁵¹ www.fema.gov/media-library/assets/documents/117791.

⁵² www.fema.gov/national-disaster-recovery-framework.

I. Operational Priorities

A. Community Lifelines

FEMA and other Emergency Management organizations use community lifelines to establish and track operational priorities during incident stabilization. Lifelines highlight priority areas and interdependencies, focus attention on actions being taken, communicate coordination efforts towards stabilization, and integrate information. The seven lifelines are:

- Safety and security
- Food, water, and sheltering
- Health and medical
- Energy (power and fuel)
- Communications
- Transportation
- Hazardous materials

Lifelines provide indispensable service to enable the continuous operation of critical business and government services. Analyzing impacts to each of the lifelines allows decision-makers to:

- Rapidly determine whether an incident is large or complex;
- Prioritize and focus response efforts to maintain or restore the most critical services and infrastructure;
- Ensure limited resources can go toward a common goal that requires involvement across the whole community; and
- Promote a response that fosters better integration and communication across the whole community since lifeline management transcends public and private sector boundaries.

B. Incident Action Plan

The Incident Action Plan (IAP) is a written plan defining the objectives for managing the overall incident and addressing the operational priorities. FEMA and the State/Tribe develop the IAP through a series of meetings which occur once during each Operational Period (O-Period). The O-Period is the timeframe designated to execute a specific set of actions. During the response phase, this is typically 12-24 hours and FEMA usually expands it to 48-96 hours or longer as the operation shifts into the recovery phase. The IAP is initially organized by lifeline stabilization priorities and shifts to recovery outcome priorities as the lifelines stabilize.

The IAP provides the following information:

- Work assignments delineated by division and group;

IAP Collaborative Meetings

A series of meetings are conducted throughout the IAP process to identify incident objectives and share situational awareness. The meetings include:

- Initial incident briefing
- Command and general staff meeting
- Operational tactics meeting
- Planning meeting
- Operations briefing

A meeting schedule (ICS Form 230) describes meeting locations and required attendees.

- Resources required to complete work assignments;
- Operational facilities and reporting locations for plan execution; and
- Organization charts, contact information, and medical, safety, and communications plans.

The PAGS ensures that PA Program work assignments, information, and contributions toward larger recovery outcomes are accurately reflected in the IAP. For additional information on the IAP process, see the *Incident Action Planning Guide*.⁵³

II. Response and Recovery Coordination

Federal, State, and Tribal government coordination begins with response during the pre-award phase and continues through the completion of recovery operations and closeout of the award. Response operations begin to transition to recovery when immediate threats to health and safety begin to stabilize. This timeframe varies by entity depending on the level of impact and response capabilities.

A. Response Coordination

FEMA operates 24-hour National and Regional Watch Centers that provide national and regional awareness on potential, developing, or ongoing situations that may require a coordinated Federal disaster response. When warranted, based on situational awareness provided by the Watch Centers, FEMA activates its National and Regional Response Coordination Centers (NRCC/RRCC). These coordination centers function as multi-agency coordination facilities to prepare for and respond to the immediate needs of an incident, as identified by the State or Tribal Government. The RA determines when to activate the RRCC. The FEMA Administrator may activate the NRCC when incidents cross regional borders, have broad geographic implications, or are nationally significant. The NRCC allocates and prioritizes national resource deployments and coordinates with the RRCC to provide additional support for immediate needs.

As described in the NRF various agencies that provide response capabilities are grouped into Emergency Support Functions (ESFs). During response, ESFs are a critical mechanism to coordinate functional capabilities and resources provided by Federal departments and agencies, along with certain private-sector and nongovernmental organizations. ESFs are activated selectively and may not be activated for all incidents. The NRF describes the composition and mission functions of each of the ESFs.⁵⁴

When FEMA activates the RRCC or NRCC, it also activates representatives from the appropriate ESFs to deploy to the RRCC or NRCC to support incident objectives consistent with the purpose and scope defined in the NRF annex for each of the ESFs. PA typically staffs a position in the RRCC or NRCC to support incident objectives related to debris removal and critical infrastructure (facilities that provide transportation, energy, communications, water, or emergency services). This position coordinates activities of ESFs 1 (Transportation), 3 (U.S. Army Corps of Engineers), 10 (U.S. Environmental Protection Agency), and 12 (Energy). FEMA's National Incident Support Manual (NISM) provides additional information on NRCC operations.⁵⁵

⁵³ *The Incident Action Planning Guide* is available at <https://www.fema.gov/media-library/assets/documents/25028>.

⁵⁴ The NRF is available at www.fema.gov/national-response-framework.

⁵⁵ The NISM is available at www.fema.gov/media-library/assets/documents/24921.

B. Recovery Coordination

FEMA's goal throughout the recovery phase is to assist communities and Applicants with achieving desired outcomes and building resilience. The National Preparedness Goal⁵⁶ identifies eight core capabilities that are critical for recovery. Various agencies that provide these recovery capabilities are grouped into the following six Recovery Support Functions (RSFs)⁵⁷:

Community Planning and Capacity Building; Economic Recovery; Health and Social Services; Housing; Infrastructure Systems; and Natural and Cultural Resources. As ESF activities subside, RSF activities ramp up and require continued information sharing and coordination.

RSFs support State, Tribal, and local area recovery efforts by coordinating among State and Federal agencies, nongovernmental and private organizations to problem-solve and improve access to needed resources. The NDRF further describes the composition and mission of each RSF.⁵⁸ Activation of each RSF depends on incident-specific recovery issues.

The Federal Interagency Operational Plan (FIOP)⁵⁹ describes how Federal recovery field leadership, RSFs, and related entities work in coordination with nongovernmental and private organizations to support State, Tribal, and local recovery efforts. It provides a flexible structure for disaster recovery leaders to address the specific needs of the disaster and enhance sustainability and resilience of communities in a unified and collaborative manner.

1. Field Operations

Prior to a declaration, FEMA may deploy a Regional or National Incident Management Assistance Team (IMAT) to provide additional situation awareness and manage Federal response operations from the field in the initial days or weeks after an incident.

Once the President issues an Emergency or Major Disaster Declaration, the Regional Watch Center or RRCC deploys key personnel to set up the initial field operations structure and assume primary responsibility for response coordination. At this point, primary responsibility for infrastructure-related tasks conducted at the RRCC are transitioned to the Infrastructure Branch Director (IBD) or Public Assistance Group Supervisor (PAGS).

Public Assistance Program Leadership

In large-scale disaster operations, the IBD is responsible for leading delivery of the PA Program and providing operational direction to FEMA PA staff and infrastructure-related ESFs. PAGS serve as deputies to the IBD. When ESFs are not activated, delivery of the PA Program is led by the PAGS. For simplicity, the PAPPG uses the term PAGS for functions that an IBD may also perform.

⁵⁶ www.fema.gov/media-library/assets/documents/25959.

⁵⁷ Recovery Support Functions are teams of Federal and national partners with a Coordinating Agency, primary and supporting agencies, and other organizations. The Coordinating Agency is usually the entity that can bring in resources to address needs, whereas the support agencies provide technical and subject matter expertise along with additional information. Additional information is available at www.fema.gov/recovery-support-functions.

⁵⁸ See Table 3 of The National Disaster Recovery Framework, which is available at <http://www.fema.gov/national-disaster-recovery-framework>.

⁵⁹ www.fema.gov/federal-interagency-operational-plans.

The declaration identifies the FCO.⁶⁰ The FCO works in partnership with the State Coordinating Officer (SCO)⁶¹ and Governor's Authorized Representative (or for Tribal declarations, the Tribal Coordinating Officer (TCO) and Tribal Authorized Representative) to coordinate Federal resources and disaster assistance programs.⁶² FEMA and the State or Tribal Government may initially operate at an Initial Operating Facility (IOF) until a facility is identified and established as a Joint Field Office (JFO). The IOF is usually at the State or Tribal Emergency Operations Center (EOC). The JFO is a temporary facility in proximity to the area affected by the incident that becomes the central location for coordination of response and recovery activities. Staff at the IOF transition to the JFO once it is established, typically several days to two weeks. FEMA's *Incident Management Handbook*⁶³ provides additional information on field operating structures and functional responsibilities.

Virtual Joint Field Office

Virtual JFOs allow for the management and coordination of response and recovery operations from a FEMA Regional Office. During select incidents, a Virtual JFO may be a preferred alternative to a conventional JFO for managing field operations.

C. Public Assistance Coordination and Planning

Primary responsibility for management and delivery of the PA Program in disaster operations rests with the PAGS. The PAGS coordinates with the Recipient to efficiently implement the PA Program. Additionally, the PAGS fosters collaboration and information sharing with other federal agencies (OFAs) and nongovernmental partners through participation in the RSFs and other operational task forces.

PA staff deliver the program from the JFO and receive project development and processing support from the designated Consolidated Resource Center (CRC). CRCs are permanent FEMA offices where subject matter experts and specialized resources provide support to all disaster operations. The PAGS coordinates with the CRC Director to provide situational awareness and ensure efficient, synchronized operations. CRC responsibilities include project scoping, costing, validation, and compliance reviews.

PA staff at the JFO are responsible for providing customer service to each Applicant, conducting site inspections, obtaining project information and documentation, determining eligibility, and awarding projects. PA staff at the JFO receive policy support from the respective FEMA regional office. When necessary, the FEMA regional office engages FEMA Headquarters on complex policy matters.

FEMA and the Recipient coordinate closely on various operational planning elements. FEMA uses both PDA and Recipient-provided information to determine the initial needs of the operation. Regional PA staff enter PDA information into PA Grants Manager to begin establishing the Disaster Operating Profile, which at minimum, includes:

- The type of peril that caused the damage
- Primary impacts from the incident

⁶⁰ Stafford Act §§ 302(a) and (d), 42 U.S.C. § 5143; 44 C.F.R. §§ 206.2(a)(11) and 206.41(a).

⁶¹ Stafford Act § 302(c), 42 U.S.C. § 5143; 44 C.F.R. §§ 206.2(a)(23) and 206.41(c).

⁶² Stafford Act § 302(b), 42 U.S.C. § 5143; 44 C.F.R. § 206.42.

- Estimated eligible damage by category of work
- Significant damage impacts
- Geographic considerations
- Projected number of Applicants by County
- Projected number of PNP organizations and Tribal Governments by County
- Projected number of PWs
- EHP concerns
- Mitigation opportunities
- State, Tribal or local capacity to develop PWs
- OFA areas of responsibility

The Disaster Operating Profile in conjunction with Recipient information enables the PAGS and Recipient to determine initial staffing and training requirements, organizational structure, and logistical needs. Additionally, it provides awareness on various operational aspects such as potential policy issues or the need for task forces or specialized personnel for specific types of infrastructure.

The PA Program is only one of many programs across various agencies that contribute to disaster recovery projects in communities. Various agencies require PA disaster impact information to focus their support appropriately and PA staff require assistance from other agencies to provide the best customer service possible to Applicants. Therefore, it is crucial for PA staff to foster partnerships and keep open lines of communication.

CHAPTER 3: APPLICANT COORDINATION AND ELIGIBILITY

FEMA and the Recipient work in partnership to administer the PA Program and provide customer service to each Applicant. The Recipient sets operational priorities for the disaster and each Applicant identifies its priorities. This chapter describes the PA activities that occur throughout Phase I of the PA Program delivery process, which includes the initial stages of Applicant coordination and Applicant eligibility determinations. Key milestones include conducting all Applicant Briefings, receiving and processing all Requests for Public Assistance (RPAs), conducting all Exploratory Calls, and completing all Recovery Scoping Meetings. This chapter defines RPA requirements for PNP organizations and PA policy on Applicant eligibility. It describes the web-based systems that FEMA, Recipients, and Applicants need to use for PA award processing, including submittal of information. This chapter also defines correspondence requirements and how FEMA documents its eligibility determinations.

I. Public Assistance Web-based Systems

FEMA uses web-based systems to provide transparency to all stakeholders throughout the PA Program delivery process. FEMA uses PA Grants Manager to review RPAs, develop and review all aspects of a PA project, track the status of PA project development, and receive information from Recipients and Applicants. Recipients and Applicants use PA Grants Portal to submit all documentation and information to FEMA, review all aspects of PA projects, and track the status of PA project development. PA Grants Manager and Grants Portal interface and are updated on an ongoing basis for continuous improvement.⁶⁴

Technical Assistance for PA Grants Manager and Grants Portal

FEMA provides technical assistance to individuals using PA Grants Manager and Grants Portal via a Help Line at 1-866-337-8448 and email correspondence at FEMA-PA-Grants@fema.dhs.gov.

The Applicant uploads all documentation that pertains to a specific damage item to the damage level. If it is specific to one project the Applicant uploads it to the Project Level. If the documentation is relevant to multiple projects, such as a labor or insurance policy, the Applicant uploads the information to its Applicant Profile. Once the Applicant has a user profile in PA Grants Portal, it can upload information to its Organizational Profile anytime regardless of whether it is impacted by a current disaster as this section is not disaster-specific. The Applicant should upload its insurance, labor, and procurement policies to the Organizational Profile whenever the documents are updated, it does not need to wait until a disaster declaration.⁶⁵ The Applicant should upload any documentation that pertains to a specific disaster, but not a specific project to its Applicant Profile.

⁶⁴ FEMA staff may submit change requests through the PA Change Control Tool at portalapps.fema.net/apps/ORR/NewPA/Pages/SubmitRequest-CCT-P3.aspx. Recipients and Applicants may request changes via email at FEMA-PA-Grants@fema.dhs.gov.

⁶⁵ PA Grants Portal user manuals are available in the resource tab in the portal.

II. Applicant Briefing

As soon as possible following the President's declaration, the Recipient conducts briefings for all potential Applicants (i.e., State, Tribal, and local government entities and PNPs).⁶⁶ The Recipient is responsible for notifying potential Applicants of the date, time, and location of the Applicant Briefing. FEMA attends the Applicant Briefing to support the Recipient. During these briefings, the Recipient provides high-level information regarding the PA Program, such as:

- Overview of the PA Program delivery process (e.g., PA Grants Portal, application procedures, damage inventory)
- Program deadlines
- General eligibility criteria
- Project funding
- Hazard mitigation
- Alternative Procedures
- Compliance requirements [procurement, EHP, and insurance]
- Administrative requirements, including documentation and recordkeeping

To obtain maximum benefit from the information presented at the briefing, potential Applicants should send representatives from its management, emergency response, public works, and finance department and designate a primary point of contact to interact with the Recipient and FEMA.

III. Request for Public Assistance

The RPA (FEMA Form 009-0-49)⁶⁷ is the form to apply for the PA Program. If a State, Tribal, or local government entity or PNP wishes to seek PA funding, it must first submit an RPA to FEMA, through the Recipient. FEMA accepts RPAs through PA Grants Portal. If a Tribal Government is its own Recipient, it submits its RPA directly to FEMA via PA Grants Portal. Prior to submitting RPAs to FEMA, the Recipient must review and approve each RPA and provide its assessment of the Applicant's risk of noncompliance as required by 2 C.F.R. § 200.331(b).

Given the necessity to collaborate with each Applicant early in the PA Program implementation process, FEMA's expectation is that the Recipient collect RPAs as soon as possible after the respective area is designated in the declaration. However, FEMA accepts RPAs up to 30-days from the date the respective area was designated.⁶⁸ FEMA may extend the deadline for submitting an RPA if the Recipient submits a request in writing with justification based on extenuating circumstances beyond the Applicant's or Recipient's control.⁶⁹

⁶⁶ 44 C.F.R. § 206.207(b)(1)(iii)(B).

⁶⁷ www.fema.gov/media-library/assets/documents/26103.

⁶⁸ 44 C.F.R. § 206.202(c).

⁶⁹ 44 C.F.R. § 206.202(f)(2).

Using the RPA, the Applicant provides general information about its organization, including physical location and point of contact. The RPA must indicate the Applicant's active Dun and Bradstreet (DUNS) number.⁷⁰

Only certain PNPs are eligible Applicants. Therefore, FEMA requires additional documentation and information with PNP RPAs to evaluate eligibility. PNP Applicants must also submit the PNP Facility Questionnaire (FEMA Form 009-0-121)⁷¹ or submit the required information in Grants Portal with all applicable documentation listed in [Chapter 3:VI.D.4, *Private Nonprofit Application Documentation Requirements*](#).

IV. Written Correspondence

Throughout this document, FEMA notes specific instances in which the Applicant must obtain FEMA approval. All requests for FEMA approval must be submitted in writing through the Recipient. The Recipient must forward the correspondence to FEMA with its recommendation. One exception is Request for Information (RFI) responses. When the Applicant submits a response to an RFI, it may submit the response simultaneously to the Recipient and FEMA for expediency. Unless otherwise noted, all deadlines are calculated based on calendar days. The RA has the authority to respond to all written correspondence unless otherwise noted. The RA usually delegates this authority to the FCO upon a Presidential declaration.⁷² The RA or FCO may further delegate authorities as appropriate. FEMA usually provides its response to the Recipient, which subsequently forwards FEMA's determination to the Applicant (in some instances FEMA may send correspondence simultaneously to the Recipient and the Applicant, such as with notifications of ineligibility determinations, appeal responses, and RFIs). See Figure 1, *Map of FEMA Regions*, for the geographical responsibilities of each FEMA Region.

⁷⁰ If the Applicant does not have an active DUNS number, it may request one at: www.dnb.com/get-a-duns-number.html.

⁷¹ www.fema.gov/media-library/assets/documents/26103.

⁷² 44 C.F.R. § 206.41(b).

Figure 1. Map of FEMA Regions

V. Eligibility Determinations

The four basic components of PA eligibility are:

- Applicant
- Facility
- Work
- Cost

FEMA refers to these components as the building blocks of an eligibility pyramid. FEMA evaluates each building block to determine eligibility, starting at the foundation (Applicant) and working up to cost at the top of the pyramid (see Figure 2, *Eligibility Pyramid*). There are two exceptions to the standard eligibility pyramid. For PNPs, FEMA must determine whether the PNP owns or operates a damaged facility that provides an eligible service in order to determine whether the Applicant is eligible (see [Chapter 3:VI.D, Private Nonprofit Organizations](#), for additional information and a pyramid specific to PNP eligibility). Secondly, for State, Tribal, and local government Applicants, evaluating facility eligibility is not a necessary step for most Emergency Work, as described in [Chapter 7, Emergency Work Eligibility](#).

Figure 2. Eligibility Pyramid

When the PAPPG uses the words “must” or “required” it is a legal requirement. The Applicant jeopardizes its PA funding if it does not comply with these requirements.

A. Requests for Information

FEMA may require additional information or documentation to evaluate eligibility. In these cases, FEMA requests the information or documentation by submitting an RFI. Responses to RFIs are due by the deadline specified in the RFI. FEMA usually requires responses within 15 days of the Applicant's receipt of the RFI. FEMA establishes the deadline based on the nature of the request and consideration of the type and volume of information or documentation requested. Therefore, the amount of time allowed may vary.

B. Notification of an Ineligibility Determination

The Program Delivery Task Force Leader (PDTFL) coordinates with the PAGS to address eligibility issues as projects are developed. The PAGS is responsible for ensuring eligibility determinations are accurate before obligating federal funds.

When determining that the Applicant, facility, work, or cost is ineligible, FEMA provides written notice via a Determination Memorandum or a letter that includes:

- Explanation of what assistance FEMA denied and, as applicable, the amount of assistance denied for each item;
- The basis for FEMA's denial, including the provisions of law, regulation, or policy that support the determination;
- A complete list of all documents reviewed (clearly titled for future reference); and
- Information regarding the Applicant's rights and procedures to appeal.

FEMA transmits the letter or Determination Memorandum simultaneously to the Recipient and Applicant via a method that confirms receipt.⁷³ This serves as the formal notification of FEMA's determination setting forth the Applicant's appeal rights.

The PDTFL is responsible for ensuring all information and documentation directly or indirectly considered in FEMA's eligibility determination in in PA Grants Manager. This may include, but is not limited to, PWs (all versions), notifications of eligibility determinations, supporting backup documentation, correspondence, photographs, technical reports, and other relevant information. FEMA considers this the Administrative Record.

C. Appeal Rights and Requirements

The Applicant may appeal any FEMA determination related to an application for, or the provision of, assistance under the PA Program.⁷⁴ This includes, but is not limited to, Applicant eligibility denials, nonconcurrence on eligible damage or scopes of work (SOWs), denial of time extensions, closeout determinations, and deobligations resulting from an audit.⁷⁵

Complex Eligibility Issues

For complex eligibility issues, the PAGS in coordination with the FCO and the Region consults the PA Policy and Regulations Branch at FEMA Headquarters.

When FEMA approves funding for an item with complex eligibility, it documents its decision-making in a DM.

⁷³ FEMA may transmit the document via any method that confirms receipt such as PA Grants Manager, certified or return receipt mail, or an email with read-receipt acknowledgement.

⁷⁴ Stafford Act § 423, 42 U.S.C. § 5189a; 44 C.F.R. § 206.206.

⁷⁵ FEMA does not consider appeals on Permanent Work Alternative Procedures Projects unless it is related to a cost adjustment made by FEMA after the Fixed-Cost Offer is accepted.

FEMA provides the Applicant with two opportunities to appeal a determination.

- The first appeal is to the RA.⁷⁶
- If the Applicant disagrees with the first appeal determination, it may submit a second appeal to the Assistant Administrator of the Recovery Directorate at FEMA Headquarters⁷⁷

At any point in the appeal process, the Applicant may withdraw its appeal by submitting a written request to the applicable FEMA office. FEMA sends a written acknowledgment to the Applicant.

All second appeal decisions represent the agency's final administrative decision on the matter.

1. Appeal Deadlines

The Applicant must submit a written appeal to the Recipient within 60 days of receiving FEMA's written notification of its determination (FEMA's eligibility determination or first appeal decision).⁷⁸ The Recipient must forward the appeal with its written recommendation to FEMA within 60 days of its receipt of the appeal.⁷⁹ If either the Applicant or Recipient does not meet the respective 60-day deadlines, FEMA will deny the appeal as untimely.

2. Appeal Content

The Applicant must include:

- ☐ All relevant documentation supporting its position;
- ☐ The specific funding amount (or amounts if there are multiple issues on appeal) in dispute, as applicable; and
- ☐ Citations to the provisions of law, regulation, or policy applicable to the respective disaster that the Applicant believes supports its position.⁸⁰

3. Appeal Review

Upon receipt of the appeal, FEMA reviews the Administrative Record and analyzes the appeal using the laws, regulations, and policies applicable to the respective disaster. FEMA may request additional information to adequately adjudicate the appeal or it may make its decision based on the documentation and information provided at the time of appeal submission. Within 90 days of receiving the appeal, FEMA takes one of the following three actions:

- Requests additional information specifying the date FEMA must receive the information (usually 30 days). Within 90 days of receiving the information (or within 90 days of the expiration of the deadline to respond), FEMA provides its appeal decision to the Recipient and Applicant.⁸¹
- Submits the appeal to a subject matter expert for technical review and recommendations. Within 90 days of receiving the technical review recommendations, FEMA provides its appeal decision to the Recipient and Applicant.⁸²

⁷⁶ 44 C.F.R. § 206.206(b)(1).

⁷⁷ 44 C.F.R. § 206.206(b)(2).

⁷⁸ 44 C.F.R. § 206.206(c)(1).

⁷⁹ 44 C.F.R. § 206.206(c)(2).

⁸⁰ 44 C.F.R. § 206.206(a).

⁸¹ 44 C.F.R. § 206.206(c)(3).

⁸² 44 C.F.R. § 206.206(d).

- Provides its written decision to the Recipient and Applicant using a method that confirms receipt.⁸³

(a) *Requests for Information on Appeals*

When FEMA issues an RFI, it includes a deadline for the Applicant to submit the information, usually 30 days.⁸⁴ FEMA issues the RFI simultaneously to the Recipient and Applicant via a method that confirms receipt.

FEMA generally issues an RFI when:

- It identifies specific documentation or information that, if provided, might impact the outcome of the appeal or assist FEMA in adequately responding to the appeal; or
- The original eligibility determination is incorrect based on applicable law, regulation, or policy, but FEMA has identified a new basis for denying all, or a portion of, the appeal.

On first appeal, if FEMA identifies potentially ineligible SOW or costs that were not previously denied it issues an RFI that includes an explanation of the:

- New eligibility issue(s);
- Basis for the determination including an explanation of the applicable provisions of law, regulation, or policy justifying the decision;
- Amount of funding subject to denial and deobligation; and
- Specific information or documentation required to justify or further evaluate the eligibility issue(s).

FEMA proceeds with its review upon receipt of the Applicant's response to the RFI or expiration of the deadline to respond.

(b) *Remanding a Second Appeal*

When reviewing a second appeal, the Assistant Administrator of the Recovery Directorate at FEMA headquarters, or designee, may identify an issue that necessitates sending the appeal back to the RA. This should be reserved for cases when there is no other acceptable way to resolve the issue.

4. Appeals for Alternative Procedures Projects

FEMA does not consider appeals on Alternative Procedures Permanent Work Projects (see [Chapter 8:VIII, Capped Projects](#)) unless it is related to a cost adjustment made by FEMA after the Fixed-Cost Offer is accepted (i.e., related to insurance, noncompliance, or an audit). Any disagreement on damage, SOW, or cost must be resolved prior to accepting the fixed-cost offer. Additionally, time extension denials on Alternative Procedures Projects are not appealable.

D. Arbitration

Under certain circumstances, an Applicant that disputes a FEMA determination related to its PA application, including eligibility for assistance or repayment of assistance, have a right of

⁸³ FEMA may transmit notification via PA Grants Manager, certified or return receipt mail, email with read-receipt acknowledgement, or other methods that confirm receipt.

⁸⁴ FEMA establishes the deadline based on the nature of the request and consideration of the type and volume of information or documentation requested.

arbitration.⁸⁵ Additional information is provided in FEMA’s Fact Sheet *Public Assistance Appeals and Arbitration under the Disaster Recovery Reform Act* at www.fema.gov/media-library/assets/documents/175821.

VI. Applicant Eligibility

FEMA provides assistance to eligible Applicants, which are defined below.⁸⁶ As shown in Figure 3, *Applicant Eligibility*, FEMA must first determine whether the Applicant is eligible before evaluating the Applicant’s claim. FEMA and the Recipient review the RPA to determine whether the Applicant is eligible for assistance.⁸⁷ This section provides FEMA’s policy on Applicant eligibility.

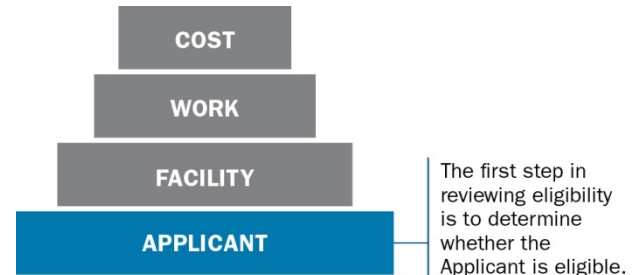

Figure 3. Applicant Eligibility

A. State Governments

State and Territorial governments, including the District of Columbia, American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Islands, are eligible Applicants. This includes any agency or instrumentality thereof, exclusive of local governments.⁸⁸ The State or Territorial government designates one of the agencies (usually the emergency management agency) as the Recipient. The Recipient serves as the pass-through entity to the other agencies, which are Subrecipients.

B. Tribal Governments

Federally recognized Indian Tribal Governments, including Alaska Native villages and organizations, are eligible Applicants. Alaska Native Corporations are ineligible as they are privately owned.⁸⁹

C. Local Governments

The following types of local governments are eligible Applicants:⁹⁰

- Counties and parishes
- Municipalities, cities, towns, boroughs, and townships
- Local public authorities
- School districts
- Intrastate districts
- Councils of governments (regardless of whether incorporated as nonprofit corporations under State law)
- Regional and interstate government entities

⁸⁵ Stafford Act § 423(d), 42 U.S.C. § 5189a, as amended by the Disaster Recovery Reform Act § 1219.

⁸⁶ 44 C.F.R. § 206.222.

⁸⁷ 44 C.F.R. § 206.207(b)(1)(iii)(C).

⁸⁸ Stafford Act § 102(4), 42 U.S.C. § 5122; 44 C.F.R. §§ 206.2(a)(22) and 206.222(a); and 2 C.F.R. § 200.90.

⁸⁹ Stafford Act § 102(6), 42 U.S.C. § 5122; 44 C.F.R. §§ 206.201(i) and 206.222(c); and 2 C.F.R. § 200.54.

⁹⁰ Stafford Act § 102(8), 42 U.S.C. § 5122; 44 C.F.R. §§ 206.2(a)(16) and 206.222(a); and 2 C.F.R. § 200.64.

- Agencies or instrumentalities of local governments
- State recognized Tribes
- Special districts established under State law
 - Community Development Districts are special districts that finance, plan, establish, acquire, construct or reconstruct, operate, and maintain systems, facilities, and basic infrastructure within their respective jurisdictions. To be eligible, a Community Development District must own and be legally responsible for maintenance, and operation of an eligible facility that is open to and serves the general public.⁹¹

The State or a political subdivision of the State may submit applications on behalf of rural communities, unincorporated towns or villages, and other public entities not listed above.⁹²

D. Private Nonprofit Organizations

Only certain PNPs are eligible Applicants. To be an eligible PNP Applicant, the PNP must show that it has:

- A ruling letter from the U.S. Internal Revenue Service that was in effect as of the declaration date and granted tax exemption under sections 501(c), (d), or (e) of the Internal Revenue Code; or
- Documentation from the State substantiating it is a non-revenue producing, nonprofit entity organized or doing business under State law.⁹³

Figure 4. PNP Eligibility

If the organization is not required to obtain 501(c)(3) status or tax-exempt status under applicable State law, the organization must provide articles of association, bylaws, or other documents indicating that it is an organized entity, and a certification that it is compliant with Internal Revenue Code section 501(c)(3) and State law requirements.

Additionally, as shown in Figure 4, *PNP Eligibility*, prior to determining whether the PNP is eligible, FEMA must first determine whether the PNP owns or operates an eligible facility.⁹⁴ For PNPs, an eligible facility is one that provides one of the services listed below (the declared incident must have damaged the facility):

- A facility that provides a critical service, which is defined as education, utility, emergency, or medical (see Table 1: *PNP Eligible Critical Services*);⁹⁵ or
- A facility that provides a noncritical, but essential social service AND provides those services to the general public (see Table 2: *PNP Eligible Noncritical, Essential Social*

⁹¹ Community Development Districts generally meet the requirement of serving the public based on the same criteria used for PNPs in [Chapter 3:VI.D, Private Nonprofit Organizations](#).

⁹² Stafford Act § 102(8)(c), 42 U.S.C. § 5122; 44 C.F.R. § 206.2(a)(16)(iii).

⁹³ 44 C.F.R. § 206.221(f).

⁹⁴ 44 C.F.R. § 206.222(b).

⁹⁵ Stafford Act § 406(a)(3)(B), 42 U.S.C. § 5172; 44 C.F.R. § 206.221(e).

Services).⁹⁶ PNP facilities generally meet the requirement of serving the general public if ALL of the following conditions are met⁹⁷:

- Facility use is not limited to any of the following:
 - A certain number of individuals;
 - A defined group of individuals who have a financial interest in the facility, such as a condominium association;
 - Certain classes of individuals; or
 - An unreasonably restrictive geographical area, such as a neighborhood within a community;
- Facility access is not prohibited with gates or other security systems; and
- Any membership fees meet all of the following criteria:
 - Are nominal;
 - Are waived when an individual can show inability to pay the fee;
 - Are not of such magnitude to preclude use by a significant portion of the community; and
 - Do not exceed what is appropriate based on other facilities used for similar services.
- Certain types of facilities, such as senior centers, that restrict access in a manner clearly related to the nature of the facility, are still considered to provide essential social services to the general public.⁹⁸

In cases where the facility provides multiple services, such as a community center, FEMA reviews additional items to determine the primary service that facility provides. Facilities established or primarily used for political, athletic, recreational, vocational, or academic training, conferences, or similar activities are ineligible (see Table 3: *PNP Ineligible Services*).

⁹⁶ 44 C.F.R. § 206.221(e)(7).

⁹⁷ FEMA also uses this criterion to determine whether a Community Development District serves the public.

⁹⁸ Per Stafford Act §§ 102(11)(B) and 406(a)(3)(C), 42 U.S.C. §§ 5122 and 5172, organizations operating houses of worship that limit leadership or membership to persons who share a religious faith or practice still provide essential social services to the general public.

All PNP Applicants
<ul style="list-style-type: none"> • A ruling letter from the Internal Revenue Service that was in effect on the declaration date and granted tax exemption under sections 501(c), (d), or (e) of the Internal Revenue Code; OR documentation from the State substantiating it is a non-revenue producing, nonprofit entity organized or doing business under State law. If exempt from both the requirement to apply for 501(c)(3) status and tax-exempt status under State law, the organization must provide articles of association, bylaws, or other documents indicating that it is an organized entity and a certification that it is compliant with Internal Revenue Code section 501(c)(3) and State law requirements. (required) • If the Applicant owns the damaged facility, proof of ownership (required) • If the Applicant owns the damaged facility, proof of ownership (required) • List of services provided in the damaged facility, when, and to whom (required)
Membership Organization
<ul style="list-style-type: none"> • Who is allowed membership (required) • What fees are charged (required) • Policy regarding waiving memberships (required)

⁹⁹ 44 C.F.R. § 206.221(e)(3).

Child Care Facility
<ul style="list-style-type: none"> • Proof that the State Department of Children and Family Services, Department of Human Services, or similar agency, recognizes it as a licensed child care facility (required)
Education
<ul style="list-style-type: none"> • Proof that the school is accredited or recognized by the State Department of Education (required) State regulations for private schools vary and some states do not require accreditation. A PNP school must demonstrate that it is recognized by the state as providing elementary or secondary education. Depending on state requirements, documentation may include, but is not limited to, the following (must have been in existence at the time of the incident): <ul style="list-style-type: none"> <input type="checkbox"/> Accreditation documents <input type="checkbox"/> Certification from the State Department of Education that the Applicant operated the facility as a PNP school at the time of the incident <input type="checkbox"/> Documentation demonstrating compliance with the State's compulsory attendance laws <input type="checkbox"/> School-year calendar <input type="checkbox"/> School budget <input type="checkbox"/> Complete list of students and teachers <input type="checkbox"/> Educational instruction property and equipment owned by the PNP <input type="checkbox"/> Tax records for the school <input type="checkbox"/> Documents reflecting school curriculum, transcripts, health and safety, disciplinary, or other records kept for students <input type="checkbox"/> Tuition receipts <input type="checkbox"/> Financial statements <input type="checkbox"/> Commencement documents <input type="checkbox"/> Inclusion in the U.S. Department of Education's National Center for Education Statistics Private School Universe Survey data¹⁰⁰ <input type="checkbox"/> State Department of Education electronic and paper homeschool declaration or registration forms
Mixed-Use Facility (See Chapter 4:II.B.1, Mixed-Use Facility)
<ul style="list-style-type: none"> • Proof of the established purpose of the facility with documentation (required), such as: <ul style="list-style-type: none"> <input type="checkbox"/> U.S. Internal Revenue Service documentation <input type="checkbox"/> Pre-disaster charter, bylaws, and amendments <input type="checkbox"/> Evidence of longstanding, routine (day-to-day) use (e.g., a calendar of activities)

Once FEMA approves the RPA, the PAGS in coordination with the PDTFL assigns a Program Delivery Manager (PDMG) to the Applicant (usually within 5 working days of RPA approval). The PDMG serves as the primary point of contact for the Applicant, providing customer service and programmatic guidance throughout the grants process.

VII. Exploratory Call

The PDMG conducts the Exploratory Call with the Applicant (usually within 7 working days of Applicant assignment). The Exploratory Call is a 30-minute introductory discussion conducted by the PDMG via a conference call. The PDMG reviews the Disaster Operating Profile and the Applicant Profile prior to the Exploratory Call. FEMA's objective for the call is to begin

¹⁰⁰ The Private School Universe Survey electronic search tool is available at nces.ed.gov/surveys/pss/privateschoolsearch/.

developing a relationship with the Applicant and prepare for the Recovery Scoping Meeting as follows:

- Understand the Applicant's disaster impacts by gathering information about the type and level of damage and priority needs for assistance
- Ensure the Applicant understands the general requirements for Damage Inventory, documentation, procurement, and EHP requirements
- Schedule the Recovery Scoping Meeting and define appropriate attendees

After the Exploratory Call and prior to the Recovery Scoping Meeting, the Applicant needs to begin preparing its Damage Inventory to formally claim damage. [Chapter 3:IX, Damage Inventory](#), provides details regarding the Damage Inventory. FEMA cannot initiate the project development process until damage items are entered in the Damage Inventory. Therefore, it is critical that the Applicant work with its PDMG to complete the Damage Inventory early in the process. This enables efficient and accurate project development.

VIII. Recovery Scoping Meeting

FEMA and the Recipient should conduct the Recovery Scoping Meeting within 21 working days of a PDMG being assigned to the Applicant.

While the Applicant Briefing is designed to address high-level information for all potential Applicants, the Recovery Scoping Meeting is designed to address the specific needs of each eligible Applicant. At the Recovery Scoping Meeting, FEMA, the Recipient, and the Applicant review and refine the Damage Inventory and discuss:

- PA delivery process
- Details of the Applicant's impacts from the incident
- Hazard mitigation opportunities
- Eligibility criteria for facilities, work and costs
- Logical grouping of damage
- Procurement requirements
- Insurance requirements
- EHP compliance requirements
- Documentation requirements
- Interagency Recovery Coordination
- Deadlines
- Appeal process

The Applicant should ensure staff with knowledge of the incident-related damage, emergency activities performed, and related costs attend the meeting (e.g., public works official, finance staff, risk manager).

Additionally, the Applicant and PDMG develop the Program Development Plan, which is a 45-60 day plan that includes a schedule of key steps to complete the project development process. FEMA uses the Project Development Plan to track project progress. In creating the plan, the PDMG and Applicant discuss:

- Weekly Applicant Status Meeting schedule

- Site inspection schedule
- Applicant's role in approving the Damage Descriptions and Dimensions
- Timeline to gather and submit documentation
- Timeline for the Applicant or FEMA to develop SOWs and cost estimates for projects

IX. Damage Inventory

The Applicant is required to identify and report all of its disaster-related damage, including Emergency Work activities and debris quantities, to FEMA within 60 days of the Recovery Scoping Meeting.¹⁰¹ FEMA may extend the deadline to identify and report damage if the Recipient submits a request with justification based on extenuating circumstances beyond the Recipient's or Applicant's control.¹⁰² For example, if a site is inaccessible, FEMA may extend the deadline for that site.

The Damage Inventory is a list of all Emergency Work and facility damage that the Applicant is claiming for PA funding. The Applicant creates the Damage Inventory by listing all disaster-related Emergency Work by location and each individual facility that sustained damage, to what extent, and a rough guess of the associated cost. It is not intended to obtain damage details or a list of all damaged components within a facility or a final estimate of costs. FEMA needs the information as soon as possible to assist Applicants expeditiously. Additionally, FEMA uses this information to help ensure it has the appropriate number and type of resources to assist Applicants.

Any work or damage that the Applicant needs to track separately for fiscal management purposes needs to be listed as a separate damage line item (e.g., the Applicant may need to track the amount of approved PA funding by department). Additionally, each of the following need to be listed as a separate damage line item:

- Debris removal activities on public property (Category A)
- Private property debris removal (Category A)
- Private property demolition (Category B)
- Debris clearance for emergency access (Category B)
- Emergency Protective Measures (Category B)
- Emergency Work Donated Resources (Category B)
- Each individual damaged facility requiring emergency repairs (Category B)
- Each individual damaged facility requiring temporary relocation (Category B)
- Each individual damaged facility (e.g., building, culvert, bridge) requiring permanent repairs inclusive of all facility components (Categories C-G)
- Facilities such as roads or power lines, which span or are located across an exceptionally large geographical area, should be separated into individual damage items based on geographical districts or areas (usually Category C or F)
- List of damaged contents and supplies in each facility (Category E)

¹⁰¹ 44 C.F.R. § 206.202 (d)(1)(ii).

¹⁰² 44 C.F.R. § 206.202 (f)(2).

- List of damaged equipment (items powered by fuel or attached to an item powered by fuel) at each facility or site (Category E)
- Management Costs (Category Z)

A. Damage Inventory Information

Each Damage Inventory line item should include the following:

- ☐ Category of work
- ☐ Unique Identifier (e.g., facility name and site) (required)
- ☐ Specific location of debris impacts or facility damage using either the address or geographical coordinates in latitude, longitude (decimal degrees) location (required)
- ☐ General description of damage, emergency protective measures, or approximate quantities of debris
- ☐ Cause of damage (e.g., wind or flood)
- ☐ Approximate cost (required)
- ☐ Percentage of work complete
- ☐ Type of labor used (or to be used) to conduct the work (e.g., employees, contract, etc.)
- ☐ Whether the project is high priority
- ☐ A map of the Applicant's jurisdiction showing all impacted sites, if available

CHAPTER 4: GENERAL WORK AND FACILITY ELIGIBILITY

This chapter provides the general requirements for work to be eligible and provides PA policy on facility eligibility.

I. General Work Eligibility

Through the PA Program, FEMA provides grant funding for:

- Emergency protective measures and debris removal (Emergency Work)
- Permanent restoration of damaged facilities, including cost-effective hazard mitigation to protect the facilities from future damage (Permanent Work)

If an entity does not comply with all applicable statutes, EOs, regulations, and policies, FEMA may take one of several actions including disallowing all or part of the cost of the project not in compliance.¹⁰³

A. Categories of Work

To facilitate the processing of PA funding, FEMA separates Emergency Work into two categories and Permanent Work into five categories based on general types of facilities. These categories are shown in Figure 5, *Categories of Work*.

B. Minimum Work Eligibility Criteria

At a minimum, work must meet each of the following three general criteria to be eligible:

- Be required as a result of the declared incident;
- Be located within the designated area; and
- Be the legal responsibility of an eligible Applicant.¹⁰⁴

Emergency Work	Permanent Work
Address an immediate threat: A Debris removal B Emergency protective measures	Restoration of: C Roads/bridges D Water control facilities E Buildings/equipment F Utilities G Parks, recreational, and other facilities

Figure 5. Categories of Work

Work eligibility is discussed in detail in

Chapters [7, *Emergency Work Eligibility*](#) and [8, *Permanent Work Eligibility*](#).

1. Result of Declared Incident

The Applicant is responsible for showing that work is required:

- Due to an immediate threat resulting from the declared incident (Emergency Work); or
- To address damage caused by the declared incident (Permanent Work, temporary repairs, and mold remediation).

¹⁰³ 2 C.F.R. § 200.338.

¹⁰⁴ 44 C.F.R. § 206.223(a).

The Applicant must demonstrate that the debris causing an immediate threat was generated during the declared incident period and directly by the declared incident.

The Applicant must demonstrate that damage was caused directly by the declared incident. FEMA does not provide PA funding for repair of damage caused by:

- Deterioration
- Deferred maintenance
- The Applicant's failure to take measures to protect a facility from further damage
- Negligence¹⁰⁵

When necessary to validate damage, the Applicant may be required to provide:

- ☐ Pre-incident photographs of the impacted site or facility, or
- ☐ Documentation supporting pre-disaster condition of the facility (e.g., facility maintenance records, inspection/safety reports).

If a facility was functioning prior to the disaster and the disaster caused damage that rendered the facility non-functional, the facility may be eligible provided the pre-disaster condition was not a significant contributing factor in the cause of failure.

2. Within Designated Area

To be eligible, the facility must be located, and work must be performed, in the designated area defined in the declaration [except for sheltering, evacuation, and EOC activities]. The sheltering, evacuation and EOC activities must be used for a declared area.¹⁰⁶ Emergency Work or Permanent Work performed on a facility located outside of the designated area is ineligible. This is true even if an eligible Applicant is legally responsible for the work, including work performed outside the designated area to protect a facility within the designated area.

Tribal Governments do not always have geographical boundaries, and some have boundaries that cross State lines. Therefore, declarations do not usually define specific designated geographical areas for Tribal Governments. For Tribal Governments, FEMA determines eligibility based on legal responsibility and whether the work is directly related to the declared incident.

3. Legal Responsibility

To be eligible, work must be the legal responsibility of the Applicant requesting assistance.¹⁰⁷

To determine legal responsibility for Emergency Work, FEMA evaluates whether the Applicant requesting the assistance either had jurisdiction over the area or the legal authority to conduct the work related to the request at the time of the incident.

To determine legal responsibility for facility restoration, FEMA evaluates whether the Applicant claiming the costs had legal responsibility for disaster-related restoration of the facility at the time of the incident based on ownership and the terms of any written agreements (such as for facilities under construction, leased facilities, and facilities owned by a Federal agency).

¹⁰⁵ 44 C.F.R. § 206.223(e).

¹⁰⁶ 44 C.F.R. § 206.223(a)(2).

¹⁰⁷ 44 C.F.R. § 206.223(a)(3).

(a) *Documentation to Support Legal Responsibility*

- ☐ Deeds
- ☐ Titles
- ☐ Lease agreements (required for leased facilities)
- ☐ Contract (required for facilities under construction at the time of the incident)

(b) *Facility Ownership*

When the Applicant requests PA funding to restore a facility, it is the Applicant's responsibility to provide proof that it owns the facility. To determine ownership, FEMA may review deeds, title documents, and local government tax records.

Ownership of a facility is generally sufficient to establish the Applicant's legal responsibility to restore the facility, provided it is not under construction by a contractor or leased to another entity at the time of the incident.

(c) *Facilities under Construction*

If the facility is under construction by a contractor at the time of the incident, FEMA reviews the contract to determine whether the Applicant is legally responsible for the repair of damage caused by the incident.¹⁰⁸ At a minimum, FEMA evaluates the contract to determine if it:

- Identifies the contractor or owner as being responsible for disaster-related repairs;
- Requires a builder's risk policy for losses that occur while the contractor has control of the facility;
- Has a Force Majeure provision, which is a clause that relieves the contractor from responsibility for damage beyond its reasonable control, such as natural disasters (often referred to "acts of God") or acts of war; or
- Has a provision that identifies the point at which the contractor transfers legal responsibility for the facility, or portions of the facility, back to the owner.

(d) *Leased Facilities*

The Applicant may own a facility and lease it to a tenant, or the Applicant may lease a facility owned by another party. In either case, FEMA reviews the lease agreement to determine legal responsibility for repair of damage caused by the incident. If the lease does not specify either party as responsible, FEMA considers the owner of the facility legally responsible for the costs to restore the facility.

If the lease is between two eligible Applicants, FEMA provides PA funding to the Applicant legally responsible for the restoration.

(e) *Federal Facilities*

Facilities owned and maintained by Federal agencies are ineligible. However, if a Federal agency constructed a facility and formally designated the Applicant as the legally responsible entity for facility operation, maintenance, and repairs, then the facility is eligible. FEMA reviews the agreement between the Federal agency and the Applicant to confirm the legally responsible entity.

¹⁰⁸ Stafford Act § 406(e)(2), 42 U.S.C. § 5172.

(f) Jurisdiction over an Area

In general, the Applicant only has legal responsibility to conduct Emergency Work activities within its jurisdiction. If the Applicant conducts Emergency Work activities outside its jurisdiction, it must demonstrate its legal basis and responsibility to conduct those activities.

(g) Conducting Activities on Private Property

Work on private property is the legal responsibility of the property owner and generally ineligible for PA funding. In rare cases, FEMA may provide PA funding for specific, limited activities. In such cases, at a minimum, the Applicant must have legal authority to conduct the activity. To determine whether a State, Tribal, or local government has legal authority to conduct activities on private property, FEMA reviews the Applicant's legal basis and specific authority to conduct the activities. See [Chapter 7:I.F, Debris Removal from Private Property](#) and [7:II.C, Emergency Protective Measures on Private Property](#) for additional eligibility requirements.

(h) Work Under the Authority of Other Federal Agencies

OFA's have authority to conduct work that may overlap with FEMA's authority. FEMA's authority is broad and most OFA authorities are more specific than FEMA's authorities.

FEMA evaluates its authorities against OFA authorities. Some of the Factors that FEMA considers when evaluating whether an OFA has more specific authority are whether the OFA's authority is specifically and exclusively:

- Available for a particular type of facility, work, or activity;
- Applicable to a Presidential Declaration under the Stafford Act;
- Specific to an incident or type of incident; or
- Delineated under direction by Congress.

In such cases, FEMA does not provide assistance for the facilities or work even if that OFA does not provide funding for the facility or work.¹⁰⁹ This restriction includes any activities or costs related to the work that falls under OFA authorities as the costs are not related to eligible work. The Applicant should apply to the respective agency for assistance with a facility or work under that agency's authority.

C. Environmental and Historic Preservation Requirements

Several statutes, EOs, and regulations establish requirements to protect the environment and preserve the Nation's historic and archaeological resources. FEMA reviews each PA project to ensure the work complies with applicable Federal EHP laws and implementing regulations, and applicable EOs.¹¹⁰ The Applicant is responsible for complying with applicable Federal, State, or Tribal EHP laws even if FEMA is not providing PA funding for all of the work. See [Appendix A: Environmental and Historic Preservation Compliance](#) for a description of frequently encountered EHP statutes, EOs, and regulations.

FEMA provides technical support to Applicants throughout the recovery process to help ensure compliance with all EHP laws, regulations, and EOs, as well as to identify opportunities to

¹⁰⁹ 44 C.F.R. § 206.226(a).

¹¹⁰ 2 C.F.R. § 200.300.

incorporate conservation measures in the project area for the protection and preservation of environmental or historic resources.

II. Facility Eligibility

In general, a facility must be determined eligible for work to be eligible. There are exceptions for some emergency work activities as shown in Figure 6, *Facility Eligibility*, and discussed in [Chapter 7, Emergency Work Eligibility](#).

A facility is a building, system, or equipment, built or manufactured, or an improved and maintained natural feature.¹¹¹

An example of a system that qualifies as a facility is a water distribution system. Mechanical, electrical, plumbing, and other systems that are components of a facility in which they operate are considered part of that facility.

For PNPs, the facility must be eligible in order for the work to be eligible.

For State, Territorial, Tribal, and local governments, the facility must be eligible in order for Permanent Work, temporary repairs, or mold remediation to be eligible. Facility eligibility is not applicable to other Emergency Work.

Figure 6. Facility Eligibility

A natural feature is improved and maintained if it meets all of the following conditions:

- The natural feature has a designed and constructed improvement to its natural characteristics, such as a terraced slope or realigned channel
- The constructed improvement enhances the function of the unimproved natural feature
- The Applicant maintains the improvement on a regular schedule to ensure that the improvement performs as designed

Only the section of a natural feature that meets the criteria above is eligible. For example, if only 150 linear feet of a natural channel bank is armored with rip rap and maintained, the eligible facility would be limited to that 150-linear-foot section.

The following are ineligible facilities:

- Unimproved property (e.g., a hillside or slope, forest, natural channel bank)
- Land used for agricultural purposes¹¹²

A. Public Facility

An eligible public facility is one that a State, Tribal, or local government owns or has legal responsibility for maintaining, including any:

- Flood control, navigation, irrigation, reclamation, public power, sewage treatment and collection, water supply and distribution, watershed development, or airport facility
- Non-Federal-aid street, road, or highway
- Other public building, structure, or system, including those used for educational, recreational, or cultural purposes

¹¹¹ 44 C.F.R. § 206.201(c).

¹¹² Ibid.

- Park¹¹³

When a facility maintained by a Community Development District is not open to the general public or does not provide a service to the general public, the facility is ineligible.

B. Private Nonprofit Facility

An eligible PNP facility is one that provides educational, utility, emergency, medical, or custodial care, including for senior citizens or individuals with disabilities, and other essential social-type services to the general public (further described in Tables 4: *PNP Eligible Critical Services*, and 5: *PNP Eligible Noncritical, Essential Social Services*).¹¹⁴

If a PNP operates multiple facilities, or a single facility composed of more than one building, FEMA must evaluate each building independently, even if all are located on the same grounds. Buildings that are part of a complex that includes outdoor facilities (e.g., swimming pools, athletic fields, or tennis courts) are not evaluated separately from the rest of the complex when determining eligibility of the building. For example, an outdoor pool usually has a building for bathrooms and controlling entry. In such cases, FEMA does not evaluate the building for eligibility separately because it is an intrinsic part of the pool complex.

See [Appendix B: Private Nonprofit Facility Eligibility Examples](#), for examples of PNP facilities and corresponding eligibility determinations.

1. Mixed-Use Facility

PNP facilities that provide both eligible and ineligible services are considered mixed-use facilities. Eligibility of mixed-use PNP facilities is dependent on the *primary* use of the facility, which is determined by the amount of physical space dedicated to eligible and ineligible services. “Primary use” is the use for which *more* than 50 percent of the physical space in the facility is dedicated. FEMA evaluates the entire structure when determining primary use; it does not separately address individual areas, such as floors, basements, or wings. Common space, such as bathrooms, hallways, lobbies, closets, stairways, and elevators, is not included when calculating mixed-use space.

If FEMA determines that 50 percent or more of physical space is dedicated to ineligible services, the entire facility is ineligible. If the facility is eligible, FEMA prorates Permanent Work funding based on the percentage of physical space dedicated to eligible services. Depending on the specifics of the scenario, FEMA either prorates Emergency Work funding or limits Emergency Work funding to what is eligible, necessary, and reasonable. The Applicant is responsible for the balance of costs to restore the facility and must restore the entire facility to receive funding for repairs to the eligible-use portions of the facility.

Eligible PNP irrigation and eligible PNP public broadcasting facilities are exempt from primary use requirements. However, in consideration of irrigation, FEMA will evaluate whether the facility was designed to provide eligible irrigation and whether it has ever been used for that purpose. If the facility was not designed for an eligible irrigation purpose, and has never been utilized for that purpose, it is not eligible.

¹¹³ Stafford Act § 102(10), 42 U.S.C. § 5122; 44 C.F.R. § 206.221(h).

¹¹⁴ Stafford Act § 102(11), 42 U.S.C. § 5122; 44 C.F.R. § 206.221(e).

(a) *Mixed-Use Space*

In cases where the same physical space is used for both eligible and ineligible services, the primary use is the use for which more than 50 percent of the operating time is dedicated in that shared physical space. If space is available for use, but the Applicant cannot support that it is used for eligible services for more than 50 of the percent of operating time, this criterion is not met.

If FEMA determines that 50 percent or more of the operating time in the shared physical space is dedicated to ineligible services, then FEMA does not include that physical space when evaluating primary use.

(b) *Use by Multiple Entities*

In cases where a PNP Applicant shares use of a facility, it is only eligible if the facility is primarily owned by the PNP Applicant and meets the primary use requirement. FEMA prorates funding for these facilities based on the percentage of physical space that the Applicant owns and dedicates to eligible services. The following guidelines are used to determine the eligibility of such facilities:

- If the eligible PNP owns the entire facility and leases a portion of it to another entity, the facility is eligible provided that the PNP dedicates more than 50 percent of the facility for eligible services. If the PNP leases 50 percent or more of the facility to an ineligible Applicant, or for ineligible services, then the facility is ineligible.
- If the eligible PNP only owns a portion of the facility, it is eligible provided that the PNP owns more than 50 percent of the facility and dedicates more than 50 percent of physical space for eligible services.

2. Small Business Administration Loan Requirement

Following a Major Disaster Declaration, the U.S. Small Business Administration (SBA) can provide loans to individuals and businesses for facility restoration. For PNPs with facilities that provide noncritical, essential social services, FEMA only provides PA funding for eligible Permanent Work costs that an SBA loan will not cover for those facilities. Therefore, noncritical PNPs must also apply for a disaster loan from the SBA and receive a determination for facilities that:¹¹⁵

- Provide noncritical services, or
- Are mixed-use facilities and the eligible portion of the facility is used to provide services that are entirely noncritical.

If the PNP misses the SBA application deadline, including any SBA approved extension, the Permanent Work is ineligible for FEMA PA funding. If the PNP declines an SBA loan, PA funding is limited to the costs that the loan would not have otherwise covered. This applies even when the PNP cannot accept the terms of the loan, and SBA therefore denies the loan, which may occur when the entity does not meet a collateral requirement. Possible outcomes are shown in Figure 7, *SBA Loan Outcomes*.

¹¹⁵ Stafford Act § 406(a)(3)(A)(ii), 42 U.S.C. § 5172; 44 C.F.R. § 206.226(c). For online applications to SBA, The Applicant should visit the SBA website at disasterloan.sba.gov/ela/. For additional assistance with the application process, the Applicant should contact the SBA Disaster Customer Service Center at 1-800-659-2955.

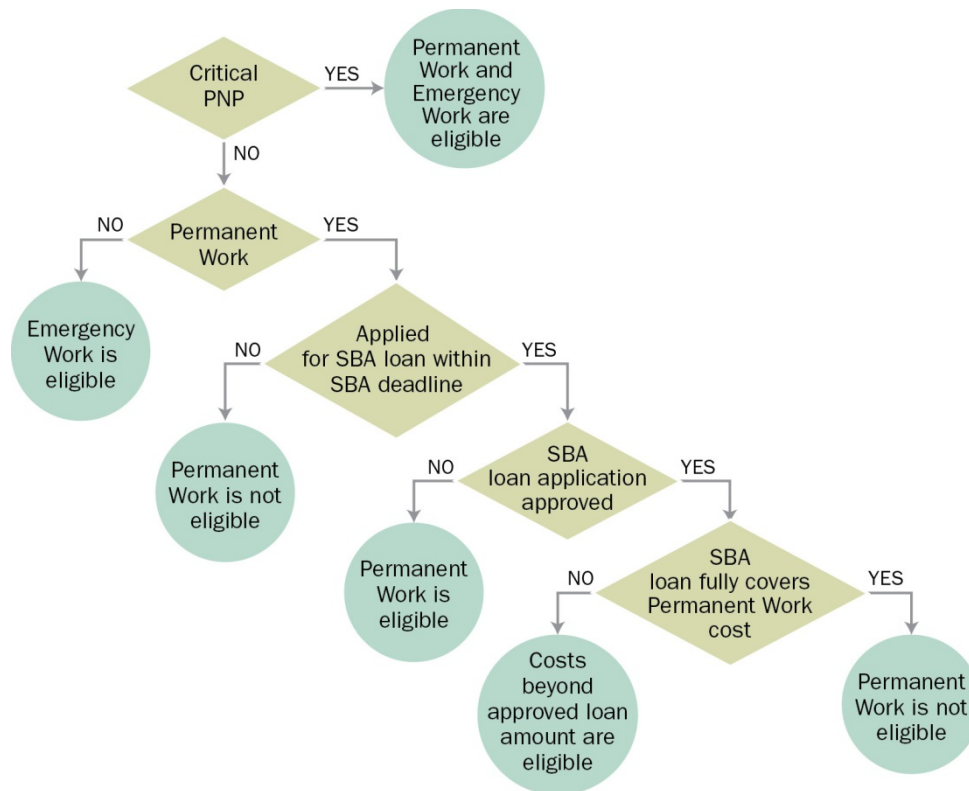

Figure 7. SBA Loan Outcomes

PNPs do not need to apply for a disaster loan from the SBA for facilities that:

- Provide critical services, or
- Are mixed-use and the eligible portion is either entirely or partially used to provide critical services.

C. Inactive or Partially Inactive Facility

To be eligible, a facility must have been in active use at the start of the incident period. Inactive facilities are ineligible, unless one of the following conditions is met:

- The facility was only temporarily inactive for repairs or remodeling (provided a contractor is not responsible for repair of disaster-related damage);
- The Applicant firmly established future active use in an approved budget; or
- The Applicant can clearly demonstrate its intent to begin use within a reasonable amount of time.¹¹⁶

The above criteria also apply to facilities that are partially inactive at the start of the incident period. Inactive portions are ineligible unless one of the exceptions noted above applies.

When eligible repairs benefit an area that was not in active use, FEMA prorates funding based on the percentage of the facility that was in active use. For example, if the roof of a partially used

¹¹⁶ 44 C.F.R. § 206.226(k)(2).

building is destroyed, FEMA limits the eligible cost to a prorated amount of the total cost to replace the roof based on the percentage of the building that was in active use.

For PNP mixed-use facilities to be eligible, more than 50 percent of the facility had to be in active use for an eligible purpose at the time of the incident.

D. Facility Scheduled for Repair or Replacement

Facilities that are not yet under contract but are scheduled for repair or replacement using non-Federal funds are eligible provided that the claimed damage did not exist prior to the incident (FEMA may review procurement and contract documents to validate). If damage existed prior to the incident, only the repair of damage caused by the incident is eligible.

A facility scheduled for replacement within 12 months of the start of the incident period using Federal funds is ineligible. In such a case, the Applicant should coordinate with the agency funding the project to expedite replacement, if possible.

CHAPTER 5: DAMAGE DESCRIPTION DEVELOPMENT

This chapter provides information on Phase II, Damage Description Development, which includes logically grouping damage line items from the Damage Inventory into PWs;¹¹⁷ conducting site inspections to develop a detailed description of the disaster-related damage and dimensions; and collecting project information and documentation.

I. Grouping Damage into Projects

The PDMG, in coordination with the Applicant and PDTFL, groups the damage line items into projects. This section defines logical grouping of work and damage.¹¹⁸

The PDMG works with the Applicant and PDTFL to identify sites and facilities that can be combined into one project. This is a two-step process: 1) Create groups based on categories of work and facility types as described in sections I.A. and I.B. 2) Identify sites or facilities that should be formulated into separate projects.

A. Standard Project Grouping

Before grouping damage, the PDMG must remove any damaged sites or facilities that are under the authority of another Federal agency and issue a written determination, if applicable.

1. Emergency Work Grouping

The bullets below identify emergency work that needs to be grouped into the same project (each bullet stands for one project).

- All debris removal from public property (Category A)
- All private property debris removal (Category A)
- All private property demolition (Category B)
- All emergency protective measures (except those conducted on private property) (Category B)
- Any emergency protective measures performed on private property (Category B)
- All emergency repairs (Category B)
- Each individual temporary facility (Category B)
- All donated resources for Emergency Work (Category B)

2. Permanent Work Grouping

The bullets below identify damaged facilities that needs to be grouped into the same project (each bullet stands for one project). The list is based on infrastructure categories.

Transportation:

- All roads, bridges, low water crossings, and culverts (Category C)
- All mass transit facilities such as subways and railways (Category G)

¹¹⁷ 44 C.F.R. § 206.201(l).

¹¹⁸ 44 C.F.R. § 206.201(k).

- All airports (Category G)
- All ports and harbors (Category G)

Dams and Flood Control:

- All dams and reservoirs (Category D)
- All canals, drainage channels, and aqueducts (Category D)
- All stormwater retention and detention basins (Category D)
- All coastal shoreline protection facilities (levees, berms, seawalls, sand revetments, etc.). (Category D)

Education:

- All school campuses (Category E)

Housing:

- All public housing campuses (Category E)

Health:

- All hospital campuses (Category E)

Emergency Service Facilities:

- All police, fire, emergency operation centers, prisons, etc. (Category E).

Other Government Facilities:

- All courthouses, administrative buildings, and other non-emergency buildings (Category E).

Energy:

- All power generation facilities and plants - Include all wind turbines, generators, substations, and other facilities within the confines of the plant. (Category F)
- Entire power transmission and distribution system (Category F)
- Entire natural gas transmission and distribution system (Category F)

Water/Waste-water:

- All water and wastewater treatment plants (Category F)
- Entire water distribution system (Category F)
- Entire wastewater collection system (Category F)
- Entire irrigation system (Category F)

Communications/Information Technology:

- All communication systems (Category F)

Natural and Cultural Resources:

- All parks, golf courses, and fish hatcheries (Category G)
- All beaches (Category G)
- All cemeteries (Category G)

Any ancillary (support) facilities need to be included in the same project as the primary facility. Ancillary facilities may include but are not limited to: buildings, outside structures (e.g. maintenance and storage sheds, restroom facilities, bath houses, pumping stations, etc.), communication towers and antennas, contents, supplies, equipment, vehicles, fences, parking lots, stairs, ramps, access roads, runways, signage, lighting, sidewalks, gutters, ditches, guard rails, integral ground, catch basins, outfall structures, piers, docks, trails, benches, picnic tables,

swimming pools, golf courses, ball fields, etc. Any donated resources for Permanent Work must also be included in the Permanent Work project.

B. Special Project Grouping

After initially grouping sites and facilities into one project, identify sites or facilities that should be formulated into separate projects. Sites or facilities that should be separated include those that:

- Are anticipated to require extensive EHP reviews. The PDMG works with EHP staff to identify these sites and facilities.
- Are in a Special Flood Hazard Area.
- Need Architectural/Engineering design funding prior to determining SOW and cost.
- Have 100% of the work completed.
- Are complex and require specialized technical support for project formulation, such as significantly damaged waste water treatment plants, dams, hospitals, or schools.
- Have ineligible work.
- Would make a project too unwieldy to review due to the number of sites and facilities combined (consider separating into two projects or creating separate projects based on geographical locations).
- The Applicant and PDTFL agree have specific circumstances that make it illogical to combine.

PNP Applicants should also separate critical service facilities into separate projects from noncritical service facilities so that projects with critical service facilities are not delayed pending the Small Business Administration determination described in [Chapter 4:II.B.2, *Small Business Administration Loan Requirement*](#).

II. Site Inspections and Obtaining Essential Elements of Information

FEMA gathers project-specific information by conducting site inspections and obtaining documentation. These activities occur concurrently.

A. Essential Elements of Information

FEMA requests information and documentation required to substantiate the eligibility of a project. The Applicant is responsible for providing this information and documentation to support that its facilities, work, and costs are eligible based on the applicable laws, regulations, EOs, and policies. At a minimum, FEMA usually requires the “who, what, when, where, why, and how much” for each item claimed. FEMA refers to this information as the essential elements of information (EEIs).

The PDMG or Applicant answers questions for each project, which trigger the EEIs that the Applicant needs to submit. Various documents may provide the information required; therefore, FEMA usually accepts a variety of documentation to substantiate eligibility. If FEMA requires specific information or documentation to support eligibility, FEMA specifies the requirement in checklists throughout the PAPPG; however, these checklists are not all-inclusive lists. FEMA and the Recipient work with the Applicant to evaluate submitted documentation and determine

whether it supports eligibility. If the Applicant does not provide sufficient documentation to support its claim as eligible, FEMA cannot provide PA funding for the work.

The Applicant receives a notification via PA Grants Portal to submit the requested EEIs. In response to the request, the Applicant uploads all documentation to the relevant level in PA Grants Portal as described in [Chapter 3:I, Public Assistance Web-based Systems](#).

B. Site Inspections

Damage information is the foundation of the overall project award (i.e., SOW and cost eligibility are tied to the eligible damage). Therefore, FEMA, the Recipient, and the Applicant need to reach agreement on the disaster-related damage description and dimensions, emergency protective measures, and debris impacts before proceeding with SOW development. If there are unresolved issues, FEMA documents the decision in a Determination memorandum. Applicants should still concur on the portion of the damage that is agreed-upon so that the process can move forward.

FEMA conducts inspections at sites with work to be completed. The purpose of the inspection is to validate, quantify, and document the cause, location, and details of the reported damage and debris impacts and identify EHP issues and project-related conservation opportunities and PA mitigation opportunities. To expedite the process, in lieu of FEMA inspections at all sites, the Applicant may submit damage information and documentation for FEMA to review and validate using a sampling methodology. FEMA works with the Applicant to determine when sampling and validation is appropriate. Sampling may not be appropriate for some damage sites.

CHAPTER 6: COST ELIGIBILITY

This chapter provides PA policy on cost eligibility. Although costs are the final component evaluated for eligibility, as shown in Figure 8, *Cost Eligibility*, this criterion applies to all costs claimed. Not all costs incurred as a result of the incident are eligible. To be eligible, costs must be:

- Directly tied to the performance of eligible work;
- Adequately documented;¹¹⁹
- Reduced by all applicable credits, such as insurance proceeds and salvage values;¹²⁰
- Authorized and not prohibited under Federal, State, Tribal, or local government laws or regulations;
- Consistent with the Applicant's internal policies, regulations, and procedures that apply uniformly to both Federal awards and other activities of the Applicant; and
- Necessary and reasonable to accomplish the work properly and efficiently.¹²¹

Figure 8. Cost Eligibility

I. Reasonable Costs

A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person under the circumstances prevailing at the time the Applicant makes the decision to incur the cost.¹²²

A. Analysis

In conducting a reasonable cost analysis, FEMA performs a preliminary review of the documentation to assess the complexity of the project and expertise required to complete the analysis. If specialized expertise is required, a subject matter expert with the appropriate specialized skills, knowledge, experience, or capability in the appropriate field such as engineering, architecture, or cost estimating conducts the analysis.

FEMA determines reasonableness by evaluating whether the:

- Cost is of a type generally recognized as ordinary and necessary for the type of facility or work.¹²³ FEMA evaluates the skill level and level of effort necessary to complete the required activity. If the type of employee or skill level is not appropriate for the specific task, FEMA limits PA funding to a rate based on the appropriate employee type or skill level. For complex projects, staff with a higher level of technical proficiency and experience may be appropriate.

¹¹⁹ 2 C.F.R. § 200.403(g).

¹²⁰ Stafford Act § 312, 42 U.S.C. § 5155, and 2 C.F.R. § 200.406.

¹²¹ 2 C.F.R. § 200.403.

¹²² 2 C.F.R. § 200.404.

¹²³ 2 C.F.R. § 200.404(a).

- Applicant participated in ethical business practices, ensuring parties to a transaction are independent of each other, without familial ties or shared interests and on equal footing without one party having control of the other.¹²⁴
- Individuals concerned acted with prudence under the circumstances considering their responsibility to the Applicant, its employees, its students or membership, the public, and the Federal Government.¹²⁵ If exigent or emergency circumstances existed, FEMA evaluates the length of time the circumstances existed compared to the length of time costs were incurred.
- Applicant deviated from its established practices and policies.¹²⁶ FEMA generally considers the Applicant's own labor, equipment, and supply costs reasonable provided the costs are consistent with the entity's policies including, but not limited to, pay rates, labor policies, and cost schedules utilized during its normal operations.
- Applicant complied with procurement requirements (see [Chapter 6:VIII, Procurement and Contracting Requirements](#)). FEMA generally considers contract costs reasonable when the Applicant adheres to full and open competition under applicable Federal procurement requirements, and the scope of services or work in the contract and level of effort is consistent with respect to the eligible SOW. FEMA evaluates reasonableness when price competition is lacking or when the selection was noncompliant with the applicable procurement under grant requirements even though there may have been price competition.
 - Cost or Price Analysis: The cost or price analysis is one component of documentation that FEMA may review as part of its evaluation of reasonable costs. If the Applicant does not submit a cost or price analysis, FEMA may evaluate the elements that would have been part of such analysis.¹²⁷ The Applicant may need to provide this information if it is not included in the documentation submitted.
 - Selection Criteria: FEMA evaluates whether the Applicant selected the lowest responsible bidder based on the selection criteria. If the Applicant selected a contractor with a higher bid than others, it must substantiate its selection based on the selection criteria set forth in its Request for Proposal.
- Cost is comparable to the current market price¹²⁸ for similar goods or services in the same geographical area. FEMA makes its determination based on one or more of the following:
 - Historical documentation (previous contracts, invoices, or other documentation)
 - FEMA may compare costs to the Applicant's historical costs for similar SOW or items. FEMA considers inflation and other factors such as code or standard changes, availability of in-kind construction material, quantity, delivery schedules, and the economy. FEMA's Cost Estimating Format (CEF) employs a nationally recognized economic inflation factor. Some types of work may have a different inflation rate than others.

¹²⁴ 2 C.F.R. § 200.404(b).

¹²⁵ 2 C.F.R. § 200.404(d).

¹²⁶ 2 C.F.R. § 200.404(e).

¹²⁷ FEMA's *Procurement Guidance for Recipients and Subrecipients Under 2 C.F.R. Part 200* provides information on how to conduct a cost or price analysis (www.fema.gov/media-library/assets/documents/96773).

¹²⁸ 2 C.F.R. § 200.404(c).

- Average costs in the area
 - Weighted average unit pricing: FEMA may determine the average costs in the area using weighted average unit prices. These are comprised of the average costs of historical bid tabulations and related specifications from competitive bid pricing solicitations respective to the area and usually includes all factors required to bid public works projects, such as performance bonds, bid bonds, overhead and profit, and general conditions. The Applicant or respective State or regional agency, such as the State's Department of Transportation may provide weighted average unit pricing and related specifications for FEMA's review.
 - Other Applicant's Project Costs: FEMA may compare the costs with other Applicant's projects of similar SOW and similar circumstances such as event impacts, magnitude, comparable shortages, market factors, and any other unique circumstances that may impact either of the costs.
- Published unit costs from national cost estimating databases. When using this method, FEMA confirms that the cost publication is current and prepares the estimate using its CEF and the appropriate locality adjustment factor.
 - Industry Cost Estimating Resources: When appropriate local data cannot be developed or obtained, FEMA uses industry standard construction cost estimating resources to prepare an estimate against which to evaluate reasonableness of the Applicant's actual costs. These costing methods include, but may not be limited to, RSMeans, BNi Costbooks, Marshall and Swift, and Sweet's Unit Cost Guide, which are widely accepted in the industry and available for nationwide use.
 - Federal or State Unit Costs: When industry standard construction cost estimating resources do not provide work items that are appropriate or applicable to the construction activities required to complete the project, FEMA considers local cost data from OFAs or State agencies responsible for construction of similar facilities in or near the locality.
 - FEMA Cost Codes: FEMA maintains regional and national unit prices (cost codes). FEMA cost codes may be used when a cost is not found in other published unit costs or if the cost codes are otherwise more applicable than other published costs, such as for force account equipment.
- Following factors or other extenuating circumstances existed and caused escalation in costs:
 - Shortages in equipment, materials, supplies, labor, or contractors. When escalating costs are due to shortages, FEMA considers whether the Applicant's work continued beyond the period of shortages and whether there was an opportunity for the Applicant to obtain more reasonable pricing.
 - Project-specific complexities: Complexities may include environmental or historic issues, remote access or location, provision of a unique service with few providers, or elements requiring an extraordinary level of effort.
 - Economy of Scale: FEMA considers the amount of work that may impact the unit price (for example, smaller projects may have higher rates and larger projects may have lower rates due to various efficiencies that are realized with larger projects. Additionally, when hauling is involved, such as with debris projects, some projects may have longer haul routes due to landfill locations or road blockages).

- Applicant's Justification: When a reasonable cost analysis has been conducted and costs appear high for a project, FEMA reviews the Applicant's justification to determine whether there are any additional factors that justify the higher cost as a reasonable amount.

The Applicant is responsible for providing documentation to demonstrate its claimed costs are reasonable. Documentation may include, but is not limited to:

- ☐ Documentation showing current market price for similar goods or services, such as:
 - Historical documentation;
 - Average costs in the area; or
 - Published unit costs from national cost estimating databases.
- ☐ Documentation supporting necessity of unique services or extraordinary level of effort
- ☐ Documentation supporting shortages, challenging procurement circumstances, and length of time shortages or procurement challenges existed, such as news stories or supply chain vendor reports

[Appendix L: Validation of Applicant-Provided Cost Estimates](#) includes a checklist that FEMA staff use when evaluating the reasonableness of costs claimed. After completing the evaluation by considering all relevant information and factors as described above, if FEMA determines any of the costs to be unreasonable based on its evaluation, FEMA may disallow all or part of the costs by adjusting eligible funding to an amount it determines to be reasonable. When determining the reasonable amount, FEMA may use the least-cost alternative, the lowest bid received by the Applicant, or the pricing of another Applicant's properly procured and selected contractor.

II. Applicant (Force Account) Labor

FEMA refers to the Applicant's personnel as "force account." FEMA reimburses force account labor based on actual hourly rates plus the cost of the employee's actual fringe benefits. FEMA calculates the fringe benefit cost based on a percentage of the hourly pay rate. Because certain items in a benefit package are not dependent on hours worked (e.g., health insurance), the percentage for overtime is usually different than the percentage for straight-time. Fringe benefits may include:

- Holiday leave
- Accrued vacation leave
- Sick leave
- Social security matching
- Medicare matching
- Unemployment insurance
- Workers compensation
- Retirement
- Health insurance
- Life and disability insurance
- Administrative leave

The Applicant needs to submit the following to support labor costs claimed (not an all-inclusive list):

- ☐ Summary of actual costs for completed work (required)
- ☐ For each individual:
 - Name (required)
 - Job title and function (required)
 - Type of employee (i.e., full-time exempt, full-time non-exempt, part-time, temporary, etc.) (required)
 - Days and hours worked (required)
 - Pay rates and fringe benefit rate (required)
 - Description of work performed (required) with representative sample of daily logs / activity reports, if available
- ☐ Timesheets (representative sample required when requested)
- ☐ Fringe benefit calculations (required)
- ☐ Pay policy (required)

A. Labor Policies

FEMA determines the eligibility of overtime, premium pay, and compensatory time costs based on the Applicant's pre-disaster written labor policy, provided the policy:

- Does not include a contingency clause that payment is subject to Federal funding;
- Is applied uniformly regardless of a Presidential declaration; and
- Has set non-discretionary criteria for when the Applicant activates various pay types.

If these requirements are not met, FEMA limits PA funding to the Applicant's non-discretionary, uniformly applied pay rates.

All costs must be reasonable and equitable for the type of work being performed.

FEMA determines whether the number of hours claimed are reasonable and necessary by evaluating:

- The severity of the incident;
- Whether the work was performed at a time when it was necessary to work extraordinary hours based on the circumstances of the incident;
- The function of the employee for which the hours are claimed; and
- The number of consecutive hours the employee worked.

B. Eligibility Criteria Based on Type of Employee and Work Performed

FEMA's criteria for reimbursing straight-time labor costs differ depending on the type of employee and whether that employee is performing Emergency Work or Permanent Work.

For Permanent Work, both straight-time and overtime labor costs are eligible for both budgeted and unbudgeted employees.¹²⁹ For Emergency Work, only overtime labor is eligible for budgeted employees.¹³⁰ For unbudgeted employees performing Emergency Work, both straight-time and overtime labor are eligible. Table 5: *Emergency Work Labor Eligibility*, indicates different types of budgeted and unbudgeted employees. Overtime is time worked beyond an employee's scheduled working hours as defined by the Applicant's pre-disaster pay policy.

Regular Time for Debris Removal Projects

- Alternative Procedures: Eligible
- Standard Program: Ineligible

Under the Alternative Procedures authorized by Section 428 of the Stafford Act, straight-time labor costs are eligible for budgeted employees conducting eligible debris removal (Category A) activities. FEMA's policy guidance on the Alternative Procedures for Debris Removal provides additional details.¹³¹

Table 5: Emergency Work Labor Eligibility

Emergency Work Labor Eligibility		
Budgeted Employees	Overtime	Straight-Time
Permanent employee	✓	
Part-time or seasonal employee working during normal hours or season of employment	✓	
Unbudgeted Employees	Overtime	Straight-Time
Essential employee called back from furlough	✓	✓
Reassigned employee funded from external source	✓	✓
Temporary employee hired to perform eligible work	✓	✓
Part-time or seasonal employee working outside normal hours or season of employment	✓	✓

1. Reassigned Employees

The Applicant may assign an employee to perform work that is not part of the employee's normal job. For example, a police officer may clear debris. FEMA provides PA funding based on the reassigned employee's normal pay rate, not the pay level appropriate to the work, because the Applicant's incurred cost is the employee's normal pay rate.

2. Reassigned Employees Funded from an External Source

Straight-time of a permanent employee funded from an external source (such as a grant from a Federal agency or statutorily dedicated funds) is eligible if the employee is reassigned to perform eligible Emergency Work that the external source does not fund. FEMA must confirm that no duplication of funding exists prior to approval.

3. Backfill Employees

The Applicant may need to temporarily replace an employee who is responding to the incident. Overtime costs for the backfill employee are eligible even if the backfill employee is not

¹²⁹ Stafford Act § 406(a)(2)(C), 42 U.S.C. § 5172; 44 C.F.R. § 206.228(a)(2)(i).

¹³⁰ 44 C.F.R. § 206.228(a)(2)(iii).

¹³¹ www.fema.gov/media-library/assets/documents/167472.

performing eligible work as long as the employee that he/she is replacing is performing eligible Emergency Work.

FEMA also provides PA funding for straight-time if the backfill employee is a:

- Contracted or temporary employee; or
- Permanent employee called in on a normally scheduled day off (weekend or other off day).

If the backfill employee is called in from scheduled leave, only overtime is eligible.

4. Essential Employees Called Back from Furlough

Straight-time of essential employees called back to work from a budget-related furlough due to the declared incident is eligible if the costs are not budgeted.

5. Supervisors

Second-level supervisors and above (e.g., commissioners, mayors, department directors, police and fire chiefs) are usually exempt employees¹³² and are not directly involved in the performance of a specific project. Therefore, overtime costs related to these types of employees are ineligible, unless the Applicant:

- Demonstrates that the employee was directly involved with a specific project;
- Normally charges that individual's time to specific projects regardless of Federal funding; and
- Incurs overtime costs for the employee in accordance with a labor policy that meets the criteria in [Chapter 6:II.A, Labor Policies](#).

6. Other

Extraordinary costs (such as call-back pay, night-time and weekend differential pay, and hazardous duty pay) for essential employees who are called back to duty during administrative leave to perform eligible Emergency Work are eligible if costs are paid in accordance with a labor policy that meets the criteria above.

Administrative leave or similar labor costs incurred for employees sent home or told not to report due to emergency conditions are ineligible.

7. Standby Time

FEMA may provide PA funding for labor costs related to intermittent standby time for staff conducting eligible evacuation or sheltering, search and rescue, or emergency medical care. All of the following criteria must be met:

- Standby use and pay are consistent with the Applicant's labor policy (or contractual obligation based on a labor agreement) and consistent with its practice in non-federally declared incidents,
- The standby time occurred when it was necessary to have resources available to conduct the respective life-saving action,

¹³² These employees are exempt from the overtime pay requirements set forth in the Fair Labor Standards Act.

- The number of hours and individuals were reasonable and necessary based on the number of resources required,
- The employee was conducting the respective life-saving action, and
- All other labor cost eligibility criteria were met.

Examples of when FEMA may reimburse labor costs for standby time include, but are not limited to:

- When bus drivers are prudently deployed to transport evacuees.
- When first responders are prudently deployed for the purpose of evacuating or providing emergency medical care to survivors in order to save lives.
- When a contract or union agreement requires payment for standby time.

Additionally, the Applicant may be required to pay firefighter costs from portal-to-portal, which may result in paying for 24-hour shifts with periods of rest. FEMA will reimburse costs based on such requirements. In these instances, FEMA limits its reimbursement to costs and timeframes that are reasonable and necessary, not to exceed 14 calendar days from the start of the incident period.

In addition to all other documentation required to support labor costs, the Applicant must provide the data that led to its decisions and actions.

Standby time is separate and distinct from pre-positioning resources, which is addressed in [Chapter 7:II.E, *Pre-positioning Resources*](#).

III. Applicant-Owned Equipment and Purchased Equipment

FEMA provides PA funding for the use of Applicant-owned (force account) equipment, including permanently mounted generators, based on hourly rates.¹³³ FEMA may provide PA funding based on mileage for vehicles, if the mileage is documented and is less costly than hourly rates.

There are instances when the Applicant does not have sufficient equipment to effectively respond to an incident. If the Applicant purchases equipment that it justifiably needs to respond effectively to the incident, FEMA provides PA funding for both the purchase price and either:

- The use of the equipment based on equipment rates (without the ownership and depreciation components); or
- The actual fuel and maintenance costs.

FEMA only applies equipment rates to the time the Applicant is actually operating equipment. Although costs associated with transporting equipment (e.g., labor and equipment costs used to transport equipment) to an eligible site are eligible, costs for standby time (time spent on hold or in reserve) are ineligible unless the equipment operator uses the equipment intermittently for more than half of the working hours for a given day. In this case the intermittent standby time is eligible.

¹³³ 44 C.F.R. § 206.228(a)(1).

The Applicant should submit the following to support Applicant owned or purchased equipment costs claimed (not an all-inclusive list):

For each piece of equipment:

- ☐ Type of equipment and attachments used, including year, make, and model (required)
- ☐ Size/capacity (e.g., horsepower, wattage) (required)
- ☐ Locations and days and hours used (required) should include usage logs
- ☐ Operator name (required when requested)
- ☐ Schedule of rates, including rate components (required if not using FEMA rates)

Purchased Equipment:

- ☐ Invoices, receipts (required)
- ☐ Locations and days and hours used (required)

FEMA provides PA funding for force account equipment usage based on FEMA, State, Tribal, or local equipment rates in accordance with the specific criteria noted below.

A. FEMA Rates

FEMA publishes equipment rates applicable on a national basis.¹³⁴ FEMA's rate schedule includes any item powered by fuel or attached to any item powered by fuel. FEMA develops equipment rates based on all costs associated with ownership and operation of equipment (except for operator labor). FEMA equipment rate components include depreciation, overhead, equipment overhaul (labor, parts, and supplies), maintenance (labor, parts, and supplies), lubrication, tires, ground engaging component (if applicable), and fuel. Because the rates include maintenance costs, a mechanic's labor costs to maintain Applicant-owned equipment are ineligible.

B. State or Tribal Rates

State or Tribal rates are those established under State or Tribal guidelines for use in normal day-to-day operations. FEMA provides PA funding based on State or Tribal rates up to \$75 per hour.¹³⁵ FEMA only provides PA funding for a rate above \$75 per hour if the Applicant demonstrates that each of the components of the rate is comparable to current market prices.¹³⁶

C. Local Rates

Local rates are those developed under local government guidelines for use in normal day-to-day operations. FEMA generally provides PA funding for equipment usage based on the lower of either the local rate or the FEMA rate. However, if the local rate is lower, but it does not reflect all of the costs associated with operating the equipment, FEMA may provide PA funding based

¹³⁴ www.fema.gov/schedule-equipment-rates.

¹³⁵ 44 C.F.R. § 206.228(a)(1)(i).

¹³⁶ Per 44 C.F.R. § 206.228(a)(1)(i), reimbursement of rates in excess of \$75 is determined on a case-by-case basis by FEMA. FEMA evaluates the rate for approval based on current market prices.

on the higher FEMA rate. Additionally, if the local rate is higher, the Applicant must document the basis for that rate and obtain approval from FEMA for the higher rate.¹³⁷

If determining the lowest rate for each piece of equipment is overly burdensome because of the number of different types of equipment used, or if the Applicant prefers, FEMA will reimburse all equipment use based on the lower of the two rate schedules, rather than based on a comparison of each individual rate. In these cases, the PA Division at FEMA Headquarters determines which schedule of rates is lower.

D. Equipment with No Established Rate

If the Applicant uses equipment that has no established State, Tribal, or local rate, FEMA reimburses that equipment based on the FEMA rate.¹³⁸ If FEMA does not have a rate established for the equipment, the Applicant may either submit a rate for approval or request that FEMA provide a rate. If the Applicant submits a rate, it must include documentation demonstrating that each component of the rate is comparable to current market prices. The rate cannot be based on rental rates as such rates include cost components, such as profit, that are above and beyond what is necessary to operate and maintain force account equipment.

IV. Leased Equipment

When the Applicant leases equipment, FEMA provides PA funding based on the terms of the lease. Leasing costs are eligible if:

- The Applicant performed an analysis of the cost of leasing versus purchasing the equipment;¹³⁹ and
- The total leasing costs do not exceed the cost of purchasing and maintaining equipment during the life of the eligible project.

If the leasing costs exceed the cost of purchasing and maintaining the equipment, FEMA determines the amount of eligible costs based on an evaluation of the reasonableness of the costs claimed, including whether the Applicant acted with prudence under the circumstances at the time it leased the equipment.

If the Applicant has a lease-purchase agreement and obtains ownership during completion of eligible work, FEMA provides PA funding for the equipment use based on the hourly equipment rate, as described in [Chapter 6:III, Applicant-Owned Equipment and Purchased Equipment](#).

If the Applicant has a lease-purchase agreement and completes the eligible work prior to obtaining ownership, FEMA provides PA funding based on the cost to lease the equipment.

The Applicant needs to submit the following to support leased equipment costs claimed (not an all-inclusive list):

- ☐ Lease agreements, invoices, receipts (required)
- ☐ Locations and days used (required)
- ☐ Hours used (required if lease agreement charges hourly rates)

¹³⁷ Ibid.

¹³⁸ 44 C.F.R. § 206.228(a)(1)(iii).

¹³⁹ 2 C.F.R. § 200.318(d).

- ☐ Amount of fuel used (required)

V. Supplies

The cost of supplies, including materials, is eligible if:

- Purchased and justifiably needed to effectively respond to and/or recover from the incident; or
- Taken from the Applicant's stock and used for the incident.

The Applicant needs to track items taken from stock with inventory withdrawal and usage records.

FEMA provides PA funding for these items based on invoices, if available. If invoices are not available for items used from stock, FEMA provides PA funding based on the Applicant's established method of pricing inventory.¹⁴⁰ If the Applicant does not have an established method, FEMA provides PA funding based on historical data or prices from area vendors.

FEMA consults with the U.S. Department of Homeland Security Office of Inspector General Emergency Management Oversight Team in cases where it has difficulty determining a reasonable value.

The Applicant needs to submit the following to support costs claimed for supplies (not an all-inclusive list):

Supplies from Stock:

- ☐ Cost documentation such as original invoices or other historical cost records
- ☐ Inventory records
- ☐ Type of supplies and quantities used (required), should include support documentation such as daily logs
- ☐ Location used(required)

Purchased Supplies:

- ☐ Receipts or invoices (required)
- ☐ Quantities used (required)
- ☐ Justification (required if requested)

¹⁴⁰ 2 C.F.R. § 200.453(b).

VI. Disposition of Purchased Equipment and Supplies

The discussion below describes disposition requirements when purchased equipment or supplies (including materials) are no longer needed for federally funded projects.

In the context of disposition, equipment is any tangible personal property (including information technology systems) having a useful life of more than 1 year and a per-unit acquisition cost that equals or exceeds the lesser of the capitalization level established by the Applicant for financial statement purposes, or \$5,000.¹⁴¹ Tangible personal property that does not fall under this definition of equipment is a supply.¹⁴²

Terminology

Personal property means property other than real property.

Real property means land, including land improvements, structures, and appurtenances thereto, but excludes moveable machinery and equipment.

A. Disposition of Purchased Equipment

In accordance with Federal regulations, State government Applicants dispose of equipment in accordance with State laws and procedures.¹⁴³

When equipment purchased with PA funding are no longer needed for response to or recovery from the incident, Tribal and local governments and PNP Applicants may use the items for other federally funded programs or projects.¹⁴⁴

When an individual item of equipment is no longer needed for federally funded programs or projects, Tribal and local governments and PNP Applicants must calculate the current fair market value of the individual item of equipment. The Applicant must provide the current fair market for items that have a current fair market value of \$5,000 or more. FEMA reduces eligible funding by this amount.¹⁴⁵ If the individual item of equipment has a current fair market value less than \$5,000, FEMA does not reduce the eligible funding.¹⁴⁶

Terminology

Fair market value is either the selling price or the advertised price for a similar item in a competitive market.

Tribal and local governments and PNP Applicants must comply with all disposition requirements described in 2 C.F.R. 200.313(e), *Disposition*.

B. Disposition of Purchased Supplies

When supplies are no longer needed for federally funded programs or projects, all Applicants, including State government Applicants, must calculate the current fair market value of any unused residual supplies (including materials) that FEMA funded for any of its projects and determine the aggregate total.

¹⁴¹ 2 C.F.R. § 200.33.

¹⁴² 2 C.F.R. § 200.94.

¹⁴³ 2 C.F.R. § 200.313(b).

¹⁴⁴ 2 C.F.R. § 200.313(c).

¹⁴⁵ 2 C.F.R. § 200.313(e)(2).

¹⁴⁶ 2 C.F.R. § 200.313(e)(1).

The Applicant must provide the current fair market value if the aggregate total of unused residual supplies is greater than \$5,000. FEMA reduces eligible funding by this amount.¹⁴⁷ If the aggregate total of unused residual supplies is less than \$5,000, FEMA does not reduce the eligible funding.

VII. Disposition of Real Property

If the Applicant acquires or improves real property with PA funds, disposition and reporting requirements apply.¹⁴⁸ The PA Division at FEMA Headquarters provides disposition instructions when acquired or improved real property is no longer needed for the originally authorized purpose.¹⁴⁹

VIII. Procurement and Contracting Requirements

FEMA provides PA funding for contract costs based on the terms of the contract if the Applicant meets Federal procurement and contracting requirements. Federal procurement and contracting requirements for State government agencies are different than those for Tribal and local government agencies and PNPs. This section provides information on Federal procurement and contracting requirements.

FEMA PA staff coordinate with FEMA's Office of Chief Counsel when evaluating whether the Applicant complied with Federal procurement requirements. In the case of noncompliance, FEMA applies an appropriate remedy in accordance with its authorities.¹⁵⁰ FEMA has determined an appropriate remedy under these circumstances is to either deny all costs associated with the contract or, if sufficient information is provided to substantiate a reasonable amount for the eligible work completed, FEMA may reimburse the portion of the costs it determines are reasonable and allowable based on all available information and documentation provided. In addition to monetary remedies, FEMA may also take non-monetary actions against the Applicant as authorized by 2 C.F.R. §§ 200.207 and 200.338.

FEMA's *Procurement Guidance for Recipients and Subrecipients Under 2 C.F.R. Part 200 (Uniform Rules)* provides additional details regarding Federal procurement and contracting requirements.¹⁵¹

A. Procurement and Contracting Requirements for State Government Entities

Applicants must comply with Federal procurement requirements as a condition of receiving PA funding for contract costs for eligible work.

1. Procurement

State government Applicants¹⁵² must comply with Federal procurement procedures at 2 C.F.R. § 200.317, which include:

¹⁴⁷ 2 C.F.R. § 200.314(a).

¹⁴⁸ 2 C.F.R. §§ 200.311 and 200.329.

¹⁴⁹ 2 C.F.R. § 200.311(c). Recipients and Applicants must obtain specific disposition instructions from FEMA.

¹⁵⁰ 2 C.F.R. § 200.338.

¹⁵¹ www.fema.gov/media-library/assets/documents/96773.

¹⁵² See [Chapter 3:VI.A, State Governments](#) for a description of which Applicants are State government entities.

- Following the same policies and procedures they would use for procurements with non-Federal funds; and
- Complying with the Environmental Protection Agency (EPA) guidelines in 2 C.F.R. § 200.322, Procurement of recovered materials.

FEMA does not typically review State procurement policies or procedures. In certain circumstances, FEMA may request that a State attorney certify in writing whether the Applicant complied with the State's procurement policies and procedures.

2. Contracting

State government Applicants must include required provisions detailed in 2 C.F.R. § 200.326 in all contracts awarded.¹⁵³ Some provisions are based on sound contracting practices while others are required by Federal law, EO, and regulations. Some provisions do not apply under the PA Program (e.g. Davis Bacon Act¹⁵⁴ and Rights to Inventions Clause) while others require verbatim language.

Although time and material (T&M) contracts without a ceiling price and cost-plus-percentage-of-cost or percentage-of-construction contracts may be allowed under State government standards, the use of these contracts has a high risk of noncompliance with the requirement that all costs be reasonable.¹⁵⁵

When requested, the Applicant must provide a copy of the contract and any change orders.

B. Procurement and Contracting Requirements for Tribal and Local Government Agencies and Private Nonprofits

Tribal and local governments, including Tribal Recipients, and PNPs¹⁵⁶ must comply with:

- Their own documented procurement procedures;
- Applicable State, Tribal, and local government laws and regulations; and
- Applicable Federal laws and regulations.¹⁵⁷

If a Federal requirement is different than the State, Tribal, or local requirement, or the Applicant's own requirements, it must use the more restrictive requirement. Additionally, Territorial governments should consult their legal counsel when a project involves a public building or public works facility as the Buy American Act may apply to the procurement process.

1. Pre-procurement Considerations

Tribal and local governments and PNPs must:

¹⁵³ 2 C.F.R. § 200.326.

¹⁵⁴ The Davis Bacon Act requires "prevailing wage" payment to contracted workers based on the local union wage scale defined by the U.S. Department of Labor. If the Applicant incorporates prevailing wage rates as part of its normal practice for all contracts regardless of the funding source, then those rates are eligible.

¹⁵⁵ 2 C.F.R. § 200.403(a).

¹⁵⁶ See [Chapter 3:VI, Applicant Eligibility](#) for a description of which Applicants are Tribal or local governments or PNPs.

¹⁵⁷ 2 C.F.R. § 200.318(a).

- Establish or update written procurement procedures that reflect applicable State, Tribal, or local laws and regulations;¹⁵⁸ and
- Maintain required written standards of conduct covering conflicts of interest and governing the performance of employees who engage in the selection, award, and administration of contracts.¹⁵⁹

Tribal and local governments and PNPs should also create a prequalified list of responsible contractors identified to possess the qualifications and technical abilities to satisfy the Applicant's potential requirement.¹⁶⁰ Although not a contract, many entities have prequalified lists that serve as contract research.

A prequalified contractor is one that the Applicant evaluated and determined to be qualified to perform the work based on capabilities, such as technical and management skills, prior experience, past performance, and availability. A prequalified contractor is not entitled to a "standby" contract. The Applicant must still conduct full and open competition. The Applicant cannot exclude potential bidders or offerors from qualifying during the solicitation period, even if they were not on the prequalified list.

2. General Federal Procurement Requirements

Federal procurement requirements for Tribal and local governments and PNPs are found at 2 C.F.R. § 200.318 through 200.326. The requirements include, but are not limited to:

- Providing full and open competition¹⁶¹ (Tribal Government Applicants may provide preference to Indian organizations or Indian-owned economic enterprises¹⁶² if the Applicant substantiates that it met the Indian Self-Determination and Education Act requirements).
- Conducting the following steps to ensure the use of small and minority businesses, women's business enterprises, and labor surplus area firms when possible:¹⁶³
 - Place such organizations that are qualified on solicitation lists;
 - Ensure such organizations are solicited whenever they are potential sources;
 - Divide total requirements, when economically feasible, into smaller tasks or quantities;
 - Establish delivery schedules, where the requirement permits, which encourage their participation;

¹⁵⁸ Ibid.

¹⁵⁹ 2 C.F.R. § 200.318(c)(1).

¹⁶⁰ 2 C.F.R. § 200.319(d).

¹⁶¹ 2 C.F.R. § 200.319(a).

¹⁶² Per the Indian Financing Act of 1974, Pub. L. No. 93-262, § 2(e), 88 Stat 77 (codified as amended at 25 U.S.C. § 1452(f)), an Indian organization is the governing body of any federally recognized Tribe or an entity established or recognized by the governing body. An Indian-owned economic enterprise is any commercial, industrial, or business activity established or organized by a member of a Federal recognized Tribe for the purpose of profit, provided that such Indian ownership constitutes 51 percent or more of the enterprise.

¹⁶³ 2 C.F.R. § 200.321.

- Use the services and assistance, as appropriate, of the Small Business Administration and the Minority Business Development Agency of the Department of Commerce; and
- Require prime contractor to conduct the above steps if subcontracting.

Note that for Tribal Government Applicants, using the Indian Self-Determination and Education Assistance Act preference is considered to meet this requirement such that they do not need to separately follow the six socioeconomic steps outlined above.

- Performing a cost or price analysis in connection with every procurement action above the simplified acquisition threshold,¹⁶⁴ including contract modifications. The Applicant must make independent estimates before receiving bids or proposals.¹⁶⁵ Additionally, the Applicant must negotiate profit as a separate element of the price when it performs a cost analysis and for each contract in which there is no price competition.¹⁶⁶
- Evaluating and documenting the contractor's integrity, compliance with public policy, record of past performance, and financial and technical resources.¹⁶⁷
- Ensuring that the contractor was not suspended or debarred.¹⁶⁸
- Prohibiting the use of statutorily or administratively imposed state, local, or tribal geographic preferences in evaluating bids or proposals except where expressly encouraged by applicable Federal law.¹⁶⁹
- Excluding contractors that develop or draft specifications, requirements, statements of work, or invitations for bids or requests for proposals from competing for such procurements to ensure objective contractor performance and eliminate unfair competitive advantage.¹⁷⁰
- Maintaining records to detail the history of the procurement including, but are not limited to:
 - Rationale for the method of procurement
 - Selection of contract type
 - Contractor selection or rejection
 - The basis for the contract price¹⁷¹

¹⁶⁴ The simplified acquisition threshold is set by the Federal Acquisition Regulation at 48 C.F.R. § 2.101. The threshold is adjusted periodically for inflation.

¹⁶⁵ 2 C.F.R. § 200.323(a).

¹⁶⁶ 2 C.F.R. § 200.323(b).

¹⁶⁷ 2 C.F.R. § 200.318(h).

¹⁶⁸ 2 C.F.R. § 200.213. This information can be found at <http://www.sam.gov/SAM/>.

¹⁶⁹ 2 C.F.R. § 200.319(b).

¹⁷⁰ 2 C.F.R. § 200.319(a).

¹⁷¹ 2 C.F.R. § 200.318(i).

3. Procurement Methods

Tribal and local governments and PNPs must use one of the following procurement methods:¹⁷²

- Micro-purchase
- Small purchase procedure
- Sealed bid (formal advertising)
- Competitive proposal
- Noncompetitive proposal (sole-sourcing)

(a) *Noncompetitive Procurement*

FEMA may reimburse costs incurred under a contract procured through a noncompetitive proposal, also referred to as sole-source, only when one or more of the following circumstances apply:

- The item is only available from one source;
- The public exigency or emergency for the requirement will not permit a delay resulting from competitive solicitation (this exception to competitive procurement is only for work specifically related to the circumstance and only while the circumstance exists. Therefore, Applicants need to immediately begin the process of competitively procuring similar goods and services and transition to a competitively procured contract as soon as the circumstances cease to exist);
- FEMA or the Recipient expressly authorizes a noncompetitive proposal in response to a written request from the Applicant; or
- After solicitation of several sources, competition is determined inadequate.¹⁷³

For each noncompetitive procurement, the Applicant must identify which of the four circumstances listed above apply and provide all of the following information, documentation, and justification:

- ☐ A brief description of the product or service being procured, including the expected amount of the procurement.

¹⁷² 2 C.F.R. § 200.320.

¹⁷³ 2 C.F.R. § 200.320(f).

Terminology

Micro-purchase: purchase of supplies or services where the total cost does not exceed the micro-purchase threshold set by the Federal Acquisition Regulation at 48 C.F.R. Subpart 2.1.

Small purchase procedure: relatively simple and informal procurement method for securing services, supplies, or other property that do not cost more than the simplified acquisition threshold set by the Federal Acquisition Regulation at 48 C.F.R. Subpart 2.1.

Sealed bid: publicly solicited bid awarded via a firm fixed price contract to the lowest responsive and responsible bidder.

Competitive proposal: normally conducted with more than one source submitting an offer and generally used when conditions are not appropriate for the use of sealed bids.

Noncompetitive proposal: solicitation of a proposal from only one source.

See 2 C.F.R. § 200.320 for Federal rules that apply to each individual method.

Terminology

Exigency: The existence of a need to avoid, prevent or alleviate serious harm or injury, financial or otherwise, to the Applicant.

Emergency: The existence of a threat to life, public health or safety, or improved property requiring immediate action to alleviate the threat.

- ☐ Explanation of why a noncompetitive procurement is necessary. If there was a public exigency or emergency, the justification should explain the specific conditions and circumstances that clearly illustrate why competitive procurement would cause unacceptable delay in addressing the public exigency or emergency. (Failure to plan for transition to competitive procurement cannot be the basis for continued use of noncompetitive procurement based on public exigency or emergency).
- ☐ Length of time the noncompetitive contract will be used for the defined SOW, and the impact on that SOW should the noncompetitively procured contract not be available for that amount of time (e.g., how long does the Applicant anticipate the exigency or emergency circumstances to continue; how long it will take to identify requirements and award a contract that complies with all procurement requirements; or how long it would take another contractor to reach the same level of competence).
- ☐ The specific steps taken to determine that full and open competition could not have been used, or was not used, for the SOW (e.g., research conducted to determine that there were limited qualified resources available that could meet the contract provisions).
- ☐ Any known conflicts of interest and any efforts that were made to identify potential conflicts of interest before the noncompetitive procurement occurred. If no efforts were made, explain why.
- ☐ Any other justification.

Example of an Exigent Situation

A tornado impacts a city in June and causes widespread and catastrophic damage, including damage to a city school. The city wants to repair the school and have it ready for use by the beginning of the school year in September. The city estimates, based on experience, that awarding a contract using a sealed bidding process would require at least 90 days, and the city's engineer estimates that the repair work would last another 60 days. This would extend the project beyond the beginning of the school year. Rather than conducting a sealed bidding process, the city—in compliance with State and local law—wants to sole source with a contractor it has contracted with previously.

Example of an Emergency Situation

Severe weather impacts a city and causes widespread and catastrophic damage, including loss of life, widespread flooding, loss of power, damage to public and private structures, and millions of cubic yards of debris across the city, leaving majority of the jurisdiction inaccessible. The city needs to begin debris removal activities immediately to restore access to the community, support search and rescue operations, power restoration, and address health and safety concerns.

If FEMA determines that none of the allowable circumstances existed or did not preclude the Applicant from adhering to competitive procurement requirements, FEMA may disallow all or part of the associated costs.¹⁷⁴

¹⁷⁴ 2 C.F.R. § 200.338.

4. Contract Types

FEMA reimburses costs incurred by Tribal and local governments and PNPs using three types of contract payment obligations: fixed price, cost-reimbursement, and, to a limited extent, T&M. The specific contract types related to each of these are described in FEMA's *Procurement Guidance for Recipients and Subrecipients Under 2 C.F.R. Part 200 (Uniform Rules)*.¹⁷⁵

Tribal and local governments and PNPs must maintain oversight on all contracts to ensure contractors perform according to the conditions and specifications of the contract and any purchase orders.¹⁷⁶

(a) Time and Material Contracts

T&M contracts do not provide incentives to the contractor for cost control or labor efficiency. Therefore, use of T&M contracts are only allowed if all of the following apply:

- No other contract type was suitable;
- The contract has a ceiling price that the contractor exceeds at its own risk; and
- The Applicant maintains a high degree of oversight to obtain reasonable assurance that the contractor is using efficient methods and effective cost controls.¹⁷⁷

FEMA generally limits the use of T&M contracts to a reasonable timeframe based on the circumstances during which the Applicant could not define a clear SOW. Therefore, the Applicant should define the SOW as soon as possible to enable procurement of a more acceptable type of contract.

Some entities, such as Rural Electrical Cooperatives, provide the materials necessary to restore the facilities and refer to such contracts as Time and Equipment (T&E) contracts. The limitations and requirements that apply to T&M contracts also apply to T&E contracts.

(b) Cost-Plus-Percentage-of-Cost or Percentage-of-Construction

In addition to limiting reimbursement to costs that can be determined to be reasonable, FEMA does not reimburse the increased cost associated with the percentage on a cost-plus-percentage-of-cost calculation or percentage-of-construction cost method.¹⁷⁸ This type of contract billing is prohibited as it does not provide incentive to contractors to control costs because the contractor's profit increases as the costs of performance increase. Instead, it provides a financial interest to the contractor to increase costs so that its profit increases. FEMA identifies these cost methods by determining whether:

- Payment is on a predetermined percentage rate;
- The predetermined percentage rate is applied to actual performance costs;
- The contractor's total payment amount is uncertain at the time of contracting; and

¹⁷⁵ www.fema.gov/media-library/assets/documents/96773.

¹⁷⁶ 2 C.F.R. § 200.318(b).

¹⁷⁷ 2 C.F.R. § 200.318(j).

¹⁷⁸ 2 C.F.R. § 200.323(d).

- The contractor's payment increases commensurately with increased performance costs.¹⁷⁹

5. Additional Contracting Considerations

(a) *Pre-Positioned Contracts*

Some Applicants have pre-positioned contracts, which are contracts awarded before an incident occurs for the potential performance of work. These contracts are also referred to as advance or standby contracts. FEMA may reimburse reasonable costs under a pre-positioned contract if:

- It was originally procured in compliance with Federal procurement requirements;
- The scope of work was adequate to cover eligible work; and
- The contract term covers time when work was performed.

(b) *Cooperative Purchasing*

A cooperative purchasing program is a cooperative arrangement for acquiring goods or services that involves aggregating the demand of two or more entities to obtain a more economical purchase.¹⁸⁰

Program membership may provide entities with access to lists of agreements or contracts for goods and services at pre-negotiated rates or prices. Typically, the member then purchases the goods or services by negotiating with participating vendors and placing purchase orders or entering into contracts based on the pre-negotiated rates or prices. FEMA advises against the use of cooperative purchasing programs due to frequent compliance issues with Federal procurement requirements.

[Appendix D: Frequent Compliance Issues with Cooperative Purchasing Programs](#) provides a list of frequent compliance issues with cooperative purchasing programs for procurements above the simplified acquisition threshold. Applicants must document and explain how its use of the program complied with all procurement requirements.

Piggyback contracting is a type of cooperative purchasing and occurs when one entity assigns the contractual rights it has in a contract to another entity. FEMA advises against the use of piggyback contracts. Piggyback contracts are usually not compliant with Federal requirements as the scope of work pertains to the needs of a different entity.

C. Required Contract Clauses

Applicants must include required provisions detailed in 2 C.F.R. § 200.326 in all contracts awarded.¹⁸¹ Some provisions are based on sound contracting practices while others are required by Federal law, EO, and regulations.

Required contract provisions include:

- ☐ Remedies Clause
- ☐ Termination for Cause

¹⁷⁹ See *Federation Aviation Administration -Request for Advance Decision*, 58 Comp.Gen. 654, 655 (1979), 79-2 CPD 34; *Marketing Consultants International Limited*, 55 Comp.Gen. 554, 562 (1975), 75-2 CPD 384.

¹⁸⁰ Cooperative purchasing programs are distinguishable from joint procurements. A joint procurement is a method of contracting in which two or more purchasers agree from the outset to use a single solicitation and enter into a single contract with a vendor for the delivery of goods or services. Joint procurements must still comply with Federal procurement requirements. However, FEMA sees fewer compliance issues with joint procurements.

¹⁸¹ 2 C.F.R. § 200.326.

- ☐ Termination for Convenience
- ☐ Equal Employment Opportunity
- ☐ Contract Work Hours and Safety Standards Act
- ☐ Clean Air Act
- ☐ Federal Water Pollution Control Act
- ☐ Debarment and Suspension
- ☐ Byrd Anti-Lobbying Amendment Clause
- ☐ Byrd Anti-Lobbying Amendment Certification
- ☐ Procurement of Recovered Materials

In addition to the required provisions, FEMA also recommends the following contract provisions be included in all contract awards:

- ☐ Changes Clause
- ☐ Access to Records
- ☐ Department of Homeland Security Seal, Logo, and Flags
- ☐ Compliance with Federal Law, Regulations, and EOs Clause
- ☐ No Obligation by Federal Government
- ☐ Program Fraud and False or Fraudulent Statements or Related Acts

Some provisions do not apply under the PA Program (e.g. Davis Bacon Act¹⁸² and Rights to Inventions Clause) while others require verbatim language. [Appendix K: Contract Provisions](#), provides the exact language for the provisions that require verbatim language and provides sample language for some of the other provisions.

D. Documentation Requirements

The Applicant should submit the following to support contract costs claimed (not an all-inclusive list):

- ☐ Procurement policy (required when requested)
- ☐ Procurement documents (i.e., requests for proposals, bids, selection process, etc.) (required when requested)
- ☐ A cost or price analysis (required for contracts above the simplified acquisition threshold)
- ☐ Contracts, change orders, and summary of invoices (required)
- ☐ Dates worked (required when requested)¹⁸³
- ☐ Documentation that substantiates a high degree of contractor oversight, such as daily or weekly logs, records of performance meetings (required for T&M contracts when requested)

¹⁸² The Davis Bacon Act requires “prevailing wage” payment to contracted workers based on the local union wage scale defined by the U.S. Department of Labors. If the Applicant incorporates prevailing wage rates as part of its normal practice for all contracts regardless of the funding source, then those rates are eligible.

¹⁸³ FEMA may request this information to validate work was completed within the project’s approved period of performance and when applicable for Emergency Work, to determine cost share application per [Chapter 6:XIII. Increased Federal Cost Share for a Limited Timeframe](#))

IX. Mutual Aid

When the Applicant does not have enough resources to respond to an incident, it may request resources from another jurisdiction through a “mutual aid” agreement. FEMA refers to the entity requesting resources as the Requesting Entity. FEMA refers to the entity providing the requested resource as the Providing Entity.

FEMA provides PA funding to the Requesting Entity as it is legally responsible for the work. FEMA does not provide PA funding directly to the Providing Entity. For the work to be eligible, the Requesting Entity must have requested the resources provided.

Some States have a statewide mutual aid agreement that designates the State as being responsible for reimbursing mutual aid costs. In these States, the Providing Entity may request funding directly from the State, with prior consent of the Requesting Entity, in accordance with applicable State laws and procedures. If the Requesting entity and the State approve the request and the State pays the Providing Entity, FEMA provides PA funding to the State. The Requesting Entity may be responsible for reimbursing the State for any non-Federal local cost share, depending on specific State requirements.

The Requesting Entity or State, if applicable, must provide a description of the services requested and received, along with documentation of associated costs (e.g., labor, equipment, supplies, or materials) to FEMA in support of a request for PA funding.

A. Post-Incident Agreements

When the Requesting and Providing Entities do not have a written agreement, OR where such an agreement exists but is silent on reimbursement, the entities may verbally agree on the resources to be provided and on the terms, conditions, and costs of such assistance.

The agreement should be consistent with past practices for mutual aid between the entities. For example, if the Requesting Entity does not normally reimburse a Providing Entity for its costs, it should not agree to do so specifically for the declared incident.

Prior to funding, the Requesting Entity must document the verbal agreement in writing, have it executed by an official of each entity with the authority to request and provide assistance, and submit it to FEMA (preferably within 30 days of the Applicant’s Briefing).¹⁸⁴

B. Eligibility

Mutual aid resources are eligible when used for Emergency Work, emergency utility restoration (regardless of whether it is deemed Category B or F) or grant management activities [subject to the criteria in FEMA Recovery Policy FP 104-11-2, *Public Assistance Management Costs (Interim)*]. Mutual aid work is subject to the same eligibility criteria as contract work. Costs to transport the Providing Entity’s equipment and personnel to the declared area are eligible.

Ineligible work performed by a Providing Entity includes, but is not limited to:

- Preparing to deploy or “standing-by”
- Dispatch operations outside the receiving State or Tribe

¹⁸⁴ The Recipient conducts Applicant Briefings to provide PA Program information to potential Applicants. This briefing is described in [Chapter 3:II, Applicant Briefing](#).

- Training and exercises
- Support for long-term recovery and mitigation operations

The Emergency Management Assistance Compact (EMAC) is a national interstate mutual aid agreement that enables States to share resources in response to an incident. Work performed outside the receiving State that is associated with the operation of EMAC, including tracking of resources, is ineligible unless the work is associated with the receiving State's emergency operations for the incident.

The Providing Entity's straight-time and overtime labor are eligible, including fringe benefits. When the Requesting Entity is a State, Tribal, or local government and the Providing Entity is another division within the same State, Tribal, or local government, straight-time for budgeted employees of the Providing Entity is ineligible.

If the Providing Entity backfills deployed personnel, overtime for backfill personnel is eligible even if they are not performing eligible work. However, straight-time for backfill personnel is ineligible.

FEMA reimburses the use of equipment provided to a Requesting Entity based on either the terms of the agreement or equipment rates (detailed in [Chapter 6:III, Applicant-Owned Equipment and Purchased Equipment](#)). FEMA provides PA funding to repair damage to this equipment the same way as it provides PA funding to repair damage to Applicant-owned equipment (detailed in [Chapter 7:IV, Damage Caused During Performance of Emergency Work](#)).

The Applicant needs to submit the following to support mutual aid costs claimed (not an all-inclusive list):

- ☐ Written agreement (required)
- ☐ Services requested and received (required)
- ☐ Same information listed for labor, equipment, and supplies (required as applicable)
- ☐ Invoices (representative sample required when requested)

X. Prisoners

FEMA provides PA funding for prisoner labor costs based on the rate that the Applicant normally pays prisoners. FEMA also provides PA funding for prisoner transportation to the worksite and extraordinary costs of security guards, food, and lodging.¹⁸⁵

The Applicant should submit the following to support prison labor costs claimed (not an all-inclusive list):

- ☐ Estimated hours and rates for work to be completed
- ☐ Prison labor pay policy and pay rate (required)
- ☐ For each individual:
 - Name (required)

¹⁸⁵ Stafford Act § 406(a)(2)(B), 42 U.S.C. § 5172.

- Days and hours worked (required)
- Description of work performed (required) should include a representative sample of daily logs or activity reports
- Locations worked (required)

XI. National Guard

The Governor may activate National Guard personnel to State Active Duty in response to an incident. Labor costs and per diem, if applicable, are eligible for State Active Duty personnel performing eligible work. Both straight-time and overtime are eligible, including fringe benefits.

The U.S. Department of Defense funds National Guard personnel activated under Full-Time National Guard Duty (Title 32) or Active Duty (Title 10). Therefore, Title 32 and Title 10 personnel costs, and any other costs funded by the U.S. Department of Defense, such as training, are ineligible.

XII. Direct Federal Assistance

When the impact of an incident is so severe that the State, Tribal, and local governments lack the capability to perform or contract eligible Emergency Work, the Recipient may request that the Federal Government provide this assistance directly. FEMA may task another Federal agency to perform or contract the work provided it is an eligible activity under [Chapter 7, Emergency Work Eligibility](#)¹⁸⁶ unless the work falls under the authority of another Federal agency.¹⁸⁷ FEMA issues a “Mission Assignment” to task the work and refers to it as Direct Federal Assistance (DFA).¹⁸⁸ DFA has the same cost-share provisions applicable to the declaration (as described in [Chapter 1:IV.E, Federal Cost Share](#)).

XIII. Increased Federal Cost Share for a Limited Timeframe

When the president authorizes an increased Federal cost share for a limited timeframe, FEMA applies it to all eligible costs related to work performed through 11:59 p.m. on the date of expiration. Therefore, the Applicant needs to delineate costs for work performed prior to the deadline versus costs for work performed after the deadline. The following bullets further define how FEMA applies the increased Federal cost share:

- Employees: Costs for hours worked up to the date and time of expiration.
- Purchased Material and Equipment: Cost to purchase each item that the Applicant needed and used to perform eligible work during the increased funding period. In this case, FEMA also applies the increased Federal cost share to the usage cost up to the date and time of expiration.
- Leased Equipment and Facilities: Lease costs up to date and time of expiration. FEMA may calculate the cost based on a pro-ration of time (i.e., if a facility is leased for six months based on a monthly rate and the period for the increased Federal cost share expired 45 days from the start of the lease, FEMA applies the increased Federal cost

¹⁸⁶ 44 C.F.R. § 206.208(a).

¹⁸⁷ 44 C.F.R. § 206.208(c)(2).

¹⁸⁸ 44 C.F.R. § 206.208(c)(1).

share to the cost to lease the facility for 45 days based on a pro-ration of the monthly rate).

- **Contract Costs:** Costs for work performed up to the date and time of expiration. If costs cannot be distinguished by date performed, FEMA may pro-rate costs based on the percentage of work completed prior to the deadline versus the percentage of work remaining. However, Applicants should work with contractors to delineate dates associated with work.

XIV. Donated Resources

Individuals and organizations often donate resources to assist with response activities. FEMA does not provide PA funding for donated resources. However, FEMA allows the Applicant to use the value of donated resources (non-cash contributions of property or services)¹⁸⁹ related to eligible Emergency Work to offset the non-Federal cost share of its eligible Emergency Work projects and DFA; and to use the value of donated resources related to eligible work on a Permanent Work project to offset the non-Federal cost share of that specific Permanent Work project. FEMA applies the offsets regardless of the cost share arrangements between the Recipient and its Subrecipients.

For Emergency Work specifically, if there is a time-limited 100 percent Federal cost share period (see [Chapter 6:XIII, *Increased Federal Cost Share for a Limited Timeframe*](#)) and the Applicant uses resources donated during this time period, it may use the value of those donated resources to offset the non-Federal cost share incurred after the 100 percent Federal cost share period expires. If the Applicant uses resources from its stock that were donated during a previous incident or timeframe, it may use the value of those donated resources to offset its non-Federal cost share if the Applicant has not claimed the resources as an offset in a previous incident.

The Applicant may apply the offset if all of the following conditions are met:

- The donated resource is from a third party. A third party includes private entities or individuals, including individuals that are normally paid employees of the Applicant or Federal, State, or Tribal Government, but are volunteering as unpaid individuals and not on behalf of the employer);
- The donated resource is necessary and reasonable;¹⁹⁰
- The Applicant uses the resource in the performance of eligible work¹⁹¹ and within the respective project's period of performance;¹⁹² and
- The Applicant or volunteer organization tracks the resources and work performed, including description, specific locations, and hours.¹⁹³ The Applicant must track the donated resources for Permanent Work to the specific project for which it is associated.

¹⁸⁹ 2 C.F.R.) § 200.96.

¹⁹⁰ 2 C.F.R. § 200.306(b)(3).

¹⁹¹ Applicants may not use the value of standby time as a donated resource as no work is being performed.

¹⁹² 2 C.F.R. § 200.309. For Emergency Work, the end of the period of performance is equal to the latest Emergency Work Project Worksheet's (PW's) period of performance.

¹⁹³ 2 C.F.R. §§ 200.434(d) and 306(b)(1).

FEMA considers unpaid individuals who volunteer their labor to the Applicant to be third-party even if they are officially members or employees of the Applicant organization (e.g. volunteer fire fighters at a PNP volunteer fire department performing eligible Emergency Work).

Resources donated to the Applicant by an organization that would normally provide the same resources under its mission, such as the American Red Cross, are eligible as an offset provided the organization is not federally funded. Additionally, if a mutual aid agreement provides for assistance at no cost to the Applicant, the Applicant may use the value of that assistance to offset its non-Federal cost share.

The value of a donated resource is ineligible as an offset toward the non-Federal cost share if the resource is:

- Donated by a Federal agency,
- Donated by another federally funded source,
- Funded through a Federal award,¹⁹⁴
- Used as an offset to any other Federal award,¹⁹⁵ or
- Used for ineligible work.

Requesting donated resources from contractors during the solicitation phase of a procurement may violate Federal procurement rules as it may be considered overly burdensome or restrictive of competition.¹⁹⁶ To remain compliant, the Applicant can do the following:

- Accept unsolicited donated resources from contractors;
- Maintain a list of donors; and
- Ask contractors that are donating resources to work with other organizations.

If the Applicant accepts donated resources from contractors, it must not do any of the following:

- Solicit donations in its requests for proposals or solicitations for bids;
- Directly solicit donations or requests for proposals from contractors who are actively bidding on its contracts;
- Grant an award to a contractor which has donated resources for the specific work covered by the contract;
- Show favoritism or give the appearance of showing favoritism to a contractor who has donated resources; and
- Limit competition among contractors based on donated resources, especially for smaller contractors (including women or minority owned businesses) that might not be able to afford to donate resources.

A. Offset Amounts

FEMA applies values to donated resources as follows:

- Volunteer Labor: The offset is based on the same straight-time hourly labor rate, and fringe benefits, as a similarly qualified person in the Applicant's organization who normally performs similar work. FEMA does not offset volunteer labor based on

¹⁹⁴ 2 C.F.R. § 200.306(b)(5).

¹⁹⁵ 2 C.F.R. § 200.306(b)(2).

¹⁹⁶ 2 C.F.R. § 200.319.

overtime or premium rates. If the Applicant does not have employees performing similar work, FEMA credits the non-Federal share based on a rate consistent with those ordinarily performing the work in the same labor market that the Applicant would otherwise compete for that type of work.¹⁹⁷

- Equipment: The offset is based on equipment rates and must not exceed the fair rental value (if loaned) or the fair market value of equipment that is in similar age and condition at the time of donation (if donated with a transfer of title). See [Chapter 6:III, Applicant-Owned Equipment and Purchased Equipment](#) for information on equipment rates.¹⁹⁸
- Supplies or Materials: The offset is based on current commercial rates; which FEMA validates based on invoices from previous purchases or information available from vendors in the area. The amount must not exceed the fair market value at the time of donation.¹⁹⁹
- Buildings or Land: For buildings or land donated permanently (i.e., with a transfer of ownership), the offset is based on the fair market value at the time of donation as established by an independent appraisal and certified by the Applicant.
- Space: For building or land space donated for temporary use, the offset is based on the fair rental value of comparable privately-owned space in the same locality as established by an independent appraisal.²⁰⁰
- Logistical Support: Reasonable logistical support for volunteers doing eligible work, such as donations warehousing and management related to eligible work, may be eligible either for funding (if the Applicant provides the logistical support) or as a donated resource offset (if a third party provides the logistical support), subject to approval by FEMA.

For Emergency Work, the donated resource offset is applied against the combined non-Federal cost share for all the Applicant's Emergency Work PWs (Category A and B) under the declared incident. The offset may not exceed the total out-of-pocket costs and is capped at the total non-Federal cost share of these PWs. FEMA prepares the Emergency Work donated resource project as a Category B PW separate from Emergency Work PWs for the Applicant's incurred costs. FEMA does not obligate the donated resource PW until after it obligates all Emergency Work PWs for the Applicant.

For Permanent Work, the donated resource offset is applied against the non-Federal cost share of the specific Permanent Work project for which the resources were donated. The offset may not exceed the total out-of-pocket costs. The offset is capped at the non-Federal cost share of that specific Permanent Work PW. The type and amount of resources donated must directly correlate to, and may not exceed, the type and amount approved in the scope of work of the Permanent Work project (e.g., if the approved scope of work includes replacement of 10 chairs and 15 chairs are donated, the donated resource offset is limited to 10 chairs). FEMA adjusts the Permanent Work project to capture any donated resource offsets related to the PW upon receipt of the donated resource information and no later than closeout.

¹⁹⁷ 2 C.F.R. § 200.306(e) and (f).

¹⁹⁸ 2 C.F.R. § 200.306(g), (h), and (i).

¹⁹⁹ 2 C.F.R. § 200.306(g).

²⁰⁰ 2 C.F.R. § 200.306(i)(3).

B. Documentation Requirements

The Applicant needs to submit the following to support donated resources (not an all-inclusive list):

For each individual:

- ☐ Sign-in sheet (required)
- ☐ Name (required)
- ☐ Title and function (required for professional services)
- ☐ Days and hours worked (required)
- ☐ Location of work and work performed (required)

Equipment:

- ☐ Same information listed under Chapter 6:III, Applicant-Owned Equipment and Purchased Equipment (required)
- ☐ Who donated each piece of equipment (required)

Supplies or materials:

- ☐ Quantity used (required)
- ☐ Who donated (required)
- ☐ Location(s) used (required)
- ☐ Invoices or other documentation to validate claimed value

XV. Project Management and Design Services

FEMA provides PA funding for costs related to project management and design activities as part of the project. Project management includes activities performed to manage the actual project. These are activities that would be required regardless of whether the entity is receiving PA funding and differ from management costs, which are costs for activities related to the receipt and administration of PA funding.

Project management activities may include procurement actions, legal review of contracts, monitoring contractor work, construction oversight and inspections, environmental and historic preservation permitting actions, completing load tickets for debris operations. These activities are eligible provided they are tracked and directly related to a specific, eligible project.

Architectural, engineering, and design services for the approved scope of work, including hazard mitigation, are also eligible provided the services are necessary. Some projects do not need these services or require only basic services, while others require specialized engineering and design.

When evaluating the eligibility of project management and design services, FEMA considers whether redesign was necessary due to unexpected site conditions or whether the project includes improvements that are ineligible for funding (costs for management and design services associated with improvements or other ineligible work are not eligible).

XVI. Public Assistance Grant Management and Administration

FEMA provides contributions for management costs that a Recipient or Subrecipient incurs in administering and managing PA awards. For Recipients, FEMA provides PA funding for management costs based on actual costs incurred up to 7 percent of the total award amount. For

Subrecipients, FEMA provides PA funding for management costs based on actual costs incurred up to 5 percent of the Subrecipient's total award amount. Additional information is provided in an interim policy, FEMA Recovery Policy FP 104-11-2, *Public Assistance Management Costs (Interim)*.²⁰¹

XVII. Surveys to Assess or Locate Damage or Debris Impacts

The Applicant is responsible for identifying locations of incident-related damage or debris impacts. Costs related to assessing overall impacts of an incident, locating damage or debris impacts, and conducting PDAs are not eligible project costs, but may be eligible as grant management costs.

If, during a survey after the declaration, the Applicant identifies incident-related damage to a facility, the costs related to the inspection of that facility are eligible as management costs provided the facility is eligible.

Further detailed inspections of that damage to determine the extent of damage or quantity of debris and method of repair or removal, including professional evaluations, are eligible as part of the work to restore the facility or work to remove the debris. If the Applicant performs a detailed inspection of a partially damaged system, eligible costs are based on the percentage of the system that was damaged. For example, if after inspecting 500 linear feet of sewer line, the Applicant identified 100 linear feet of line damaged by the incident, only one-fifth of the inspection costs are eligible.

FEMA has specific eligibility criteria for inspecting earthquake damage to buildings constructed with welded steel-moment frames. FEMA bases the eligibility criteria on *Recommended Post Earthquake Evaluation and Repair Criteria for Welded Steel Moment Frame Buildings* (FEMA 352).²⁰² The criteria are summarized in [Appendix C: Welded Steel Moment Frame](#).

Safety inspections are discussed in [Chapter 7:II.S, Safety Inspections](#).

XVIII. Duplication of Benefits

FEMA is legally prohibited from duplicating benefits from other sources. If the Applicant receives funding from another source for the same work that FEMA funded, FEMA reduces the eligible cost or de-obligates funding to prevent a duplication of benefits.²⁰³

A. Insurance Proceeds

FEMA cannot provide PA funding that duplicates insurance proceeds.²⁰⁴ Consequently, FEMA reduces eligible costs by the amount of:

- Actual insurance proceeds, if known;²⁰⁵ or

²⁰¹ Stafford Act § 324(a), 42 U.S.C. § 5165b as amended by the Disaster Recovery Reform Act; and 2 C.F.R. §§ 200.56 and 200.412.

²⁰² www.fema.gov/media-library/assets/documents/747.

²⁰³ Stafford Act § 312, 42 U.S.C. § 5155, and 2 C.F.R. § 200.406.

²⁰⁴ Ibid.

²⁰⁵ 44 C.F.R. §§ 206.252(c) and 253(a).

- Anticipated insurance proceeds based on the Applicant's insurance policy, if the amount of actual insurance proceeds is unknown. FEMA subsequently adjusts the eligible costs based on the actual amount of insurance proceeds the Applicant receives.

FEMA requires the Applicant to take reasonable efforts to pursue claims to recover insurance proceeds that it is entitled to receive from its insurer(s). FEMA may limit funding if the insurance policy provides coverage that should be pursued. If the Applicant expends costs to pursue its insurance claim, FEMA offsets the insurance reduction with the Applicant's reasonable costs to pursue the claim if:

- The incurred cost resulted from pursuing insurance proceeds for FEMA-eligible work, and
- The Applicant can provide documentation to show that the incurred cost was attributed to pursuing more insurance proceeds than the initial settlement amount.

If the Applicant receives insurance proceeds for ineligible losses (e.g., business interruption), FEMA calculates a relative apportionment of insurance proceeds to determine the insurance reduction based on:

- The proceeds received per type of loss as specified by the insurance policy or settlement documentation;
- Policy limits for categories of loss as specified in the insurance policy; or
- The ratio of total eligible losses to total ineligible losses.

FEMA Recovery Policy (FP) 206-086-1, *Public Assistance Policy on Insurance*, describes insurance reductions in detail.²⁰⁶

The Applicant should upload the following documentation in PA Grants Portal at the Applicant Level (not an all-inclusive list):

- ☐ Summary of insurance coverage
- ☐ Actual insurance proceeds, if available (required before project is closed)
- ☐ General Property Insurance Policy (required if applicable):
 - Property policy declaration pages
 - Schedule of covered locations
 - Property policy forms and endorsements
 - Inland marine coverage section
 - Equipment breakdown section
- ☐ Flood insurance policy (required for flood loss)
- ☐ Wind policy, which may include a separate wind only insurance policy issued by a state Wind Pool or Association. [required for wind-related loss (hurricane, tornado, severe weather incident)]:
- ☐ Auto insurance policy (required for vehicle damage)
- ☐ Insurance settlement information (required if available):
 - Final Statement of loss

²⁰⁶ www.fema.gov/media-library/assets/documents/107564.

- Adjuster's estimates
- Settlement checks
- Correspondence explaining the settlement amount and allocation
- Letter of denial

B. Non-Federal Grants and Cash Donations

Grants and cash donations from non-Federal sources are subject to the following criteria based on whether the funds are provided toward a specific purpose and whether that specific purpose is otherwise eligible for PA funding.

- If the funds are designated for the same purpose as eligible work, the following apply:
 - The Applicant may use the funds toward its non-Federal cost share.
 - If the funds are not used toward the non-Federal cost share, FEMA considers the donation or non-Federal grant a duplication of benefits and reduces eligible costs by the duplicated amount.
 - If the funds exceed the amount of the non-Federal cost share, FEMA reduces eligible costs by the excess amount.
- If the funds are designated for non-specific purposes, FEMA does not consider the funds a duplication of benefits. The Applicant may use the funds toward its non-Federal cost share. If the funds exceed the amount of the non-Federal share, the Applicant can apply the excess amount toward ineligible work.
- If the funds are designated for a specific purpose that is ineligible, FEMA does not allow the Applicant to apply the funds toward its non-Federal cost share.

C. Third-Party Liability

When a third party²⁰⁷ causes damage (e.g., an oil spill) or increases the cost of repair or cleanup and the Applicant requests FEMA funding for the costs, FEMA requires the Applicant to make reasonable efforts to pursue claims to recover costs it is entitled to receive from the third party.

If the costs recovered are not adequate despite the Applicant's good faith effort, FEMA reduces eligible costs based on the recovered amount. If the Applicant receives funds from the third party for eligible and ineligible work or losses, FEMA determines the offset amount based on:

- The proceeds received for eligible losses as specified by the settlement documentation; or
- The ratio of total eligible losses to total ineligible losses.

D. Other Federal Awards

If the Applicant receives funds from another Federal agency for the same purpose as PA funding, it is a duplication of benefits. FEMA cannot duplicate funds provided by another Federal agency.

²⁰⁷ A third party is a private entity or individual that is not involved in the Federal award, i.e., not the Applicant or Federal, State, or Tribal Government.

XIX. Duplication of Funding Between FEMA Programs

FEMA provides assistance under other Programs, such as its IA programs and Hazard Mitigation Grant Program (HMGP), that could duplicate assistance that is available under the PA Program. FEMA must ensure it does not duplicate funds in areas where its programs overlap.

For IA, individuals may receive assistance for work that, under certain circumstances, is also eligible under PA when a State, Tribal, or local government has legal authority to perform the work. For example, a homeowner may receive IHP assistance for debris clearance from a privately-owned road and the local government may request PA funding for debris clearance from the same road for emergency vehicle access. FEMA must ensure it does not provide PA funding for the same work to two different entities.

For HMGP, FEMA can provide funding for a wide range of mitigation measures, including measures that may also be eligible under the PA Program. FEMA must ensure that PA funds do not duplicate HMGP funds.

XX. Interest on Loans

Applicants may need to obtain a loan to complete work. Financing costs for a loan is only eligible when it meets the conditions established in 2 C.F.R. § 200.449.

XXI. Ineligible Costs

The Stafford Act authorizes FEMA to provide PA funding for specific work performed as a result of the incident. It does not authorize FEMA to provide PA funding for all losses or costs resulting from the incident. The following costs are ineligible because the Stafford Act does not authorize FEMA to provide PA funding for these items.

A. Loss of Revenue

FEMA cannot provide PA funding for revenue lost due to the incident. The following are examples of when loss of revenue may occur because of an incident:

- Hospitals release noncritical patients to make room for survivors
- Hospitals sustain damage that reduces pre-existing capacity
- States open a toll road for evacuation and do not charge a toll
- States waive the normal fee for ferry service to encourage alternate transportation
- A utility system is shut down
- Events are cancelled due to an entity using a venue for incident-related activities, such as sheltering

B. Loss of Useful Service Life

FEMA cannot provide PA funding for the projected loss of useful service life of a facility. For example, if a road has been inundated by flood waters for an extended timeframe, FEMA cannot provide PA funding for the value of the projected loss of useful life of the road due to the long-term effects the inundation might have on the road. Similarly, FEMA cannot fund the value of the loss of landfill capacity due to incident-related debris.

C. Tax Assessments

State, Tribal, and local governments may conduct tax assessments to re-assess real property values after an incident. Costs related to conducting these assessments are ineligible because the assessments are neither essential to addressing an immediate threat to life or improved property, nor connected with the permanent restoration of eligible facilities.

D. Increased Operating Costs

Increased costs of operating a facility or providing a service are generally ineligible, even when directly related to the incident. However, short-term increased costs that are directly related to accomplishing specific emergency health and safety tasks as part of emergency protective measures may be eligible, as discussed in [Chapter 7:II.F, Expenses Related to Operating a Facility or Providing a Service](#).

CHAPTER 7: EMERGENCY WORK ELIGIBILITY

FEMA is authorized to provide PA funding for Emergency Work,²⁰⁸ including emergency protective measures and debris removal. This chapter includes PA policy for Emergency Work, which is work that must be done immediately to:

- Save lives;
- Protect public health and safety;
- Protect improved property; or
- Eliminate²⁰⁹ or lessen an immediate threat of additional damage.²¹⁰

“Immediate threat” is the threat of additional damage or destruction from an incident that can reasonably be expected to occur within 5 years of the declared incident.²¹¹

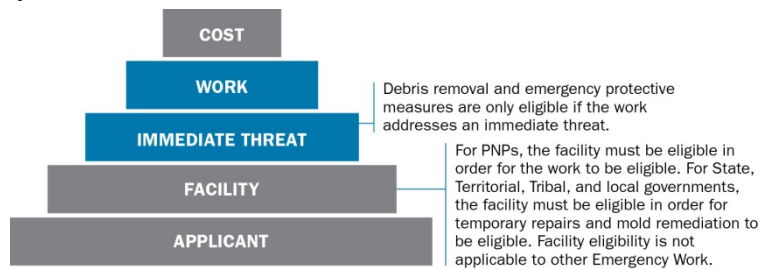

Figure 9. Emergency Work Eligibility

For flood incidents specifically, an immediate threat is a threat from a 5-year flood (a flood that has a 20 percent chance of occurring in any given year). For other incidents, an immediate threat means imminent danger from an incident that can reasonably be expected to occur within 5 years of the declared incident. The declared incident must have caused the immediate threat to exist. However, the threat itself can be from any type of incident; it is not limited to the type of incident that caused the initial damage or threat.

The deadline to complete Emergency Work is 6 months from the declaration date unless the Recipient or FEMA authorize an extension.²¹² Although regulations allow 6 months to complete Emergency Work, eligible Emergency Work is that which is necessary to address an immediate threat (as shown in Figure 9, *Emergency Work Eligibility*). FEMA considers the urgency with which the Applicant proceeds with work when evaluating eligibility. The Applicant should not delay in following its normal policies and procedures when taking actions to address threats to life, public health and safety, and improved property.

For PNP Applicants, eligible Emergency Work is generally limited to that associated with an eligible PNP facility as follows:

- Debris removal from the facility property; and

²⁰⁸ 44 C.F.R. § 206.201(b).

²⁰⁹ While the regulatory definition of the term “Emergency Work” includes the term “avert,” the regulatory language used for the specific eligibility criteria for debris removal and emergency protective measures includes the term “eliminate,” not “avert.”

²¹⁰ In addition to addressing immediate threats to life, health and safety, and improved property, debris removal may be authorized to ensure economic recovery of the affected community.

²¹¹ 44 C.F.R. § 206.221(c).

²¹² 44 C.F.R. §§ 206.204(c) and (d).

- Emergency protective measures to prevent damage to the facility and its contents.

In limited circumstances, PNPs may be eligible for other types of Emergency Work when essential components of a facility are urgently needed to save lives or protect health and safety (see [Chapter 7:II.D, Emergency Protective Measures Conducted by Private Nonprofit Organizations](#) for details).

For State, Tribal, and local Applicants, evaluating facility eligibility is not necessary for most Emergency Work. For these Applicants, eligibility of Emergency Work is primarily based on evaluation of an immediate threat and legal authority to perform the work. The Applicant must provide the following:

- ☐ Detailed description of work performed (required)
- ☐ Description of immediate threat (required if requested)
- ☐ Records demonstrating presence of immediate threat (e.g., technical reports, safety inspector reports, photographs) (required if requested)

Environmental and Historic Preservation Considerations

The Applicant should make every effort to inform the Recipient and FEMA of necessary Emergency Work prior to performing the work, when appropriate, to afford FEMA the opportunity to perform EHP reviews and consultations. The Applicant is responsible for obtaining all required EHP permits from the appropriate agencies before proceeding with Emergency Work. FEMA EHP staff is available to assist the Applicant with ensuring the work is compliant with EHP laws, regulations, and EOs.

When performing Emergency Work, the Applicant should avoid new ground disturbance when possible. If the Applicant cannot avoid new ground disturbance, it must consider impacts to natural and cultural resources and obtain all necessary permits. To facilitate EHP review, the Applicant should provide:

- ☐ Site map (including geographical coordinates in latitude, longitude in decimal degrees) showing the location of all proposed areas where the Applicant will conduct site work or construction and the extent of ground disturbance (including any staging areas, access roads, parking, landscaping, grading, or utilities)
- ☐ Construction dates and photographs of all facilities in the project area
- ☐ Any known environmental issues or historic preservation concerns, such as, but not limited to, threatened and endangered species including their critical habitat, location in floodplain or wetlands, presence of asbestos within the facility, or facility's location in an archaeologically sensitive area
- ☐ Environmental assessments
- ☐ Historic property designations or surveys, including archaeological surveys
- ☐ Copies of permits and correspondence with regulatory agencies, including but not limited to:
 - State or Tribal Historic Preservation Officer (SHPO/THPO) (historic properties)
 - U.S. Army Corps of Engineers (work in navigable waters, work involving dredging or discharging dredged materials or fill in waterways or wetlands)

- U.S. Fish and Wildlife Service (federally listed threatened and endangered species, migratory birds, bald and golden eagles, work in Coastal Barrier Resource System areas, work in or near waterways or wetlands)
- National Oceanic and Atmospheric Administration (federally listed threatened and endangered species, work in essential fish habitat, work in National Marine Sanctuaries)
- EPA (work involving underground injection, work with the potential to increase contamination of sole source aquifers)
- State or Tribal environmental agencies (permits for burning, staging, or disposing of debris)

I. Debris Removal (Category A)

Debris removal activities, such as clearance, removal, and disposal, are eligible as Category A if the removal is in the public interest based on whether the work:

- Eliminates immediate threats to lives, public health, and safety;
- Eliminates immediate threats of significant damage to improved public or private property;
- Ensures economic recovery of the affected community to the benefit of the community at large,²¹³ or
- Mitigates risk to life and property by removing Substantially Damaged²¹⁴ structures and associated structures and appurtenances as needed to convert property acquired using HMGP funds to uses compatible with open space, recreation, or wetlands management practices. Such removal must be completed within 2 years of the declaration date unless extended by the FEMA Assistant Administrator of the Recovery Directorate.²¹⁵

Debris includes, but is not limited to, vegetative debris, construction and demolition debris, sand, mud, silt, gravel, rocks, boulders, and vehicle and vessel wreckage.

For a PNP, eligible debris removal is limited to that associated with an eligible facility, including debris on the property of the eligible facility.

Removal of debris from improved public property and public rights-of-way (ROWs), including Federal-aid roads,²¹⁶ is eligible. If State, Tribal, or local governments authorize residents to place incident-related debris on public ROWs, FEMA provides PA funding to remove the debris from the ROWs for a limited timeframe.

²¹³ This condition is generally restricted to debris removal from large commercial areas when a significant percentage of the commercial sector of a community is impacted and coordinated debris removal is necessary to expedite restoration of the economic viability of the affected community.

²¹⁴ Substantial Damage is damage of any origin sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

²¹⁵ Stafford Act § 407, 42 U.S.C. § 5173; 44 C.F.R. § 206.224(a).

²¹⁶ The term “Federal-aid roads” means the highways on the Federal-aid highway system and all other public roads not classified as local roads or rural minor collectors. The Federal-aid highway system means the National Highway System and the Dwight D. Eisenhower National System of Interstate and Defense Highways (the Interstate System).

The Applicant needs to provide:

- ☐ Estimated debris quantities by type (required for all uncompleted work and completed contract work)
- ☐ Photographs of debris impacts, if available
- ☐ Location of temporary reduction sites and permanent disposal sites (required)
- ☐ Copies of permits for reduction and disposal sites (required)
- ☐ If contracted, quantities of debris removed, reduced, disposed, and recycled (by type) with a representative sampling of load tickets to support quantities (required)
- ☐ If contracted, representative sample of tower logs (required)
- ☐ Establishes legal responsibility (required);
- ☐ Includes the basis of the immediate threat determination (required);
- ☐ Identifies locations, types, and quantities of debris (required); and
- ☐ Demonstrates the debris claimed was deposited by the incident and was not pre-existing (e.g., waterway soundings that show pre-and post-incident levels) (required).

Removal of debris placed on the public ROWs from commercial properties is ineligible unless it is pre-approved by FEMA (see [Chapter 7:I.F.2\(c\), Removal from Commercial Property \(Requires FEMA's Pre-approval\)](#)). Additionally, removal of materials related to the construction, repair, or renovation of either residential or commercial structures is ineligible.

Debris removal from the following is ineligible:

- Federally maintained navigable channels and waterways
- Flood control works under the authority of the Natural Resources Conservation Service (NRCS). Flood control works under the specific authority of NRCS are those that are part of the Watershed and Flood Prevention Operations (WFPO) Program under PL 83-566.²¹⁷
- Agricultural land
- Natural, unimproved land, such as heavily wooded areas and unused areas²¹⁸

Terminology

Flood control works are those structures such as levees, flood walls, flood control channels, and water control structures designed and constructed to have appreciable effects in preventing damage by irregular and unusual rises in water levels.

Removing debris to restore the pre-disaster capacity of engineered facilities may be eligible as Permanent Work if the Applicant can substantiate the pre-disaster capacity and maintenance of that facility as described in [Chapter 8:IX.B.1, Restoring the Capacity of Channels, Basins, and Reservoirs](#).

Removal and disposal of pollutants and hazardous substances are eligible as Category B work in accordance with [Chapter 7:II.K, Hazardous Materials](#).

²¹⁷ www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/wfpo.

²¹⁸ 44 C.F.R. § 206.224(b).

Environmental and Historic Preservation Considerations

Although debris removal is usually statutorily excluded.²¹⁹ from NEPA review, FEMA must ensure compliance with other Federal laws, regulations, and EOs prior to funding the work. Accordingly, FEMA must ensure that the Applicant's debris removal operations avoid impacts to such resources as floodplains, wetlands, federally listed threatened and endangered species and their critical habitats, and historic properties (including maritime or underwater archaeological resources if waterways are impacted). The Applicant must stage debris at a safe distance from property boundaries, surface water, floodplains, wetlands, structures, wells, and septic tanks with leach fields. Additional coordination may be necessary for debris removal from waterways, stump removal, and use of fill.

The Applicant should contact applicable Federal, State, and Tribal regulatory agencies to ensure compliance with requirements and permits for debris-related operations. Upon completion of debris removal and disposal, site remediation may be necessary at staging sites and other impacted areas. See more detailed discussion of EHP considerations above in Chapter 7, I.

A. Alternative Procedures for Debris Removal

The Applicant may elect to participate in the Alternative Procedures for debris removal and receive reimbursement for straight-time for the Applicant's employees that conduct debris removal activities. The policy and process are detailed at www.fema.gov/alternative-procedures.

B. Hazardous Limbs, Trees, and Stumps

Eligible vegetative debris may include tree limbs, branches, stumps, or trees that are still in place, but damaged to the extent they pose an immediate threat. These items are ineligible if the hazard existed prior to the incident, or if the item is in a natural area and does not extend over improved property or public-use areas, such as trails, sidewalks, or playgrounds.

Contractors typically charge debris removal based on a unit price for volume (cubic yards) or weight (tons). A hazardous tree or stump may be collected individually. When these items are collected individually, contractors often charge a price per tree or stump based on its size. FEMA encourages Applicants to procure branch or limb removal from trees on a one-time charge per tree basis as opposed to a unit price per limb or branch to facilitate more cost-effective operations. FEMA has specific eligibility criteria and documentation requirements for funding these items based on a price per each item instead of by volume or weight. If the Applicant does not provide sufficient documentation, it jeopardizes its PA funding.

Bracing a tree is eligible (as Category B) only when doing so is less costly than removal and disposal. If the Applicant chooses to brace a tree rather than remove it, the tree is ineligible for removal later if it dies.

Pruning, maintenance, trimming, and landscaping are ineligible.

1. Broken Limb or Branch Removal

Removal of broken limbs or branches that are 2 inches or larger in diameter (measured at the point of break) that pose an immediate threat are eligible. An example is a broken limb or branch

²¹⁹ Stafford Act § 316, 41 U.S.C. § 5159.

that is hanging over improved property or public-use areas, such as trails, sidewalks, or playgrounds if it could fall and cause injury or damage to improved property.

FEMA does not fund removal of broken limbs or branches located on private property unless:

- The limbs or branches extend over the public ROW;
- The limbs or branches pose an immediate threat; and
- The Applicant removes the hazard from the public ROW (without entering private property).

Only the minimum cut necessary to remove the hazard is eligible. For example, cutting a branch at the trunk is ineligible if the threat can be eliminated by cutting it at the closest main branch junction.

2. Tree Removal

FEMA considers incident-damaged trees to be hazardous and eligible if the tree has a diameter of 6 inches or greater measured 4.5 feet above ground level, and the tree:

- Has a split trunk;
- Has a broken canopy; or
- Is leaning at an angle greater than 30 degrees.

For trees that have 50 percent or more of the root-ball exposed, removal of the tree and root-ball and filling the root-ball hole are eligible. For contracted removal of a tree with a root-ball, FEMA will not reimburse two separate unit costs to remove the tree and its root-ball.

For trees that have less than 50 percent of the root-ball exposed, FEMA only provides PA funding to flush cut the item at ground level and dispose of the cut portion based on volume or weight. Grinding any residual stump after cutting the tree is ineligible.

3. Stump Removal

For stumps that have 50 percent or more of the root-ball exposed, removal of the stump and filling the root-ball hole are eligible. If grinding a stump in-place is less costly than extraction, grinding the stump in-place is eligible.

Stump removal in areas with known or high potential for archaeological resources usually requires that FEMA further evaluate and consult with SHPO or THPO. If the Applicant discovers any potential archeological resources during stump removal, the Applicant must immediately cease work and notify FEMA.

(a) Contracted Stump Removal

FEMA only reimburses contracted costs charged on a per-stump basis if:

- The stump is 2 feet or larger in diameter measured 2 feet above the ground; and
- Extraction is required as part of the removal.

The Applicant needs to ensure the price for stump removal includes extraction, transport, disposal, and filling the root-ball hole.

For stumps that have less than 50 percent of the root-ball exposed, FEMA only provides PA funding to flush cut the item at ground level and dispose of the cut portion based on volume or weight. Grinding any residual stump is ineligible.

For stumps smaller than 2 feet in diameter, or for stumps of any size that do not require extraction, FEMA only provides PA funding based on volume or weight as removal of these stumps does not require special equipment. If the Applicant claims reimbursement of these stumps on a per stump basis, FEMA limits PA funding based on a unit price for volume or tons, calculated using [Appendix E: Stump Conversion Table](#).

If the Applicant incurs additional costs in picking up stumps 2 feet or larger in diameter that the contractor did not extract, it should complete [Appendix F: Hazardous Stump Worksheet](#) and present documentation to substantiate the costs as reasonable based on the equipment required to perform the work.

4. Documentation Requirements for Hazardous Limbs, Trees, and Stumps

The Applicant must retain, and provide when requested, all of the following documentation to support the eligibility of contracted work to remove tree limbs, branches, stumps, or trees that are still in place:

- ☐ Specifics of the immediate threat with the location (geographical coordinates in latitude, longitude) and photograph or video documentation that establishes the item is on public property (required, FEMA reviews a representative sample);
- ☐ Quantity removed (if a contractor charged an individual price for each limb, tree, or stump removed; FEMA requires the diameter of each item removed. For stumps, the measurement must be 2 feet up the trunk from the ground and for trees it must be 4.5 feet up from the ground) (required);
- ☐ Quantity, location, and source of material to fill root-ball holes (required); and
- ☐ Equipment used to perform the work (required).

C. Waterways

Debris removal from waterways that is necessary to eliminate the immediate threat to life, public health and safety, or improved property is eligible. Removal of debris in a waterway that does not meet this criterion is ineligible, even if the debris is deposited by the incident.

The EPA and U.S. Coast Guard (USCG) have the specific authority to remove hazardous materials, as described in the previous section. EPA is responsible for removing such material from inland water zones and USCG is responsible for coastal water zones. Debris removal from waterways usually requires coordination with the U.S. Army Corps of Engineers (USACE) for the use of a Nationwide permit and with the National Marine Fishery Service (NMFS) and U.S. Fish and Wildlife Service (USFWS) to ensure compliance with Section 7 of the Endangered Species Act (ESA).

1. Navigable Waterways

If the Applicant has legal responsibility for maintenance of a navigable waterway, removal and disposal of debris that obstructs the passage of vessels is eligible to a maximum depth of 2 feet below the low-tide draft of the largest vessel that utilized the waterway prior to the incident. Any debris below this zone is ineligible unless it is necessary to remove debris extending upward into an eligible zone.

If a tree is still rooted to an embankment and is floating or submerged, the cost to cut the tree at the water's edge is eligible.

Debris removal from federally maintained navigable waterways is ineligible. USCG and the USACE have specific authorities for removal of hazardous substances, vessels, and other obstructions from federally maintained navigable waterways.

2. Non-navigable Waterways, Including Flood Control Works and Natural Waterways

Debris deposited by the incident may obstruct a natural waterway (that is, a waterway that is not improved or maintained) or a constructed channel, including flood control works. In these cases, removal of the debris from the channel is eligible if the debris poses an immediate threat, such as when the debris:

- Obstructs, or could obstruct, intake structures;
- Could cause damage to structures, such as bridges and culverts; or
- Is causing, or could cause, flooding to improved public or private property during the occurrence of a 5-year flood.

Removal of the obstruction is eligible even in streams where debris removal would also be eligible under the NRCS Emergency Watershed Protection Program (EWP)²²⁰ unless NRCS provides assistance for the debris removal. However, debris removal from flood control works that are under the specific authority of NRCS is ineligible for PA funding, even if NRCS does not have sufficient funding or does not provide assistance. Flood control works under the specific authority of NRCS are those that are part of the WFPO Program under PL 83-566.²²¹

For flood control works that are eligible for the USACE Rehabilitation and Inspection Program (RIP),²²² debris removal is eligible for PA funding. USACE does not reimburse Applicants for debris removal but conducts this activity directly when necessary.

3. Identifying Debris Impact Locations

The Applicant is responsible for identifying debris deposited by the incident that poses an immediate threat. Random surveys to look for debris, including surveys performed using side scan sonar, are ineligible. However, if the Applicant identifies an area of debris impacts and demonstrates the need for a survey to identify specific immediate threat, FEMA may provide PA funding for the survey in that location, including the use of side scan sonar.

NRCS EWP and USACE RIP

The **NRCS EWP** is an emergency recovery program designed to relieve imminent hazards to life and property caused by floods, fires, windstorms, and other natural occurrences. Activities include, but are not limited to, providing financial and technical assistance to:

- Remove debris from stream channels, road culverts, and bridges
- Reshape and protect eroded banks
- Correct damaged drainage facilities
- Establish cover on critically eroding lands
- Repair levees and structures
- Repair conservation practices

The **USACE RIP** provides rehabilitation assistance for flood risk reduction structures.

²²⁰ www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/ewpp.

²²¹ www.nrcs.usda.gov/wps/portal/nrcs/main/national/programs/landscape/wfpo.

²²² www.usace.army.mil/Missions/CivilWorks/LeveeSafetyProgram/LeveeInspections.aspx.

D. Privately Owned Vehicles and Vessels on Public Property

Removal of privately-owned vehicles and vessels from public property is eligible if all of the following conditions are met:

- The vehicle or vessel blocks access to a public-use area;
- The vehicle or vessel is abandoned;
- The Applicant follows applicable State, Tribal, and local government ordinances or laws for private vehicle or vessel removal; and
- The Applicant documents the handling of the vehicle or vessel.

The Applicant needs to retain documentation to support it met these criteria.

A limited timeframe for vehicle and vessel storage is eligible if it is necessary to remove the item prior to being able to identify the owner. If the owner is identified, the Applicant should work with private property owners to pursue and recover storage and removal costs and credit FEMA the Federal share of any funds received.

E. Debris Removal from Private Property

Debris removal from private property (PPDR) is the responsibility of the property owner and is usually ineligible under the PA Program. In limited circumstances, based on the severity of the impact of an incident and whether debris on private property is so widespread that it threatens public health and safety or the economic recovery of the community, FEMA may determine that debris removal from private property is eligible under the PA Program. In such cases, FEMA works with the State, Tribal, and local governments to designate specific areas where debris removal from private property, including private waterways, is eligible. The debris removal must be in the public interest, not merely benefiting an individual or a limited group of individuals. Figure 10, *Debris on Private Property*, is an example of the level of debris impacts that may warrant FEMA assistance for PPDR.

Figure 10. Debris on Private Property

Clarification of Demolition versus Debris

If more than one wall of a structure is standing and not in immediate danger of collapsing, FEMA considers the removal of that structure to be demolition and not debris removal. Demolition is subject to additional requirements and **must** comply with [Chapter 7:II.U, Demolition of Private Structures](#).

1. Approval Process

The Applicant must submit a written request to FEMA identifying the specific properties or areas of properties where private property debris removal activities will occur. Once the FEMA receives the request, it engages with the Recipient and Applicant to review the request and conduct site inspections. With exception of debris removal from commercial property, the Applicant does not need to wait for FEMA approval to start work. However, for the Applicant to receive PA funding, FEMA must determine that the PPDR work at each property is eligible.

FEMA only approves PA funding for PPDR if the Applicant demonstrates all of the following with sufficient documentation:

(a) Legal Authority and Indemnification

FEMA accepts a written statement from an authorized Applicant official that:

- ☐ Certifies the Applicant has legal authority and responsibility to remove debris from private property;
- ☐ Cites all applicable sources of authority (law, ordinance, code, contract, etc.); and
- ☐ Indemnifies the United States for any claim arising from the debris removal.

(b) Public Interest.

The Applicant must demonstrate that the PPDR was in the public interest.²²³ This includes the basis for the determination that removing the debris from the private property locations requested was in the public interest. The determination must be made by the State, Tribal, county, or municipal government's public health authority or other public entity that has legal authority to make a determination that disaster-generated debris on private property constitutes an immediate threat to life, public health, or safety, or to the economic recovery of the community at large.

- ☐ The established, specific legal requirements for declaring the existence of a threat to public health and safety.

FEMA evaluates the submission to determine if it concurs that PPDR is in the public interest and provides a written response specifying any properties or area of properties for which it approves funding for debris removal.

2. Removal from Private Roads

Private roads are those that are not owned or operated by or otherwise the legal responsibility of a local, Tribal, State, or Federal entity (including orphan roads, roads in gated communities, homeowners' association roads, etc.). If the public has unrestricted access (no locks, gates, or guards) and frequently uses the private road, then removal and disposal of the debris, including debris placed at the curbside by residents, is in the public interest and the Applicant is not required to submit documentation demonstrating the debris removal is in the public interest. This does not include debris on private driveways or parking lots. It also does not include removal and disposal activities from private roads in areas with restricted access (roads behind locks, gates, or guards) or private roads that are unrestricted but rarely used by the public. The Applicant must provide further documentation to establish that removal is in the public interest in these areas and, though not required, Applicants should consider obtaining approval from FEMA prior to starting removal and disposal. Debris clearance (push or cut and toss) for emergency access may be eligible as Category B work if it meets the criteria in [Chapter 7:II.J, Emergency Access](#).

3. Removal from Private Residential Property

Debris removal from residential property is usually not in the public interest because the debris does not typically present an immediate health and safety threat to the general public. If the disaster generates debris quantities and/or types of debris on residential property that is so widespread or of such magnitude that it creates an immediate threat to public health and safety,

²²³ Stafford Act § 407, 42 U.S.C. § 5173; 44 C.F.R. § 206.224(b).

debris removal may be in the public interest. To determine if removal of debris from private residential property is in the public interest, FEMA evaluates the public health determination (see [Chapter 7:I.E.1\(b\), Public Interest](#), and will consider:

- Whether the debris is:
 - Located in open areas accessible to the public (e.g., in a yard with no fence barrier next to a public sidewalk)
 - Located in maintained areas
 - Creating a health and safety hazard (such as a rodent infestation);
- Volume of debris;
- Height of debris;
- Number of houses and blocks with large volumes of debris; and
- Amount of the public population affected.

Given these additional considerations, Applicants should consider obtaining approval from FEMA prior to starting work.

4. Removal from Commercial Property (Requires FEMA's Pre-approval)

Removal of debris from commercial properties, such as industrial parks, golf courses, cemeteries, apartments, condominiums, and trailer parks, is generally ineligible because commercial enterprises are expected to retain insurance that covers debris removal. In very limited, extraordinary circumstances, FEMA may provide an exception. In such cases, the Applicant must meet the requirements of [Chapter 7:I.E.1, Approval Process](#) and FEMA must approve the work prior to the Applicant removing the debris.

5. Duplication of Benefits

The Applicant should work with private property owners to pursue and recover insurance proceeds and credit FEMA the Federal share of any insurance proceeds received. In some circumstances, FEMA may provide IA assistance to individuals for debris removal; consequently, FEMA PA staff coordinate closely with IA staff to ensure FEMA does not fund the same work under both programs.

F. Disposal

FEMA provides PA funding for various costs related to disposing of debris. The Applicant should dispose of debris in an efficient and cost-effective manner.

Vegetative debris is bulky and can consume a significant volume of landfill space. To minimize the use of landfill space, FEMA encourages the Applicant to reduce the volume of vegetative debris before burying. Costs to reduce vegetative debris using methods such as mulching, grinding, or burning are eligible.

When removing sand, disposal of sand spoils on a public beach may be eligible as part of the debris removal project when it is the most cost-effective method of disposal.

Certain types of construction and demolition debris are reusable or recyclable. The Applicant should conserve landfill space by separating materials for reuse or recycling.

1. Recycling Revenue

If the Applicant receives revenue for recycling debris, FEMA reduces PA funding by the amount of revenue received. The Applicant may deduct costs for administering and marketing the sale of the salvageable materials from the fair market value.

If a contract allows the contractor to take possession of salvageable material and benefit from its sale to lower bid prices, there is no salvage value to be recovered at the end of the project. Therefore, the Applicant has no further obligation to FEMA.

2. Temporary Staging Sites

Establishing and operating a temporary staging site necessary for debris separation and reduction is eligible. The cost to lease property is eligible. Additionally, if the terms of the lease require that the Applicant restore the leased property back to its condition prior to the Applicant's use, the costs related to that restoration are also eligible as part of the Category A project. If leased, the Applicant must provide the lease agreement.

3. Hand-Loaded Trucks and Trailers

FEMA has determined that, for vegetative debris, hand-loaded trucks and trailers achieve approximately half the compaction level of mechanically loaded trucks and trailers. Therefore, FEMA only provides PA funding for 50 percent of the vegetative debris in hand-loaded trucks and trailers.

Similarly, trucks without solid tailgates cannot be compacted to full capacity. Therefore, FEMA only funds up to a maximum of 85 percent of the debris in trucks without solid tailgates.

The Applicant must document the types and total quantity of debris that was hand-loaded, and the types and total quantity of debris hauled in trucks without solid tailgates and provide this information to FEMA to ensure appropriate reductions are taken for this debris.

4. Landfills and Tipping Fees

Landfill tipping fees usually include fixed and variable costs, along with special taxes or fees assessed by the jurisdiction in which the landfill is located. Eligible tipping fee costs are limited to the variable and fixed costs that are directly related to landfill operations, such as recycling tax. The components of tipping fees that are not directly related to landfill operations, such as special taxes or fees related to other government services or public infrastructure, are ineligible as part of the tipping fee. When providing PA funding for tipping fees, FEMA removes any ineligible components.

The Applicant may use a significant portion of the available capacity of a landfill to dispose of incident-related debris. Although FEMA provides PA funding for tipping fees, it cannot provide PA funding for the value of the loss of landfill capacity due to incident-related debris.

G. Monitoring Contracted Debris Removal Operations

FEMA requires the Applicant to monitor all contracted debris operations to ensure that the quantities and work claimed are accurate and eligible. This includes documenting debris quantities by types, quantities reduced, reduction methods, and pickup and disposal locations. If the Applicant does not monitor contracted debris removal operations, it jeopardizes its PA funding for that work.

The Applicant may use force account resources (including temporary hires), contractors, or a combination of these for monitoring. It is not necessary, or cost-effective, to have Professional Engineers or other certified professionals perform debris monitoring duties. FEMA considers costs unreasonable when associated with the use of staff that are more highly qualified than necessary for the associated work. If the Applicant uses staff with professional qualifications to conduct debris monitoring, it must document the reason it needed staff with those qualifications.

FEMA provides training to the Applicant's force account debris monitors (including its temporary hires) upon request.

Eligible activities associated with debris monitoring include, but are not limited to:

- Field supervisory oversight
- Monitoring contracted debris removal at both the loading and disposal sites
- Compiling documentation, such as load tickets and monitor reports, to substantiate eligible debris
- Training debris monitors on debris removal operations, monitoring responsibilities and documentation processes, and FEMA debris eligibility criteria

Eligible Tipping Fee Components

Eligible fixed costs include:

- Equipment
- Construction
- Permits
- Landfill closure
- Post-closure activities
- Amortized costs for facilities that support the landfill

Eligible variable costs include:

- Labor
- Supplies
- Maintenance
- Operation of utilities
- Operation of gas recovery systems

II. Emergency Protective Measures (Category B)

Emergency protective measures conducted before, during, and after an incident are eligible if the measures:

- Eliminate or lessen immediate threats to lives, public health, or safety; OR
- Eliminate or lessen immediate threats of significant additional damage to improved public or private property in a cost-effective manner.²²⁴

FEMA may require certification by Federal, State, Tribal, or local government officials that a threat exists, including:

- Identification and evaluation of the threat
- Recommendations of the work necessary to cope with the threat²²⁵

Environmental and Historic Preservation Considerations

Although emergency protective measures are usually statutorily excluded from NEPA review, FEMA **must** ensure compliance with other Federal laws, regulations, and EOs prior to funding the work. Accordingly, FEMA **must** ensure that the Applicant's emergency protective measures avoid impacts to such resources as floodplains, wetlands, federally listed threatened and endangered species and their critical habitats, and historic properties. Additional coordination may be necessary for projects such as, but not limited to, new construction related to the temporary relocation of emergency services, mosquito abatement, disposal of contaminated sandbags, or the construction of temporary levees, roadways, or bridges. See more detailed discussion of EHP considerations above in Chapter 7, I.

A. Saving Lives and Protecting Public Health and Safety

The following is a list of emergency protective measures and costs that are eligible. These actions save lives or protect public health or safety. This list is not all-inclusive. Some of these actions are discussed in detail below.

- Transporting and pre-positioning equipment and other resources for response
- Flood fighting
- EOC-related costs
- Emergency access
- Supplies and commodities
- Medical care and transport
- Evacuation and sheltering, including that provided by another State or Tribal Government
- Child care
- Safety inspections
- Animal carcass removal²²⁶

²²⁴ 44 C.F.R. § 206.225(a)(3).

²²⁵ 44 C.F.R. § 206.225(a)(2).

²²⁶ FEMA may fund the removal of animal carcasses as Category A if the removal is part of the Applicant's overall debris disposal operation as opposed to a separate and distinct operation.

- Demolition of structures²²⁷
- Search and rescue to locate survivors, household pets, and service animals requiring assistance
- Fire fighting
- Security, such as barricades, fencing, or law enforcement
- Use or lease of temporary generators for facilities that provide essential community services
- Dissemination of information to the public to provide warnings and guidance about health and safety hazards using various strategies, such as flyers, public service announcements, or newspaper campaigns
- Searching to locate and recover human remains
- Storage and interment of unidentified human remains
- Mass mortuary services

The following are eligible under limited circumstances based on specific criteria described in each of the referenced sections:

- Expenses related to operating a facility or providing an emergency service (see [Chapter 7:II.F, *Expenses Related Operating a Facility or Providing a Service*](#))
- Mosquito abatement (see [Chapter 7:II.Q, *Mosquito Abatement*](#))
- Temporary relocation of essential services (see [Chapter 7:II.V, *Temporary Relocation of Essential Services*](#))
- Snow-related activities when specifically authorized in the declaration (see [Chapter 7:II.W, *Snow-Related Activities*](#))

B. Protecting Improved Property

The following is a list of eligible emergency protective measures to protect improved property,²²⁸ some of which are discussed in further detail below. This list is not all-inclusive.

- Constructing emergency berms or temporary levees to provide protection from floodwaters or landslides
- Emergency repairs necessary to prevent further damage, such as covering a damaged roof to prevent infiltration of rainwater
- Buttrussing, shoring, or bracing facilities to stabilize them or prevent collapse
- Emergency slope stabilization
- Mold remediation
- Removal and storage of contents from eligible facilities for the purpose of minimizing additional damage
- Extracting water and clearing mud, silt, or other accumulated debris from eligible facilities if the work is conducted expeditiously for the purpose of addressing an immediate threat (if the work is only necessary to restore the facility, it is Permanent Work, not Emergency Work)

²²⁷ FEMA usually reimburses demolition of a public structure as part of the Permanent Work project to replace the facility.

²²⁸ 44 C.F.R. § 206.221(d). Improved property means a structure, facility or item of equipment which was built, constructed or manufactured. Land used for agricultural purposes is not improved property.

- Taking actions to save the lives of animals that are eligible for replacement (see [Chapter 8:IX.C.5, Animals](#))

C. Emergency Protective Measures on Private Property

In limited circumstances, FEMA may determine that emergency protective measures conducted on private property are eligible under the PA Program if:

- The immediate threat is widespread, affecting numerous homes and businesses such that it is a threat to the health and safety of the general public;
- The Applicant has legal authority to perform the work; and
- The Applicant obtained rights-of-entry and agreements to indemnify and hold harmless the Federal Government.

Situations where this may occur are generally limited to:

- Demolition of unsafe private structures that endanger the public ([Chapter 7:II.U, Demolition of Private Structures](#))
- Installation of fiber-reinforced sheeting to cover damaged roofs, commonly referred to as Operation Blue Roof ([Chapter 7:II.X.1, Operation Blue Roof](#))
- Provision of emergency access ([Chapter 7:II.J, Emergency Access](#))
- Pumping of flooded basements
- Pumping of septic tanks or decontamination of wells causing a pollution threat ([Chapter 7:II.K, Hazardous Materials](#))
- Residential electric meter repair ([Chapter 7:II.R, Residential Electrical Meter Repair](#))
- Safety inspections ([Chapter 7:II.S, Safety Inspections](#))
- Stabilizing a slope ([Chapter 7:II.X.2, Slope Stabilization](#))

Upon submittal of its claim, the Applicant must include the following support documentation for the work to be eligible:

- A detailed explanation documenting the Applicant's legal authority and responsibility to enter private property;
- The basis for the determination that a threat exists to the general public; and
- Copies of the rights-of-entry and agreements to indemnify and hold harmless the Federal Government.

If the above criteria are not met, the private property owner may be eligible for assistance under FEMA's IA Programs. FEMA PA and IA staff coordinate closely to ensure FEMA does not fund the same work under both programs.

D. Emergency Protective Measures Conducted by Private Nonprofit Organizations

For PNPs, eligible emergency protective measures are generally limited to activities associated with preventing damage to an eligible facility and its contents.

Emergency services are usually the responsibility of State, Tribal, or local governments.

Therefore, PNPs are generally not legally responsible for those services and FEMA does not provide PA funding to PNPs for the costs associated with providing those services. When a PNP provides emergency services at the request of, and certified by, the legally responsible

government entity, FEMA provides PA funding through that government entity as the eligible Applicant. These services include:

- Fire and rescue activities
- Animal control
- Emergency ambulance service for evacuation
- 211 call services, if tracked and related to eligible work
- Other similarly urgent governmental services

PNPs that own or operate a medical or custodial care facility are eligible for direct reimbursement of costs related to patient evacuation. In limited circumstances, FEMA may also reimburse a PNP directly when essential components of a facility are urgently needed to save lives or protect health and safety, such as an emergency room of a PNP hospital or a PNP sewage or water treatment plant.

Additionally, if a PNP volunteer fire department operates based on established agreements with a State, Tribal, or local government that designates the volunteer fire department as an official recognized entity legally authorized to provide emergency services in areas of coverage specifically designated by the State, Tribal, or local government, FEMA may reimburse the volunteer fire department directly as an eligible Applicant.

E. Pre-positioning Resources

Costs related to pre-positioning resources specifically for the declared incident are eligible if the resources are used in the performance of eligible Emergency Work.

Pre-positioning resources to evacuate or provide emergency medical care during the evacuation period (such as ambulances, buses, and staff) is eligible even if those resources are not ultimately used, provided the staging of those resources occurred within the declared area, were reasonable, necessary, and prudent based on the data at the time of staging. However, pre-positioning for sheltering and search and rescue are only eligible if the resources are ultimately used.

F. Expenses Related to Operating a Facility or Providing a Service

The Applicant may incur increased costs related to operating a facility as a result of the incident because of an increased demand for the services the facility provides.

These additional costs are only eligible if:

- The services are specifically related to eligible emergency actions to save lives or protect public health and safety or improved property;
- The costs are for a limited timeframe based on the emergency or exigency of the circumstances; and
- The Applicant tracks and documents the additional costs.

Increased operating costs that may be eligible for a limited time, include but are not limited to, costs for:

- Generators at a hospital or police station
- Water testing and treatment, including supplies, in the immediate aftermath of the incident to counter a specific threat
- Fuel for increased use of a pumping station

- EOC facility costs (e.g., utilities)

Increased operating costs that are ineligible, even for a limited time, include but are not limited to, costs for:

- Patient care, except as noted in [Chapter 7:II.N, Medical Care](#)
- Administrative activities
- Provision of food, except as noted in [Chapter 7:II.L, Supplies and Commodities](#); and [M, Meals](#)
- Costs related to staff that were retained to work additional hours, but did not perform eligible Emergency Work
- Obtaining electrical power from an alternate source
- Obtaining water from an alternate source
- School make-up days, including contracted costs for bus service for make-up days
- Provision of school bus service including fuel or mileage for transporting students from alternate locations or to alternate schools or temporary facilities
- Modification or construction of a new landfill to add landfill capacity

For PNPs, operating costs are generally ineligible even if the services are emergency services, unless the PNP performs an emergency service at the request of and certified by the legally responsible government entity. In such case, FEMA provides PA funding through that government entity as the eligible Applicant.

G. Emergency Public Transportation and Communication (DFA only)

A State, Tribal, or local government may provide emergency communication services and public transportation when existing systems are damaged to the extent vital functions of community life or incident response are disrupted. The costs of these services are ineligible for reimbursement.²²⁹ However, FEMA may provide short-term DFA for these services.²³⁰

H. Flood Fighting

Flood fighting activities may include, but are not limited to, sandbagging, dewatering behind a levee by breaching or pumping, or increasing the height of a levee. These activities are eligible if necessary to reduce an immediate threat to life, public health and safety, or improved property. These activities are eligible even if they are associated with a facility that is eligible for the USACE RIP, as USACE cannot reimburse the Applicant for flood fighting. However, they are ineligible if associated with flood control works under the specific authority of NRCS.

The repair of deliberate breaches made by the Applicant to accomplish dewatering is eligible as part of the Emergency Work project.

Dewatering agricultural and natural areas behind levees and other water control structures is ineligible.

²²⁹ Transportation costs for the purpose of evacuation are eligible for reimbursement as described in [Chapter 7:II.O, Evacuation and Sheltering](#).

²³⁰ Stafford Act §§ 418 and 419, 42 U.S.C. §§ 5185 and 5186; 44 C.F.R. §§ 206.225(c) and (d).

I. Emergency Operations Centers

The Applicant may use its EOC to direct and coordinate resources and response activities for a period of time. Response activities conducted at EOCs are eligible provided they are associated with eligible work. Costs associated with operating the EOC are also eligible, including, but not limited to:

- Increased utility costs
- Costs to lease a facility
- Supply costs
- Meal costs, as described in [Chapter 7:II.M, Meals](#)

J. Emergency Access

There are times when the incident causes damage or debris blockage to access routes to an essential community service, or to a community with survivors. If the extent of damage or blockage makes these areas inaccessible, work related to providing access is eligible. This includes clearing debris from or conducting emergency repairs to an access facility, such as a road or bridge. Eligible work is limited to that necessary for the access to remain passable.

Private roads are those that are not owned or operated by or otherwise the legal responsibility of a local, county, Tribal, Territorial, State, or Federal entity. Clearance of debris from private roads including orphan roads, roads in gated communities, homeowners' association roads, etc. is in the public interest if the debris impairs emergency access by local emergency responders, ambulances, fire, and police. For example, downed trees may be cut and moved off the roadway. Eligible work is limited to that necessary for roads to remain passable but might include removal and disposal during the initial pass as necessary to ensure emergency access. Otherwise, the eligibility of debris removal is determined based on the criteria in [Chapter 7:I, Debris Removal \(Category A\)](#). The Applicant is not required to submit documentation demonstrating that debris clearance is in the public interest.

The Applicant must complete all necessary legal processes or obtains rights-of-entry and agreements to indemnify and hold harmless the Federal Government.

Emergency repairs to privately-owned roads, including those within gated communities, are eligible only when all of the following conditions are met:

- There is no other access point;
- Repair of the damage economically eliminates the need for temporary housing; and
- The Applicant completes all legal processes and obtains rights-of-entry and agreements to indemnify and hold harmless the Federal Government.

Upon submittal of its claim, the Applicant must include documentation supporting that it met the conditions above in order for the work to be eligible.

Debris Clearance versus Debris Removal

Debris Clearance is the clearance of debris to allow passage only. It does not include hauling or disposing of the debris. Debris clearance is often referred to as “cut and toss” or “push”.

Debris Removal includes hauling and disposing of debris at a temporary or final disposal site.

K. Hazardous Materials

Removal and disposal of pollutants and hazardous substances are eligible. Eligible activities include:

- Separation of hazardous materials from other debris
- Specialized procedures for handling and disposing of hazardous materials
- Control or stabilization of the hazardous material
- Pumping water contaminated with the hazardous material
- Clean-up and disposal of the hazardous material

Testing for contaminants in water, air, or soil necessary to ensure elimination of the immediate threat is eligible in accordance with [Chapter 7:II.F, *Expenses Related to Operating a Facility or Providing a Service*](#). However, testing for the purpose of long-term cleanup actions is ineligible.

The Applicant must comply with Federal, State, Tribal, and local government environmental requirements for handling hazardous materials. Before handling or disposing of hazardous materials, the Applicant should contact the appropriate Federal, State, Tribal, or local agency to obtain required permits, notify proper agencies of hazardous materials storage, and to coordinate the creation of any required facility specific Emergency Response Plans for spills, safety and proper handling. Additionally, appropriate certified hazardous waste specialists should handle, capture, recycle, reuse, or dispose of hazardous materials. When providing PA funding for work involving the handling of hazardous materials, FEMA must ensure compliance with the Resource Conservation and Recovery Act (RCRA).

Additionally, the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) authorizes the Federal Government to respond directly to releases or threatened releases of hazardous substances that may endanger public health or the environment. Under CERCLA and the Clean Water Act (CWA), EPA²³¹ and the USCG have the authority to respond to actual or potential discharges of oil, hazardous substances, pollutants, and contaminants that may present an imminent and substantial danger to public health or welfare. EPA has responsibility for responses in the inland zone²³² and the USCG has responsibility for responses in the coastal zone.²³³ Response actions may include containment, stabilization, decontamination, collection (e.g., orphan tanks, drums), and disposal.

²³¹ See Recovery Policy 9523.8, *Mission Assignments for ESF#10*, for discussion on U.S. Environmental Protection Agency (EPA) and U.S. Coast Guard (USCG) authority with respect to removal of hazardous waste: www.fema.gov/media-library/assets/documents/136089.

²³² The inland zone is the environment inland of the coastal zone, excluding the Great Lakes and specified ports and harbors on inland rivers. Precise boundaries are identified in Federal regional contingency plans.

²³³ The coastal zone includes coastal waters (including the lands therein and thereunder) and the adjacent shorelands (including the waters therein and thereunder), strongly influenced by each other and in proximity to the shorelines of coastal States, including islands, transitional and intertidal areas, salt marshes, wetlands, and beaches.

L. Supplies and Commodities

The purchase of supplies and commodities required for emergency protective measures is eligible.

Costs related to the Applicant purchasing supplies or using its own stock to perform Emergency Work are eligible and reimbursed in accordance with [Chapter 6:III.5, *Supplies*](#). Examples include, but are not limited to, safety equipment, personal protective equipment, radios, power tools, sand, and tarps.

Purchasing and packaging life-saving and life-sustaining commodities and providing them to the impacted community are eligible. Examples of such commodities include, but are not limited to, food, water, ice, personal hygiene items, cots, blankets, tarps, plastic sheeting for roof damage, and generators, as well as food and water for household pets and service animals. The cost of delivering these same commodities to unsheltered residents in communities where conditions constitute a level of severity such that these items are not easily accessible for purchase is also eligible. This includes food and water for household pets whose owners are in shelters.

The cost of leasing distribution and storage space for the commodities is also eligible.

M. Meals

Applicants often provide meals for emergency workers. Provision of meals, including beverages and meal supplies, for employees and volunteers engaged in eligible Emergency Work, including those at EOCs, is eligible provided the individuals are not receiving per diem and one of the following circumstances apply:

- Meals are required based on a labor policy or written agreement that meets the requirements of [Chapter 6, *Cost Eligibility*](#);
- Conditions constitute a level of severity that requires employees to work abnormal, extended work hours without a reasonable amount of time to provide for their own meals; or
- Food or water is not reasonably available for employees to purchase.

FEMA only reimburses the cost of meals that are brought to the work location and purchased in a cost-effective and reasonable manner, such as bulk meals. FEMA does not reimburse costs related to group outings at restaurants or individual meals.²³⁴

N. Medical Care

When the emergency medical delivery system within a declared area is destroyed, severely compromised or overwhelmed, FEMA may fund extraordinary costs associated with operating emergency rooms and with providing temporary facilities for emergency medical care of survivors. Costs associated with emergency medical care should be customary for the emergency

²³⁴ FEMA reimburses meal costs as part of a contract in accordance with the contract terms provided it meets the requirements in [Chapter 4:VIII, *Procurement and Contracting Requirements*](#).

medical services provided. Costs are eligible for up to 30 days from the declaration date unless extended by FEMA.

Eligible medical care includes, but is not limited to:

- Triage and medically necessary tests and diagnosis
- Treatment, stabilization, and monitoring
- First-aid assessment and provision of first aid
- A one-time 30-day supply of prescriptions for acute conditions or to replace maintenance prescriptions
- Vaccinations for survivors and emergency workers to prevent outbreaks of infectious and communicable diseases
- Durable medical equipment
- Consumable medical supplies
- Temporary facilities, such as tents or portable buildings for treatment of survivors
- Leased or purchased equipment for use in temporary medical care facilities
- Security for temporary medical care facilities
- Use of ambulances for distributing immunizations and setting up mobile medical units

Long-term medical treatment is ineligible. FEMA determines the reasonableness of these costs based on Medicare's cost-to-charge ratio (a ratio established by Medicare to estimate a medical service provider's actual costs in relation to its charges).

FEMA does not provide PA funding for these costs if underwritten by private insurance, Medicare, Medicaid, or a pre-existing private payment agreement.²³⁵ The Applicant must take reasonable steps to provide documentation on a patient-by-patient basis verifying that insurance coverage or any other source funding including private insurance, Medicaid, or Medicare, has been pursued and does not exist for the costs associated with emergency medical care and emergency medical evacuations.

Ineligible costs include:

- Medical care costs incurred once a survivor is admitted to a medical facility on an inpatient basis
- Costs associated with follow-on treatment of survivors beyond 30 days of the declaration
- Administrative costs associated with the treatment of survivors

Terminology

Durable medical equipment is reusable medical equipment necessary for the treatment of an illness or injury or to prevent a patient's further deterioration. The equipment includes, but is not limited to:

- Oxygen equipment
- Wheelchairs
- Walkers
- Hospital beds
- Crutches
- Other medical equipment

Consumable medical supplies are medical supplies that are ingested, injected, or applied or are for one-time use only, including, but not limited to:

- Medical supplies
- Medications
- Diapers
- Adult incontinence briefs
- Bandages

²³⁵ Stafford Act § 312, 42 U.S.C. § 5155.

O. Evacuation and Sheltering

Evacuation and sheltering of survivors are eligible activities. This includes household pets and service and assistance animals, but not exhibition or livestock animals.

1. Evacuation Including Accessible Transportation and Emergency Medical Transportation

Transportation to evacuate (and subsequently return) survivors, household pets, service animals, assistance animals, luggage, and durable medical equipment is eligible. This includes emergency medical transportation. The mode of transportation should be customary and appropriate for the work required.

Eligible activities include, but are not limited to:

- Transferring patients from inoperable, compromised, or overwhelmed eligible medical or custodial care facilities to another medical facility or to a shelter.
- Transferring patients back to original medical or custodial care facility, when appropriate.
- Transporting survivors, including shelterees, who require emergency medical care to and from the nearest existing or temporary medical care facility equipped to adequately treat the medical emergency. Transport may include emergency air, sea, or ground ambulance services if necessary.
- Use of equipment such as buses, trucks, or other vehicles (including accessible vehicles) to provide one-time transportation to evacuate survivors and their household pets and service and assistance animals to emergency shelters from pre-established pick-up locations. This includes standby time for drivers and contracted equipment while waiting to transport survivors.
- Paratransit transportation services, such as vans, minibuses, and buses, (including accessible vehicles) to transport senior citizens, individuals with disabilities (including mobility disabilities) or access and functional needs, individuals in nursing homes and assisted-living facilities, and homebound individuals impacted by the incident.
- Tracking of evacuees, household pets, service animals, luggage, and durable medical equipment. This includes the use of animal microchips for the purpose of tracking evacuated animals.
- Food and water provided during transport.

Terminology

Household pets are domesticated animals that:

- Are traditionally kept in the home for pleasure rather than for commercial purposes
- Can travel in commercial carriers
- Can be housed in temporary facilities

Examples are dogs, cats, birds, rabbits, rodents, and turtles.

Household pets do not include reptiles (except turtles), amphibians, fish, insects, arachnids, farm animals (including horses), or animals kept for racing purposes.

Service animals are dogs that are individually trained to do work or perform tasks for people with disabilities or access and functional needs.

Assistance animals are animals that work, provide assistance, or perform tasks for the benefit of a person with a disability, or provide emotional support that alleviates identified symptoms or effects of a person's disability.

Although dogs are the most common type of assistance animal, other animals can also be assistance animals.

- Emergency medical care provided during transport, including emergency medical personnel and supply costs.
- Stabilization of individuals injured during evacuation.
- Costs incurred in advance of an incident necessary to prepare for evacuations in threatened areas. Costs may include mobilization of ambulances and other transport equipment. Contracts for staging ambulance services must be part of the State, Tribal, or regional evacuation plan. Costs of staging ambulances are eligible even if the incident does not impact the area normally served by those ambulances. PA funding for activating, staging, and using ambulance services ends when any of the following occurs:

- FEMA, and the State or Tribal Government, determines that the incident did not impact the area where it staged ambulances;
- Evacuation and return of medical patients and individuals with disabilities or access and functional needs is complete; or
- The immediate threat caused by the incident has been eliminated and the demand for services has returned to normal operation levels.

FEMA does not provide PA funding for ambulance services that are covered by private insurance, Medicare, Medicaid, or a pre-existing private payment agreement.²³⁶

2. Sheltering

FEMA provides PA funding to State, Tribal, and local government Applicants for costs related to emergency sheltering for survivors. Typically, such sheltering occurs in facilities with large open spaces, such as schools, churches, community centers, armories, or other similar facilities. FEMA refers to these shelters as congregate shelters.

Eligible costs related to sheltering include, but are not limited to, the items listed below, as necessary based on the type of shelter and the specific needs of the shelterees. If any of the items listed are donated, including labor, the Applicant may offset the non-Federal share of its eligible Emergency Work projects in accordance with [Chapter 6:XIV, Donated Resources](#). Sheltering and caring for household pets is only eligible while the pet owner is in an emergency shelter.

(a) Shelter Facility Costs

- Facility lease or rent, including space for food preparation
- Utilities such as power, water, and telephone
- Minor facility modifications if necessary to make the facility habitable, compliant with the Americans with Disabilities Act (ADA), functional as a child care facility, or functional as an animal shelter
- Restoration to return the facility to its condition prior to use
- Generator costs
- Secure storage space for medical supplies

²³⁶ Ibid.

If an eligible State, Tribal, or local government Applicant owns or leases the shelter facility, and a volunteer agency operates the shelter, the facility costs described above are eligible. However, the labor costs for the volunteer agency's workers are ineligible (except as a donated resource in accordance with the criteria in [Chapter 6:XIV, Donated Resources](#)).

(b) *Shelter Staff Costs*

- Medical staff
- Personal assistance service staff
- Veterinary and animal care staff
- Public Information Officer
- Social workers
- Food service workers
- Custodial and facilities staff
- National Guard personnel (See [Chapter 6:XI, National Guard](#))

(c) *Shelter Supplies and Commodities*

- Hot and cold meals, snacks, beverages, and related supplies for survivors
- Cooking and serving supplies
- Food, water, and bowls for household pets and service and assistance animals
- Durable medical equipment
- Consumable medical supplies
- Medication for animal decontamination and parasite control
- Infant formula, baby food, and diapers
- Refrigerators, microwaves, and crock pots
- Cots, cribs, linens, blankets, pillows, tables, and chairs
- Crates, cages, leashes, and animal transport carriers
- Personal hygiene kits with items such as shampoo, soap, toothpaste, a toothbrush, towels, and washcloths
- Animal cleaning tables and supplies
- Televisions or radios – one per 50 shelterees
- Basic cable service
- Computers – one per 25 shelterees
- Internet service, including WiFi
- Washers and dryers – one of each per 50 shelterees
- Toys and books

(d) *Shelter Services*

Shelter services are eligible for the time the facility is actively used to shelter survivors.

- Shelter management
- Supervision of paid and volunteer staff
- Cleaning the shelter, linens, and animal crates
- Shelter safety and security
- Use of equipment, such as ambulances, buses, trucks, or other vehicles, to provide sheltering support

- Phone banks for survivors
- Care for survivors with disabilities or access and functional needs, including the provision of the following personal assistance services:
 - Grooming, eating, walking, bathing, toileting, dressing, and undressing
 - Transferring (e.g., movement between a cot and wheelchair or wheelchair to restroom facilities)
 - Maintaining health and safety
 - Assistance with self-administering medications
 - Communicating or accessing programs and services
- Emergency medical and veterinary services for sheltered survivors, household pets, and service and assistance animals, including:
 - Emergency and immediate life stabilizing care, including necessary prescriptions (not to exceed 30-day supply)
 - Triage, medically necessary tests, diagnosis, treatment, stabilization, and monitoring
 - First-aid assessment
 - Provision of first aid and health information
 - Care for evacuees with chronic conditions
 - Administering vaccinations to shelterees and workers for transmissible or contagious diseases, including, but not limited to, tetanus and hepatitis
 - Administering vaccinations to household pets, and service and assistance animals, for transmissible or contagious diseases, including, but not limited to, Bordetella (kennel cough). The vaccinations need to be effective while the animal is in the shelter.
 - Medical waste disposal
 - Mental-health care
 - Outpatient costs for sheltered survivors requiring emergency life-sustaining treatment not available at the shelter for the period of time that a survivor is housed in the shelter. Eligible outpatient services are limited to:
 - Physician services in a hospital outpatient department, urgent care center, or physician's office;
 - Related outpatient hospital services and supplies, including X-rays, laboratory and pathology services, and machine diagnostic tests; and
 - Local professional transport services to and from the nearest hospital equipped to adequately treat the emergency.
- Sheltering self-evacuees (self-evacuee transportation costs are ineligible)
- Costs paid to the American Red Cross (ARC) or other Non-governmental Organizations (NGO) to operate shelters under a written agreement [costs that ARC or other NGOs incur under their own organizational mission (i.e., independent of any Federal, State, Tribal, or local request) are ineligible for reimbursement]

(e) *Non-congregate Sheltering*

Generally, FEMA does not provide PA funding for emergency sheltering in non-congregate environments, which are locations where each individual or household has living space that offers some level of privacy (e.g., hotels, motels, casinos, dormitories, retreat camps, etc.). In limited circumstances, such as when congregate shelters are not available or sufficient, FEMA may reimburse costs related to emergency sheltering provided in non-congregate environments. FEMA's Assistant Administrator for Recovery has the authority to approve this policy exception. The Applicant must submit a request for PA funding for costs related to emergency, non-congregate sheltering and obtain FEMA approval prior to sheltering survivors in non-congregate facilities. At a minimum, the Applicant should include the following information in its request:

- Justification for the necessity of non-congregate sheltering;
- Whether the State or Tribal Government has requested Transitional Sheltering Assistance;
- The type of non-congregate sheltering available and which type the Applicant intends to utilize;
- An analysis of the available options with the associated costs of each option; and
- The timeframe requested (i.e., date of activation and length of time).²³⁷

FEMA limits any approval to that which is reasonable and necessary to address the needs of the incident (usually no more than 30 days). FEMA determines the eligible costs based on the contractual agreement, including reimbursement for repairing damage if it is the Applicant's legal responsibility based on the agreement. The Applicant must obtain FEMA approval for any time extensions, which should include a detailed justification for the continued need and a revised analysis of options, including the costs for each option.

If FEMA approves the request, the Recipient must provide sufficient data and documentation to establish eligibility (including the need for non-congregate sheltering resulting from the disaster, reasonableness, and costs). Sufficient documentation includes:

- The number of non-congregate shelterees:
 - By age groups 0-2, 3-6, 7-12, 13-17, 18-21, 22-65, and 66+;
 - With disabilities or access and functional needs;
 - Registered for assistance from FEMA's IA Programs; and
 - Referred to State or non-governmental organization programs for assistance.
- Number of household pets, and assistance and service animals sheltered, and the type of shelter provided (e.g., stand alone, co-located, or co-habitational);
- Length of stay per "household unit;" and
- Number of meals and other services provided.

Transitional Sheltering Assistance Program

FEMA's Transitional Sheltering Assistance (TSA) is a form of short-term non-congregate sheltering assistance provided as Direct Federal Assistance. The intent of TSA is to provide temporary sheltering for survivors transitioning from emergency shelters to temporary or permanent housing solutions. Additional information is available in FEMA's Individual Assistance Program and Policy Guide at www.fema.gov/media-library/assets/documents/177489.

²³⁷ 44 C.F.R. §§ 206.225(a)(2) and 206.202(c) and (d).

As with any activity, lack of full documentation may result in FEMA determining that some or all of the costs are ineligible.

3. Child Care Services

FEMA reimburses State, Tribal, and local governments for the cost of providing licensed child care services to support sheltered populations. This includes the cost of the labor, facility, supplies, and commodities. Additionally, FEMA may provide PA funding for the cost of child care services that the eligible Applicant provides to other survivors, and beyond the period of emergency sheltering, with certification that temporary child care is necessary to meet immediate threats to life, public health and safety, or property.

Child care includes services such as:

- Day care for children
- Before- and after-school care

The Applicant may provide these services within a shelter facility or in a separate facility, as appropriate. FEMA PA and IA staff coordinate to ensure no duplication with IHP assistance.

4. Host-State or Host-Tribe Evacuation and Sheltering

If the impacted State or Tribe (Impact-State or Impact-Tribe)²³⁸ has evacuation and sheltering needs beyond its ability to address within its jurisdictional area, it may request assistance either from another State or Tribal Government (Host-State or Host-Tribe)²³⁹ through mutual aid agreements such as EMAC, or from FEMA.

If the Impact-State/Tribe requests assistance directly from another State or Tribal Government, FEMA reimburses costs based on the mutual aid agreement as described in [Chapter 6:IX, Mutual Aid](#). FEMA may also provide PA funding to the Host-State/Tribe directly, even if the Impact-State/Tribe already requested assistance directly from that Host-State/Tribe, provided that:

- The Impact-State/Tribe requested the assistance;
- The Host-State/Tribe agrees to accept evacuees based on need—without restriction;
- An authorized official from the Host-State/Tribe transmits a written agreement to FEMA; and

²³⁸ Impact-State or Impact-Tribe means the State or Tribal Government for which the President declared an Emergency or Major Disaster and requested FEMA assistance because of a need to evacuate and/or shelter affected individuals outside the State.

²³⁹ Host-State or Host-Tribe means a State or Tribal Government that by agreement with FEMA provides sheltering or evacuation support to evacuees from an Impact-State or Impact-Tribe.

- The Governor or Tribal Chief Executive of the Host-State/Tribe signs the FEMA/Host-State or FEMA/Host-Tribe Agreement pursuant to the terms and conditions in 44 C.F.R. § 206.44, FEMA-State Agreements, to establish the Host-State/Tribe as the Recipient.²⁴⁰

If the Impact-State/Tribe requests assistance from FEMA, FEMA determines whether potential Host-States/Tribes have sufficient capability to meet some or all of the sheltering and evacuation needs of the Impact-State/Tribe. If FEMA determines a Host-State/Tribe has sufficient capability and the Host-State/Tribe meets the three conditions described above, FEMA provides PA funding to the Host-State/Tribe directly.²⁴¹

When FEMA provides PA funding directly to the Host-State/Tribe, FEMA reimburses 100 percent of the Host-State/Tribe's eligible costs, including straight-time and benefits of the Host-State/Tribe's permanent employees²⁴² so that it does not have any out-of-pocket costs. In these cases, the Impact-State/Tribe is responsible for the non-Federal cost share and must subsequently reimburse FEMA for the non-Federal cost share of the eligible costs incurred by the Host-State/Tribe. The non-Federal cost share is based on the Category B cost-share amount designated in the declaration. The Impact-State/Tribe cannot offset its non-federal cost share with the Host-State/Tribe's volunteer labor.

In addition to the other eligible evacuation and sheltering costs described in this chapter, FEMA also reimburses the Host-State/Tribe for the following:

- Straight-time and benefits of entities' employees that provide assistance under a mutual aid agreement or a contract with the Host-State/Tribe such as a local government or PNP.
- Costs to provide the requested shelter capacity, even if the shelter was underused or not used at all.
- Costs related to arrest and incarceration of evacuees who commit unlawful acts in the Host-State/Tribe congregate shelter, including costs incurred by on-duty law enforcement officers in order to detain, take into custody, or make an arrest (costs of chemical tests, processing, charging, booking, and holding such persons are ineligible costs). Costs to transport a detainee back to the shelter is eligible if the individual was not charged.
- When patients in hospitals in the Impact-State/Tribe are evacuated, transported, and admitted into hospitals in the Host-State/Tribe through mission assignment with HHS, and the patients are treated and discharged but require follow-on care while awaiting transport, and shelters are not available, the costs that the Host-State/Tribe's hospital incurs for hotel rooms during patients' follow-on care until the patients can be transported back to the Impact-State/Tribe, provided that Medicare, Medicaid, or private insurance does not cover these costs.
- Bus or shuttle transport to pick up evacuees at the airport, train station, or bus terminal when the expected plane, train, or bus is re-routed, canceled, or rescheduled.
- Ambulance costs for hospital-to-hospital transfers, provided it is a transfer within the Host-State/Tribe.
- When the Impact-State/Tribe determines that it is safe for re-entry, it coordinates with the Host-State/Tribe and FEMA to return evacuees, household pets, and service and

²⁴⁰ 44 C.F.R. § 206.202(f)(1)(i).

²⁴¹ 44 C.F.R. § 206.208(c)(3).

²⁴² 44 C.F.R. § 206.202(f)(1)(ii).

assistance animals to the Impact-State/Tribe by air, rail, or bus. Return transportation costs are eligible along with food, water, and security during transport.

- Return transportation costs for family members of the Impact-State/Tribe evacuee who was admitted to a hospital after the congregate shelters close.
- When evacuees are discharged from a hospital after all congregate shelters have closed and transportation cannot be arranged for departure on the same day discharged, FEMA reimburses up to 5 nights of hotel lodging while awaiting return transport.
- FEMA reimburses a State agency from the Impact-State/Tribe for transportation costs and related expenses to transport deceased evacuees and accompanying family members to the Impact-State/Tribe. The cost of the State/Tribe-mandated embalming or cremation of the body prior to return are also eligible.

The Host-State/Tribe must determine whether any ambulance or medical service costs are covered by a patient's private insurance, Medicare, Medicaid, or a pre-existing private payment agreement as FEMA deducts this amount from the Host-State/Tribe's eligible cost.

Fees that the Host-State/Tribe waives for the use of State parks by self-evacuees with recreational vehicles (RVs) are ineligible. Additionally, purchase and distribution of gas cards, bus passes, cash vouchers, debit cards, food vouchers, or direct payments to evacuees are ineligible.

P. Infectious Disease Incident

The HHS Centers for Disease Control and Prevention (CDC) has primary authority to enable support and assistance to States or Tribal Governments in response to an infectious disease incident. FEMA may provide assistance for the rescue, evacuation, and movement of persons; movement of supplies; and care, shelter, and other essential needs of affected human populations. Any assistance provided by FEMA in response to an infectious disease incident is done in coordination with the CDC. The Office of Response and Recovery Fact Sheet FP 104-009-001, *Infectious Disease Event*, provides additional details.²⁴³

Q. Mosquito Abatement

Mosquito abatement measures may be eligible when a State, Tribal, or local government public health official validates in writing that a mosquito population poses a specific health threat as discussed further in [Appendix G: Mosquito Abatement](#). FEMA consults with the CDC to determine the eligibility of mosquito abatement activities. FEMA only provides PA funding for the increased cost of mosquito abatement. This is the amount that exceeds the average amount based on the last 3 years of expenses for the same period.

R. Residential Electrical Meter Repair

In rare cases, to reduce the number of survivors needing shelter, FEMA may provide limited PA funding to a State, Tribal, or local government to repair residential electrical meters. To receive PA funding, the State, Tribal, or local government must:

- Issue a finding of an immediate threat to safety due to loss of power caused by damaged meters or weather heads;

²⁴³ www.fema.gov/media-library/assets/documents/99710.

- Request participation in this program; and
- Receive FEMA approval for each identified property.

Only residential properties are eligible for this program. Commercial properties, including apartment complexes, are ineligible.

If approved, the applicable State, Tribal, or local government must:

- Obtain a signed right-of-entry from each residential property owner;
- Take reasonable measures to document any known insurance proceeds;
- Contract with licensed electricians to perform electrical meter repair;
- Coordinate the work with the property owner, the power company, and the contracted electricians; and
- Be responsible for payment of the non-Federal share.

Eligible work is limited to that associated with repairing damage to items otherwise installed and maintained by a homeowner's electrician, including the weather head, service cable, and meter socket.

FEMA generally provides PA funding up to \$800 per meter per residential dwelling. This amount includes equipment, materials, labor, and inspection fees to restore the meter to current local codes. It is also inclusive of limited debris clearance if necessary to access the damaged meter or weather head. Removal and disposal of the debris is ineligible. Eligible work is limited to that completed within 30 days from the declaration date unless extended by FEMA.

FEMA does not provide PA funding for repair costs if it is not safe to restore power to the residence or if other impacts would restrict the dwelling from being habitable even after power restoration.

FEMA PA and IA staff coordinate closely to ensure FEMA does not fund the same work under both programs.

S. Safety Inspections

Post-incident safety inspections for public and private facilities are eligible, as well as posting appropriate placards (e.g., "red-tagging" a building that is unsafe).

The specific purpose of the inspection must be to determine whether the facility is safe for entry, occupancy, and lawful use. The Applicant must clearly substantiate that the purpose of the inspection was for safety and not to assess damage. Building inspections are ineligible if the purpose of the inspection is to:

- Determine whether the building is Substantially Damaged for the purpose of compliance with the community's floodplain management ordinance;
- Determine whether the building needs to be elevated or relocated, in accordance with the community's floodplain management ordinance; or
- Ensure that repairs are completed in accordance with the community's building code or standard.

T. Animal Carcasses

Removal and disposal of animal carcasses, including interim processing,²⁴⁴ is eligible. If the removal and disposal is conducted as part of the overall debris removal operations, the work may be funded as Category A.

FEMA may require certification from the State, Tribal, or local government health department, HHS, or the U.S. Department of Agriculture (USDA) that a threat to public health and safety exists.

When few in number, smaller animal carcasses (e.g., rodents, skunks, or possums) do not usually pose an immediate threat to public health or safety. Removal and disposal of these carcasses is ineligible.

FEMA does not provide PA funding when another Federal agency has authority to provide assistance for carcass removal and disposal. NRCS has authority to remove animal carcasses and to provide technical assistance to the Applicant under its EWP program. The USDA's Farm Service Agency may provide assistance for farmland debris cleanup. The EPA and USCG have authority to provide technical assistance and to remove animal carcasses contaminated with oil, hazardous substances, pollutants, or contaminants.²⁴⁵

U. Demolition of Private Structures

Emergency demolition of structures located on private property may be eligible when partial or complete collapse is imminent, and that collapse poses an immediate threat to the general public.

In some instances, restricting public access to an unsafe structure and the surrounding area, such as securing the area with a fence, is sufficient to alleviate the immediate threat and is more cost-effective than demolition. In these cases, demolition is ineligible.

If a structure is condemned prior to the incident, emergency protective measures related to that structure are ineligible.

FEMA reviews the Applicant's demolition process for compliance with all applicable EHP laws, regulations, and EOs.

1. Conditions for Eligibility

For demolition to be eligible, the Applicant must:

- Certify that the structures are unsafe and pose an immediate threat to lives or public health and safety.
- Provide documentation to confirm its legal authority and responsibility to enter private property and demolish privately owned unsafe structures. This includes:
 - Citation of the law, ordinance, code, or emergency powers for which it is exercising its legal authority to demolish privately owned unsafe structures. The authority cited must be applicable to the structural condition representing the immediate threat and not merely the Applicant's uniform level of services.

²⁴⁴ Interim processing may include burning, incinerating, rendering, mounding, composting, or other pre-processing activities.

²⁴⁵ See Recovery Policy 9523.8, *Mission Assignments for ESF#10*, for discussion on EPA and USCG authority with respect to removal of hazardous waste: www.fema.gov/media-library/assets/documents/136089.

- Confirmation that a legally authorized official of the Applicant has ordered the exercise of public emergency powers or other appropriate authority to enter onto private property in the designated area in order to demolish privately-owned unsafe structures and remove the resulting debris.
- Indemnify the Federal Government and its employees, agents, and contractors from any claims arising from the demolition of privately-owned unsafe structures and removal of the resulting debris.

Before FEMA will provide PA funding, the Applicant must provide confirmation that it satisfied all legal processes and obtained permission requirements from the property owners (rights-of-entry) and agreements to indemnify and hold harmless the Federal Government. Additionally, the Applicant must provide documentation to support that it obtained all necessary permits and complied with EHP requirements.

2. Commercially Owned Structures

Demolition of structures owned by commercial enterprises, including businesses, apartments, condominiums, and mobile homes in commercial trailer parks, are generally ineligible as it is expected that the commercial enterprises retain insurance that cover the cost of demolition. In very limited, extraordinary circumstances, FEMA may provide an exception. In such cases, the Applicant must meet the requirements of [Chapter 7:I.F, Debris Removal from Private Property](#).

3. Eligible Work

If FEMA approves the demolition of private structures, eligible work associated with the demolition includes, but is not limited to:

- Capping wells
- Pumping and capping septic tanks
- Filling open below-grade structures, such as basements and swimming pools
- Testing for hazardous materials
- Securing utilities
- Obtaining permits and licenses
- Performing title searches

Fees for permits, licenses, and titles issued directly by the Applicant are ineligible unless the Applicant demonstrates that the fees are above and beyond its normal administrative costs. Overtime labor directly related to issuing these permits, licenses, and titles for facilities that are eligible for demolition is eligible.

The following work is also eligible and may be funded as Category A if the removal and disposal is conducted as part of the overall debris removal operations:

- Removing demolition debris, including personal effects
- Removing hazardous materials, such as asbestos and household hazardous waste

The Applicant should work with the property owner to pursue and recover insurance proceeds and credit FEMA the Federal share of any insurance proceeds recovered. In some circumstances, the property owner may be eligible for IA funding. FEMA PA and IA staff coordinate closely to ensure FEMA does not fund the same work under both programs.

4. Ineligible Work

Ineligible work associated with the demolition of private structures includes, but is not limited to:

- Removal or covering of concrete pads and driveways except for structures in a FEMA-funded buyout program
- Removal of slabs or foundations that do not present a health or safety hazard, except for structures in a FEMA-funded buyout program through the HMGP (the removal of Substantially Damaged structures and associated facilities acquired through HMGP may be eligible as Category A, Debris Removal).

V. Temporary Relocation of Essential Services

If the Applicant provides essential community services at a facility that is unsafe, inaccessible, or destroyed as a result of the incident, temporary relocation of these services to another facility is eligible.²⁴⁶ Essential community services are those services of a governmental nature that are necessary to save lives, protect property and the public, and preserve the proper function and health of the community at large. These services differ from the list of eligible PNP essential social services. FEMA evaluates the criticality of the service and safety of the facility to determine the need for temporary relocation. FEMA does not incorporate funds from temporary facilities into fixed cost projects.

1. Eligible for Temporary Relocation:

Essential community services provided by an eligible Applicant are eligible to be relocated. The following services are considered essential community services (these differ from the list of PNP essential social services):

- Education
- Election and polling
- Emergency, including police, fire, and rescue
- Homeless and domestic violence shelters
- Emergency medical care
- Prison
- Utility
- Other facilities that provide public health and safety services of a governmental nature

Services provided in administrative and support facilities essential to the provision of the essential community service are also eligible for relocation. These include administration buildings, student housing, hospital and prison laundry and cooking facilities, parking, and storage if items are needed on-site. Athletic fields and student unions are not considered essential administrative or support services and are ineligible.

If the Applicant provides the service at a leased, private facility prior to the incident, the service is still eligible to be relocated.

²⁴⁶ Stafford Act § 403(a)(3)(D), 42 U.S.C. § 5170b.

2. Ineligible for Temporary Relocation

Facilities that do not provide essential community services are ineligible for temporary relocation. These include facilities and services such as museums, zoos, community centers, shelter workshops, performing arts centers, recreation and parking, athletic stadiums, houses of worship, housing and residential services, custodial care, assisted living, senior citizen centers, alcohol and drug rehabilitation, child care, libraries, research and warehouse facilities, burial, vocational, academic, athletic, political training, and student union buildings.

3. Determining Eligibility of Temporary Relocation

FEMA determines the eligibility of relocating services to another facility based on the safety of the damaged facility as follows:

- If the facility can be made usable with the performance of emergency protective measures or minor repairs, a temporary facility may not be eligible.
- If the damage is to the extent that it cannot be occupied safely, and restoration cannot be completed without suspending operations of the facility for an unacceptable period of time, then a temporary facility may be eligible.
- If the facility is not damaged but lacks a critical utility or operational item, such as potable water, electricity, or road access, and a temporary facility will restore services to the community before the restoration of the disrupted critical utility or operational item at the current site, then a temporary facility may be eligible.

The capacity of the temporary facility must not exceed the pre-disaster capacity of the facility that housed the displaced services. The Applicant must use the temporary facility to provide the eligible service to the same extent and manner as was provided prior to the incident.

Relocation to a site that requires ground disturbance or alteration of an existing property requires EHP review before the Applicant implements the action.

FEMA does not require the Applicant to obtain and maintain insurance for temporary facilities.

If the Applicant has a facility that does not meet eligibility requirements for temporary relocation and the facility's damage is to such an extent that the contents are at risk, FEMA may provide PA funding for temporary space to store the contents as an emergency protective measure if the space is:

- Limited to an area necessary to house the contents;
- Used solely for storage; and
- Not intended for public access, alternate office space, exhibits, or other purposes.

FEMA is not responsible for damage that may occur to contents in temporary storage.

4. Lease, Purchase, or Construct

When deciding whether to rent or purchase space and equipment, the Applicant should choose the most economical option that meets its needs. The Applicant must provide FEMA with a cost analysis,²⁴⁷ which should include at least three options with cost estimates based on the timeline to restore the original facility. Cost estimates for leasing a facility must account for the entire timeline of the project. FEMA generally reimburses the least costly option of leasing,

²⁴⁷ 2 C.F.R. § 200.318(d).

purchasing, or constructing a temporary facility. However, FEMA also considers whether the least costly option is practical when determining eligibility (e.g., if the least costly option for a temporary school is to lease a building in another county, and the next least costly option is to install modular buildings on the current campus, FEMA may reimburse the cost of the modular buildings).

If the Applicant relocates a service from a facility it owns, the lease costs of a temporary facility are eligible if leasing is the least costly option. If the Applicant was leasing the damaged facility and had to temporarily relocate to another leased facility, the increase in rent is eligible.

Purchasing or constructing a temporary facility is eligible if FEMA confirms that it is the least costly option. With exception of modular or manufactured units, the Applicant must obtain FEMA approval prior to purchasing or constructing the facility.

5. Safe Rooms for Temporary School Facilities

Funding for accessible safe rooms as part of a temporary school facility may be eligible if the damaged school contained a safe room or other space that served as a storm shelter and there are no other cost-effective, reasonable alternatives available to address the safety needs of the students and faculty. If approved, the safe room capacity is based on student population and the number of faculty who are expected to use the temporary school facility. The capacity of the safe room cannot exceed the pre-disaster capacity of the safe room in the damaged school. The safe room should be available no later than the opening day of classes at the temporary facility.

If the Applicant wishes to seek funding for a safe room as part of a temporary school facility, it must obtain prior approval from FEMA. The request needs to include:

- A description of the safe room or safe space that was used as a storm shelter prior to the incident;
- The population of students and faculty that need access to the safe room;
- Verification that no other cost-effective reasonable alternatives are within proximity that can be used as a safe space for the school population; and
- An indication that the Applicant will have the safe room installed and operational when school resumes and students occupy the temporary classroom space.

Safe rooms provided as part of a temporary school facility must comply with the requirements of *Safe Rooms for Tornadoes and Hurricanes, Guidance for Community and Residential Safe Rooms* (FEMA P-361).²⁴⁸

The timeframe for providing PA funding for the temporary safe room space coincides with the approved timeframe for providing PA funding for the temporary school facility.

6. Temporary Relocation Costs

Eligible work or costs associated with the provision of temporary facilities include, but are not limited to:

- Rental or purchase of equipment necessary to continue the services in the temporary facility

²⁴⁸ www.fema.gov/media-library/assets/documents/3140.

- Reasonable alterations of the temporary facility, if required to make the space functional based on the pre-disaster use of the damaged facility
- Restoration of the temporary facility to its pre-disaster condition when no longer needed
- Moving expenses to and from the temporary facility
- Minimal life-safety or other building upgrades required by an applicable code or standard in effect at the time the temporary facility is purchased or leased
- Public outreach and messaging costs necessary to inform the public that the service will temporarily be provided at a different location

FEMA does not provide PA funding for utility, maintenance, or operating costs in a temporary facility, even if these costs increase.

7. Time Limitations

The regulatory time limitation for temporary facilities (Emergency Work) is 6 months from the declaration date.²⁴⁹

Depending on the extent of damage to the facility, the Applicant may be unable to restore the facility to its pre-disaster design and function within 6 months. Normally, the Recipient has the authority to extend the deadline for Emergency Work for up to 6 additional months.²⁵⁰ However, for temporary facilities, only FEMA has authority to approve any time extensions to the project deadline.

FEMA considers the timeframe necessary to restore the damaged facility when evaluating time extensions for temporary facilities. If the Applicant requests funding for a temporary facility and knows at that time that the restoration of the original facility will exceed 6 months, FEMA may approve additional time and funding up to 12 months. If the Applicant needs additional time beyond this 12-month deadline, it must submit a written time extension request that includes the status of work and a timeline for completion.

FEMA only approves additional time if the Applicant begins construction on the damaged facility within 12 months of the declaration date, unless circumstances beyond the control of the Applicant prevented the start of construction within this 12-month timeframe.

(a) *Improved Project*

If FEMA approves an Improved Project for a facility for which it also approved temporary relocation of the services to a temporary facility, the temporary facility is only eligible for PA funding for the estimated amount of time necessary to restore the facility to its pre-disaster design and function. If the actual time to restore the facility with the improvements extends beyond this timeframe and causes the Applicant to continue its use of the temporary facility, FEMA does not reimburse any cost associated with that continued use. However, FEMA may reimburse costs associated with relocating its services back into the facility as part of the approved temporary facility project.

²⁴⁹ 44 C.F.R. § 206.204(c)(1).

²⁵⁰ 44 C.F.R. § 206.204(c)(2)(ii).

(b) *Alternate Project*

If FEMA approves an Alternate Project for a facility for which it also approved temporary relocation of the services to a temporary facility, FEMA does not reimburse any temporary facility costs incurred after the date the Applicant requests that Alternate Project.

(c) *Alternative Procedures Project*

If FEMA approves an Alternative Procedures Project for a facility for which it also approved temporary relocation of the services to a temporary facility, continued PA funding for the temporary facility is dependent upon the SOW of the Alternative Procedures Project.

8. Disposition Requirements

If the Applicant purchased or constructed a temporary facility, it must return to FEMA the Federal share of the equity in the facility. The Applicant must report the equity to FEMA when the approved deadline has expired or when the facility is no longer needed for the authorized purpose, whichever occurs first.

If FEMA only funded a portion of the cost of the facility, the Applicant must return to FEMA the Federal share of FEMA's proportionate equity in the facility. The amount due FEMA is computed by applying FEMA's percentage of participation in the cost of the purchase or construction to the fair market value or sale proceeds, taking into consideration reasonable out-of-pocket costs related to the sale.

The Applicant may either retain the facility or sell it. If the Applicant disposes of real property (land or structures) acquired with PA funding and acquires replacement real property using funds from the same PA project, the net proceeds of the sale may be used to offset the cost of the replacement property.

W. Snow-Related Activities

When the President declares an incident as a Snowstorm or specifically authorizes snow assistance in a declaration for a Severe Winter Storm, FEMA provides PA funding for impacts related to snow, but the assistance is limited.²⁵¹ See [Appendix H: Snow Assistance](#), for detailed information.

1. Limited Time Period

Snow-related activities are eligible for a continuous 48-hour period to address the most critical emergency needs. Each Applicant designates the beginning of its 48-hour period. However, a State agency that conducts snow-related activities in multiple locations throughout a State, such as a Department of Transportation, may use different 48-hour periods for different locations.

Once FEMA approves a project for the Applicant's designated 48-hour period, the Applicant cannot change its selected period.

If the Applicant awards a contract for periods greater than the 48-hour period, PA funding is limited to the costs incurred during the 48-hour period.

²⁵¹ 44 C.F.R. § 206.227.

The FEMA Assistant Administrator of the Recovery Directorate may extend the eligible period by 24 hours in counties, parishes, or Tribal Government areas where the snowfall exceeds the historical record snowfall by at least 50 percent.

2. Eligible Work

Eligible work includes:

- Snow-related activities (for limited time as discussed above):
 - Snow removal
 - Snow dumps
 - De-icing
 - Salting
 - Sanding of roads and other eligible facilities
- Other emergency protective measures (not restricted to the limited time), including, but not limited to, search and rescue and sheltering

Limited snow-related activities necessary to carry out emergency protective measures, such as clearing snow in the *immediate* area of a downed power line, are eligible outside of the limited time period and in counties declared but not designated for snow assistance.

For Severe Winter Storm Declarations that do not specifically authorize snow assistance, FEMA only provides PA funding for limited snow-related activities that are necessary to perform otherwise eligible work. For example, snow removal necessary to repair downed power lines is eligible, while normal snow removal from roads (including salting and sanding) is ineligible.

X. Emergency Repair or Stabilization

Emergency repair or stabilization of an eligible facility is eligible as Emergency Work if it eliminates or lessens an immediate threat.²⁵² Work performed under an exigent circumstance that restores the pre-disaster design and function of the facility in accordance with codes and standards is Permanent Work,²⁵³ not Emergency Work.

Emergency repair of a facility is ineligible if another Federal agency has the specific authority to provide assistance for the facility,²⁵⁴ such as for:

- Federal-Aid highways – Federal Highway Administration (FHWA)
- Flood control works – USACE and NRCS

For Tribal Governments specifically, although the Bureau of Indian Affairs' (BIA) or FHWA may have authority to provide temporary emergency repairs of Tribal roads, such roads may be eligible for PA funding provided the Tribal Government does not receive funding from BIA or FHWA for the work.

1. Operation Blue Roof (DFA Only)

Operation Blue Roof provides homeowners with plastic sheeting to cover damaged roofs until arrangements can be made for permanent repairs. The purpose of Operation Blue Roof is to protect property, reduce temporary housing costs, and allows residents to remain in their homes

²⁵² 44 C.F.R. § 206.201(b).

²⁵³ 44 C.F.R. § 206.201(j).

²⁵⁴ 44 C.F.R. § 206.226(a).

while recovering from the incident. Therefore, only dwellings that can be safely occupied after blue roof installation are eligible. The costs of these services are ineligible for reimbursement. However, FEMA may provide DFA for these services.²⁵⁵

2. Slope Stabilization

If a landslide or other slope instability is triggered by the incident and poses an immediate threat to life, public health and safety, or improved public or private property, emergency protective measures to stabilize the slope may be eligible.

FEMA only provides PA funding for the least costly option necessary to alleviate the threat. FEMA limits eligible stabilization measures to the area of the immediate threat, not the entire slope. Work must be reasonable relative to the size and scope of the area of instability.

FEMA may authorize funding for post-disaster inspections and limited geotechnical investigations to determine if the instability creates an unsafe condition that poses an immediate threat.

Eligible emergency protective measures include, but are not limited to:

- Emergency drainage measures
- Emergency ground protection to better stabilize the mass (rip rap, sheeting)
- Partial excavation at the head of a sliding mass to reduce its driving force
- Backfilling or buttressing at the toe of a sliding mass using measures such as gabions, rock toes, cribwalls, binwalls, and soldier pile walls
- Installation of barriers to redirect debris flow

3. Mold Remediation

The incident may cause facilities to be inundated or exposed to wet and humid weather conditions for extended periods of time. These conditions may cause growth and spreading of mold in structures and on contents, causing threats to public health and increasing the repair cost.

The following remediation activities may be eligible as emergency protective measures:

- Wet vacuuming, damp wiping, or vacuuming with High-Efficiency Particulate Air (HEPA) equipment of the interior space
- Removal of contaminated gypsum board, plaster (or similar wall finishes), carpet or floor finishes, and ceilings or permanent light fixtures
- Cleaning of contaminated heating and ventilation (including ductwork), plumbing, and air conditioning systems or other mechanical equipment

Pre-remediation mold sampling is only eligible when the sampling reveals the presence of mold. Post-remediation sampling is eligible to confirm that remediation is complete.

The Applicant may use a variety of mold cleanup methods to remediate mold damage based on the extent of damage and type of damaged material. [Appendix I: Mold Remediation](#), provides information for consideration when developing a SOW for mold remediation. The Applicant must follow applicable State, Tribal, and local government guidelines for mold sampling and remediation.

²⁵⁵ See www.usace.army.mil/Media/Fact-Sheets/Fact-Sheet-Article-View/Article/475463/temporary-roofing/ for additional information.

FEMA only provides PA funding for mold sampling performed by an indoor environmental professional, such as a Certified Industrial Hygienist, Certified Indoor Environmental Consultant, or Certified Microbial Consultant. The indoor environmental professional should not be employed by the remediation company to avoid a conflict of interest. FEMA considers technical evaluations performed by licensed professionals when determining the eligibility of mold remediation.

For mold remediation to be eligible, mold must not be a result of poor facility maintenance or failure to take protective measures to prevent the spread of mold in a reasonable time after the incident. If the Applicant can document and justify why it did not take measures to prevent further contamination, or why measures taken were insufficient to prevent further damage, mold remediation may be eligible.

Examples of extenuating circumstances include:

- Disruption of power
- Facility is underwater
- Facility is inaccessible
- Heating, ventilation, and air conditioning (HVAC) equipment is damaged
- Insufficient resources to remediate the entire facility

FEMA evaluates whether the facility had pre-existing water infiltration conditions when determining whether mold remediation is eligible. For this evaluation, FEMA considers whether there is evidence of:

- Improperly sealed windows or exterior vents
- Standing water against an exterior wall
- Poorly maintained drains or gutters with rust or vegetative growth
- Absence of rain gutters
- Leaking ceiling tiles

4. Emergency Dunes or Berms on Beaches

If a natural or engineered beach has eroded to a point where flooding from a 5-year ~~flood~~ incident²⁵⁶ could damage improved property, cost-effective emergency protective measures on the beach that protect against damage from that incident are eligible.²⁵⁷

Eligible measures typically include the construction of emergency sand dunes or berms to protect against additional damage from a 5-year incident. Emergency sand dunes or berms are not intended to permanently restore the beach; they are intended only to provide protection from immediate threats. The Applicant may construct emergency dunes or berms with sand recovered from the beach or with imported sand. If the Applicant constructs the dunes or berms with imported sand, FEMA will only provide PA funding if the sand is from a source that meets applicable environmental regulations and one of the following circumstances exists:

- Recoverable quantities are insufficient; or
- State, Tribal, or local government regulations prohibit placement of the recovered sand.

²⁵⁶ For flood incidents specifically, an immediate threat is a threat from a 5-year flood (a flood that has a 20 percent chance of occurring in any given year).

²⁵⁷ 44 C.F.R. § 206.226(j).

The Applicant must demonstrate that the stillwater elevation plus modeled wave runup elevation for a 5-year incident exceeds the post-storm elevation of the primary dune. Stillwater elevation is the maximum storm-induced water-surface elevation.

Based on the average expected erosion for a 5-year incident, FEMA only provides PA funding for emergency dunes or berms constructed with up to 6 cubic yards per linear foot of sand above the 5-year stillwater elevation or the dune's pre-storm profile, whichever is less. In some cases, placing sand below the 5-year stillwater elevation may be necessary to provide a base for the dune or berm. The placement of that sand is also eligible as part of the emergency protective measure.

Placement of dune grass on an emergency dune or berm is only eligible if it is required by permit and is an established, enforced, uniform practice that applies to the construction of all emergency berms within the Applicant's jurisdiction, regardless of the circumstance. The Applicant must include the grass placement cost in the dune or berm construction cost when evaluating cost-effectiveness. Any maintenance of the dune grass after the initial installation is ineligible.

III. Damage Caused During Performance of Emergency Work

The Applicant may damage improved property, supplies, or equipment during the performance of eligible emergency response activities or debris removal operations.

The repair of damage to public property, supplies, or equipment is eligible as part of the respective Emergency Work (Category A or B) project if the damage was:

- Due to severe conditions resulting from the incident;
- Unavoidable; and
- Not due to improper or excessive use.

Replacement of damaged crops, trees, shrubs, or other ground cover is ineligible, unless the replacement meets the criteria in [Chapter 8:IX.E, Parks, Recreational, Other \(Category G\)](#).

For equipment damage, FEMA requires maintenance records to demonstrate that the equipment was regularly maintained and in good operational order prior to the incident, and details regarding when, where, and how the damage occurred.

Repair of damage to private property is only eligible if the above criteria is met and one of the following:

- The property is an easement and the Applicant is legally responsible for repairing the damage it causes to the easement; or
- The Applicant leased the property either for sheltering or for a temporary debris staging site, and the lease agreement establishes that the Applicant is legally responsible for the repair.

Damage caused by snow-related activities conducted outside of the authorized period, as described in [Chapter 7:II.W, Snow-Related Activities](#), is ineligible.

CHAPTER 8: PERMANENT WORK ELIGIBILITY

Permanent Work (Categories C–G) is work required to restore a facility to its pre-disaster design (size and capacity) and function in accordance with applicable codes and standards.²⁵⁸ Emergency repair or stabilization to eliminate or lessen an immediate threat is Emergency Work. All Permanent Work is subject to the eligibility of the facility as described in [Chapter 4:II, Facility Eligibility](#) and shown in Figure 11, *Permanent Work Eligibility*. This chapter provides PA Policy for Permanent Work.

Figure 11. Permanent Work Eligibility

Pre-disaster design means the size or capacity of a facility as originally constructed or subsequently modified. It does not mean the capacity at which the Applicant was using the facility at the time of the incident if different from the most recent designed capacity.²⁵⁹

Example of Restoring to Pre-disaster Design

If a school designed for a capacity of 100 students is damaged beyond repair, the eligible funding for the replacement facility is limited to that necessary for 100 students, even if more than 100 students were attending the school prior to the incident.

Pre-disaster function is the function for which the facility was originally designed or subsequently modified. For example, if the Applicant designed and constructed an administrative building, but later altered it in accordance with applicable construction codes or standards to use as a school, the pre-disaster function would be as a school. If the facility was serving an alternate function at the time of the incident, but was not altered to provide that function, FEMA provides PA funding to restore the facility either to the original pre-disaster function, OR pre-disaster alternate function, whichever costs less.²⁶⁰

Example of Restoring to Pre-disaster Function

If the Applicant is using an office building as a storage facility at the time of an incident, and it is less costly to restore the facility as a storage facility, only those repairs necessary to restore it as a storage facility are eligible.

Any special lighting or wall and floor finishes that are typical of an office building are not necessary for a storage facility and, therefore, are ineligible.

²⁵⁸ 44 C.F.R. § 206.201(j). Although this section of 44 C.F.R. does not reference function as part of the definition of Permanent Work, 44 C.F.R. § 206.203(d)(2) states that if the Applicant does not restore the function, it is an Alternate Project. See [Chapter 8:VIII, Capped Projects](#) for discussion on Alternate Projects.

²⁵⁹ 44 C.F.R. § 206.201(k).

²⁶⁰ 44 C.F.R. § 206.226(k)(1).

FEMA may approve changes to the pre-disaster design or construction method (including materials) if the changes are required due to access issues, site conditions, or to tie in to existing infrastructure. The changes must not impact the capacity or function of the facility. The Applicant must show that the changes are reasonable based on the type and extent of restoration and are consistent with the Applicant's general construction practices.

In cases where ineligible damage, such as a pre-existing condition, if not repaired, may compromise repair of eligible damage, FEMA may make PA funding for repair of the eligible damage contingent upon the Applicant repairing the ineligible damage. For example, FEMA may determine that repairs to a damaged bridge deck are eligible. However, the deck cannot be repaired unless the Applicant replaces rotting timbers that support the deck.

While PA funding is always based on pre-disaster size, capacity, and function, FEMA has developed procedures under Section 428 of the Stafford Act to maximize the ability of Applicants to drive their own recovery. Under this process, Section 428 Alternative Procedures are considered for all large permanent work projects. This approach standardizes a single process for the development and consideration of fixed cost estimates as the first option for all permanent work projects. This ensures Applicants have awareness of the opportunities and benefits provided by the Alternative Procedures, including: flexibility in meeting post-disaster recovery needs, as opposed to being limited to rebuilding back to what existed prior to the disaster; ability to share funds across all Alternative Procedures Permanent Work Projects; ability to retain and use excess funds to reduce risk and improve future disaster operations (subject to timely closeout); and eligibility for cost-effective hazard mitigation on replacement projects. Applicants will be able to agree to a fixed cost estimate or choose to pursue funding under standard, actual cost procedures.

I. Environmental and Historic Preservation Considerations

The Applicant needs to make every effort to afford FEMA the opportunity to perform EHP reviews prior to starting any work that has potential to impact the environment or historic properties, including archaeological resources. This includes, but is not limited to, demolition, site preparation, and ground disturbing activities. FEMA must ensure that the project complies with appropriate EHP laws, regulations, and EOs. If the Applicant starts this work prior to FEMA's completion of the EHP review, it jeopardizes PA funding for the entire project.²⁶¹

Permanent Work projects that restore a damaged facility essentially to pre-disaster design are excluded from National Environmental Policy Act (NEPA) review through a statutory exclusion (STATEX).²⁶² All others require NEPA review. Many qualify for one of the Categorical Exclusions (CATEXs) under NEPA which apply to actions that typically have little or no impact on the environment, as long as there are no "extraordinary circumstances" as defined by DHS.²⁶³ An example of an extraordinary circumstance is a potentially significant impact on species, habitats, historic properties, or environmentally sensitive areas protected under Federal law. If any extraordinary circumstances apply, the project does not qualify for a CATEX. Although

²⁶¹ Stafford Act § 316, 41 U.S.C. § 5159; 2 C.F.R. § 200.300.

²⁶² Stafford Act § 316, 41 U.S.C. § 5159.

²⁶³ See FEMA Instruction 108-1, Section 3.2 and DHS Instruction 023-01-001-01, [Appendix A: Environmental and Historic Preservation Compliance](#).

many projects are statutorily excluded from NEPA review or covered by a CATEX, Permanent Work projects require review for compliance with other EHP laws, regulations, and EOs.

Projects that involve changes in the location, footprint, alignment, or size of a facility may not meet a CATEX and may adversely affect or have impacts on wetlands; floodplains, flood heights, or upstream/downstream velocities; federally listed threatened and endangered species and their critical habitats; essential fish habitats; historic properties, including archaeological sites; and other environmental or historic resources. If a project does not meet a CATEX, it will require a higher level of NEPA analysis. The most common higher-level analysis is referred to as an environmental assessment (EA).²⁶⁴ In rare circumstances, a project may require an environmental impact statement (EIS),²⁶⁵ the highest level of analysis, which requires a much more detailed analysis than an EA. FEMA is responsible for NEPA compliance and identifying the required level of review.²⁶⁶ FEMA may conduct the EA or EIS. If the Applicant chooses to conduct the EA or EIS, it must obtain FEMA approval prior to initiating the EA or EIS and submit the EA or EIS to FEMA for review and approval prior to construction. When the Applicant conducts the EA or EIS, FEMA reimburses the associated cost based on the cost share of the project.

FEMA may be required to consult with Federal, State, and Tribal Government resource agencies before the Applicant begins work. These agencies may include, but are not limited to, USFWS and NMFS for impacts to federally listed threatened and endangered species; USFWS for impacts to Coastal Barrier Resource System zones and bald or golden eagles; NMFS for impacts to essential fish habitat or marine mammals; USACE for projects in navigable waters or that involve dredging or filling in U.S. waters; and SHPO or THPO for effects to historic properties. If the Applicant begins construction work before FEMA completes its EHP review, the Applicant jeopardizes PA funding for that project. FEMA may not be able to conduct consultation with resource agencies after the Applicant initiates work on a project because it forecloses on an agencies' ability to comment on, or consider, alternatives that would avoid, minimize, or mitigate adverse impacts to the environment or effects to historic properties.

Similar to NEPA, Section 106 of the National Historic Preservation Act (NHPA) requires Federal agencies to consider actions on historic properties. While some Permanent Work projects meet allowances within a Statewide Programmatic Agreement or only require a consultation letter to a SHPO/THPO, projects that adversely affect historic properties, including archaeological sites, may require the negotiation of a Memorandum of Agreement (MOA) or a project specific Programmatic Agreement to resolve adverse effects. Depending on the historic property, its level of significance, the level of controversy or if it is a National Historic Landmark (NHL), in addition to SHPO/THPO, FEMA may be required to invite the Advisory Council on Historic Preservation (ACHP) and the National Park Service (NPS) to participate in consultation. These Section 106 agreements to resolve adverse effects may have significant time and cost implications.

Consultations undertaken pursuant to the ESA will typically include required conservation measures for threatened and endangered species and their habitat. Applicants should address environmental planning early on in the project scoping and project development stages to help

²⁶⁴ FEMA Instruction 108-1, Section 3.2.

²⁶⁵ Ibid.

²⁶⁶ The National Environmental Policy Act of 1969, as amended, Public Law 91-190, 42 U.S.C. §§ 4321–4347.

avoid delays and additional costs at the EHP compliance stage. Early environmental planning should include consideration of potential project-related conservation and mitigation measures. When EHP laws, regulations, or EOs require actions to mitigate adverse effects, the Applicant is responsible for all costs associated with performing the required mitigation measures, unless such actions are directly related to the restoration of disaster-related damage.

FEMA is responsible for reviewing connected actions associated with a proposed project, even if FEMA is not funding the connected action. Actions are connected if they: automatically trigger other actions; cannot or will not proceed unless other actions are taken previously or simultaneously; or are interdependent parts of a larger action and depend on the larger action for their justification.

Some projects, such as Improved or Alternate projects, may involve significant changes to the pre-disaster configuration of a facility (e.g., location, footprint, or size). FEMA conducts EHP compliance reviews on the actual SOW to be performed, prior to approving the project.

To facilitate EHP review, the Applicant should provide:

- ☐ Site map (including geographical coordinates in latitude, longitude) showing the location of all proposed areas where the Applicant will conduct site work or construction and the extent of ground disturbance (including any staging areas, access roads, parking, landscaping, grading, or utilities)
- ☐ Construction dates and photographs of all facilities in the project area
- ☐ Photographs of all facilities in the project that may be affected by the project
- ☐ Any known environmental issues or historic preservation concerns, such as, but not limited to, threatened and endangered species including their critical habitat, location in floodplain or wetlands, presence of asbestos within the facility, or facility's location in an archaeologically sensitive area
- ☐ Environmental assessments
- ☐ Historic property designations or surveys, including archaeological surveys
- ☐ Available information about the presence of any resources protected under Federal law (see [Appendix A: Environmental and Historic Preservation Compliance](#) for a list of frequently-encountered laws)
- ☐ Copies of permits and correspondence with regulatory agencies, including but not limited to:
 - SHPO/THPO (historic properties, including archeological sites)
 - USACE (work in navigable waterways, dredging or discharging dredged materials or fill in waterways or wetlands, culvert repair, culvert installation, culvert upsizing, riprap work, bridge work, work involved in a stream, or work in a wetland)
 - USFWS (federally listed threatened and endangered species, migratory birds, bald and golden eagles, work in Coastal Barrier Resource System areas, work in or near waterways or wetlands)
 - National Oceanic and Atmospheric Administration (federally listed threatened and endangered species, essential fish habitat, work in National Marine Sanctuaries)

- EPA (work involving underground injection, work with the potential to increase contamination of sole source aquifers)
- State or Tribal environmental agencies

II. Requirement to Obtain and Maintain Insurance

Applicants that receive PA funding for permanent work to replace, repair, reconstruct, or construct a facility must obtain and maintain insurance to protect the facility against future loss.²⁶⁷ This requirement applies to insurable facilities or property (buildings, contents, equipment, and vehicles), including those funded as an Alternate, Improved, or Alternative Procedures Project. FP 206-086-1, *Public Assistance Policy on Insurance*, describes these requirements in detail.²⁶⁸

The Applicant must insure facilities with the types and extent of insurance reasonably available, adequate, and necessary to protect against future loss to the property.²⁶⁹ The type of insurance refers to the hazard(s) that caused the damage and extent refers to the amount of insurance required, which is calculated based on the eligible costs prior to any reductions (including the non-Federal share reduction).

The Applicant is not required to obtain and maintain insurance on facilities with \$5,000 or less in eligible costs (prior to any reductions).²⁷⁰

The Applicant may request that FEMA modify the insurance requirement when:

- The required insurance is not reasonably available,
- An alternative to the insurance requirement provides adequate protection against future loss to the property, or
- The required insurance is not necessary to protect against future loss to the property.

Additionally, FEMA does not require greater types and amounts of insurance than are certified as reasonably available, adequate, or necessary by the appropriate State Insurance Commissioner.²⁷¹ The State Insurance Commissioner cannot waive Federal insurance requirements but may certify the types and extent of insurance reasonable to protect against future loss to an insurable facility.²⁷²

The Applicant may comply with the insurance requirement for both flood and non-flood hazards with coverage available through commercial property insurance, which may include blanket insurance policies, standard flood insurance policies, insurance pools, or a combination of these sources.²⁷³ In some cases, with FEMA approval, the Applicant may comply with the insurance requirement using a self-insurance plan.²⁷⁴

If the Applicant does not comply with the requirement to obtain and maintain insurance, FEMA will deny or deobligate PA funds related to the noncompliance from the current disaster.

²⁶⁷ Stafford Act § 311, 42 U.S.C. § 5154; 44 C.F.R. § 206 Subpart I.

²⁶⁸ www.fema.gov/media-library/assets/documents/107564.

²⁶⁹ Stafford Act § 311, 42 U.S.C. § 5154; 44 C.F.R. § 206 Subpart I.

²⁷⁰ 44 C.F.R. § 206.253(d).

²⁷¹ 44 C.F.R. § 206.253(c).

²⁷² 44 C.F.R. §§ 206.252(d) and 206.253(c).

²⁷³ 44 C.F.R. § 206.253(b)(2).

²⁷⁴ Stafford Act § 311(c), 42 U.S.C. § 5154(c); 44 C.F.R. Part 75.

Additionally, the facilities for which the Applicant failed to comply are ineligible for future PA funding.

A. Insurance Reductions and Impact on Facility Eligibility in Subsequent Disasters

If the Applicant does not maintain the required insurance from a previous disaster, then the facility is ineligible for PA funding in a subsequent disaster, regardless of the hazard(s) that caused the damage.²⁷⁵

When the Applicant receives PA funding for a facility damaged by the same hazard in a subsequent disaster, FEMA reduces funding in this subsequent disaster by the amount of insurance required from the previous disaster. If FEMA or the State Insurance Commissioner certification modified the Applicant's insurance requirement, FEMA reduces funding by the modified insurance amount. If the Applicant's anticipated or actual insurance proceeds are higher than the amount of insurance required in the previous disaster, FEMA reduces funding by the anticipated or actual amount of insurance proceeds to avoid a duplication of benefits.

III. Codes and Standards

FEMA provides PA funding to restore facilities based on pre-disaster design and function in conformity with current applicable codes, specifications, and standards.²⁷⁶ The Applicant needs to provide documentation to support the eligibility of code or standard upgrades, including, but not limited to, the requirement to apply the codes or standards and to support they were formally adopted, implemented, and uniformly applied

A. Eligibility Criteria

Facility repairs and new construction may “trigger” upgrade requirements established by codes or standards. Upgrades required by Federal, State, Tribal, or local repair or replacement codes or standards are eligible only if the code or standard:²⁷⁷

- Applies to the type of restoration required;
- Is appropriate to the pre-disaster use of the facility;
- Is reasonable, in writing, formally adopted by the State, Tribal, or local government, and implemented by the Applicant on or before the declaration date, OR is a legal Federal requirement;
- Applies uniformly; and
- Was enforced during the time it was in effect.

1. Applies to the Type of Restoration Required

Codes and standards must apply to the type of restoration required. Codes and standards for new construction are often different than codes and standards for repair work. If FEMA determines a facility is eligible for replacement, compliance with current codes and standards for new construction is eligible. If FEMA determines a facility is ineligible for replacement, only code-required upgrades applicable to repairs are eligible.

²⁷⁵ Stafford Act § 311(b), 42 U.S.C. § 5154(c); 44 C.F.R. § 206.253(f).

²⁷⁶ Stafford Act § 406(e), 42 U.S.C. § 5172(e); 44 C.F.R. § 206.226(d).

²⁷⁷ 44 C.F.R. § 206.226(d).

A code or standard may include a trigger that requires:

- Upgrades to all structural components; or
- In addition to upgrading all structural components, bringing the non-structural components into conformance with current codes or standards for new construction.

If an upgrade to an entire structural or non-structural system within a building is triggered, the upgrade is only eligible if there is a direct relationship between the upgrade work and eligible damage.²⁷⁸ Only upgrade work within the same system as the damage is eligible.

FEMA evaluates the eligibility of the work to upgrade or change the configuration of damaged systems for reasonableness with respect to the type and extent of damage.

Examples of Codes or Standards that do Not Apply to the Restoration Required

The Applicant requests PA funding for the repair of a damaged building and the construction of a parking garage. The Applicant states that while there was no parking garage prior to the incident, zoning codes and other local ordinances require one. Because parking improvements have no relationship to the disaster-related repairs, they do not apply to the type of restoration required and are ineligible.

Similarly, if a code or standard that applies to new construction or the rehabilitation of an entire road requires the construction of paved shoulders, drainage swales, and berms, the construction of these improvements is ineligible for a project involving repairs to discrete damaged portions of the road shoulders.

2. Appropriate to Pre-disaster Use

Codes and standards must be appropriate to the pre-disaster use of the facility. FEMA determines the eligibility of code-required upgrades based on the facility's pre-disaster design or actual use at the time of the disaster. The least costly of the following is eligible:

- Pre-disaster use of the facility, if serving the same function for which it was originally designed; or
- Alternate use of the facility, if serving an alternate function at the time of the incident.

Example of a Code or Standard that is Not Appropriate to the Pre-disaster Use of the Facility

The original design of a facility was a warehouse; however, the Applicant was using the facility as a classroom before the incident. Restoring the facility as a classroom in conformance with classroom codes or standards would not be eligible if it would cost more than restoring the facility as a warehouse in accordance with code or standards applicable to a warehouse.

3. Reasonable

Codes and standards must be reasonable. When determining reasonableness, FEMA:

- Examines the general reasonableness of the code or standard and the trigger for application of the code or standard;

²⁷⁸ 44 C.F.R. § 206.223(a)(1).

- Determines whether the upgrade and trigger relate to the type of restoration required by the damage and whether the upgrade and trigger are justified based on the extent of damage;
- Considers whether the upgrade and the trigger are technically defensible from an engineering perspective; and
- Determines whether the cost of the upgrade is reasonable.

FEMA may determine a very large upgrade based on a very low trigger to be unreasonable.

Example of Reasonableness

Installation of a code or standard-required new sprinkler system throughout a building is eligible if that building is replaced. However, installation of that sprinkler system is ineligible if the eligible work only involved repair of the building, even if required by the code or standard, unless it is reasonable based on the eligible repair.

4. Written, Formally Adopted, and Implemented

Codes and standards must be in writing, formally adopted by the State, Tribal, or local government, and implemented by the Applicant on or before the declaration date, OR be a legal Federal requirement, such as an ADA or seismic safety requirement. An appropriate legislative body or regulatory authority within the jurisdiction must:

- Approve the code or standard;
- Make it a matter of public record; and
- Formally incorporate it into the building code or other applicable ordinance.

The code or standard must apply to the facility in question. For example, if a State has jurisdiction over a particular type of work and formally adopts a code or standard related to that work, a Tribal or local government in that State does not necessarily have had to formally adopt the code or standard for it to apply to its facility. The Tribal or local government meets the above requirement if it shows that it implements the code or standard consistently.

FEMA does not recognize codes or standards adopted by a PNP specifically for its facilities when determining whether compliance with codes or standards is eligible. FEMA also does not accept codes or standards adopted by agencies or divisions of State, Tribal, or local governments that are not authorized to set codes or standards within the broad governmental jurisdiction of the State, Tribal, or local government.

Example of a Standard that is Not in Writing, Formally Adopted, and Implemented

FEMA approves funding to replace a culvert that was washed out by a flood. The State natural resources department denies the Applicant's permit application for replacing the culvert, and recommends the Applicant construct a bridge instead. The decision of the permitting officials is discretionary and not based on a written and formally adopted code or standard; therefore, the bridge construction is ineligible.

5. Applies Uniformly

Codes and standards must apply uniformly to all similar types of facilities, whether private or public, eligible or ineligible, in the Applicant's jurisdiction or (if applicable) in a particular hazard zone within its jurisdiction.

For FEMA to find that a code or standard and its triggers are uniformly applied, the code or standard must meet all of the following conditions. The code or standard must:

- Provide for uniform accountability in the event of noncompliance;
- Not be subject to discretionary enforcement by public officials; and
- Not allow for selective application.

A code or standard must meet three tests to demonstrate that it is not selectively applied:

- The upgrade is generally triggered regardless of the cause of damage and is also triggered for renovations or improvements.
- The code or standard is applied regardless of the source of funding for the work.
- The code or standard is not applied selectively based on the availability of funds.

Example of a Standard that Does Not Apply Uniformly

A local jurisdiction has authority over all facilities, both public and private. A statewide code or standard imposes seismic retrofit requirements for all public buildings, but not for privately owned buildings. The seismic retrofitting is ineligible as it does not apply uniformly to all similar types of facilities within the Applicant's jurisdiction.

6. Enforced

The code or standard must have been enforced during the time it was in effect. FEMA may provide PA funding for costs related to an upgrade based on confirmation of previous enforcement and in reliance on continued enforcement. If the local jurisdiction subsequently violates this criterion, no further work to comply with the code or standard is eligible within the local jurisdiction.

If FEMA determines a jurisdiction has had no reasonable opportunity to enforce the code or standard, the upgrade may be eligible. A reasonable opportunity to enforce may be lacking when a code or standard is new or when a facility affected by the code or standard has not been damaged during the time the code or standard was in effect.

Example of a Code or Standard that Was Not Enforced While in Effect

The Applicant requests funding to upgrade the foundation of several damaged trailers based on a code requirement applying to repairs to trailers and installation of new trailers. The Applicant installed several new trailers after the incident and did not use the code or standard-required foundation. The upgrades to the foundation of the damaged trailers are ineligible because the Applicant did not enforce the standard.

B. FEMA Required Minimum Codes and Standards

If the building is eligible for repair, replacement, or new construction (for PA projects, new construction usually occurs when a new facility is being constructed as an improved or alternate project),²⁷⁹ FEMA generally requires that the Applicant incorporate the natural hazard-resistant codes and standards and related provisions referenced in the most recent published edition of the International Code Council's (ICC) International Building Code (IBC), International Existing Building Code (IEBC), or International Residential Code (IRC) into the building design and construction.²⁸⁰ This includes natural hazard-resistant provisions, such as tornado, wind, seismic, and flood as identified in the IBC, IEBC, or IRC regardless of the type of incident that caused the damage. In accordance with these codes and standards, the Risk Category of the eligible building determines the applicable tornado, wind, seismic, flood, snow, ice, and rain loads.²⁸¹ FEMA provides PA funding for the eligible increased cost associated with meeting these codes and standards at the cost-share for the disaster.

Generally, the IBC, IEBC, or IRC apply when a building:

- Is substantially damaged;²⁸²
- Suffered substantial structural damage;²⁸³ or
- Is eligible for replacement in accordance with 44 C.F.R. part 206.226(f).²⁸⁴

FEMA generally accepts the determination of whether a code or standard is triggered when it is made by:

- A building official or inspector;
- The Recipient's or Applicant's registered design professional; or
- Other appropriate and qualified individual.

FEMA may review the determination for consistency with the above codes and standards and other PA policies. FEMA may deviate from this policy in circumstances where utilization of the codes or standards would create an extraordinary burden on the Applicant or would otherwise be inappropriate for the facility.

FEMA requires that the Applicant incorporate these codes and standards in the design of eligible repair, replacement, or new construction of the building projects unless local codes or standards meet or exceed the hazard-resistant provisions or in instances where communities

²⁷⁹ This includes Alternative Procedures Projects. Per Stafford Act § 428, 42 U.S.C. § 5189f; 44 C.F.R. § 206.203(d), funding for these types of projects is capped at the cost to restore the facility to its pre-disaster design and function in accordance with codes and standards, including the required codes and standards referenced in this section, that would be applicable to the building if rebuilt as it existed.

²⁸⁰ FEMA determined that these codes represent the minimum adequate standards which are generally necessary to protect the Federal investment of PA funding. Stafford Act §§ 323 and 406(e), 42 U.S.C. §§ 5165a, 5172; 44 C.F.R. § 206.400.

²⁸¹ Risk Category is defined in the International Building Code (IBC) as a categorization of buildings and other structures for determination of flood, wind, snow, ice and seismic loads based on the risk associated with unacceptable performance.

²⁸² Damage of any origin sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

²⁸³ Significant damage to the vertical elements of the lateral force-resisting system or the vertical gravity load-carrying components in accordance with the IBC or International Existing Building Code (IEBC).

²⁸⁴ Disaster-related damage exceeds 50 percent of the cost to replace a facility to its pre-disaster design and function.

have not adopted a building code or standard. FEMA will evaluate the eligibility of locally adopted natural hazard-resistant building codes or standards that exceed those referenced in the IBC, IEBC, or IRC, based on the criteria in [Chapter 8:III.A, Codes and Standards, Eligibility Criteria](#).²⁸⁵ If the IBC, IEBC, or IRC have been adopted under another name (for example the California Building Code), then it meets the natural hazard-resistant provisions in the model codes, and FEMA considers the adopted code or standard compliant with the minimum codes and standards requirement.

When triggered by the eligible SOW, natural hazard-specific requirements include, but are not limited to, the following:²⁸⁶

- In areas where tornado shelter design wind speeds are 250 mph or greater, the Applicant must incorporate a storm shelter or safe room (designed to ICC 500 standards) for elementary and secondary schools with an occupant load of 50 or more, Emergency Operation Centers, 911 call stations, fire stations, rescue stations, ambulance stations, and police stations.
- For wind-resistant requirements, the Applicant must incorporate applicable wind-resistant design and construction standards contained in the IBC, IEBC or IRC and its referenced standards [e.g., American Society of Civil Engineers (ASCE)/Structural Engineering Institute (SEI) 7].
- For seismic-resistant requirements, the Applicant must incorporate applicable seismic-resistant design and construction standards contained in the IBC, IEBC or IRC and its referenced standards (e.g., ASCE/SEI 7 and 41).²⁸⁷
- For flood-resistant requirements, the Applicant must incorporate applicable flood-resistant design and construction standards contained in the IBC, IEBC or IRC and its referenced standards (e.g., ASCE/SEI 7 and 24).²⁸⁸

FEMA also provides PA funding for costs associated with meeting the load requirements in the most recent IBC, IEBC, and IRC for snow, rain, and ice loads.

Costs related to conforming to these codes and standards are generally eligible. These codes and standards must apply to the type of restoration required (e.g., repair, replacement, or new construction), be appropriate to the pre-disaster use of the facility, and be reasonable.

Upon completion of the project, the Applicant must provide proof of compliance.²⁸⁹ Acceptable forms of proof include, but are not limited to:

- A written certification by a registered design professional that the natural hazard-resistant design elements comply with applicable IBC, IEBC, or IRC requirements; or
- A valid certificate of occupancy from the local building department that supports that the project was constructed or repaired as designed.

²⁸⁵ 44 C.F.R. § 206.226(d).

²⁸⁶ See www.fema.gov/building-code-resources for additional guidance on natural hazard-specific standard requirements.

²⁸⁷ These seismic-resistant requirements are also mandated by EO 13717, *Establishing a Federal Earthquake Risk Management Standard*.

²⁸⁸ Eligible projects involving substantial improvement or new construction in the flood hazard area may be required to meet the floodproofing or elevation requirements as described in 44 C.F.R. § 9.11(d), or the IBC, IEBC, or International Residential Code (IRC), whichever is higher.

²⁸⁹ Stafford Act § 323, 42 U.S.C. § 5165a; 44 C.F.R. § 206.402.

Noncompliance may result in denial or de-obligation of PA funding for the facility. Therefore, the Applicant should work with its local building department and any other authorities having jurisdiction to ensure compliance with this and other Federal, State, Tribal, and local government code and standard requirements.

C. Ineligible Upgrades

Upgrades recommended by design standards, guidelines, policies, industry practices, or other non-mandatory provisions are ineligible if the provisions do not meet all of the criteria noted in [Chapter 8:III.A, Codes and Standards, Eligibility Criteria](#). Upgrades that are deemed ineligible but enhance a facility's ability to resist similar damage in a future incident, may be eligible as mitigation (See [Chapter 8:IV, Hazard Mitigation](#)).

D. Historic Preservation Compliance

1. Federal Requirement

If the facility is listed in, or meets the criteria to be listed in, the National Register of Historic Places, and an applicable code or standard requires repair in a certain manner, costs associated with work to comply with that code or standard are eligible, even if repair costs exceed replacement costs. This is an exception to the regulatory requirement that when a facility is eligible for replacement, FEMA limits eligible costs to the less expensive of repairs or replacement (see [Chapter 8:V.C, Repair vs. Replacement, Eligible Funding](#)).²⁹⁰

2. State or Tribal Government Requirement

If a State or Tribal historic building code or standard requires specific work be performed, FEMA evaluates the code or standard using the eligibility criteria in [Chapter 8:III.A, Codes and Standards, Eligibility Criteria](#). Most State historic building codes and standards encourage code officials to allow *less* intrusive alternatives to requirements of the prevailing codes or standards, but do not require any particular work be performed. As a result, the codes and standards usually fail to meet the eligibility criteria.

Terminology

FEMA publishes **Flood Insurance Rate Maps** that identify the following:

- **Special Flood Hazard Area:** The land area subject to inundation during a flood having a 1 percent chance of occurring in a given year (also referred to as the base flood or 100-year flood).
- **Base Flood:** The flood which has a one percent chance of being equaled or exceeded in any given year (also known as a 100-year flood). This term is used in the National Flood Insurance Program (NFIP) to indicate the minimum level of flooding to be used by a community in its floodplain management regulations.
- **Base Flood Elevation:** The computed elevation to which floodwater is anticipated to rise during the base flood.
- **Coastal High Hazard Area:** The area subject to high velocity waters including, but not limited to, hurricane waves or tsunamis. On a Flood Insurance Rate Map (FIRM), this appears as zone V1-30, VE or V.
- **Floodway:** The portion of the floodplain which is effective in carrying flow, within which this carrying capacity must be preserved and where the flood hazard is usually highest, i.e., where water depths and velocities are the greatest. It is that area which provides for the discharge of the base flood so the cumulative increase in water surface elevation is no more than one foot.

²⁹⁰ 44 C.F.R. § 206.226(f)(2) and (3).

E. Floodplain Management and Wetland Protection

When providing PA funding for a project in or impacting a floodplain or wetland, the following requirements apply.

1. Minimum Requirement for Structures in a Floodplain

For any structure (walled or roofed buildings, including mobile homes and gas or liquid storage tanks)²⁹¹ built, replaced, or Substantially Improved in a Special Flood Hazard Area (SFHA), the Applicant must, at a minimum, either elevate or floodproof the lowest floor (including the basement) to or above the 100-year base flood elevation (BFE).²⁹² The BFE is based on the best available information in accordance with FEMA Policy 104-008-2: *Guidance on the Use of Available Flood Hazard Information*.²⁹³

If the structure houses critical actions and is in the 100 or 500-year floodplain, the Applicant must, at a minimum, elevate the lowest floor (including the basement) to or above the 500-year flood level.²⁹⁴ If the structure in the 100 or 500-year floodplain is nonresidential, the Applicant may opt to floodproof to the required level instead of elevating.²⁹⁵

Further, if the structure is substantially improved in a Coastal High Hazard Area, the Applicant must elevate the facility to the BFE (the 500-year level for critical actions) (including wave height) on open works (walls columns, piers, piles, etc.) and anchor it properly.²⁹⁶ New construction is prohibited in a Coastal High Hazard Area and within regulatory floodways unless the structure has a functionally dependent use; or facilitates open space use.²⁹⁷

²⁹¹ 44 C.F.R. § 9.4.

²⁹² 44 C.F.R. § 9.11(d)(3)(i) and (iii).

²⁹³ www.fema.gov/media-library/assets/documents/129766.

²⁹⁴ 44 C.F.R. § 9.11(d)(3)(i) and (ii).

²⁹⁵ 44 C.F.R. § 9.11(d)(3)(iii).

²⁹⁶ 44 C.F.R. § 9.11(d)(2) and (7).

²⁹⁷ 44 C.F.R. § 9.11(d)(1)

2. Requirement for Communities Participating in the National Flood Insurance Program

A community that participates in the National Flood Insurance Program (NFIP) must adopt and enforce a floodplain management ordinance that meets or exceeds the minimum NFIP requirements.²⁹⁸ Such an ordinance must contain construction requirements for new construction or Substantial Improvement of buildings located in a SFHA. In addition to other requirements, the ordinance must require that new or Substantially Improved buildings be elevated so that the lowest floor is at or above the BFE or floodproofed to a level equal to or above the BFE (some communities have more restrictive ordinances that require elevation or floodproofing to greater levels.)

Work required for compliance with the floodplain ordinance is eligible provided the ordinance meets the eligibility criteria for codes and standards and the Substantial Improvements are disaster-related repairs. If the cost to repair a facility in accordance with the floodplain ordinance is greater than the cost to replace the facility in accordance with the ordinance, the eligible cost is capped at the replacement cost.

Substantial Damage Determination

A floodplain manager's Substantial Damage determination is part of the NFIP eligibility process and is separate and distinct from the PA eligibility process for determining whether a facility is eligible for replacement or relocation.

FEMA determines whether replacement costs are eligible for PA Program based on the criteria in [Chapter 6:V, Repair vs. Replacement](#). FEMA determines whether relocation costs are eligible for PA funding based on the criteria in Chapter [6:VI, Relocation](#) and [6:IV, Hazard Mitigation](#).

²⁹⁸ 44 C.F.R. § 60.3.

F. Accessibility for Individuals with Disabilities

The ADA and other disability rights laws such as the Architectural Barriers Act (ABA) require that all newly constructed facilities be accessible to and usable by individuals with disabilities²⁹⁹ and that repairs that might affect the ability of individuals with disabilities to use the facility comply with accessibility standards.³⁰⁰ In some circumstances, FEMA provides PA funding for accessibility compliance requirements.

If the primary function area sustained eligible disaster damage, FEMA may provide PA funding for reasonable changes required by an eligible code or standard to increase accessibility to undamaged elements that serve the primary function area and the path of travel to the primary function area such as an accessible entrance, accessible routes to the primary function area, restroom access, accessible drinking fountains, and other elements.

To be eligible for PA funding, the required alterations must have a reasonable and technically supportable relationship to the damaged elements of the facility. As a result, there may be alterations required that are ineligible for PA funding.

PA funding for alterations to the path of travel requirements cannot exceed the ADA requirement of 20 percent of the total cost to repair the primary function area³⁰¹. The 20 percent calculation is defined at 28 C.F.R. § 35.151 (b)(4)(iii). If the costs for ADA upgrades exceed the 20 percent, the Applicant must prioritize the accessible elements as described in 28 C.F.R. § 35.151 (b)(4)(iv).

Terminology

A **primary function area** is the area where a major activity occurs for which the facility is intended. Examples include the dining area of a cafeteria, meeting rooms of a conference center, and public offices providing governmental services to the public.

Path of travel includes a continuous, unobstructed way of pedestrian passage to the primary function area. This includes interior and exterior approaches such as hallways, doorways, sidewalks, streets, parking areas, and public transit drop points. See Figure 12, *Path of Travel*.

Service facilities to the primary function area include restrooms, telephones, and drinking fountains.

See www.access-board.gov/guidelines-and-standards/buildings-and-sites/about-the-ada-standards/guide-to-the-ada-standards.

²⁹⁹ 42 U.S.C. § 12101 et seq.; 28 C.F.R. § 35.151(a)

³⁰⁰ 42 U.S.C. § 12147(a); 28 C.F.R. § 35.151(b).

³⁰¹ For calculation purposes, the total costs of the primary function area repair include the repair costs of the roof, HVAC system, mechanical rooms, janitorial closets, locker rooms, and private offices directly associated with the repair of the primary function area.

If the Applicant engages in repairs that are ineligible for PA funding, the cost of requirements triggered by those repairs are ineligible.

FEMA provides PA funding regardless of whether the facility was in compliance prior to the incident, provided the Applicant was not cited for a violation. If the Applicant was notified of being in violation of a requirement prior to the incident and did not bring the facility into compliance, then accessibility requirements related to the violation are ineligible.

Some special provisions apply when ADA requirements “threaten or destroy the historic significance of qualified historic buildings and facilities.”³⁰² FEMA addresses these provisions during its consultation with the SHPO or THPO and incorporates them into the agreement regarding the repairs to the building.

FEMA may also provide PA funding for additional State, Tribal, or local government ADA requirements that meet the eligibility criteria for codes or standards, as described in [Chapter 8:III.A, Codes and Standards, Eligibility Criteria](#).

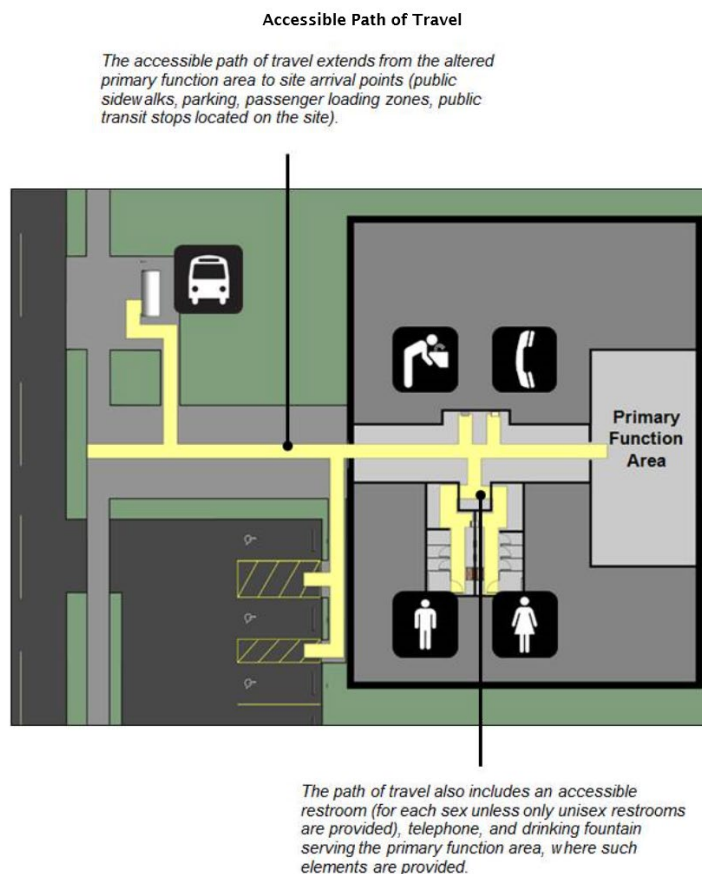

Figure 11. Path of Travel

G. Permit Requirements

If a Federal, State, Tribal, or local government permitting agency requires additional work based on a code or standard that does not meet the eligibility criteria in [Chapter 8:III.A, Codes and Standards, Eligibility Criteria](#), the cost of the additional work is only eligible if the work:

- Does not change the pre-disaster size, capacity, or function of the facility;
- Applies to the type of repair or restoration required;
- Is reasonable based on the type and extent of damage; and
- Is an established, enforced, uniform practice that applies to all similar types of facilities within the Applicant’s jurisdiction, regardless of the circumstance.

³⁰² 28 C.F.R. § 36.405.

IV. Hazard Mitigation

Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. FEMA has authority to provide PA funding for cost-effective hazard mitigation measures for facilities damaged by the incident.³⁰³

In addition to providing funding for hazard mitigation under the PA Program, FEMA also provides hazard mitigation funding under its Hazard Mitigation Assistance (HMA) programs. FEMA's Federal Insurance and Mitigation Administration administers the HMA programs, which are briefly described in Figure 13, *FEMA Hazard Mitigation Programs*. The eligibility criteria, procedures, and timelines for implementation of the hazard mitigation measures funded under the HMA programs differ from the hazard mitigation measures funded under the PA Program.

Stafford Act Section 406	Stafford Act Section 404	National Flood Insurance Act of 1968 NFIA	Stafford Act Section 203	
PA Programs	HMA Programs			
<i>Disaster-related programs</i>  PA: Mitigation of incident-caused damage Funding: Available for disaster-damaged facilities only*	<i>Disaster-related programs</i>  HMGP: Multi-hazard, statewide mitigation Funding: Available for damaged and non-damaged facilities based on a percentage of dollars obligated to the PA and IA programs	<i>Non-disaster-related programs</i> <div> FMA: Flood mitigation for insured properties</div> <div> PDM: Multi-hazard, project-specific</div>		
NOTE: PA = Public Assistance HMA = Hazard Mitigation Assistance HMGP = Hazard Mitigation Grant Program				FMA = Flood Mitigation Assistance PDM = Pre-Disaster Mitigation IA = Individual Assistance

* See exception for Alternative Procedure Projects in Chapter 2, Section VII.G.4(c).

Figure 13. FEMA Hazard Mitigation Programs

³⁰³ Stafford Act § 406(e), 42 U.S.C. § 5172; 44 C.F.R. § 206.226(e).

FEMA refers to PA-funded hazard mitigation as PA mitigation and mitigation funded under HMGP as HMGP mitigation.

The Applicant may use both PA mitigation and HMGP mitigation funds to implement mitigation measures on the same facility, but not for the same work. The Applicant cannot use funds from one of these mitigation programs to meet the non-Federal cost share of work funded under the other mitigation program.

This document provides details regarding PA mitigation funding. FEMA's *Hazard Mitigation Assistance Guidance* provides further details on HMGP mitigation funding and the HMA programs.³⁰⁴

A. Public Assistance Hazard Mitigation

FEMA evaluates proposed PA mitigation measures for eligibility, cost-effectiveness, technical feasibility, and compliance with EHP laws, regulations, and EOs. In addition, FEMA ensures that the mitigation does not negatively impact the facility's operation or surrounding areas or create susceptibility to damage from another hazard.

To be eligible for PA funding, the mitigation measures must directly reduce the potential of future damage to the damaged portion(s) of the facility. Generally, eligible PA mitigation measures are those the Applicant performs on the damaged portion(s) of the facility. If the Applicant proposes mitigation measures that are distinct and separate from the damaged portion(s) of the facility, FEMA evaluates the proposal and determines eligibility on a case-by-case basis considering how the mitigation measure protects the damaged portion(s) of the facility and whether the mitigation measure is reasonable based on the extent of damage. Some examples of such measures include:

- Constructing floodwalls around damaged facilities
- Installing new drainage facilities (including culverts) along a damaged road
- Dry floodproofing both damaged and undamaged buildings that contain components of a system that are functionally interdependent (i.e., when the entire system is jeopardized if any one component of the system fails)

If FEMA determines mitigation measures to undamaged portions ineligible as PA mitigation the Applicant may request HMGP funding from the State to provide protection to undamaged portions, while utilizing PA mitigation funds to provide protection to damaged portions.

Hazard Mitigation Grant Program

The Recipient manages HMGP and is responsible for soliciting applications from State, Tribal, and local government agencies. Projects submitted to the Recipient must be in accordance with the Recipient's Hazard Mitigation Plan, address severe detrimental impacts, and have the greatest potential to reduce future losses. Eligible projects include acquisition of hazard-prone property, retrofitting existing buildings and facilities, elevation of flood-prone structures, infrastructure protection measures, and hazard mitigation planning. State, Tribal, and local government agencies should direct questions regarding HMGP to the State Hazard Mitigation Officer: www.fema.gov/state-hazard-mitigation-officers.

³⁰⁴ www.fema.gov/media-library/assets/documents/103279.

PA mitigation opportunities usually present themselves during facility repair. However, in cases where the Applicant needs to repair a facility in an expedited manner, it may miss an opportunity to implement mitigation measures during repair. If the Applicant implements mitigation measures after the PA-funded repair is complete, the mitigation work may still be eligible for PA funding; however, FEMA will not provide PA funding for any duplicative work triggered by the subsequent mitigation.

In some instances, the Applicant may implement mitigation measures after the incident occurs but before the incident is declared or before FEMA has the opportunity to evaluate the measure for eligibility. In these cases, the mitigation work may still be eligible for PA funding if it is cost-effective and FEMA confirms compliance with applicable EHP laws, regulations, and EOs.

If FEMA approves PA funding for mitigation and the Applicant does not complete the PA mitigation work, FEMA will deobligate the PA mitigation funds.

Cost-effective Evaluation

PA mitigation measures must be cost-effective. FEMA considers PA mitigation measures to be cost-effective if any of the following criteria are met:

- The cost for the mitigation measure does not exceed 15 percent of the total eligible repair cost (prior to any insurance reductions) of the facility or facilities for which the mitigation measure applies.
- The mitigation measure is specifically listed in [Appendix J: Cost-Effective Public Assistance Hazard Mitigation Measures](#), AND the cost of the mitigation measure does not exceed 100 percent of the eligible repair cost (prior to any insurance reductions) of the facility or facilities for which the mitigation measure applies.
- The Recipient or Applicant demonstrates through an acceptable benefit-cost analysis (BCA) methodology that the measure is cost-effective. FEMA's BCA software³⁰⁵ provides appropriate BCA methodologies.

Hazard Mitigation Best Practices

FEMA publishes documents describing best practices to reduce loss of life and property when repairing damaged facilities. These publications are listed in FEMA P-787, Catalog of FEMA Building Science Branch Publications and Training Courses at www.fema.gov/media-library/assets/documents/12909.

Many mitigation measures that do not meet the first two requirements above prove to be cost-effective based on a BCA. If the mitigation measure is not cost-effective based on the first two criteria, FEMA, the Recipient, and the Applicant work together to develop a BCA to determine whether it is cost-effective.

A BCA is based on a comparison of the total estimated cost for the PA mitigation measure to the total value of expected benefits to society. FEMA's BCA methodology considers common project benefits, which include reductions in the magnitude or frequency of:

- Damage to the facility and its contents
- The need for emergency protective measures
- The need for temporary facilities

³⁰⁵ www.fema.gov/benefit-cost-analysis.

- Loss of function
- Casualties (typically included only for earthquake, tornado, and wildfire mitigation)
- Previous impacts regardless of whether the impacts occurred in Federal declarations (only if documented)

B. Public Assistance Mitigation Funds for Capped Projects

1. Improved Project

If the capped amount for an Improved Project includes PA mitigation funds and the Applicant either does not complete the PA mitigation work, or replaces or relocates the original facility, FEMA deobligates the PA mitigation funds.

2. Alternate Project

If the SOW to restore a facility includes PA mitigation, and the Applicant elects to proceed with an Alternate Project, FEMA does not include costs related to the PA mitigation in the capped amount for the Alternate Project.

3. Alternative Procedures Project

When the Applicant is restoring the function, but changing the pre-disaster capacity of a facility, the proposed PA mitigation SOW is developed based on the actual SOW to be performed; however, the cost-effectiveness is evaluated based on the fixed-cost amount accepted for the pre-disaster restoration SOW. If the capacity is increased, the proposed hazard mitigation SOW and cost is limited to the SOW and cost necessary to mitigate to the pre-disaster capacity of the damaged facility. If the Applicant does not complete the approved PA mitigation, FEMA deobligates the portion of the fixed-cost amount related to hazard mitigation.

V. Repair vs. Replacement

When evaluating whether a damaged facility is eligible for replacement, FEMA compares the repair cost with the replacement cost and evaluates the feasibility of repairing the facility.³⁰⁶

A facility is considered repairable when:

- The cost to repair the disaster-related damage does not exceed 50 percent of the cost to replace the facility based on its pre-disaster size, capacity, and function; and
- It is feasible to repair the facility so that it can perform the pre-disaster function as well as it did prior to the incident.³⁰⁷

The comparison of the repair cost to the replacement cost results in a fraction that expresses repair as a percentage of replacement. The percentage is calculated with the repair cost as the numerator and the replacement costs as the denominator. FEMA refers to this as the “50% Rule.”

The purpose of the 50% Rule is to make an early determination on whether it is more prudent to repair or replace a facility. It is not intended to be a full calculation of all eligible project costs.

³⁰⁶ 44 C.F.R. § 206.226(f).

³⁰⁷ 44 C.F.R. § 206.226(f)(1).

A. Calculation

The repair cost (numerator) is the cost of repairing disaster-related damage only and includes costs related to modern means, methods, and materials that apply to the repair of the damaged elements only.³⁰⁸ The numerator does not include costs associated with:

- Upgrades of damaged or non-damaged elements even if required by codes or standards (e.g., elevation of an entire facility triggered by repair, increased capacity, or additional features)
- Demolition beyond that which is essential to repair the damaged elements
- Site work
- Soft costs
- Contents
- Hazard mitigation measures
- Emergency Work

The replacement cost (denominator) is the cost of replacing the facility based on its pre-disaster design (size and capacity) and function in accordance with applicable codes or standards. The denominator does not include costs associated with:

- Demolition
- Site work
- Soft costs
- Contents
- Hazard mitigation measures
- Emergency Work

Although certain costs are not included in the 50% Rule calculation to determine whether the facility is eligible for replacement, the costs may be eligible for PA funding subject to all other eligibility requirements.

Example of Means, Methods, and Materials

A code-compliant repair of a hundred-year-old brick sewer line that was hand dug would include different material and methods than that originally used to construct the pipeline. In this instance, the 50 % Rule repair cost would include the cost of current material and methods. However, if a code required increasing the diameter of the pipeline, these costs would not be included in the 50 % Rule repair cost even if the increase is eligible for FEMA funding. Similarly, codes may require structural reinforcement of an unreinforced masonry building in a seismic hazard zone. Since the structural reinforcement was not present before the disaster it would not be included in the repair cost, even if it is eligible for FEMA funding.

Terminology

Soft costs are those not considered as direct construction costs, including:

- Architectural costs
- Engineering costs
- Project management costs
- Financing
- Legal fees
- Other pre-/post-construction expenses

Site Work is any exterior work at the site. Examples include:

- Excavation
- Backfill
- Erosion control
- Utility installation
- Paving

³⁰⁸ This includes FEMA's minimum required codes and standards.

B. Written Request

The Applicant should submit its request for replacement within one year of the Declaration. The request should include both repair and replacement cost estimates with supporting documentation, prepared in accordance with the requirements described in [Chapter 9:II.E.1, Applicant Estimates](#).

FEMA staff that are professionally licensed engineers or architects with cost-estimating expertise or certified cost estimators review all requests for replacement and validate the estimates. For any replacement requests over \$5 million, FEMA submits the estimates to the USACE Center for Excellence for Cost Engineering for an additional review of the repair and replacement estimates. FEMA considers the results of the USACE review prior to approving replacement.

Floodplain Management Ordinance Compliance

The costs to comply with a local floodplain management ordinance that requires elevation or floodproofing of a Substantially Damaged facility in an SFHA are eligible for PA funding. These costs are not included in the repair cost of the 50% Rule calculation but are included in the replacement cost of the calculation.

C. Eligible Funding

If the estimated repair cost exceeds 50 percent of the estimated replacement cost,³⁰⁹ the actual replacement cost is eligible. The Applicant may elect to repair the facility in conformance with applicable codes and standards. In this case, FEMA limits the eligible cost to the estimated cost of repair or replacement, whichever is less.³¹⁰

If the repair cost does not exceed 50 percent of the replacement cost, AND upgrades are triggered by codes or standards, AND the total of both is greater than 100 percent of the estimated replacement cost, FEMA caps the total eligible cost at the total estimated replacement cost including soft costs (not the amount used for the 50 percent calculation).

Demolition of a facility that is eligible for replacement is eligible as part of the work to replace the facility. Eligible costs include removal of the associated demolition debris.

PA mitigation funding cannot be applied to replacement facilities, unless the facility is part of an Alternative Procedures Project (described in [Chapter 8:VIII, Capped Projects](#)) or the mitigation measure is listed in [Appendix J: Cost Effective Public Assistance Hazard Mitigation Measures](#).

As discussed in [Chapter 8:III.D.1, Historic Preservation Compliance, Federal Requirement](#), if an applicable code or standard requires that a historic facility be restored in a certain manner and does not allow other options, the cost to restore the facility in accordance with the code or standard is eligible and may exceed the estimated replacement cost.³¹¹ A historic facility is defined as one listed in, or eligible for listing in, the National Register of Historic Places.

³⁰⁹ For repair versus replacement, the term “replacement cost” means the cost of replacement in accordance with applicable codes and standards.

³¹⁰ 44 C.F.R. § 206.226(f)(2).

³¹¹ 44 C.F.R. § 206.226(f)(3).

D. Replacement of Components of a Facility or System

FEMA does not apply the 50% Rule to a facility's structural or mechanical components (e.g., windows, roofs, HVAC; electrical, plumbing). For example, FEMA does not apply the 50% Rule to a damaged HVAC system to determine whether the system should be repaired or replaced because it is a component of a building. If the HVAC system is repairable, as determined by an inspector or engineer with appropriate technical expertise, FEMA limits its funding to the repair of the system.

For facilities that are systems composed of multiple components that are easily segregated, FEMA applies the 50% Rule to individual components of the system, rather than the entire system. The following are examples of facilities that are systems to which FEMA applies the 50% Rule calculation to individual components:

- Drainage channel or irrigation system: a section from node to node, which is where there are intersections or connecting points
- Water or sewer line system: a section of piping from manhole to manhole, a lift station, or a manhole structure
- Water or wastewater treatment plant: a control building, clarifier, or sedimentation pond
- Roadway: each damaged roadway section

Electrical distribution systems are evaluated for replacement based on the criteria in [Chapter 8:IX.D.2, Power: Transmission and Distribution System Conductor Replacement](#).

The following are examples of facilities to which FEMA applies the 50% Rule to the entire facility:

- Bridge
- Culvert
- Building
- Pumping station
- Pier
- Pool, including integral pumping
- Bath house or rest room
- Equipment
- Lighting structure
- Sign

VI. Relocation

FEMA may approve funding for and require restoration of an Applicant's destroyed (i.e., eligible for replacement) facility at a new location. FEMA only provides PA funding when all of the following conditions apply:

- The facility is subject to repetitive heavy damage because of its location. For example, facilities located in a SFHA are subject to repetitive heavy damage;
- Project approval is not barred by other regulations;³¹² and

³¹² 44 C.F.R. § 206.226(g)(1).

- The overall project, including all costs, is cost-effective. If the cost to relocate the facility is less than the eligible cost to replace the facility at its original location (the value of the land at the original site is not included as part of this evaluation) then the project is cost effective. In instances where the cost of relocation exceeds the cost to replace the facility at its original location FEMA may use its BCA process and software to determine cost effectiveness.

An applicable Federal, State, or local code or standard, such as a floodplain management regulation, may also require that a damaged facility be relocated away from a hazardous area (e.g. floodway). If the facility is destroyed (i.e. eligible for replacement), FEMA determines whether relocation is cost-effective in the same manner as described above.

If the Applicant requests relocation of a facility that FEMA is not requiring to be relocated, FEMA may provide funding for the relocation if it is more cost-effective than replacing it at the current location. In the case of a request for relocation, FEMA evaluates the cost effectiveness as a PA mitigation measure using its BCA process and software³¹³ to compare the benefits of the damage prevented to the facility at its original location against the cost of replacement and relocation at the new location.

If relocation is not feasible, cost effective, or eligible for PA funding the Applicant may request an Improved, Alternate, or Alternative Procedures project as detailed in [Chapter 8:VIII, Capped Projects](#).

A. Eligible Work and Funding

Eligible work associated with relocation includes land acquisition and construction of necessary support facilities, such as roads, parking lots, and utilities. Demolition and removal of the original facility are also eligible if deemed necessary.³¹⁴ FEMA limits PA funding to the amount necessary to make the relocated facility and its associated components operational.

FEMA considers the proximity of the new site to utilities (water, sewer, and electric) and approves the least costly solution. Construction of an off-site support facility is only eligible if it is a utility that would serve the relocated facility exclusively.

For land acquisition, if the facility was located on 10 acres of land at the time of the incident, and FEMA determines that 10 acres is not necessary for the operation of the facility, FEMA limits PA funding to the necessary amount of land.

In situations where the Applicant owns the facility, but not the land or the support facilities at the original location, the cost to purchase the land or build support facilities is ineligible.

When FEMA requires relocation, FEMA does not provide future PA funding for repair or replacement of the original facility or for other facilities at the original site unless the facility facilitates an open space use.³¹⁵ For example, if the Applicant converts the original site to a park, FEMA may provide PA funding in the future for park components, such as benches, tables, restrooms, or gravel roads.

³¹³ www.fema.gov/benefit-cost-analysis.

³¹⁴ 44 C.F.R. § 206.226(g)(2).

³¹⁵ 44 C.F.R. § 206.226(g)(3).

B. Sale or Lease of Property at Original Site

The Applicant may sell or lease the original facility or the land on which a relocated facility was originally located. The Applicant must inform the purchaser of the property that FEMA will not provide future PA funding for repair or replacement of the original facility or for other facilities at the original site unless the facility facilitates an open space use.

The property which the facility is relocated to, and the relocated facility itself, are subject to the real property provisions of 2 C.F.R. part 200 including disposition and reporting requirements under 2 C.F.R. §§ 200.311 and 329, respectively.

If the Applicant takes an action, such as demolition, using PA funds at the original site, FEMA must complete an EHP review before the action occurs.

VII. Facility Located in or Impacting a Floodplain

When FEMA provides PA funding for restoration of a facility located in or impacting a floodplain, FEMA is required to ensure minimization of harm to or within the floodplain.

A. 8-Step Decision-making Process

FEMA is responsible for determining whether a PA project will have an adverse impact on the 100-year floodplain (500-year floodplain for critical actions). To make this determination, FEMA initiates the 8-Step Decision-making Process defined in 44 C.F.R. § 9.6. As part of this process FEMA evaluates the impacts the project may have on the floodplain and practicable alternatives for environmental, social, economic, technical, and legal factors, as defined in 44 C.F.R. § 9.9. Some alternatives may not be eligible for PA funding. FEMA considers whether each alternative identified is eligible for PA funding and, if not, whether the Applicant has funding available to proceed with the alternative without PA funding.

Projects in the 100-year floodplain (500-year floodplain for critical actions) are only eligible if, as a result of completing the 8-step process, FEMA is unable to identify a practicable alternative

Terminology

A **critical action** is an action for which even a slight chance of flooding is too great. The minimum floodplain of concern for critical actions is the 500-year floodplain (also referred to as the critical action floodplain).

Critical actions are defined in 44 C.F.R. § 9.4, Definitions, which includes examples of actions that FEMA deems critical.

If an action is not specified, FEMA utilizes the U.S. Water Resource Council Floodplain Management Guidelines to determine whether a proposed action is deemed a critical action by considering the following:

- The potential for additional impacts if the proposed project is flooded in a future incident (e.g., the facility contains volatile or toxic materials).
- The ability for occupants of buildings such as hospitals, schools, and nursing homes to evacuate in time to avoid loss of life and injury given the flood warning lead-time available in a future incident.
- The potential for emergency services and utilities to become inoperative, or essential and irreplaceable records to be lost if a facility is flooded in a future incident.

The term “critical action” should not be confused with a PNP “critical service” or “critical facility.”

to restoring the facility within the floodplain. The 8-step process is not required for projects where the repair cost is less than \$5,000.³¹⁶

B. Facility Located in a Special Flood Hazard Area

SFHAs³¹⁷ are areas that are subject to inundation during a 100-year flood (a flood having a 1 percent chance of occurrence in a given year).

1. National Flood Insurance Program

For an NFIP-insurable facility located in an SFHA, FEMA must reduce PA funding when the facility is:

- Located in an area that FEMA has identified as an SFHA for more than 1 year;
- Damaged by flooding; and
- Uninsured for flood loss.

If the Applicant believes that its property is incorrectly identified on a Flood Insurance Rate Map (FIRM) as being located within the SFHA, it may request a Letter of Map Amendment or Letter of Map Revision from FEMA within 6 months of the declaration. If the Applicant's request is approved and FEMA determines that the property is not located in an SFHA, FEMA may reinstate PA funding. Costs incurred in pursuit of a Letter of Map Amendment or Letter of Map Revision are ineligible for PA funding.

If the Applicant does not have flood insurance for the facility or carries inadequate flood insurance for the insurable facility, FEMA reduces eligible project costs by the lesser of:

- The maximum amount of insurance proceeds that could have been obtained from an NFIP standard flood insurance policy for the building and its contents;³¹⁸ or
- The value of the building and its contents at the time of the incident.

FEMA does not apply this reduction to PNP facilities in communities that do not participate in the NFIP.³¹⁹ However, for FEMA to provide PA funding for the PNP facility, the community must agree to participate in the NFIP within 6 months of the declaration and the PNP must purchase the required flood insurance; or the PNP must obtain and maintain flood insurance from another source.³²⁰

VIII. Capped Projects

FEMA provides three options that provide flexibility for the Applicant to use PA funding differently than restoring the pre-disaster design and function of the facility. For these options, FEMA caps the amount of PA funding based on the estimated amount to restore the damaged facility to its pre-disaster design and function, including eligible codes and standards.³²¹

The three capped project options are:

³¹⁶ 44 C.F.R. § 9.5(c)(13).

³¹⁷ 44 C.F.R. § 206.251.

³¹⁸ 44 C.F.R. § 206.252(a).

³¹⁹ 44 C.F.R. § 206.252(b).

³²⁰ Ibid.

³²¹ This includes FEMA's minimum required codes and standards.

Intent of Permanent Work Alternative Procedures

The intent of the PA Alternative Procedures for Permanent Work is to provide the Applicant with a flexible avenue to drive its own recovery outcomes. Instead of driving the Applicant's recovery within the confines of what the PA Program can fund, PA staff develop projects and identify the amount of PA funds that are available for Applicants to use toward a strategic recovery outcome. The Recipient and Applicant may also work together with various Federal agencies and other stakeholders to identify other available sources of funding that may also be applied to achieve the desired outcome.

- Alternative Procedures Project under Section 428 (Large Projects only):³²² This type of project offers the maximum amount of flexibility with how the Applicant may use PA funding, including use of excess funds which are not eligible under the Improved or Alternate Project options. The Applicant may use funds across all Permanent Work Alternative Procedures Projects with no requirement to rebuild communities back to what existed prior to the disaster. Alternative Procedures Projects are subject to acceptance of a fixed-cost offer within the deadlines described in [Chapter 9:II.E.6\(a\), Fixed Cost Offer Deadlines](#).
- Improved Project: The Applicant may wish to make improvements to a damaged facility that are not required by eligible codes or standards. A project that restores the pre-disaster function of a facility and incorporates improvements or changes to the pre-disaster design is an Improved Project.
- Alternate Project: The Applicant may determine that the public welfare is not best served by restoring the function of the damaged facility. When this occurs, the Applicant must obtain FEMA's approval to apply PA funding toward a different facility (or facilities). FEMA refers to this as an Alternate Project.³²³ The Alternate Project must be a permanent project that benefits the general public, serving the same general area that was being served by the original facility.

Capped projects may involve significant changes to the pre-disaster configuration of a facility (e.g., location, footprint, or size). FEMA conducts EHP compliance reviews on the actual proposed SOW to be performed, prior to approving the project.

A. Capped Project Funding

Alternative Procedures Project Funding Under Section 428

Federal funding for an Alternative Procedures Project is capped based on the aggregate Federal share of the approved estimated cost:

- To restore the damaged facilities to pre-disaster design and function in accordance with eligible codes and standards; and
- For cost-effective PA mitigation measures associated with the actual restoration SOW to be performed.

³²² Stafford Act § 428, 42 U.S.C. § 5189f.

³²³ 44 C.F.R. § 206.203(d)(2).

Improved Project Funding

Federal funding for an Improved Project is limited to the lesser of the following:

- The Federal share of the approved estimate to restore the damaged facility to its pre-disaster design and function; or
- The Federal share of the actual costs of completing the Improved Project.³²⁴

FEMA only increases eligible funding for an Improved Project if the Applicant identifies an error or omission in the original SOW or cost estimate related to restoring the facility to its pre-disaster design and function.

Alternate Project Funding

Federal funding for an Alternate Project is limited to the lesser of:

- The Federal share of the approved estimate to restore the damaged facility to its pre-disaster design and function; or
- The Federal share of the actual cost of completing the Alternate Project.³²⁵

B. Use of Capped Project Funds

FEMA has different requirements for how the Applicant can use the funds related to each type of capped project.

1. Use of Alternative Procedures Project Funds

FEMA will complete a fixed-cost estimate for all large permanent work projects. FEMA will transmit this estimate as a fixed-cost offer to the Applicant for consideration. When the Applicant accepts a fixed cost offer for a large project in accordance with [Chapter 9:II.E.6\(a\), Fixed Cost Offer Deadlines](#), FEMA considers it an Alternative Procedures Project and the Applicant is:

- Not required to rebuild back to what existed prior to the disaster.
- Allowed to share funds across all Alternative Procedures Permanent Work Projects.
- Not required to track costs to specific work items or facilities as funds can be shared across all Alternative Procedures Permanent Work Projects.

Example of an Alternative Procedures Project

A county road crosses a watercourse and its adjacent floodplain using five culverts. During the incident, floodwaters overtop the road and damage the crossings, either by washing out the culverts or by damaging the roadway and headwalls. FEMA prepares and approves a Project Worksheet to repair or replace each culvert crossing, including hazard mitigation measures to increase the size of the culverts. The Applicant requests that the aggregate funding for the five crossings be used to replace the current configuration with one bridge.

³²⁴ 44 C.F.R. § 206.203(d)(1).

³²⁵ 44 C.F.R. § 206.203(d)(2)(ii) and (iii).

- Allowed to retain and use excess funds to reduce risk and improve future disaster operations (subject to timely closeout).
- Eligible for cost-effective hazard mitigation on replacement projects.

The Applicant may use Alternative Procedures Permanent Work Project funds, including any excess funds across all of its Alternative Procedures Permanent Work projects.

The Applicant may request to use the funds for any of the activities defined as eligible under the *Use of Fixed-Cost Funds* column in the table below. Once FEMA approves, and the Applicant completes, the SOW associated with these activities, the Applicant may use any excess funds for the expanded list of eligible activities listed under the *Use of Excess Funds* column.

Any excess funds remaining after the approved SOW is complete may be used for cost-effective activities that reduce the risk of future damage, hardship, or suffering from a major disaster, and activities that improve future PA operations or planning. The Applicant must submit a proposed SOW for use of any excess funds, along with a project timeline to the Recipient within 90 days of completing its last Alternative Procedures Project. The Recipient must forward the request to FEMA within 180 days of date the last Alternative Procedures Project was completed. FEMA evaluates the proposed use of excess funds for reasonableness to ensure prudent use of funds. FEMA also evaluates the submitted project timeline and approves an appropriate deadline for work completion, not to exceed the overall disaster period of performance.

If the Applicant does not accept the fixed-cost offer, the project will be processed utilizing standard procedures and final funding will be based on actual costs. The flexible use of funds and the use of excess funds are not available under standard procedures.

The following table lists examples of eligible and ineligible types of work and costs when using fixed-cost funds and excess funds.

Type of Work or Cost (all work or costs listed must otherwise be eligible for PA)	Use of Fixed-Cost Funds	Use of Excess Funds
Restoration of disaster-damaged facilities and equipment	Eligible	Eligible
Restoration of disaster-damaged facilities in undeclared areas within the same State or Tribal area	Ineligible	Eligible
Alternate Projects (e.g., purchasing equipment, constructing new facilities, improvements to undamaged facilities such as shelters and emergency operation centers) in declared areas	Eligible	Eligible
Cost-effective hazard mitigation measures for undamaged facilities	Ineligible	Eligible
Covering future insurance premiums, including meeting obtain and maintain (O&M) insurance requirements, on damaged or undamaged facilities	Ineligible	Eligible
Work on facilities that are ineligible due to a failure to meet previous O&M requirements	Ineligible	Ineligible

Conducting or participating in training for response or recovery activities, including Federal grants management or procurement courses	Ineligible	Eligible
Planning for future disaster response and recovery operations, such as developing or updating plans (e.g., Debris Management Plans, Hazard Mitigation Plans, Pre- disaster Recovery Plans, Emergency Management Plans), integrating these plans into other plans, preparedness activities, exercises, and outreach	Ineligible	Eligible
Salaries for PA or emergency management staff. This may include but is not limited to, staff performing PA award or subaward administration, monitoring, and closeout activities for other PA disaster awards, and staff developing or updating disaster plans	Ineligible	Eligible
Paying down debts	Ineligible	Ineligible
Covering operating expenses	Ineligible	Ineligible
Covering budget shortfalls	Ineligible	Ineligible
Covering the non-Federal cost share of FEMA projects or other Federal awards	Ineligible	Ineligible

Obtain-and-maintain requirements for insurance apply to work funded with excess funds, as appropriate.

2. Use of Improved Project Funds

The Applicant may use Improved Project funds to improve the damaged facility. The facility must have the same function and at least the same capacity that existed immediately prior to the disaster. The following are examples of Improved Projects:

- Laying asphalt on a gravel road
- Replacing a firehouse that originally had two bays with a firehouse that has three bays
- Incorporating requirements dictated by a code or standard that does not meet PA eligibility criteria
- Relocating a facility when the relocation is not required by FEMA

The Applicant must obtain approval from the Recipient.³²⁶ If the Improved Project significantly changes the pre-disaster configuration of the facility, the Recipient must forward the request to FEMA to ensure that the Improved Project complies with appropriate EHP laws, regulations, and EOs.

The Applicant can combine PA funds with funding from another Federal agency to construct the Improved Project. However, the Applicant cannot use funding from another Federal agency toward the non-Federal cost share of the PA-funded project, unless the legislation for the other grant allows such use. CDBG³²⁷ is an example of a Federal program that, in certain circumstances, allows use of its funding to meet the non-Federal share of another Federal grant program.

³²⁶ 44 C.F.R. § 206.203(d)(1).

³²⁷ portal.hud.gov/hudportal/HUD?src=/program_offices/comm_planning/communitydevelopment/programs.

3. Use of Alternate Project Funds

The Applicant may use Alternate Project funds toward a project that does not restore the pre-disaster function of the damaged facility. This includes:

- Repair, expand, mitigate, or construct a facility that would otherwise be an eligible facility under the PA Program³²⁸
- Demolish facilities
- Purchase capital equipment that has a useful life of at least 1 year and is equal to, or greater than, \$5,000 per unit
- Fund project shortfalls due to mandatory flood insurance reductions taken from PA Program funding for repairs to buildings in SFHAs (see [Chapter 8:VII.B.1, National Flood Insurance Program](#))
- Supplement funds for an Improved Project
- Conduct cost-effective hazard mitigation measures, regardless of whether the facility was damaged by the incident and whether the measures reduce the risk of future damage from the same type of incident or of the same type of damage caused by the incident. Alternate Project funds may be use used for hazard mitigation provided that:
 - Funding does not duplicate other FEMA mitigation funding; and
 - Measures reduce the risk of future damage to a facility that is otherwise eligible either under the PA or HMA programs. If the measures are the same type as those eligible for HMA funding, they must meet a need for governmental services and functions or eligible PNP services and functions in the area affected by the incident.

If the Alternate Project involves construction, the Applicant must obtain FEMA approval prior to the start of construction as FEMA must ensure that it complies with appropriate EHP laws, regulations, and EOs.³²⁹

The Applicant may not use Alternate Project funds to:

- Meet budget shortfalls
- Create a new community plan
- Landscape
- Pay for operating expenses³³⁰
- Purchase supplies, furniture, or equipment costing less than \$5,000 per unit
- Pay the non-Federal share of any PA project³³¹
- Fund buyouts for mitigation, such as acquisition of flood-prone property to create open space
- Supplement funds on projects that utilize other Federal agency grants
- Fund a project located in a FEMA-designated floodway

³²⁸ 44 C.F.R. § 206.203(d)(2)(iv).

³²⁹ 44 C.F.R. § 206.203(d)(2)(v).

³³⁰ Ibid.

³³¹ Ibid.

C. Disposition of Original Facility

For Alternate and Alternative Procedures Projects, if the Applicant does not repair, replace, or sell the damaged facility for which the capped project funding was based, and that facility is unsafe if not repaired, the Applicant must render the facility safe and secure (e.g., by restricting access, locking doors and windows, constructing a fence around the property) or demolish it.

If the Applicant receives funds for salvaged components of the facility, FEMA adjusts the capped project by the value or anticipated fair market value of salvaged materials less the estimated costs necessary to demolish the facility, grade the site, or make the facility safe and secure.

For any action at the original site, such as demolition, that is completed using PA funds, FEMA must conduct an EHP review. However, if the Applicant completes the work at the original site using non-PA funds, a FEMA EHP review is not required.

If the Applicant opts to keep a damaged facility for a later use, the facility may be eligible for PA funding in future incidents, provided the Applicant repaired the facility in accordance with current codes and standards, and completed any mitigation measures that FEMA included in the original SOW prior to the incident.

IX. Eligibility Considerations by Facility

This section details the types of facilities captured within each category of work along with specific eligibility criteria related to one or more of the facilities within each category. See [Appendix N: Work Eligibility Considerations by Type of Facility](#) for a summary of eligibility by facility type.

A. Roads and Bridges (Category C)

Roads may be paved, gravel, or dirt. Road components include, but may not be limited to:

- Surfaces
- Bases
- Shoulders
- Ditches
- Drainage structures, such as culverts
- Low water crossings
- Associated facilities, such as lighting, sidewalks, guardrails, and signs

Bridge components include, but may not be limited to:

- Decking
- Guardrails
- Girders
- Pavement
- Abutments
- Piers
- Slope protection
- Approaches

- Associated facilities, such as lighting, sidewalks, and signs

Permanent Work to restore roads and bridges is eligible unless restoration is under the specific authority of another Federal Agency such as FHWA. However, for Tribal Governments specifically, although BIA or FHWA may have authority to provide Permanent restoration of public Tribal roads, such roads may be eligible for PA funding provided the Tribal Government does not receive funding from BIA or FHWA for the same work.

FHWA has authority to restore public roads under the Emergency Relief (ER) Program³³². Roads that are eligible for ER assistance are identified as Federal-aid routes, which include highways on the Federal-aid highway system and all other public roads not classified as local roads or rural minor collectors. The ER Program is activated separately from Presidential declarations under the Stafford Act and may not be activated for all incidents. Federal-aid routes are ineligible for Permanent Work even if the ER Program is not activated or if the program is activated but FHWA does not provide funding for the work. FHWA also has authority to assist with restoration of transportation facilities under the Emergency Relief for Federally Owned Roads Program (ERFO).³³³

Private roads, including homeowners' association roads, are ineligible. However, roads owned by a Tribal Government may be eligible even if they are not open to the general public.

Work to repair scour or erosion damage to a channel or stream bank is eligible if the repair is necessary to restore the structural integrity of an eligible road, culvert, or bridge. Earthwork in a channel or stream embankment that is not related to restoring the structural integrity of an eligible facility is ineligible.

1. Maintenance

The incident may cause minor damage to roads that result in damage similar to that which may occur over time from other causes, such as the age of the road, traffic flow, and frequent rain. Costs related to maintenance of roads are ineligible. Therefore, distinguishing between pre-existing damage and damage caused by the incident is often difficult. For the repair of this type of damage to be eligible, the Applicant must demonstrate that the damage was directly caused by the incident.

When evaluating eligibility of reported road damage, in addition to evaluating how the incident caused the damage, FEMA reviews maintenance records or documentation establishing that the Applicant has a routine maintenance program. In the absence of maintenance records, FEMA reviews material purchase invoices and activity logs and inspects other sections of the Applicant's road system to confirm the performance of regular maintenance activities.

Work to repair potholes or fatigue cracking is usually ineligible as this type of damage is rarely caused directly by one incident.

³³² www.fhwa.dot.gov/programadmin/erelief.cfm.

³³³ fh.fhwa.dot.gov/programs/erfo/.

B. Water Control Facilities (Category D)

Water control facilities are those facilities built for the following purposes:

- Channel alignment
- Recreation
- Navigation
- Land reclamation
- Irrigation
- Maintenance of fish and wildlife habitat
- Interior drainage
- Erosion prevention
- Flood control
- Storm water management

They include:

- Dams and reservoirs
- Levees and floodwalls
- Lined and unlined engineered drainage channels
- Canals
- Aqueducts
- Sediment and debris basins
- Storm water retention and detention basins
- Coastal shoreline protective devices
- Irrigation facilities
- Pumping facilities
- Navigational waterways and shipping channels

1. Restoring the Capacity of Channels, Basins, and Reservoirs

Restoring the pre-disaster carrying or storage capacity of engineered channels, debris and sediment basins, storm water detention and retention basins, and reservoirs may be eligible, but only if the Applicant provides documentation to establish:

- The pre-disaster capacity of the facility; and
- That the Applicant maintains the facility on a regular schedule.

If the Applicant chooses to remove non-incident-related material along with that deposited as a result of the incident, the project is considered an Improved Project.

Documentation Supporting Pre-disaster Capacity

Survey data that is either *recent* or covers a multi-year period to substantiate the amount of new material reasonably attributable to the incident.

Documentation Supporting Regular Maintenance

Written maintenance plan and/or activity logs documenting regular intervals of activity. Applicant logs documenting clearance of blockages in response to resident complaints are not sufficient to substantiate a regular maintenance schedule.

2. Flood Control Works

Flood control works are those structures such as levees, flood walls, flood control channels, and water control structures designed and constructed to have appreciable effects in preventing damage by irregular and unusual rises in water levels.

Generally, flood control works are under the authority of USACE or NRCS and restoration of damaged flood control works under the authority of another Federal agency is ineligible.

Secondary levees riverward of a primary levee are ineligible, unless the secondary levee protects human life.

C. Buildings and Equipment (Category E)

Buildings, including:

- All structural and non-structural components, including mechanical, electrical, and plumbing systems
- Contents and equipment within the building
- Furnishings

Equipment includes:

- Vehicles
- Construction equipment

Repair or replacement of buildings and equipment is eligible.

1. Buildings

A Public Housing Authority facility is only eligible for Permanent Work if Congress does not appropriate funds to HUD for emergency capital needs for the facility.

For buildings and building systems, distinguishing between damage caused by the incident and pre-existing damage may be difficult. Before making an eligibility determination, FEMA considers each of the following:

- Evidence of regular maintenance
- Evidence of pre-disaster condition, such as interior water stains from a leaky roof (in such cases, FEMA evaluates whether the roof was repaired prior to the incident)
- The severity and impacts of the incident
- Whether the Applicant took prudent actions to prevent additional damage

Mold remediation and removal of mud, silt, or other accumulated debris is eligible as Permanent Work when conducted in conjunction with restoration of the facility.

(a) Earthquake Damage to Welded Steel Moment Frame Buildings

FEMA has specific eligibility criteria for evaluating and repairing earthquake damage to buildings constructed with welded steel moment frames. FEMA bases the eligibility criteria on *Recommended Post Earthquake Evaluation and Repair Criteria for Welded Steel Moment Frame Buildings* (FEMA 352).³³⁴

³³⁴ www.fema.gov/media-library/assets/documents/747.

The repair of the damaged frame connections to pre-earthquake design in accordance with FEMA 352, Chapter 6, is eligible, but only if FEMA approves a specific SOW for the repairs prior to the Applicant performing the work. Repair of the architectural finishes and fire retardants removed in the area of the damage are also eligible.

2. Equipment and Supplies

Repairing damaged—or replacing destroyed—equipment and supplies with the same number of equivalent items is eligible.³³⁵ Equivalent items are similar in age, condition, and capacity.

The Applicant may replace equipment or supplies with different items used for the same general purpose. However, FEMA caps the eligible cost at the estimated amount for items equivalent to those damaged.

When equipment is not repairable, FEMA uses “blue book” values or similar price guides to estimate the eligible cost.

When a used item is not reasonably available (within a reasonable cost, time, or distance) or does not meet applicable national consensus standards, the purchase of a new item with similar capacity is eligible.

If the cost to replace the item is less than the cost to repair it, FEMA limits PA funding to the replacement cost.

Terminology

Consensus standards are standards that have been adopted by a nationally recognized standards-producing organization.

3. Files

Eligible activities associated with the recovery of files include, but are not limited to:

- Recovery of damaged hard copies
- Stabilizing the damaged hard copies
- Sanitizing damaged hard copies
- Photocopying or scanning damaged hard copies to re-establish files
- Recovering data from water-damaged computer hard drives

Recovery of damaged hard copies includes labor and materials, such as bags, boxes, and containers. Stabilizing damaged hard copies includes freeze-drying. Photocopying or scanning includes labor and materials such as new folders and paper.

Not all activities are eligible. Examples of ineligible activities include:

- Establishing new information databases
- Manually entering data that was lost in damaged computers

³³⁵ 44 C.F.R. § 206.226(h).

- Scanning re-established hardcopy files into computers to create digital files
- Deciphering photocopies of damaged hard copies

4. Research-Related Contents

Reagents and specimen collections are eligible for replacement based on the following criteria.

The number of units of each reagent eligible for replacement is equal to the number lost OR to the number necessary to restore basic research activity, whichever is less.

FEMA reimburses the purchase price from commercial sources or other institutions, whichever is less. The replacement of reagents that are so unique that they are considered an outcome of a research program is ineligible.

Replacing a representative, but not necessarily a whole portion, of a specimen collection may be eligible. To be eligible for replacement, the specimen types should be available for purchase from commercial sources or other institutions and support an ongoing eligible educational or medical program.

5. Animals

Animals housed or exhibited in an eligible facility are eligible for replacement with the same number of comparable animals if they are:

- Injured to the extent they are no longer able to function for the intended purpose
- Killed
- A destroyed specimen
- A damaged specimen that is not recoverable

The animal is ineligible for replacement if a comparable animal is not available for purchase or the Applicant is unable to obtain a comparable at a reasonable cost.

Eligible animals may include, but are not limited to:

- Police animals
- Trained and certified rescue dogs
- Animals in museums, zoos, or publicly owned nature centers
- Fish in fish hatcheries
- Taxidermy specimens
- Animals used by rehabilitation facilities as part of diagnosis or treatment
- Laboratory animals used in an active research program

Terminology

A **reagent** is a substance used in a chemical reaction to detect, measure, examine, or produce other substances. Some reagents are very common and available for purchase from commercial sources.

A **specimen** is a portion or quantity of material for use in testing, examination, or study, including blood plasma and flesh tissue.

A **specimen collection** is a repository of specimens related to biomedical, marine, or agricultural research.

Terminology

A **taxidermy specimen** is an animal that has been preserved and mounted in a lifelike representation.

The replacement of animals on loan to an eligible facility at the time they are destroyed is eligible if the Applicant substantiates legal responsibility.

Additionally, FEMA may provide PA funding for actions taken to save the lives of these animals as a Category B emergency protective measure.

(a) Determining Costs

The estimated cost to replace an animal is usually determined through market surveys. Costs associated with acquiring donated, loaned, or wild animals as replacement animals are eligible provided they do not exceed the estimated cost of purchasing a comparable animal.

When a destroyed animal is replaced through a donation or loan of a comparable animal, costs associated with the purchase of another comparable animal are ineligible.

For laboratory animals, eligible costs associated with replacement include, but are not limited to, the replacement cost of a laboratory animal that is as genetically close as possible to, but does not exceed, the genetic progression of the lost animal AND can be reasonably procured commercially. If an identically genetic animal is not available, the eligible cost is based on a readily procured animal that is as genetically close as possible to the original animal. The Applicant, using its scientific research staff, an independent member of the scientific community, or a certified expert, needs to make reasonable decisions on the genetic likeness of the replacement lab animals.

Ineligible costs associated with replacing laboratory animals include:

- The cost of reproducing a new animal with all the characteristics of the lost animal to re-establish research
- The cost of using a laboratory to perform a breeding program to advance benchmark stock to the genetic changes lost because of the incident
- The cost associated with surgery required to replace a surgically altered animal
- The cost associated with the replacement of a laboratory animal when an animal of similar genetic characteristics can be obtained at no cost from other researchers or institutions

If the Applicant requests, and the Recipient approves, other than in-kind and exact number of replacement animals, FEMA caps the Federal share based on the estimated in-kind replacement costs.

6. Irreplaceable Collections and Individual Objects

Collections and individual objects are artifacts, specimens, artworks, archives, public records, and other items that are often considered irreplaceable because of their artistic, educational, historic, legal, scientific, or social significance. They are nonliving and, therefore, do not include animals or plant material, and are usually one-of-a-kind. Eligible collections and individual objects may be in storage or on display in a public or PNP facility and may include items located outdoors, such as sculptures and public art installations.

Stabilization of damaged collections or individual objects is eligible. Stabilization is a series of treatment measures to maintain the integrity of a collection or object and to minimize deterioration. Stabilization involves taking the minimum steps necessary to return a collection or object to a condition in which it can function in the same capacity as it did prior to the incident. This includes:

- Treating damaged items through proper environmental controls, such as temperature and humidity; and
- Chemical or mechanical cleaning to stabilize items to prolong their existence, maintain their integrity, and minimize further deterioration from the damaging effects of the incident.

Additional treatment beyond stabilization is eligible if it is necessary to maintain the integrity of the collection or object and return it to its pre-disaster function.

In some cases, costs associated with restoring an item to pre-disaster—but not original—condition may be eligible. For example, repairing a tear in a painting that was a direct result of the incident may be eligible, whereas costs to remove signs of pre-disaster aging, such as layers of old varnish, are ineligible.

Costs associated with the development of a treatment plan for a damaged collection or individual object are eligible.

Documentation Supporting Classification as Collection or Individual Object

Documentation of collections and individual objects generally include accession, catalog, and inventory documentation. Subrecipients should submit all associated documentation along with a clear title to all items.

Terminology

Archives are materials created or received by a person, family, or organization, public or private, and preserved because of the enduring value they contain, or as evidence of the functions and responsibilities of their creator, especially those materials maintained using the principles of provenance, original order, and collective control.

Accession is formal process used to legally accept and record a specimen or artifact as a collection item.

A **catalog** is a full record of information specific to an item and cross-referenced to other records and files, including identification and documentation of the material.

Stabilization is a series of treatment measures intended to maintain the integrity of a collection or object and to minimize deterioration. It involves the minimum steps necessary to return a collection or object to a condition in which it can function in the same capacity as it did prior to the disaster.

Conservation is the preservation of a collection or object for the future. Conservation activities include examination, documentation, treatment, and preventive care, supported by research (e.g., scholarly and technological, x-rays, paint sampling) and education.

Special library collections typically include unique, rare printed books, first editions (often author-signed), manuscripts, archives, artifacts, photos, engravings, graphics, music, and ephemera, as well as limited edition print runs of special collections of maps or other important topics.

Treatment is conducted by qualified conservation professionals with the appropriate specialty and in accordance with the American Institute for Conservation of Historic and Artistic Works Code of Ethics and Guidelines for Practice.³³⁶

FEMA, in consultation with the Recipient and Subrecipient, may recommend no treatment when non-intervention best serves to promote the preservation of damaged items.

Collections and individual objects damaged to the extent that stabilization is not practicable or possible are considered destroyed. Replacement of destroyed collections or individual objects is ineligible.

Restoring materials, equipment, and exhibition furnishings associated with the storage, display, preservation, or exhibition of collections and individual objects is eligible. These may include, but are not limited to:

- Equipment regulating temperature or humidity
- Exhibit panels
- Models
- Video and audio equipment

7. Library Books and Publications

Replacement of damaged or destroyed library books and publications is eligible based on the pre-disaster inventory of the quantities of the books and publications. Re-shelving, cataloging, and other work incidental to the replacement of library books and publications is also eligible.³³⁷

However, special library collections, including rare books, manuscripts, and other fragile materials, are only eligible for treatment, not replacement.

D. Utilities (Category F)

Utilities include:

- Water storage facilities, treatment plants, and delivery systems
- Power generation, transmission, and distribution facilities, including, but not limited to, wind turbines, generators, substations, and power lines
- Natural gas transmission and distribution facilities
- Sewage collection systems and treatment plants
- Communication systems

1. Right-of-Way Clearance

The Applicant may need to clear its ROW to obtain access to repair a utility. It is the Applicant's responsibility to maintain its ROW. FEMA may fund limited clearance of disaster-related debris from the ROW to enable access to the facility. Additionally, if trees in the vicinity of the facility were damaged by the incident and an arborist confirms that the trees cause an immediate threat of further damage to the facility (e.g., overhead power lines), FEMA may provide PA funding to remove those trees. Any further clearance of debris in the ROW is ineligible for FEMA funding.

³³⁶ www.nps.gov/training/tel/Guides/HPS1022_AIC_Code_of_Ethics.pdf.

³³⁷ 44 C.F.R. § 206.226(i).

2. Power: Transmission and Distribution System Conductor Replacement

For electrical transmission or distribution systems, determining the disaster-related damage to some components, such as poles, guys, and cross-arms, can usually be accomplished by visual inspection. However, determining the full extent of disaster-related damage to conductors is more challenging, particularly with older systems. A conductor is eligible for replacement when it is stretched beyond the point where it can be effectively repaired and re-sagged to meet appropriate clearances, sag, and tension, and to meet pre-disaster reliability.

A conductor is only eligible for replacement (reconductoring) when the Applicant cannot effectively repair it because one of the following exists within a line section:

- Twenty-five percent or more of the conductor spans have visible damage, such as broken strands, splices, or sleeves (installed as a result of the incident) or severe pitting, burns, or kinks.
- Thirty percent or more of the line spans are visually stretched (out of sag), or do not meet clearance requirements such as conductor-to-conductor or conductor-to-ground clearance.
- Forty percent or more of the supporting poles need to be replaced or plumbed (straightened). A pole is considered to be in need of straightening if it is leaning such that it is unsafe to climb.
- Forty percent or more of the supporting structures (other than poles) have damage such as broken cross-arms, braces, ties, insulators, guys, pulled anchors, or bent pins. If more than one element of the support structure is damaged, it still only counts as one damaged support structure. If a pole is counted under the previous bullet, FEMA does not count the supporting structure under this criterion.
- Sixty-five percent or more of any combination of the damage described in the bullets above.
- Evidence provided by a licensed Professional Engineer that demonstrates the conductor is damaged beyond repair.

Conductor Spans

The number of conductor spans is calculated by multiplying the number of conductors per span by the number of spans.

For example, a three-phase line section with three spans has 12 conductor spans:

$$4 \text{ conductors} \times 3 \text{ spans} = 12$$

If a single conductor span has damage in more than one location, it only counts as one damaged conductor span. Similarly, if more than one conductor is damaged, it still only counts as one damaged span.

Terminology

A **line section** is a group of contiguous spans selected for evaluation. A span is the distance between two poles or structures.

The Applicant has flexibility in defining a line section. A line section can be:

- A single span
- All the spans between two dead-end structures
- All the spans on a feeder
- All the spans on a tap
- Any other group of contiguous spans that are evaluated together

If the Applicant provides sufficient documentation establishing the pre-disaster condition and a line section of its system meets one of the six criteria above, that line section is eligible to be reconductored.

The use of #2 Aluminum Conductor Steel Reinforced (ACSR) is considered a lower cost alternative to replacing conductor with equal or lesser amperage capacity such as copper weld conductor, hard and soft drawn copper wire, smaller ACSR, and Amerdutor. Therefore, if a conductor with equal or lesser amperage capacity to #2 ACSR is eligible for reconductoring, the line section is eligible to be replaced with #2 ACSR. When the Applicant replaces conductor with #2 ACSR, adjustments to other components of the electric distribution and transmission systems to accommodate #2 ACSR, including, but not limited to, adjusting span lengths between utility poles and increasing pole heights and standards to meet appropriate design requirements are eligible. The Applicant does not need to cite a code or standard for this additional work even though the appropriate design requirements may come from Federal, State, Tribal, or local codes or standards, including National Electrical Safety Code or Rural Utilities Service (RUS) standards.

If the Applicant prefers to reductor a line with conductor of lesser amperage capacity than #2 ACSR, such as #4 ACSR (including associated adjustments in span lengths and pole heights), FEMA provides PA funding for the work if the cost is less than the cost of reductoring with #2 ACSR (including associated adjustments in span lengths and pole heights).

If the Applicant plans to upgrade its conductor to an amperage capacity above #2 ACSR, and there is no code or standard requiring the upgrade that meets the eligibility requirements discussed in B, the additional upgrades are ineligible and the Applicant must request an Improved Project.

If the damage does not meet the criteria for replacement, only the repair of the damaged line section(s) is eligible.

Documentation Supporting Pre-disaster Condition of a Conductor

To document the pre-disaster condition of a conductor, the Applicant should provide the following information:

- A signed, dated, and stamped letter from a licensed professional engineer who has direct experience with the damaged electrical transmission or distribution system certifying the pre-disaster capacity and condition of the conductor along with records providing satisfactory evidence of the pre-disaster capacity and condition of the conductor. Records may include, but are not limited to, maintenance records, contract documents, work orders, inspection logs, or a description of past inspection and maintenance activities certified by a licensed professional engineer.
- If available, copies of construction work plans demonstrating the utility's past practices and current and future projects.
- If required by RUS, a copy of any corrective action plans submitted to RUS in compliance with 7 C.F.R. §1730.25, Corrective action (RUS borrowers only).
- Staking sheets.

If the Applicant provides the information above, FEMA does not require further documentation to establish pre-disaster condition. The Applicant is not precluded from substantiating the pre-disaster condition with other documentation if it is unable to provide the documentation described above.

E. Parks, Recreational, Other (Category G)

Eligible publicly owned facilities in this category include:

- Mass transit facilities such as railways
- Beaches
- Parks
- Playground equipment
- Swimming pools
- Bath houses
- Tennis courts
- Boat docks
- Piers
- Picnic tables
- Golf courses
- Ball fields
- Fish hatcheries
- Ports and harbors
- Other facilities that do not fit in Categories C–F

Unimproved natural features are ineligible.

Plantings (such as trees, shrubs, and other vegetation) are eligible when they are part of the restoration of an eligible facility for the purpose of erosion control, to minimize sediment runoff, or to stabilize slopes, including dunes on eligible improved beaches.

Grass and sod replacement are eligible if it is an integral part of the restoration of an eligible recreational facility. Vegetation replacement is also eligible if necessary to restore the function of the facility (e.g., if vegetation is a component of a sewage filtration system).

Plantings required to mitigate environmental impacts, such as those required to address impacts to wetlands or endangered species habitat, are only eligible if required by a Federal, State, Tribal, or local code or standard or permit that meets the criteria described in [Chapter 8:III.G, Permit Requirements](#).

Long-term monitoring to ensure vegetative growth is ineligible even if it meets the requirements above.

Plantings ineligible for replacement include, but are not limited to:

- Replacement of trees, shrubs, and other vegetation.
- Replacement of destroyed crops.
- Cosmetic or aesthetic vegetation, such as landscaping around public facilities or in median strips along roadways. This restriction applies even when the vegetation is damaged during performance of eligible work, such as when repairing underground utilities within landscaped areas.

1. Beaches

Replacement of sand on beaches is only eligible under certain conditions. A beach is considered an eligible facility when all of the following conditions exist:

- The beach is not a federally constructed shoreline under the specific authority of USACE (i.e., not a specifically authorized and constructed Coastal Storm Risk Management Project);
- The beach was constructed by the placement of imported sand—of proper grain size—to a designed elevation, width, and slope;³³⁸ and
- The Applicant has established and adhered to a maintenance program involving periodic renourishment with imported sand to preserve the original design or a specific engineered design that is justified and clearly stated in the maintenance program.³³⁹ Placement of sand under the following circumstances does not meet this requirement:
 - Emergency or “one-time” nourishment, even if to a design
 - Emergency or “as-needed” renourishments when the beach has eroded to a critical condition where all original nourishment is gone
 - Partial renourishments or “hot-spot” nourishments
 - Renourishment using material from a channel maintenance project when dredge spoils do not meet compatibility design criteria and the amount placed is dependent on the amount dredged, not the beach design

Documentation Supporting Eligibility of a Beach

To document eligibility of a beach as a designed and maintained facility, the Applicant **must** provide the following information (all required unless the beach was previously determined eligible, in which case FEMA may request only a portion of this information):

- Design studies, plans, construction documents, and as-builts for the original nourishment;
- Documentation and details of the maintenance plan, including how the need for renourishment is determined and funded; and
- Renourishment history, design studies, and as-builts for every renourishment, including construction documents if applicable.

³³⁸ 44 C.F.R. § 206.226(j)(2)(i).

³³⁹ 44 C.F.R. § 206.226(j)(2)(ii).

Figure 14. Typical Beach Profile

The amount of sand eligible for replacement is limited to the amount lost due to the incident. FEMA uses the pre- and post-storm profiles of the beach to determine the eligible volume of sand for replacement above an established closure depth. Therefore, the Applicant should provide pre-and post-storm profiles that extend at least to the seaward edge of the sub-aqueous nearshore zone (closure depth, usually -15 to -20 feet) (see Figure 14, *Typical Beach Profile*). If pre-storm profiles are not available, FEMA estimates the amount of sand lost using design documents and renourishment history.

Replacing sand that eroded prior to the incident is ineligible. However, the Applicant is encouraged to renourish the project to achieve the design profile.

F. Landslides and Slope Stabilization

If an eligible facility is located on a slope and is damaged as a result of a landslide or slope instability triggered by the incident, FEMA determines the stability of the slope that supports the facility before it approves PA funding to restore the facility. Restoration of the integral ground that supports the facility may also be eligible. The impact of slope stability on eligibility is as follows:

- If the site is stable, permanent restoration of the facility and its integral ground is eligible.
- If the site is unstable and there is no evidence of pre-disaster instability after the facility was constructed, permanent restoration of the facility and its integral ground is eligible, including measures to stabilize the integral ground.

Terminology

Integral ground refers to only the ground necessary to physically support a facility.

Integral ground may be natural or improved ground upon which an eligible facility is located and that is essential to support the structural integrity and utility of the facility.

- If the site is unstable and there is evidence of pre-disaster instability after the facility was constructed, restoration of the facility's integral ground is ineligible. Restoration of the facility is eligible only upon the Applicant stabilizing the site and restoring the integral ground.

Site inspections and limited geotechnical assessments to determine site stability and to obtain a technical opinion of the cause of the slope failure are eligible.

Permanent repair to stabilize natural ground that is not integral to an eligible facility's function is ineligible.

FEMA may approve permanent relocation of the facility if the facility is subject to repetitive heavy damage and relocation is cost-effective. Eligible costs for relocation are described in E.

The Applicant may request an Alternate Project if restoration of the facility is not feasible because of soil instability.

CHAPTER 9: SCOPE OF WORK AND COST DEVELOPMENT

Once FEMA, the Recipient, and the Applicant agree on the damage description and dimensions, either the Applicant submits the SOW and cost for FEMA review and validation or FEMA submits the project to its CRC to develop the SOW and cost. This is Phase III of the PA Program delivery process and is described in this chapter.

I. Scope of Work Development

For completed work, the Applicant must describe the completed SOW for each of the projects and provide supporting documentation.

For Emergency Work, the SOW includes work required to address immediate threats and to remove debris and must include quantitative information. For Permanent Work, the SOW includes a description of how the Applicant plans to repair, or has repaired, the damage, including repair dimensions and hazard mitigation description and dimensions.

The Applicant should provide the following for each site (not an all-inclusive list):

- ☐ Whether the work is complete
- ☐ Who performed, or will perform, the work (e.g., force account, contract, etc.)
- ☐ Proposed or completed, repair scope of work, including PA mitigation measures
- ☐ Technical studies, reports, and assessments

II. Cost Development

FEMA or the Recipient prepares the PW based on actual or estimated costs.

A. Project Thresholds

FEMA establishes a minimum project threshold for each Federal fiscal year. The threshold applies to incidents declared within that fiscal year and is based on the Consumer Price Index. If a PW totals less than the minimum threshold³⁴⁰ after the Applicant has accounted for all project costs—including actual insurance proceeds and other reductions to avoid duplication of benefits—the project is ineligible.³⁴¹ For example, if actual insurance proceeds are less than those anticipated and the insurance adjustment on a project below the minimum threshold raises it above the minimum threshold to a small project, FEMA processes it based on the criteria that applies to small projects. However, if the reverse occurs, FEMA deobligates the project as ineligible based on the minimum threshold requirement.

Small Project Preparation

If the Applicant prepares its own Small Projects, it **must** submit them to FEMA for validation within 60 days of the Recovery Scoping Meeting. Small projects are defined in [Chapter 9:II.A, Project Thresholds](#).

³⁴⁰ The minimum threshold is available at: www.fema.gov/public-assistance-indicator-and-project-thresholds.

³⁴¹ 44 C.F.R. § 206.202(d)(2).

The minimum threshold applies to each PW and not to each damage line item. FEMA does not combine work among several sites or projects onto one PW for the **sole** purpose of reaching the minimum threshold. Because of the administrative cost involved, FEMA does not process PWs under the minimum threshold unless the Applicant is eligible, is disputing the SOW or costs, and is planning to appeal an amount that would increase the project amount to at least the minimum threshold. The minimum threshold does not apply to Donated Resource PWs or Management Cost PWs; however, these PWs are only eligible when the donated resources or management costs are related to an eligible PW that meets the minimum threshold.

FEMA also establishes a dollar threshold each Federal fiscal year for the implementation of Simplified Procedures under Section 422 of the Stafford Act. This threshold defines a project as large or small.³⁴²

- A Large Project is a PW with a cost equal to or greater than the threshold.
- A Small Project is a PW with a cost below the threshold.³⁴³

The threshold applies to incidents declared within that fiscal year. FEMA administers funding for Large and Small Projects differently. For Large Projects that are not capped, FEMA adjusts any estimated costs to the actual incurred amount so that the final approved funding is based on actual costs.³⁴⁴ For Small Projects, FEMA does not adjust estimated costs to the actual incurred amount.³⁴⁵ FEMA determines whether a project is large or small based on the final approved amount of eligible costs after any cost adjustments, including actual insurance reductions.

B. Expedited Projects for Emergency Work

FEMA may provide expedited funding for Emergency Work projects (Category A or B) that meet or exceed the large project threshold. FEMA funds Expedited Projects at 50 percent of the Federal share of the estimated project cost. Requests for Expedited Projects must be submitted to FEMA within 60 days of the Applicant's Recovery Scoping Meeting. To support its request, the Applicant must provide enough information for FEMA to validate that the work and costs are eligible. FEMA will work to obligate funding within 90 days of receipt of the request. Therefore, the PA Group Supervisor notifies the CRC as soon as possible after receiving a request.

The Applicant must substantiate its legal responsibility for the work. The Applicant needs to provide the following broken down by the Applicant's monthly (or bi-weekly) operational periods (if Category A or B has an increased Federal cost share for a limited timeframe, the Applicant needs to separate work anticipated to be completed within the increased cost share timeframe from work anticipated to be completed after the increased cost share period (See [Chapter 6:XIII, Increased Federal Cost Share for a Limited Timeframe](#)):

- A detailed description of the work and documentation to substantiate that the work is eligible. This includes:
 - Description of immediate threat
 - Detailed description of work activities
 - Work locations

³⁴² The project threshold amount is available at: www.fema.gov/public-assistance-indicator-and-project-thresholds.

³⁴³ Stafford Act § 422, 42 U.S.C. § 5189; 44 C.F.R. § 206.203(c).

³⁴⁴ 44 C.F.R. § 206.205(b).

³⁴⁵ 44 C.F.R. § 206.205(a).

- Additionally, for debris: estimated quantities by type of debris substantiated with photographs or video, temporary staging and disposal locations with copies of permits and reduction methods
- The total estimated cost with documentation to support the basis of the estimate and substantiate that the cost estimate is reasonable. This includes:
 - Insurance documentation
 - For Force Account labor or other hourly labor costs such as mutual aid labor:
 - Number of personnel
 - Average hours per day
 - Average days per week
 - Average pay rate
 - Lodging and per diem rates
 - Mutual Aid Agreement, Memorandum of Understanding or other written agreement
 - For Force Account equipment:
 - Amount of equipment by type
 - Average hours per day
 - Average days per week
 - Hourly rate
 - For rented equipment:
 - Rental agreement with pricing
 - For contract work:
 - Request for proposals, bid documents, contracts
 - If bids have not yet been received, the Applicant may submit a unit price estimate
 - Debris monitor information

Terminology

Work Completion Date is the date the Applicant completes all work associated with the approved SOW including meeting all compliance requirements. It does not include invoice payments, warranty periods, or grant management activities (e.g., compiling and submitting documentation, financial reconciliation, requesting payment, etc.).

FEMA estimates the work based on cost information provided by the Applicant. If the Applicant does not provide sufficient cost information, FEMA may use average historical pricing. For contracted work, FEMA uses the unit cost from the contract if it determines the costs are reasonable; however, this is only for the purpose of expediting funding based on an estimate. FEMA reviews the Applicant's procurement and contracting for compliance and addresses any noncompliance prior to final reconciliation and closeout of the project.

FEMA provides the Federal cost share for the remaining 50 percent of the project cost once the Applicant provides all of the documentation required to support the estimated project cost for a non-Expedited Project.

C. Costs for Projects with All Work Completed

For projects with all work complete, the PDMG works with the Applicant to:

- Answer programmatic, EHP, insurance, and hazard mitigation questions;
- Identify information and documentation requirements; and

- Address contextual information needed for supporting the Applicant's claim for completed work.

Once work on a project is 100% complete, the Applicant must submit documentation for the project within 90 days of the Recovery Scoping Meeting or within 90 days of the work completion date, whichever is later, regardless of whether the project has been obligated. FEMA makes its eligibility determination and processes the project based on the documentation received within the 90-day deadline.³⁴⁶ FEMA denies assistance for work and costs that are not supported with documentation by this deadline. There may be cases where, during review of the documentation submitted, FEMA determines additional information or explanation is required. In this instance, FEMA may generate an RFI specifying a deadline for response.

For small projects, FEMA may accept certification in lieu of documentation and may process the projects based on estimated costs even if all work is completed.³⁴⁷ However, with exception of the scenarios listed in [Chapter 12:I.A, Small Projects](#), small project estimates are not subsequently adjusted to reflect actual costs. The Applicant must still retain documentation for net small project overrun appeals and audits.

D. Estimating Emergency Work Projects with Work to be Completed

Emergency Work projects are often difficult to estimate due to the type of work conducted. Unlike Permanent Work, where a detailed SOW is usually determined and estimated with unit pricing in advance, the detailed scope of work to address Emergency Work is often unknown and therefore, difficult to estimate in advance. Additionally, emergency response activities do not generally have established unit pricing and have a lot of variables that can impact pricing. If the Applicant provides sufficient information, FEMA may process Emergency Work projects based on estimates.

E. Estimating Permanent Work Projects with Work to be Completed

When work is not yet complete, FEMA determines the amount of PA funding based on the estimated cost to restore the damaged facility to its pre-disaster design and function, including eligible codes and standards. The amount may include a reasonable amount of anticipated soft costs. FEMA does not include costs that are only related to, or only triggered by, changes to the pre-disaster design or function of the damaged facility. These include, but are not limited to, costs related to:

- Engineering and design
- EHP compliance
- Work required by codes or standards

If FEMA developed the SOW, it also develops the associated cost estimate.

1. Applicant Estimates

FEMA accepts an Applicant-submitted cost estimate if the estimate:

³⁴⁶ 44 C.F.R. § 206.205(b)(1) and 2 C.F.R. § 200.343.

³⁴⁷ Stafford Act § 422.

- Is prepared by a licensed Professional Engineer or other estimating professional, such as a licensed architect or certified professional cost estimator³⁴⁸ who certifies that the estimate was prepared in accordance with industry standards;
- Includes certification that the estimated cost directly corresponds to the repair of the agreed upon damage;
- Is based on unit costs for each component of the SOW and not a lump sum amount;
- Contains a level of detail sufficient for FEMA to validate that all components correspond with the agreed-upon SOW;
- Is based on the current phase of design or construction inclusive of any known costs;
- Includes actual costs for work completed at the time the cost estimate is developed; and
- Is reasonable.

FEMA evaluates Applicant-submitted estimates for reasonableness based on the criteria in [Chapter 6.I, Reasonable Costs](#) using the checklist in [Appendix L: Validation of Applicant-Provided Cost Estimates](#).

2. FEMA Estimates

When FEMA develops cost estimates for sites with Permanent Work that is less than 90 percent complete and total costs are expected to meet or exceed the large project threshold, FEMA uses the CEF in accordance with the CEF Instruction Guide³⁴⁹ The CEF Instructional Guide defines various factors and the range of percentage values that FEMA may apply to projects. In rare cases, a factor may need to be reviewed or adjusted. FEMA Headquarters has access to technical assistance to review the appropriate ranges for factors. Only FEMA Headquarters has the authority to approve the use of factors that exceed the CEF specified range or approve additional factors. FEMA will include the CEF contingency factor “Applicant Reserve for Change Orders” but will not include any additional factors or risk premiums associated with capped projects (Improved, Alternate, or Alternative Procedures projects).

3. Expert Panel Review

A FEMA-funded,³⁵⁰ independent panel of cost estimating experts may review project estimates. FEMA does not use this panel for appeals. The review is limited to issues pertaining to the estimated cost and the panel does not make decisions related to the eligibility of work. However, it may make determinations about whether cost elements are required to execute the SOW. The panel may review cost documentation for completed work, if necessary.

- All project estimates with an estimated Federal share of \$25 million or greater are reviewed by the independent panel.
- FEMA may request the independent panel review for any cost estimate.
- The Applicant may request the panel review the estimate for any project with an estimated Federal share of at least \$5 million.

³⁴⁸ In lieu of a license or certification, an individual with professional experience and proficiency in the field of cost estimating may prepare and sign the cost estimate.

³⁴⁹ www.fema.gov/media-library/assets/documents/25390.

³⁵⁰ The expert panel is fully funded by FEMA and does not require a non-Federal cost share.

4. Insurance Reductions

FEMA reduces the estimate to account for insurance coverage based on:

- Actual insurance proceeds, if known; or
- Anticipated insurance proceeds based on the Applicant's insurance policy, if the amount of actual proceeds is unknown.

5. Projects Requiring Engineering Analysis

Some projects may require an engineering analysis to determine the method of repair. In these cases, FEMA may provide PA funding for engineering and design services. Once the Applicant determines its preferred method of repair, it must submit a detailed SOW and cost estimate for FEMA's review.

6. Fixed-Cost Offer for Alternative Procedures Projects Under Section 428

FEMA will complete a fixed-cost estimate for all large permanent work projects. FEMA will transmit this estimate as a fixed-cost offer to the Applicant for consideration. The cost estimate is developed by FEMA or developed by the Applicant and validated by FEMA³⁵¹ as being reasonable and eligible based on the work required to address the disaster-related damage. FEMA transmits a fixed-cost offer via PA Grants Manager to the Applicant. If the Applicant accepts the fixed-cost offer for a Large Project, it is considered an Alternative Procedures Project.

The following table summarizes the differences between the Alternative Procedures policy and the standard PA policy:

Alternative Procedures Project	Standard Project
Fixed-cost project with use of excess funds.	Actual cost project. No retention of excess funds associated with the approved estimate.
May use funds across all Alternative Procedure Permanent Work PWs.	Can only use funds toward the specific work identified in each specific project.
After FEMA approves a SOW, approval is only required for changes that involve buildings or structures aged 45 years or older, ground disturbing activities, or work in or near water.	After FEMA approves a SOW, approval is required for any change to the SOW.
Do not need to track costs associated with changes to the SOW (see Chapter 12:I.C, Alternative Procedures Permanent Work Projects for closeout requirements)	Must track costs associated with all changes to the SOW.
Do not need to track costs to specific work items. Only need to track the total costs associated with the all of its Alternative Procedures Permanent Work PWs. (see Chapter 12:I.C, Alternative	Must track costs specific to each work item within each individual project.

³⁵¹ The expert panel completes its review before FEMA transmits the fixed-cost offer.

<i>Procedures Permanent Work Projects</i> for closeout requirements)	
Do not need to track work to specific Alternative Procedures PWs. Only need to substantiate that the work is related to the approved SOW covered across the projects.	Must track all work to each individual project.

Once the Applicant accepts a fixed cost offer, it may not revert back to a project funded based on actual costs. FEMA does not adjust the fixed amount even if the Applicant discovers hidden damage while conducting approved work. Prior to closing the project, FEMA adjusts the fixed estimate to account for actual insurance proceeds as described in [*Chapter 6:XVIII.A, Insurance Proceeds*](#). Once FEMA and the Applicant agree to a fixed-cost, FEMA will not adjust funding on the basis of reasonableness or eligibility provided the Applicant completes the approved scope of work. This does not preclude de-obligations on the basis of noncompliance with grant conditions, such as environmental or historic preservation; duplication of benefits, including insurance; or evidence of fraud.

If the estimated amount is less than the Applicant is willing to accept as a fixed cost, the Applicant may decline the offer and FEMA will process the project using standard procedures. In these cases, FEMA obligates the project based on the estimated amount in the offer and adjusts funding based on actual eligible costs at closeout.

(a) *Fixed Cost Offer Deadlines*

The Applicant has up to 18 months from the disaster declaration date to accept a fixed-cost offer for each project (also subject to 30-day deadline from receipt). If the Applicant is requesting hazard mitigation funding, it must determine the actual SOW and hazard mitigation measures to be performed within the 30-day and 18-month deadlines.

Each time FEMA transmits a fixed-cost offer, the Recipient and Applicant have a combined total of 30 calendar days from the date of FEMA's transmittal of the fixed-cost offer to accept the offer (not to exceed the 18-month deadline). FEMA processes projects without accepted fixed-cost offers by the 30-day and 18-month deadlines using standard PA policies and procedures and adjust funding based on actual eligible costs at closeout.

Time extensions to accept fixed-cost offers must be approved by FEMA's Assistant Administrator for Recovery.

III. Compliance Reviews

The CRC conducts a series of reviews for program compliance. The Insurance Specialist reviews the Applicant's insurance documentation, calculates required reductions, and documents insurance obtain and maintain requirements as a condition of the award. FEMA EHP staff review the SOW to determine if the SOW has a potential of impacting environmental or historic resources, FEMA EHP staff review the SOW to determine if modifications would reduce potential impacts. and document the EHP requirements as a condition of the award.

CHAPTER 10: OBLIGATION AND RECOVERY TRANSITION

Obligation and Recovery Transition is Phase IV of the PA Program delivery process. This Chapter describes the final review and obligation process, the Recovery Transition Meeting, and provides an overview of PA considerations for transitioning field operations back to the Regional office, a PA Processing Center, or a Long-Term Recovery Office. It also includes PA policy on appeals and provides a summary of arbitration.

I. Obligation

A. Recipient Review

PWs are routed to the Recipient for review before FEMA conducts the final review. The Recipient reviews PWs to ensure that each PW properly addresses all of the Applicant's disaster damage, repair methods, and costs.

B. Final Review

The PAGS performs the Final Review to verify the PW is eligible before obligating funds. The final reviewer ensures the cost share is accurate. If the Federal cost share is greater than \$1 million, the final reviewer submits the PW to the Million Dollar Review queue. FEMA notifies Congress and the Department of Homeland Security of PWs with a Federal cost share greater than \$1 million before obligation (including subsequent versions to the PW). This process is referred to as the Large Project Notification (LPN) process. If the Federal share is less than \$1 million, the final reviewer submits the PW into a queue where FEMA obligates the Federal share of the eligible project cost to the Recipient.³⁵² Once obligated, the PW constitutes the official record of the eligible damage and approved SOW for the project.

C. Obtaining Funds

Strategic Funds Management is FEMA's process for obligating PA funding based on the Applicant's schedule to execute the work. If a Permanent Work project is greater than \$1 million and the Applicant does not need funds for more than 180 days from the time the PW is ready for obligation, FEMA obligates funds based on the project completion schedule. FEMA's *Strategic Funds Management – Implementation Procedures for the Public Assistance Program* (FEMA SOP 9570.24) addresses this obligation process in detail.³⁵³

The Recipient is responsible for notifying the Applicant that funds are available³⁵⁴ and for distributing the funds to the appropriate Subrecipient.³⁵⁵ Funds that FEMA has obligated are available to the Recipient via electronic transfer and reside in a Federal account until the

³⁵² 44 C.F.R. § 206.202(e).

³⁵³ www.fema.gov/media-library/assets/documents/30301.

³⁵⁴ 44 C.F.R. § 206.200(b)(2)(i).

³⁵⁵ 44 C.F.R. § 206.202(a).

Recipient draws the funds to pass through to the appropriate Applicant.³⁵⁶ When a Recipient distributes funds, it is the pass-through entity.³⁵⁷

II. Recovery Transition Meeting

The PDMG coordinates with the Recipient to schedule a Recovery Transition Meeting once the Applicant has signed all of its projects in PA Grants Portal. The transition meeting prepares the Applicant for FEMA's transition of PA Operations from the JFO to the Regional office. The PDMG or Recipient representative contacts the Applicant to coordinate meeting logistics, review discussion topics, and identify appropriate Applicant attendees. FEMA, the Recipient, and the Applicant attend the Recovery Transition Meeting.

FEMA uses this meeting to:

- Ensure all claimed damage is sufficiently and accurately documented;
- Discuss record retention requirements;
- Explain deadlines for completion of work and appeals, including net small project overruns;
- Ensures the Applicant understands the terms and conditions of the projects (e.g., requirements for environmental and historic preservation, procurement, minimum standards, disposition, etc.);
- Transition primary point-of-contact from field personnel to the Recipient; and
- Discuss questions or concerns.

III. Transition Field Operation to Regional or Recovery Office

This section provides an overview of PA considerations for transitioning from the JFO and CRC environment, in which PW development is the predominant activity, to the post-JFO environment (e.g., Regional Office or Long-Term Recovery Office), where program management and closeout are predominant.

A JFO closes when most FEMA program and FCO goals have been met. The FCO coordinates with the FEMA Region, FEMA Headquarters, the PAGS, and other program leads to determine closure. PA considerations include the number of remaining:

- PWs to be written
- PWs in each review queue
- Recovery Transition Meetings

Once the JFO closes, PA operations are transferred to the Regional Office or to a Recovery Operation. The Region regains primary responsibility for ongoing operations and the CRC maintains its support role to the region until all projects for the incident have been processed through initial obligation. A small number of PDMGs and necessary support staff may remain in the disaster area to provide ongoing Applicant support until all Recovery Transition Meetings have been completed.

³⁵⁶ 44 C.F.R. § 206.200(b)(2)(ii).

³⁵⁷ 2 C.F.R. § 200.74.

The need for a PA Recovery Operation exists when the JFO is scheduled to close but too much work remains for the Region to assume full responsibility for the disaster operation or if the Regional Office is located too far from the disaster location. In this situation, a Recovery Operation is set up to finish remaining PWs and versions, complete required reviews, resolve outstanding issues, and obligate remaining funds. PA Recovery Operations may include the following:

- PA Processing Center: Established by the respective Regional Office after a small to medium sized disaster when IA is no longer active in the disaster area and the FCO has demobilized; the PAGS may still be active in the Processing Center with oversight provided by the Regional Office.
- Long-Term Recovery Office: Established by FEMA Headquarters after a large disaster.

Transition from a Recovery Operation to the Regional Office varies by region. It typically occurs when project formulation is complete and outstanding issues have been resolved.

CHAPTER 11: POST AWARD MONITORING

This chapter provides PA policy on post award monitoring (Phase V). This includes reporting requirements, post award changes in SOW, work completion deadlines, and audits.

I. Large Project Quarterly Progress Reports

The Large Project Quarterly Progress Report (QPR) is a tool for FEMA and the Recipient to track the progress of Large Projects. FEMA requires the Recipient to report on the status of all open Large Projects on a quarterly basis.³⁵⁸ Recipients must submit QPRs to FEMA no later than 30 days after the end of each quarter (see Table 6, *Deadlines for Submitting Quarterly Progress Reports*).

The Subrecipient must submit the following for each incomplete Large Project on a quarterly basis:

- ☐ Total expenditures to date;
- ☐ Status of the project (either construction phase or percent complete);
- ☐ Whether the work is complete (per definition in [Chapter 11:V, Work Completion Deadlines](#));
- ☐ Projected or actual work completion date (per definition in [Chapter 11:V, Work Completion Deadlines](#)); and
- ☐ Any circumstances that could delay the project.

In addition to verifying and submitting the Subrecipient's information above, the Recipient must submit the following for each open Large Project on a quarterly basis:

- ☐ Total amount drawn down;
- ☐ Date of last drawdown;
- ☐ Total amount disbursed to the Subrecipient;
- ☐ Whether final payment was made;
- ☐ Whether time extensions were approved; and
- ☐ Latest approved work completion deadline.

Table 6: Deadlines for Submitting Quarterly Progress Reports

Quarter	Dates	Report Due Date
1	October 1 – December 31	January 30
2	January 1 – March 31	April 30
3	April 1 – June 30	July 31
4	July 1 – September 30	October 30

II. Financial Status Reports

Recipients submit Federal Financial Status Reports (FFRs) (SF-425s) quarterly to the respective FEMA Regional Office.³⁵⁹ The FFR provides the status of funds for the disaster award, the

³⁵⁸ 44 C.F.R. § 206.204(f).

³⁵⁹ 2 C.F.R. § 200.327.

Recipient's expenditure drawdowns, and whether the Recipient is meeting its cost-share requirements.

III. Federal Funding Accountability and Transparency Act

The Federal Funding Accountability and Transparency Act (FFATA) requires Recipients to register in the FFATA Subaward Reporting System (FSRS) and report on all awards and subawards equal to or greater than \$25,000.

IV. Post Award Change in Scope of Work

While proceeding with the project, the Applicant must ensure that it uses PA funding only for eligible work as identified in the PW). The Applicant may identify a need to change the SOW. The Applicant should engage the Recipient and FEMA as soon as it identifies a change to the SOW to allow FEMA time to review changes for eligibility and EHP compliance requirements prior to commencement of work. If the Applicant begins work associated with a change before FEMA review and approval, it jeopardizes PA funding.

A change requires a written request with detailed justification and documentation to support the eligibility of the requested revision.³⁶⁰ If the request involves previously unreported damage, the Applicant must also provide documentation demonstrating how the incident caused the damage. The Recipient must forward the request to FEMA with its written recommendation.³⁶¹ Table 7: *Information to Support SOW Changes*, indicates the information necessary for FEMA to evaluate a request for a change in SOW.

FEMA engages subject matter experts for technical assistance when necessary to reach a determination of whether the requested change is eligible for PA funding.

Changes in SOW due to one of the following reasons are generally eligible:

- Alternate repair method is more cost-effective than the original proposed repair method,
- Original repair method is not technically feasible,
- Increase in previously approved quantities due to errors and omissions,
- Hidden damage discovered during construction and is disaster-related, or
- The Applicant wishes to pursue an Improved or Alternate Project.

³⁶⁰ 44 C.F.R. § 206.204(e).

³⁶¹ Ibid.

Table 7. Information to Support SOW Changes

Information to Support SOW Changes
<p>Change in SOW requests should be submitted prior to the approved project deadline and include the following (not an all-inclusive list):</p> <ul style="list-style-type: none"><input type="checkbox"/> Detailed changes to SOW and cost (required)<input type="checkbox"/> Reason for changes (required)<ul style="list-style-type: none">• If more cost-effective repair: both cost estimates• If original SOW not feasible: supporting documentation such as technical reports• If hidden damage (must be found during performance of eligible work):<ul style="list-style-type: none">○ Documentation substantiating the damage is related to the declared incident○ Photographs documenting damage○ Change orders<input type="checkbox"/> Construction timeline / project schedule<ul style="list-style-type: none">• Time extension, if necessary (include information in Table 8, <i>Information to Support a Time Extension</i>)

A. Scope of Work Changes on Permanent Work Alternative Procedures Projects

For Alternative Procedures Projects, once the SOW is approved and a fixed-cost offer is accepted:

- The Applicant must notify FEMA prior to making SOW changes that involve:
 - Buildings or structures that are 45 years of age or older,
 - Ground disturbing activities, or
 - Work in or near waterways.

With exception of buildings or structures that are 45 years of age or older, the Applicant does not need to notify FEMA when it intends to make changes that substantially conform to the approved SOW. Changes that substantially conform include items, such as:

- Substitutions in material type (e.g., pre-cast concrete vs. steel beam, stainless steel vs galvanized fasteners); or
- Interior floor plan reconfigurations (e.g., adding, moving or removing rooms/features).

If the Applicant wishes to change the SOW to the extent that it changes the hazard mitigation, such changes must be approved within the 18-month deadline and the fixed-cost offer amount will be adjusted to reflect the cost of the revised hazard mitigation SOW.

V. Work Completion Deadlines

FEMA only provides PA funding for work completed and costs incurred³⁶² within regulatory deadlines (see Figure 15, *Work Completion Deadlines*). The deadline for Emergency Work is 6 months from the declaration date. The deadline for Permanent Work is 18 months from the declaration date.³⁶³ FEMA considers these timeframes to be a project's approved POP.

Deadlines for Completion of Work	
Type of Work	Months
Emergency Work	6
Permanent Work	18

Figure 15. Work Completion Deadlines

Work completion is defined as the completion of all work associated with the approved SOW including meeting all compliance requirements. It does not include invoice payments, warranty periods, or PA grant management and administration activities (e.g., compiling and submitting closeout documentation, financial reconciliation, requesting payment, etc.). If the Applicant determines it needs additional time to complete work, it must submit a written request for a time extension to the Recipient with the following information:

- Documentation substantiating delays beyond its control;
- A detailed justification for the delay;
- Status of the work; and
- The project timeline with the projected completion date.³⁶⁴

The Recipient has authority to extend deadlines for individual projects based on extenuating circumstances. Except for temporary relocation projects, the Recipient may extend Emergency Work projects up to an additional 6 months and Permanent Work projects up to an additional 30 months.³⁶⁵ The Recipient must notify FEMA when it approves a time extension either via FEMA's systems and reporting mechanisms or written notification.³⁶⁶

FEMA has authority to extend individual project deadlines beyond these timeframes if extenuating circumstances justify additional time.³⁶⁷

The prime award POP begins on the first day of the incident period and initially extends four years from the declaration date. Project extensions cannot exceed the Recipient's prime award POP. Therefore, the Recipient must request FEMA approval for an extension to the prime award POP if it anticipates project work to extend beyond the end of the prime award POP.³⁶⁸

FEMA generally considers the following to be extenuating circumstances beyond the Applicant's control:

- Permitting or EHP compliance related delays due to other agencies involved
- Environmental limitations (such as short construction window)
- Inclement weather (site access prohibited or adverse impact on construction)

³⁶² 2 C.F.R. § 200.309 and 44 C.F.R. § 206.204(d)(2).

³⁶³ 44 C.F.R. § 206.204(c)(1).

³⁶⁴ 44 C.F.R. § 206.204(d)(2).

³⁶⁵ 44 C.F.R. § 206.204(c)(2)(ii).

³⁶⁶ Per 2 C.F.R. § 200.308(d)(2), for non-construction Emergency Work, the Recipient must notify FEMA at least 10 days prior to the project deadline.

³⁶⁷ 44 C.F.R. § 206.204(d).

³⁶⁸ The FEMA Chief Financial Officer must approve the request.

- Lack of availability of materials, equipment, or contractors to complete work

FEMA generally considers the following to be circumstances within the control of the Applicant and not justifiable for a time extension:

- Permitting or environmental delays due to Applicant delays in requesting permits
- Lack of funding
- Change in administration or cost accounting system
- Compilation of cost documentation

Although FEMA only provides PA funding for work performed on or before the approved deadline, the Applicant must still complete the approved SOW for funding to be eligible.³⁶⁹ FEMA deobligates funding for any project that the Applicant does not complete. If the Applicant completes a portion of the approved SOW and the completed work is distinct from the uncompleted work, FEMA only deobligates funding for the uncompleted work. For example, if one project includes funds for three facilities and the Applicant restores only two of the three facilities, FEMA only deobligates the amount related to the facility that the Applicant did not restore.

Table 8: *Information to Support a Time Extension*, indicates the information that the Applicant should submit to support a request for a time extension.

Table 8. Information to Support a Time Extension

Information to Support a Time Extension
<p>Request should be submitted prior to current approved deadline, be specific to one project, and include the following information with supporting documentation:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Dates and provisions of all previous time extensions <input type="checkbox"/> Construction timeline / project schedule in support of requested time (required) <input type="checkbox"/> Basis for time extension request (required): <ul style="list-style-type: none"> • Delay in obtaining permits <ul style="list-style-type: none"> ○ Permitting agencies involved and application dates • Environmental delays or limitations (e.g., short construction window, nesting seasons) <ul style="list-style-type: none"> ○ Dates of correspondence with various agencies ○ Specific details • Inclement weather (prolonged severe weather conditions prohibited access to the area, or adversely impacted construction) <ul style="list-style-type: none"> ○ Specific details • Other reason for delay <ul style="list-style-type: none"> ○ Specific details

VI. Audits

Recipients and Subrecipients are subject to Federal and non-Federal audits. Records are subject to audit by State auditors, FEMA, the U.S. Department of Homeland Security Office of Inspector General, and the U.S. Government Accountability Office (GAO).³⁷⁰ FEMA may adjust project funding due to audit findings.

³⁶⁹ 44 C.F.R. § 206.204(d)(2).

³⁷⁰ 2 C.F.R. § 200.336.

A. Single Audits

A Recipient or Subrecipient that expends \$750,000 or more in Federal funds during its fiscal year must perform a single or program-specific audit.³⁷¹

B. Government Accountability Office

The GAO is the investigatory arm of Congress and is under the direction of the Comptroller General of the United States. GAO is an independent, nonpartisan agency that investigates how the Federal Government spends taxpayer dollars. Its mission is to help improve the performance and accountability of the Federal Government. Although the GAO usually audits FEMA programs, it has authority to audit any project.

C. Office of the Inspector General

The Department of Homeland Security's Office of Inspector General (OIG) conducts independent audits and investigations on FEMA programs, operations, activities, and functions; how Recipients and Subrecipients expend Federal funds; and oversight of non-Federal audits such as single audits. The OIG evaluates activities to identify, deter, and address fraud, waste, and abuse. The OIG has authority to audit any project, including Alternative Procedures Projects.

D. Recovery of Improper Payments

FEMA conducts audit assessments on high-dollar draw-downs to recover payments identified as improper as required by the Improper Payments Elimination and Recovery Improvement Act (IPERIA). FEMA's *Public Assistance Recovery of Improper Payments Standard Operating Procedure* (SOP 9570.16)³⁷² provides additional information.

³⁷¹ 2 C.F.R. § 200.501.

³⁷² www.fema.gov/media-library/assets/documents/92114.

CHAPTER 12: FINAL RECONCILIATION AND CLOSEOUT

Phase VI, Final Reconciliation and Closeout is the final stage of PA Program delivery process. This chapter provides PA policy and procedural requirements for reconciliation and closeout of projects, Applicants, and the PA award.³⁷³

I. Project Reconciliation and Closeout

FEMA requires timely and complete project-level information from the Recipient as work is completed to facilitate efficient and effective closeout of the Recipient's prime award. This section defines requirements for project-level closeout. To initiate project-level closeout, the Subrecipient must inform the Recipient that its project is complete and the date the work was completed. To ensure a timely closeout process, the Applicant should notify the Recipient immediately as it completes each Large Project and when it has completed its last Small Project. Subrecipients should not wait for the Quarterly Progress Report to inform the Recipient as it must meet the 90-day closeout deadlines defined throughout this section.

A. Small Projects

Once FEMA obligates a Small Project, FEMA does not adjust the approved amount of an individual Small Project. This applies even when FEMA obligates the PW based on an estimate and actual costs for completing the eligible SOW differ from the estimated amount. To close Small Projects, the Recipient must submit a letter with a Project Completion and Certification Report (P.4) and certify that:

- The Subrecipient completed the approved SOWs for all of its Small Projects in accordance with the FEMA-State/Tribe Agreement; and
- It made all payments in accordance with the FEMA-State/Tribe agreement.³⁷⁴

FEMA only adjusts the approved amount on individual Small Projects if one of the following conditions applies:

- The Subrecipient did not complete the approved SOW;
- The Subrecipient requests additional funds related to an eligible change in SOW;
- The PW contains inadvertent errors or omissions; or
- Actual insurance proceeds differ from the amount deducted in the PW.

In these cases, FEMA only adjusts the specific cost items affected.

If the total actual cost of all of a Subrecipient's Small Projects combined exceeds the total amount obligated for all of the Small Projects, the Subrecipient may request additional funding. The Subrecipient must request the additional funding through the appeal process, described in [Chapter 3:V.C, Appeal Rights and Requirements](#), within 60 days of work completion on its last

³⁷³ The language in this document supersedes the language in the December 2013 *Public Assistance Program Management and Grant Closeout Standard Operating Procedure* (SOP) 9570.14.

³⁷⁴ 44 C.F.R. § 206.205(a).

Small Project.³⁷⁵ FEMA refers to this as a net small project overrun (NSPO) appeal. The appeal must include actual cost documentation for all Small Projects that FEMA originally funded based on estimate amounts.³⁷⁶

If the Subrecipient is not appealing for an NSPO, the Recipient must submit the certification to FEMA within 180 days from the latest Small Project work completion date or the latest approved deadline of the Subrecipient's Small Projects, whichever is sooner. The Recipient must submit certification of completion of all of its own Small Projects within 90 days of the latest Small Project work completion date or the approved deadline of its last Small Projects, whichever is sooner.³⁷⁷

Once FEMA receives the Recipient's certification and completes the necessary review, FEMA closes the respective Small Projects and notifies the Recipient in writing.

B. Large Projects

FEMA closes Large Projects individually as each is completed.³⁷⁸ With exception of Capped Projects, the final eligible amount for a Large Project is the actual documented cost incurred to complete the eligible SOW.³⁷⁹

The Subrecipient must provide documentation to support the actual costs within 90 days of work completion.³⁸⁰ The Recipient must submit a letter with a P.4 and must certify that:

- All incurred costs are associated with the approved SOW;
- The Subrecipient completed all work in compliance with the FEMA-State/Tribe Agreement; and
- It made all payments in accordance with 2 C.F.R. § 200.305.³⁸¹

The Recipient must submit its certification of the Applicant's completion of each Large Project with the final claim for PA funding for the project and supporting documentation to FEMA within 180 days of the work completion date or the project deadline, whichever occurs first.³⁸² The Recipient must submit its certification for each of its own Large Projects within 90 days of the work completion date or the project deadline, whichever occurs first. If a Large Project is completed prior to obligation, the Applicant must still submit actual cost documentation within the 90 days of work completion. However, the Recipient's certification and final payment of claim is due within 180-days from the date of obligation.

At a minimum, Large Project closeout packages must include:

- ☐ A cost breakdown identifying the individual elements that comprise the total actual costs claimed;

³⁷⁵ 44 C.F.R. § 206.204(e)(2).

³⁷⁶ 44 C.F.R. § 206.204(e).

³⁷⁷ 2 C.F.R. § 200.343.

³⁷⁸ 44 C.F.R. § 206.205(b).

³⁷⁹ 44 C.F.R. § 206.203(c)(1).

³⁸⁰ 44 C.F.R. § 206.205(b)(1) and 2 C.F.R. § 200.343.

³⁸¹ 44 C.F.R. § 206.205(b)(1).

³⁸² 2 C.F.R. § 200.343. FEMA allows 180 days based on the combined allowance of 90 days for the Subrecipient and 90 days for the Recipient.

- ☐ An expenditure report from the Subrecipient's accounting system documenting the expenditure dates;
- ☐ All applicable documentation to support the actual costs as identified in [Chapter 6, Cost Eligibility](#);
- ☐ Documentation sufficient for FEMA to validate the work performed was consistent with the approved SOW;
- ☐ Documentation to substantiate compliance with all terms and conditions of the award (e.g., EHP compliance documentation and insurance policies showing additional coverage obtained); and
- ☐ A summary explaining the documentation submitted.

Prior to closing projects, FEMA:

- Verifies there are no outstanding appeals or arbitration cases;
- Reviews the invoices and other documentation related to the work performed to validate it was consistent with the approved SOW, including completion of any approved PA mitigation;
- Determines whether the Applicant completed the work within the approved deadline (FEMA limits reimbursement to costs incurred within the deadline);
- Ensures no duplication of funding exists (e.g., with insurance or costs in any other related PWs);
- Validates compliance with cost principles, including, but not limited to:
 - Equipment and property disposition;
 - Procurement and contracting; and
 - Reasonableness of costs (FEMA limits reimbursement to what it can determine to be reasonable).
- Validates compliance with all terms and conditions of the award, including, but not limited to:
 - Minimum standard requirements;
 - EHP requirements; and
 - Insurance obtain and maintain requirements.
- FEMA reviews and verifies the accuracy of the actual costs and evaluates and reconciles any cost overruns or underruns. If the information is extensive, such as payroll records or trip tickets, FEMA selects and reviews a random sample of the documents. If FEMA successfully validates the sample, it considers all of the records to be correct. However, if FEMA identifies errors it works with the Recipient to correct the errors and reviews a larger sample. If necessary, based on the number or significance of the errors, FEMA may return the final claim for correction and resubmittal. For projects with funding changes, FEMA prepares a PW amendment and obligates additional funds or reduces funding based on actual costs to complete the eligible SOW.³⁸³

If the project included approved PA mitigation measures; FEMA does not re-evaluate the cost-effectiveness of the PA mitigation based on the final actual cost. If during the review, FEMA determines that the Subrecipient performed work that was not included in the approved SOW,

³⁸³ 44 C.F.R. § 206.205(b)(2).

the Applicant jeopardizes its funding. FEMA designates the project as an Improved Project, reviews the additional SOW for EHP compliance, and either deobligates or caps funding at the original estimated amount, depending on the outcome of the review.³⁸⁴

For Capped Projects, the Applicant must provide documentation to support that it used the funds in accordance with the eligibility criteria described in [Chapter 8:VIII.B, Use of Capped Project Funds](#).

If the Applicant did not comply with all Federal requirements (e.g., procurement and contracting, minimum codes and standards, EHP, insurance, etc.), FEMA may deobligate either all or a portion of the funding.

Once FEMA completes its review and funding adjustments, FEMA closes the project and notifies the Recipient in writing.

C. Alternative Procedures Permanent Work Projects

Work must be completed by the end of the latest Alternative Procedures Project period of performance and the Recipient must certify that all incurred costs are associated with the approved SOW and that the Applicant completed all work in accordance with FEMA regulations and policies. The Recipient must submit its certification to FEMA within 180 days of the Applicant completing its last Alternative Procedures Project or the latest Alternative Procedure Project deadline, whichever occurs first, in order for the Applicant to retain and use any excess funds.

The closeout certification must include a final report of Alternative Procedures Project costs and documentation to support the following:

- ☐ Summary of actual work completed;
- ☐ Mitigation measures achieved, if applicable;
- ☐ Compliance with EHP requirements;
- ☐ Compliance with the obtain and maintain insurance requirement;
- ☐ Summary of total actual costs to complete the Alternative Procedure Projects;
- ☐ Compliance with Federal procurement procedures; and
- ☐ Actual insurance proceeds received.

Applicants do not need to track costs to specific work items. Applicants only need to substantiate and certify that all claimed costs are related to the overall work deemed eligible for the Alternative Procedure Projects.

D. Subrecipients

The Recipient needs to request that FEMA close each Subrecipient once all of its respective projects have been completed and closed for the disaster. The Recipient may either request this in the same submittal as the Subrecipient's last project closeout request or may submit a separate request. The request should include a P.4 as the P.4 lists all of the Subrecipient's projects.

³⁸⁴ 44 C.F.R. § 206.203(d)(1).

If all of the Subrecipient's projects are closed and there are no outstanding audits, FEMA closes the Subrecipient and notifies the Recipient in writing.

II. Stafford Act Section 705

Section 705 of the Stafford Act imposes a 3 year limit on FEMA's authority to recover payments made to State, Tribal, or local government Recipients and Subrecipients unless there is evidence of fraud. Section 705 does not apply to PNPs. In order to ensure consistent application of the provisions contained in Section 705, FEMA issued Recovery Policy (FP 205-081-2), *Stafford Act Section 705, Disaster Grant Closeout Procedures*, which describes the limitations and requirements in detail.³⁸⁵

III. Public Assistance Award Closeout

The Recipient must submit its final FFR (SF-425) with a written request to close the PA award. FEMA and the Recipient certify that all work has been completed, all eligible costs have been reimbursed, and financially reconciled. The PA program is considered programmatically closed when FEMA ensures that all PA projects awarded for the disaster met statutory and regulatory requirements. For FEMA to close the PA award, the following conditions should be met:

- FEMA has issued final determinations on all appeals;
- FEMA has obligated all eligible PA funding;
- The Recipient and Subrecipients have completed all PA Program projects and have met the statutory and regulatory requirements governing the program, including compliance with EHP requirements and insurance purchase requirements;
- The Recipient has passed through all obligated funds appropriately and submitted its final expenditure report to FEMA;
- FEMA has adjusted the funding level for the program, as appropriate; and
- Both FEMA and the Recipient have completed all administrative actions related to the PA Program.

The Recipient must liquidate all obligations within 90 days of the end of the prime award period of performance.

IV. Documentation Retention Requirements

Subrecipients must maintain all source documentation for each project³⁸⁶ for 3 years after the date of transmission of the final expenditure report for project completion as certified by the Recipient.³⁸⁷ The Recipient must keep all financial and program documentation³⁸⁸ for 3 years after the date it submits the final SF-425. There are several exceptions to this timeframe that may require longer retention periods, including exceptions relating to real property and equipment disposition, audits, and litigation.³⁸⁹

TERMS AND DEFINITIONS

Acquisition cost

The net invoice price of equipment including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make it usable for the purpose it was acquired. Other charges such as the cost of installation, transportation, taxes, duty, or protective in-transit insurance, shall be included or excluded from the unit acquisition cost in accordance with the Recipient's regular accounting practices.

Animal

Any living or dead member of the animal kingdom, including any mammal, fish, bird, amphibian, reptile, mollusk, crustacean, arthropod, or other invertebrate or any part thereof.

Applicant

A non-Federal entity submitting an application for assistance under the Recipient's Federal award.

Assistance Animal

An animal that works, provides assistance, or performs tasks for the benefit of a person with a disability, or provide emotional support that alleviates identified symptoms or effects of a person's disability. Although dogs are the most common type of assistance animal, other animals can also be assistance animals.

Award (Federal)

The financial assistance that a non-Federal entity receives either directly from a Federal awarding agency or indirectly from a pass-through entity; or the cost-reimbursement contract under the Federal Acquisition Regulation that a non-Federal entity receives directly from a Federal awarding agency or indirectly from a pass-through entity.

Backfill Employee

A replacement employee who performs the regular duties of other personnel.

Coastal zone

The coastal waters (including the lands therein and thereunder) and the adjacent shorelands (including the waters therein and thereunder), strongly influenced by each other and in proximity to the shorelines of coastal States, including islands, transitional and intertidal areas, salt marshes, wetlands, and beaches.

Cost-to-charge ratio

A ratio established by Medicare to estimate a medical service provider's actual costs in relation to its charges.

Critical action

An action for which even a slight chance of flooding is too great. The minimum floodplain of concern for critical actions is the 500-year floodplain (also referred to as the critical action floodplain).

Current fair market value

The value of equipment and supplies determined by selling them in a competitive market or by researching advertised prices for similar items on the used market.

Duplication of Benefits

Funding received from two sources for the same item of work.

Educational institution

Any elementary school as defined by section 801(c) of the Elementary and Secondary Education Act of 1965; any secondary school as defined by section 801(h) of the Elementary and Secondary Education Act of 1965; or any institution of higher education as defined by section 1201 of the Higher Education Act of 1965.

Emergency

Any occasion or instance for which the President determines Federal assistance is needed to supplement State, Tribal, and local efforts and capabilities to save lives and to protect property and public health and safety, or to lessen or avert the threat of a catastrophe in any part of the United States.

Emergency Protective Measure

An action taken by a community before, during, and after a disaster to save lives, protect public health and safety, and prevent damage to improved public and private property.

Emergency Work

Work that must be done immediately to save lives, protect improved property, protect public health and safety, or avert or lessen the threat of a major disaster.

Equipment

Tangible personal property, including information technology systems, having a useful life of more than 1 year and a per-unit acquisition cost that equals or exceeds the lesser of the capitalization level established by the non-Federal entity for financial statement purposes, or \$5,000.

Facility

Any publicly or privately-owned building, works, system or equipment—built or manufactured—or an improved and maintained natural feature. Land used for agricultural purposes is not a facility.

Federal agency

Any department, independent establishment, government corporation, or other agency of the executive branch of the Federal Government, including the United States Postal Service, but not including the American National Red Cross.

Federal share

The portion of the total project costs that are paid by Federal funds.

Final expenditure report

The report the Recipient submits to FEMA for all of a Subrecipient's projects, certifying that the grant terms and conditions have been met and project costs are reconciled.

Flood control work

A structure such as a levee, flood wall, flood control channel, or water control structure that was designed and constructed to have appreciable effects in preventing damage by irregular and unusual rises in water level.

Flood fighting

An activity or measure (e.g., sandbagging, buttressing) intended to prevent or stop flooding, at levels above flood stage, or to prevent structural failure.

Force account

An Applicant's own labor forces and equipment.

Fringe benefits

A percentage of the actual wages that pays for employee benefits.

Immediate threat

The threat of additional damage or destruction from an event that can reasonably be expected to occur within 5 years.

Improved property

A structure, facility, or item of equipment that was built, constructed, or manufactured. Land used for agricultural purposes is not improved property.

Incident period

The time span during which the disaster-causing incident occurs.

Indian Tribal Government

Any federally recognized governing body of an Indian or Alaska Native Tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian Tribe under the Federally Recognized Tribe List Act of 1994, Title 25 of the U.S. Code (U.S.C.) 479a. This does not include Alaska Native corporations, the ownership of which is vested in private individuals.

Indirect cost

A cost incurred for a common or joint purpose benefiting more than one cost objective that is not readily assignable to the cost objectives specifically benefited.

Inland zone

The environment inland of the coastal zone excluding the Great Lakes and specified ports and harbors on inland rivers. Precise boundaries are identified in Federal regional contingency plans.

Large Project

A project for which the final obligated (Federal and non-Federal) amount is equal to or *greater* than the annually adjusted cost threshold for small project grants.

Local government

A county, municipality, city, town, township, local public authority, school district, special district, intrastate district, council of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under State law), regional or interstate government entity, or agency or instrumentality of a local government; an Indian Tribe or authorized tribal organization, or Alaska Native village or organization that does not meet the definition of Indian Tribal Government; or a rural community, unincorporated town or village, or other public entity, for which an application for assistance is made by a State or political subdivision of a State.

Major disaster

Any natural catastrophe (including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion, in any part of the United States, for which the President determines causes damage of sufficient severity and magnitude to warrant major disaster assistance under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as Amended to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.

Management cost

Any indirect cost, any direct administrative cost, and any other administrative expense associated with a specific project under a major disaster or emergency.

Museum

A facility that preserves and exhibits a documented collection of artistic, historic, scientific, or other objects.

Non-Federal entity

An institution of higher education, nonprofit organization, local government, Indian Tribe, or State that carries out a Federal award as a Recipient or Subrecipient.

Pass-through entity

A non-Federal entity that provides a subaward to a Subrecipient to carry out part of a Federal program.

Period of performance

The time during which the non-Federal entity may incur new obligations to carry out the work authorized under the Federal award.

Permanent Work

Restorative work that must be performed through repairs or replacement to restore an eligible facility on the basis of its pre-disaster design and current applicable codes and standards.

Personal property

Property other than real property. It may be tangible, having physical existence, or intangible.

Pet (household)

A Domesticated animal that is traditionally kept in the home for pleasure rather than for commercial purposes, can travel in a commercial carrier, and can be housed in a temporary facility. Examples are dogs, cats, birds, rabbits, rodents, and turtles. Household pets do not include reptiles (except turtles), amphibians, fish, insects, arachnids, farm animals (including horses), or animals kept for racing purposes.

Pre-disaster design

The size or capacity of a facility as originally designed and constructed or subsequently modified by changes or additions to the original design. It does not mean the capacity at which the facility was being used at the time the major disaster occurred if different from the most recent designed capacity.

Pre-disaster function

The function the facility was performing immediately prior to the disaster.

Private nonprofit organization

Any nongovernmental agency or entity that currently has an effective ruling letter from the U.S. Internal Revenue Service, granting tax exemption under Sections 501(c), (d), or (e) of the Internal Revenue Code, or satisfactory evidence from the State that the nonrevenue producing organization or entity is a nonprofit one organized or doing business under State law.

PNP custodial care facility

A building, structure, or system, including those for essential administration and support, that is used to provide institutional care for persons who require close supervision and some physical constraints on their daily activities for their self-protection, but do not require day-to-day medical care.

PNP educational facility

Classrooms plus related supplies, equipment, machinery, and utilities of an educational institution necessary or appropriate for instructional, administrative, and support purposes.

PNP emergency facility

A building, structure, equipment, or system used to provide emergency services, such as fire protection, ambulance, or rescue, to the general public, including the administrative and support facilities essential to the operation of such emergency facilities, even if not contiguous.

PNP medical facility

A hospital, outpatient facility, rehabilitation facility, or facility for long-term care as such terms are defined in Section 645 of the Public Health Service Act (42 U.S.C. 291o) and any similar facility offering diagnosis or treatment of mental or physical injury or disease, including the administrative and support facilities essential to the operation of such medical facilities even if not contiguous.

Project

A logical grouping of work required as a result of the declared major disaster or emergency.

Project Worksheet

The Project Worksheet is the primary form used to document the location, damage description and dimensions, scope of work, and cost estimate for each project.

Providing entity

The entity providing mutual aid assistance to a requesting entity pursuant to a local or statewide mutual aid agreement.

Public entity

An organization formed for a public purpose whose direction and funding are provided by one or more political subdivisions of the State.

Public facility

Any of the following facilities owned by a State, Tribal, or local government: any flood control, navigation, irrigation, reclamation, public power, sewage treatment and collection, water supply and distribution, watershed development, or airport facility; any non-Federal aid, street, road, or highway; and any other public building, structure, or system, including those used for educational, recreational, or cultural purposes; or any park.

Real property

Land, including land improvements, structures, and appurtenances thereto, but excludes moveable machinery and equipment.

Recipient

A non-Federal entity that receives a Federal award directly from a Federal awarding agency to carry out an activity under a Federal program.

Reasonable cost

A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person under the circumstances prevailing at the time the decision was made to incur the cost. In other words, a reasonable cost is a cost that is both fair and equitable for the type of work being performed.

Rehabilitation facility

A facility that primarily provides diagnosis and treatment for rehabilitation of injuries, disabilities, or illness. (Consistent with the definition of “comprehensive outpatient rehabilitation facility” in 42 U.S.C. § 1395x(cc)(2)).

Request for Public Assistance

The form a public entity or PNP organization uses to apply for disaster assistance.

Requesting Entity

An entity that requests mutual aid assistance from a Providing Entity for work resulting from a declared fire, emergency, or major disaster within its legal jurisdiction.

Service animal

A dog that is individually trained to do work or perform tasks for people with disabilities or access and functional needs.

Simplified acquisition threshold

The dollar amount below which a non-Federal entity may purchase property or services using small purchase methods. The simplified acquisition threshold is set by the Federal Acquisition Regulation at 48 C.F.R. Subpart 2.1 (Definitions) and in accordance with 41 U.S.C. 1908. As of the publication of this part, the simplified acquisition threshold is \$150,000, but this threshold is periodically adjusted for inflation.

Small Project

A project for which the final obligated (Federal and non-Federal) amount is less than the annually adjusted cost threshold for small project grants.

Special Flood Hazard Area

The land area subject to inundation during a flood having a 1 percent chance of being equaled or exceeded in a given year (also referred to as the base flood or 100-year flood). Special Flood Hazard Areas are shown on FIRMs published by FEMA.

State

Any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

Subaward

An award provided by a pass-through entity to a Subrecipient for the Subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal program.

Subrecipient

A non-Federal entity that receives a subaward from a pass-through entity to carry out part of a Federal program. It does not include an individual that is a beneficiary of such program. A Subrecipient may also be a Recipient of other Federal awards directly from a Federal awarding agency.

Substantial Damage

Damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

Supply

Any tangible personal property other than that meeting the definition of equipment.

Trust land

Land, the title to which is held by the United States in trust for an Indian Tribe or individual, or which is held by an Indian Tribe or individual subject to a restriction by the United States against

alienation. “Trust or restricted interest in land” or “trust or restricted interest in a parcel of land” means an interest in trust land. Collectively referred to as “trust lands.”

Wetland

An area that is saturated by water with a frequency sufficient to support or, under normal hydrologic conditions would support, a prevalence of vegetation or aquatic life typically adapted to saturated or seasonally saturated soil conditions (e.g., swamp, fresh and saltwater marsh, bog, fen).

Zoo

Any facility maintained under the care of a Doctor of Veterinary Medicine, in which live animal(s) are kept for public exhibition or education. Aquariums and wildlife or zoological parks may meet this definition.

APPENDIX A: ENVIRONMENTAL AND HISTORIC PRESERVATION COMPLIANCE

The following statutes, Executive Orders (EOs), and regulations establish requirements to protect the environment and preserve the Nation's historic and archeologic resources. FEMA reviews each Public Assistance (PA) project to ensure the work complies with applicable Federal environmental and historic preservation (EHP) laws, their implementing regulations, and applicable EOs.

National Historic Preservation Act

Section 106 of the National Historic Preservation Act (NHPA) requires FEMA to consider the effects a project will have on historic properties and provide the Advisory Council on Historic Preservation the opportunity to comment on the effects of the project.³⁹⁰ Historic properties include buildings or groups of buildings (districts), structures, objects, landscapes, archaeological sites, and traditional cultural properties included in, or eligible for inclusion in, the National Register of Historic Places.³⁹¹

National Environmental Policy Act

Section 102 of the National Environmental Policy Act (NEPA) requires Federal agencies to integrate environmental values into their decision-making processes by considering the environmental impacts of their proposed actions and reasonable alternatives to those actions.³⁹² The White House Council on Environmental Quality publishes its NEPA regulations in Title 40 of the Code of Federal Regulations (C.F.R.) Parts 1500–1508. The U.S. Department of Homeland Security publishes NEPA requirements and provides a specific decision-making process that FEMA must follow before funding a project. The process ensures consideration of environmental consequences of the project and informs the general public.

Endangered Species Act

The Endangered Species Act (ESA) requires Federal agencies to use their authorities to conserve federally listed threatened and endangered species (listed species) and critical habitats. FEMA must also consult with the U.S. Fish and Wildlife Service (USFWS) and the National Oceanic and Atmospheric Administration Fisheries, also known as the National Marine Fisheries Service (NMFS), to ensure that proposed projects will not jeopardize the continued existence of any listed species or result in the destruction or adverse modification of critical habitat for listed species.³⁹³

Clean Water Act

The Clean Water Act (CWA) establishes the basic structure for regulating discharges of pollutants in the waters of the United States (e.g., rivers and streams, lakes and ponds, coastlines, wetlands, estuaries). The CWA makes it unlawful to discharge any pollutant from a specific

³⁹⁰ 16 U.S.C. § 470f.

³⁹¹ www.nps.gov/subjects/nationalregister/index.htm.

³⁹² 42 U.S.C. § 4332.

³⁹³ 16 U.S.C. § 1536, Endangered Species Act Section 7.

source into navigable waters without the appropriate CWA permits from the U.S. Army Corps of Engineers (USACE) or State regulatory agency.³⁹⁴

Clean Air Act

The Clean Air Act (CAA) protects the Nation's air through the reduction of smog and atmospheric pollution. Except for activities in nonattainment areas (defined as those areas that do not meet national standards for air quality and, therefore, require more rigorous compliance measures), air quality compliance often requires certain measures be implemented, such as dust abatement, vehicle emissions control, fuel storage, and distribution procedures.³⁹⁵

Coastal Barrier Resources Act

The Coastal Barrier Resources Act (CBRA)³⁹⁶ established the John H. Chafee Coastal Barrier Resources System (CBRS), which consists of relatively undeveloped coastal barriers along the Atlantic, Gulf, and Great Lakes coasts. CBRA minimizes adverse impacts to these areas by restricting Federal assistance that encourages development within the CBRS. USFWS publishes maps designating these areas.³⁹⁷ FEMA must consult with USFWS prior to providing PA funding for work within the CBRS.³⁹⁸

Migratory Bird Treaty Act

The Migratory Bird Treaty Act makes it unlawful to pursue, hunt, take, capture, kill, or sell migratory birds listed in the statute without a waiver from USFWS.³⁹⁹ FEMA consults with USFWS regarding projects likely to trigger compliance with this Act.

Resource Conservation and Recovery Act

The Resource Conservation and Recovery Act (RCRA) established a framework for Federal, State, and local cooperation for controlling the management of hazardous and non-hazardous solid waste. The U.S. Environmental Protection Agency's (EPA's) role is to establish minimum regulatory standards, usually implemented by the States, and to provide technical assistance. RCRA requires the safe disposal of waste materials, promotes the recycling of waste materials, and encourages cooperation with local agencies.⁴⁰⁰

Coastal Zone Management Act

The Coastal Zone Management Act (CZMA) provides for the management of the Nation's coastal resources. The CZMA establishes a voluntary partnership between the Federal Government and coastal and great lakes States. It requires participating States to develop State coastal zone management plans. PA projects located in, or near, established coastal zone management areas must be consistent with the enforceable policies of the State's federally

³⁹⁹ 16 U.S.C. §§ 703–712.

⁴⁰⁰ 42 U.S.C. § 6901 et seq.

approved coastal zone management plan.⁴⁰¹ Before approving a project in a coastal zone management area, FEMA consults with the State agency overseeing the implementation of the CZMA plan to ensure the project is consistent with the plan's provisions.

Farmland Protection Policy Act

The Farmland Protection Policy Act minimizes the extent to which Federal programs contribute to the conversion of prime or unique farmland, or land of statewide or local importance, to nonagricultural uses and to ensure that Federal programs are administered in a manner that, to the extent practicable, will be compatible with State, local, and private programs and policies to protect farmland. The Farmland Protection Policy Act and U.S. Department of Agriculture (USDA) implementing procedures require FEMA to evaluate projects for adverse effects to such farmland and to consider alternative actions that could avoid adverse effects. For projects that have the potential to affect such farmland, FEMA must consult with the USDA Natural Resources Conservation Service (NRCS) to identify potential impacts to that farmland.⁴⁰²

Fish and Wildlife Coordination Act

The Fish and Wildlife Coordination Act protects fish and wildlife when Federal actions result in the control or modification of a natural stream or body of water. The Fish and Wildlife Coordination Act requires Federal agencies to determine whether a proposed action will result in the control or modification of a body of water. Projects involving the control or modification of any water body require Federal agencies to consult with USFWS and NMFS (as appropriate) and State wildlife agencies to develop measures to protect, develop, and improve fish and wildlife conditions.⁴⁰³

Wild and Scenic Rivers Act

The Wild and Scenic Rivers Act preserves the free-flowing State of rivers that are listed in the National Wild and Scenic Rivers System (System) or are under study for inclusion in the System because of their scenic, recreational, geologic, fish and wildlife, historic, cultural, or other similar values. If a proposed project is located on a river included in the System, FEMA must review it for compliance with the Wild and Scenic Rivers Act and consult with the managing agency for the affected designated river.⁴⁰⁴

Magnuson-Stevens Fishery Conservation and Management Act

The Magnuson-Stevens Fishery Conservation and Management Act is the primary law for managing and maintaining sustainable fisheries in waters of the United States. The Magnuson-Stevens Fishery Conservation and Management Act protects essential fish habitat, which includes the waters and substrate necessary to maintain healthy fisheries. FEMA must consult with NMFS when any proposed PA project could have an adverse effect on essential fish habitat.⁴⁰⁵

⁴⁰¹ 16 U.S.C. § 1451 et seq.

⁴⁰² 7 U.S.C. § 4201 et seq.

⁴⁰³ 16 U.S.C. §§ 661–667e.

⁴⁰⁴ 16 U.S.C. § 1271 et seq.

⁴⁰⁵ 16 U.S.C. §§ 1801–1884.

Executive Order 11988, Floodplain Management

EO 11988, Floodplain Management, requires Federal agencies to minimize or avoid activity that adversely affects floodplains. It requires Federal agencies to use a systematic decision-making process to evaluate the potential effects of projects located in, or affecting, floodplains; document each step of the process; and involve the public in the decision-making process. This process is designed to:

- Reduce flood loss risks;
- Minimize the impacts of floods on human safety, health, and welfare; and
- Restore and preserve the natural and beneficial functions of floodplains.

FEMA publishes its implementing regulations for EO 11988 in 44 C.F.R. Part 9, Floodplain Management and Protection of the Wetlands. These regulations set forth the policy, procedures, and responsibilities to implement and enforce the EO, including the decision-making process, which is referred to as the 8-step process.⁴⁰⁶

Executive Order 11990, Protection of Wetlands

EO 11990, Protection of Wetlands, requires Federal agencies to minimize or avoid activity that adversely affects wetlands and to encourage the preservation and enhancement of the beneficial functions of wetlands. To meet these objectives, EO 11990 requires Federal agencies to use a systematic decision-making process to evaluate the potential effects of projects in, or affecting, wetlands; document each step of the process; and involve the public in the decision-making process.

FEMA publishes its implementing regulations for EO 11990, Protection of Wetlands in 44 C.F.R. Part 9, Floodplain Management and Protection of the Wetlands. These regulations set forth the policy, procedures, and responsibilities to implement and enforce the EO, including the decision-making process, which is referred to as the 8-step process.

Executive Order 12898, Environmental Justice

EO 12898, Environmental Justice, requires Federal agencies to identify and address any disproportionately high and adverse human health or environmental effects on minority and low-income populations as a result of their actions.

⁴⁰⁶ 44 C.F.R. § 9.6, Decision-making process.

APPENDIX B: PRIVATE NONPROFIT FACILITY ELIGIBILITY EXAMPLES

Below are examples of private nonprofit (PNP) facility eligibility determinations.

Facility owned by PNP – PNP Leases Portion of Space to For-Profit Service

Parkland Hospital is an eligible PNP that owns a medical office building and leases a portion of it to doctors and laboratories that are providing for-profit services. The for-profit leases are for 70 percent of the floor space, excluding the common area floor space, as defined in this policy.

Analysis:

The building is ineligible because the eligible services were offered in less than 50 percent of the building space.

PNP Recreational Center Providing Eligible Services

The PNP Springtown Recreation Center claims that it provides eligible essential social services in addition to its recreation activities and should be eligible for assistance. The organization claims that its services now include day care for elderly adults, senior citizen center programs, programs for battered spouses, and shelter workshops. These programs are provided by the recreation center staff and offered 5 days a week. Recreation activities are limited to evenings and weekends. The entire center is used for the eligible services.

Analysis

The organization would not appear to be eligible based upon its name and presumed mission. A detailed examination is necessary to determine the eligibility of the organization and its facility based upon the eligible services provided. In cases where space is not dedicated to any specific activity, the amount of time dedicated to eligible purposes in such spaces determines eligibility and the level of assistance. Therefore, even though the entire facility is used for eligible purposes, FEMA pro-rates PA funding based on the proportion of the total time it is used for eligible services.

Support Facility Owned by PNP

A parking garage is owned by an eligible PNP hospital to support its nearby hospital facility. The ground floor is leased to retail businesses and totals 15 percent of the total space of the garage.

Analysis

Title 44 of the Code of Federal Regulations (C.F.R.) § 206.221(e), *Private nonprofit facility*, authorizes assistance for administrative and support facilities essential to the operation of medical facilities and emergency facilities, which in this example includes the parking garage. Because the hospital uses more than 50 percent of the parking garage, the facility is eligible based on primary use. FEMA assistance would be pro-rated based on the percentage of space used for the eligible parking purpose. The parking garage is eligible only because of its association with the hospital.

Facilities Owned by PNP Homeowners' Association

The Woodlands Homeowners' Association is a PNP organization responsible for providing certain services for a 200-home development. The Homeowners' Association's facilities are local neighborhood streets, water system, sewage system, fire station, medical clinic, neighborhood park, community center, and a recreational lake and dam.

Analysis

The Homeowners' Association operates facilities that provide essential social services and therefore is an eligible PNP. The lake and dam, park, and streets do not meet the definition of eligible facilities. The water and sewage systems meet the definition of a utility and are eligible for assistance. The fire station and medical clinic are eligible as emergency and medical facilities. The community center might be eligible if it serves the general public outside the Homeowners' Association community and if it is established and primarily used as a gathering place for a variety of social, educational enrichment, and community service activities.

Recreational Center – Primarily Athletic Services

Westover Recreation Center sponsors a number of activities.

The center is available for rental Friday, Saturday, and Sunday evening to companies, religious groups, clubs, and civic organizations. It is offered as a location for league parties, office parties, seminars, conferences, and holiday celebrations. The center has rooms set aside for seniors' bridge and other card games, along with occasional workshops for photography, pottery and ceramics, and art.

However, the center is primarily oriented to athletics, as exemplified by a large indoor pool and locker room, a half dozen squash/racquetball courts, a weight/exercise room, and a 9,200-square-foot gymnasium/basketball court.

Analysis

Although Westover Recreation Center offers a number of activities generally considered eligible community center functions, it is, first and foremost, a recreation center. In contrast to the definition of an eligible community center, it is neither established nor primarily used as a "gathering place for a variety of social, educational enrichment, and community service activities," even though it does offer some of these.

"Facilities established or primarily used for athletic (or) recreational activities are ineligible community centers." It is not necessary to calculate the percentage of time or space devoted to community activities versus athletic and recreational activities, because Westover is overwhelmingly athletic and recreational. For these reasons, a PNP facility similar to Westover would not be eligible.

Mixed Use Community Center – Nominal Fee

Somerset Community Center consists of a number of meeting rooms, a lending library, social services room, health services room, dining room, activity area with games and a wide-screen TV, darkroom, pianos for practice, ceramics lab, woodshop, computer room, sewing machines, exercise room, and a large foyer. Outside are a fitness trail, garden plots, an outdoor basketball court and softball field, a gazebo, and picnic area.

A nominal membership fee is charged. Classes are offered in piano, bridge, arts and crafts, and cooking. The center sponsors numerous seniors' activities, which include trips, luncheons, and recreational and educational activities. A lunch program is offered for seniors and their spouses. Some exercise classes are also offered. Health screenings and immunizations are regularly offered. Door-to-door transportation is provided to those who need it.

Analysis

By virtue of the wide range of community activities, Somerset Community Center would be an eligible community center. Although it does offer athletic and recreational activities, these are minimal in the time and space allocated to them; therefore, it is not a recreational center. The minimal fee makes it a service to the public.

School Operated by a Religious Institution

The Community Church operates a State-certified private school offering first through eighth grades. The teaching curriculum includes math, science, English, history, physical education, and religious doctrine. The school has an average attendance of 500 students. The campus consists of three buildings: one used primarily for the secular curriculum, one used primarily for religious instruction, and a chapel primarily used for religious worship. Admissions to the school are restricted to members of Community Church.

Analysis

Evaluate the three buildings separately. The two buildings used, respectively, for secular and religious education are eligible as educational facilities. As educational facilities, they are considered to provide critical services and therefore Community Church does not need to apply to SBA to receive funding for permanent work on those buildings. The chapel is eligible as a house of worship. Houses of worship provide noncritical services, so Community Church is required to apply for an SBA loan for the chapel. The restricted admissions process does not affect eligibility. Pursuant to the Stafford Act, no PNP facility is excluded from eligibility because leadership or membership in the organization is limited to people that share a religious faith or practice.

APPENDIX C: WELDED STEEL MOMENT FRAME

FEMA has specific eligibility criteria for inspecting, evaluating, and repairing earthquake damage to buildings constructed with welded steel moment framing connections subject to brittle fracture, such as those constructed prior to 1995 using the prescribed detail of the 1991 Uniform Building Code (Section 2710(g)(B) or its equivalent). FEMA bases the eligibility criteria on *Recommended Post Earthquake Evaluation and Repair Criteria for Welded Steel Moment Frame Buildings* (FEMA 352).⁴⁰⁷

Reimbursement for Preliminary Post-earthquake Assessment

The process of preliminary screening, which helps to rapidly identify buildings that are likely to have sustained significant damage to welded steel moment frame connections, is ineligible for Public Assistance (PA) funding. Preliminary screening is typically performed by building department officials immediately following an earthquake to determine if a building needs further evaluation.

Following the preliminary screening, the Applicant may use the preliminary evaluation method described in FEMA 352 to determine, on a preliminary basis, whether a building has sustained either structural or nonstructural damage that results in a hazardous condition. Preliminary evaluations include:

- A general review of the building's construction characteristics to determine its structural system and vulnerable features.
- A visit to the building site to observe its overall condition and note obvious signs of damage.
- A determination of an appropriate posting category for the building, on the basis of the preceding results and engineering judgment. Posting categories are described by the following designations:
 - Green – Little or no damage. Poses no immediate threat.
 - Yellow – Structural or nonstructural damage. Limited or localized safety hazard.
 - Red – Significant damage to structural elements. Significant safety hazard.

Preliminary evaluation is eligible only when conditions result in a yellow or red designation.

Reimbursement for Detailed Post-earthquake Evaluations

As recommended in FEMA 352, the Applicant should conduct a detailed evaluation on all buildings determined to have potential welded steel moment frame fractures, as identified in the preliminary assessment, and designated with a yellow or red posting. Eligible work includes the reasonable evaluation of the effects of the identified, significant connection damage to the future performance of the building structure. To be eligible, this evaluation should be limited to the recommendations in FEMA 352, Chapter 4, as follows:

⁴⁰⁷ www.fema.gov/media-library/assets/documents/747.

- Visual bottom flange connection inspections performed at locations selected in accordance with FEMA 352, Chapter 4, Method 2 (Inspection of a Sample of Connections) are eligible.
- The inspection of a sample of the total welded steel moment frame connections in the building, in accordance with guidance provided in FEMA 352, Chapter 4, Method 2 is eligible.
- If an Applicant discovers certain types of damage, additional visual inspection of bottom or top flange connections at locations recommended in FEMA 352, Chapter 4, are also eligible but only after the Applicant informs FEMA of the frame damage already discovered and FEMA approves the follow-on inspection.

The eligible work associated with connection inspection includes:

- Removal of necessary architectural finishes, such as plaster/drywall.
- Removal of fire retardants in the inspection area of the connection.
- Visual inspection.
- Nondestructive testing as appropriate, necessary, and approved by FEMA. Testing may include liquid dye-penetrant testing or magnetic particle testing, but not ultrasonic testing.

In circumstances where a building is assigned a green posting, visual inspections are only eligible for those connections where the Applicant has found significant damage (as defined in FEMA 352, Chapter 4) associated with the declared earthquake disaster.

Visual inspection of additional connections (at locations recommended by FEMA 352, following the discovery of damaged connections) will also be eligible, but only after the Applicant has informed FEMA of the frame damage already discovered and FEMA approves the follow-on inspection. FEMA may also approve nondestructive testing if the visual inspections indicate a significant potential for concealed damage.

Except as detailed above, any inspections that do not yield discovery of significant connection damage attributable to the earthquake are ineligible.

Generally, detailed analytical or experimental studies or Level 2 evaluations as described in FEMA 352, Chapter 5, are ineligible unless FEMA provides approval before the Applicant initiates the work.

APPENDIX D: FREQUENT COMPLIANCE ISSUES WITH COOPERATIVE PURCHASING PROGRAMS

The following is a list of frequent compliance issues with Federal procurement requirements when Tribal or local government or private nonprofit (PNP) Applicants use cooperative purchasing programs for procurements above the simplified acquisition threshold:

Full and Open Competition

The Applicant must ensure that solicitations used by cooperative purchasing programs include a clear and accurate description of the scope of work or goods actually required. Additionally, cooperative purchasing programs that place overly restrictive requirements on solicitations risk noncompliance with the full and open competition requirements in Title 2 Code of Federal Regulations (C.F.R.) § 200.319.

Procurement Method

Cooperative purchasing programs must comply with allowable procurement methods in 2 C.F.R. § 200.320. Some of these methods require that Applicants publicly advertise or publicize the solicitations, solicit bids from an adequate number of known suppliers, and award contracts to the responsible, responsive firm with the lowest price or to the responsive firm whose proposal is most advantageous to the program with price and other factors considered.

Socio-economic Contracting

The Applicant must ensure cooperative purchasing programs take the applicable affirmative steps to encourage participation of small businesses, minority businesses, and women owned enterprises. Failure to take any of the affirmative steps violates 2 C.F.R. § 200.321.

Geographic Preferences

Any geographic preferences that a cooperative purchasing program uses in evaluating bids or proposals and any additional terms and conditions in a cooperative purchasing program's pre-negotiated agreements that favor or give preference to local suppliers violates 2 C.F.R. § 200.319(b) and be restrictive of competition.

Contract Provisions

Cooperative purchase programs at times do not include the federally required contract provisions in the agreements with vendors. In accordance with 2 C.F.R. § 200.326, all contracts must contain the applicable contract clauses described in Appendix II to the Uniform Rules (Contract Provisions for non-Federal Entity Contracts Under Federal Awards).

Cost or Price Analysis

The Applicant must conduct an independent cost or price analysis when using cooperative purchasing agreements in accordance with 2 C.F.R. § 200.323.

APPENDIX E: STUMP CONVERSION TABLE

Diameter to Volume Capacity

FEMA quantifies the number of cubic yards of debris for each size of stump based on the following formula:

$$\frac{[(\text{Stump Diameter}^2 \times 0.7854) \times \text{Stump Length}] + [(\text{Root-Ball Diameter}^2 \times 0.7854) \times \text{Root-Ball Height}]}{46,656}$$

0.7854 is one-fourth Pi and is a constant.

46,656 is used to convert cubic inches to cubic yards and is a constant.

The formula used to calculate the cubic yardage used the following factors, based upon findings in the field:

- Stump diameter measured 2 feet up from the ground
- Stump diameter to root-ball diameter ratio of 1:3.6
- Root-ball height of 31 inches

Stump Diameter (Inches)	Debris Volume (Cubic Yards)	Stump Diameter (Inches)	Debris Volume (Cubic Yards)
6	0.3	46	15.2
7	0.4	47	15.8
8	0.5	48	16.5
9	0.6	49	17.2
10	0.7	50	17.9
11	0.9	51	18.6
12	1	52	19.4
13	1.2	53	20.1
14	1.4	54	20.9
15	1.6	55	21.7
16	1.8	56	22.5
17	2.1	57	23.3
18	2.3	58	24.1
19	2.6	59	24.9
20	2.9	60	25.8
21	3.2	61	26.7
22	3.5	62	27.6
23	3.8	63	28.4
24	4.1	64	29.4
25	4.5	65	30.3
26	4.8	66	31.2

Stump Diameter (Inches)	Debris Volume (Cubic Yards)	Stump Diameter (Inches)	Debris Volume (Cubic Yards)
27	5.2	67	32.2
28	5.6	68	33.1
29	6	69	34.1
30	6.5	70	35.1
31	6.9	71	36.1

APPENDIX G: MOSQUITO ABATEMENT

FEMA may provide reimbursement for mosquito abatement measures at the written request of the State, Tribal, or local public health officials after FEMA consults with the Centers for Disease Control and Prevention (CDC), based on any of the following:

- Evidence of:
 - Higher levels of disease transmitting mosquitoes in the disaster area following the incident;
 - A significant number of disease-carrying mosquitoes in the area due to the increase in incident-related standing water; or
 - The potential for disease transmission and human exposure to disease carrying mosquitoes based on the detection of arboviral diseases in sentinel organisms (poultry, wild birds, mosquito pools) in the impacted area prior to the incident, discovered during surveillance as part of mosquito abatement activities, or reported human cases in which transmission occurred prior to the incident.
- A determination that a significant increase in the mosquito population and/or the change of biting mosquito species poses a threat to emergency workers who are required to work out-of-doors, thereby significantly hampering response and recovery efforts.

Such evidence may include an abnormal rise in landing rates or trap counts, significant changes in species composition or estimate of infection rates, when compared to pre-disaster surveillance results.

- Verification from medical facilities within the affected area that an increase in the general public's exposure to mosquitoes has directly resulted in secondary infections, especially among those with weakened immune systems such as the elderly, the very young, or the sick. This may occur when increased numbers of residents in disaster areas with extended power outages are forced to open buildings for air circulation.

Where possible, a determination of the need for vector control measures should be based on surveillance data provided by local agencies, or on surveillance conducted as a component of the emergency response. Similarly, termination of control efforts should be based on mosquito

Terminology

An **arbovirus** is a virus utilizing arthropods as vectors and is transmitted via their feeding to a definitive host.

The **landing rate**, expressed as number of mosquitoes landing per minute, is used as an adult mosquito surveillance measure utilizing human volunteers as bait.

Methoprene Briquettes are formulated with methoprene (compound that mimics the action of an insect growth-regulating hormone and prevents the normal maturation of insect larvae) growth inhibitor and a timed-release carrier that resembles a charcoal briquette.

A **sentinel organism** is an organism, usually fowl, purposely exposed to mosquito bites outdoors to monitor pathogen transmission by mosquitoes.

Seroconversion is the development of detectable antibodies in the blood of a sentinel organism directed against an infectious agent.

Trap count is the number of female mosquitoes captured in a trap receptacle each night the traps are set.

density and disease transmission monitoring, and on the degree of exposure to mosquitoes of residents and responders. Information useful in determining the need for emergency mosquito control measures includes:

- The local jurisdiction's mosquito population density estimates pre- and post-disaster, including information about species composition
- Arbovirus transmission activity indices, including information about the location of surveillance activities; indices may consist of:
 - Infection rates in mosquitoes
 - Seroconversion in sentinel chickens
 - Equine case
 - Human cases
- The amount and type of flooding (e.g., saltwater/freshwater, coastal/inland)
- The extent and location of damage to housing
- The extent, location, and anticipated duration of power interruption
- The anticipated extent and duration of cleanup and recovery operations
- A description of the type of mosquito management required (e.g., aerial or ground-based adulticide applications, larvicide applications), and duration of application to reduce the threat and the areas where the interventions are needed

To be eligible for Public Assistance funding, insecticide formulations must be among those approved and registered by the U.S. Environmental Protection Agency for use in urban areas for mosquito control and must be applied according to label directions and precautions by appropriately trained and certified applicators. Furthermore, mosquito abatement measures must comply with all Federal, State, and local laws, ordinances, and regulations concerning vector control. Mosquito abatement measures include, but are not limited to the following:

- Adulticiding – The ground or aerial spraying of insecticides to kill adult mosquitoes
- Larviciding – The application of chemicals, including methoprene briquettes, by ground or air to kill mosquito larvae or pupae
- Breeding habitat removal or alteration – The modification of potential breeding habitat to make it unsuitable for mosquito breeding or to facilitate larval control, including:
 - Draining or removing standing water in close proximity to homes, schools, sheltering facilities, and businesses
 - Increased dewatering through the pumping of existing drainage systems
 - Dissemination of information (e.g., inserting flyers with resident's water bills, public service announcements, newspaper campaigns) to direct residents to remove the mosquito breeding habitat

APPENDIX H: SNOW ASSISTANCE

Snow-related activities, including snow removal, de-icing, salting snow dumps, and sanding of roads and other eligible facilities, is only an eligible emergency protective measure when a winter storm results in record or near-record⁴⁰⁸ snowfall.⁴⁰⁹ FEMA authorizes snow assistance by county based on a finding that the county received record or near-record snowfall or meets the contiguous county criteria as described below. FEMA evaluates Tribal lands either as part of a requested county or separately.

Record or Near-Record Snowfall

FEMA utilizes data collected by the National Oceanic and Atmospheric Administration's National Centers for Environmental Information (NCEI) to identify the historical 1-, 2-, and 3-day snowfall records for each county. For current event snowfall, FEMA relies primarily on snowfall measurements taken at National Weather Service (NWS) Cooperative Network Stations but accepts measurements from other sources if those measurements are verified as reasonable and accurate by the NWS. Historical 1-, 2-, and 3-day snowfall records by county are available on the NCEI Snow Climatology Database (SCDB) at the following website:

www.ncdc.noaa.gov/snow-and-ice/snowfall-extremes. Daily snowfall reports by county are available at: www.ncdc.noaa.gov/snow-and-ice/daily-snow.

FEMA follows the following process to determine record or near-record snowfalls:

- Compare current snowfall amounts with the historical record snowfall amounts for a like number of days without regard for the month in which the record snowfall or current event occurred.
- For multiple-day snowstorms, counties or Tribal lands that meet the 1-day record or near-record requirement on any 1 day, or the 2-day record or near record over 2 consecutive days, or the 3-day record or near record over 3 consecutive days, etc., meets the record or near-record criteria for that county or Tribal lands.
- FEMA relies on the NWS to determine the duration of the snowstorm.
- When data from multiple NWS-verified sources exist within a county or Tribal lands, FEMA compares the highest current event snowfall reported by the NWS within that county or Tribal land with the highest historical record snowfall for that county or Tribal land.
- For counties or Tribal lands that do not have NCEI or NWS historical record snowfall data, use the historical record from the nearest NWS Cooperative Network Station in an adjacent county or Tribal land, even if located in an adjacent State, for determining historical snowfall records.
- If current event snowfall data are not available from the NWS for a county or Tribal land, use the nearest NWS Cooperative Network Station data from an adjacent county, even if located in an adjacent State.
- FEMA may designate a county or Tribal land that does not receive a record or near-record snowfall, but is contiguous to a county (generally referred to as a “core county”) that does receive a record or near-record snowfall, for snow assistance if the county or

⁴⁰⁸ FEMA generally considers near record as being within 10 percent of the record snowfall.

⁴⁰⁹ 44 C.F.R. § 206.227.

Tribal land has current event snowfall that meets or exceeds the current event snowfall of the core county, to which it is contiguous. Base this comparison on the highest current event snowfall received by each county as reported by the NWS.

- Consider counties or Tribal areas that experience snowfalls occurring over a period exceeding 3 consecutive days that do not reach record or near-record snowfalls during a 3-day period, and for which there are no historical snowfall records for a period exceeding 3 days with NCEI or NWS, on a case-by-case basis.

Winter Storm or Snowstorm Declaration Requests

The request for a Major Disaster Declaration must include a request for snow assistance as part of that declaration. All such requests are subject to the requirements and processes established in the Stafford Act and FEMA regulations.⁴¹⁰ In addition to the information required in every disaster request, requests for snow assistance must include the following information:

- Identification of core and contiguous counties⁴¹¹ for which a snowstorm declaration is requested;
- Duration of snowfall, as identified or confirmed by the NWS; and
- For each requested county or Tribal land, daily snowfall totals from NWS stations or NWS-verified sources and historical record snowfall data from the NCEI.

Generally, the current event weather and snowfall information is included in a statement or report from the NWS describing the event.

FEMA only includes costs related to snow activities as part of the preliminary damage assessment data for counties or Tribal lands that meet the record or near-record criteria or qualify as contiguous counties.

Other categories of work, including Permanent Work, may be authorized for snowstorm or winter storm declarations as appropriate.

⁴¹⁰ 44 C.F.R. § 206 Subpart B (206.31–48).

⁴¹¹ "Core County" means a county that has a record or near record snowfall with public assistance costs that exceed the annually established countywide per capita impact indicator and is designated for snow assistance under a major disaster declaration. "Contiguous County" means a county in the same State that shares a common border with a core county without geographic separation other than by a minor body of water, typically not exceeding one mile between the land areas of such counties.

APPENDIX I: MOLD REMEDIATION

Mold Remediation Methods

The following list describes common mold remediation methods.

Method	Application
Wet Vacuum	<ul style="list-style-type: none">• Use when materials are wet• Use where water has accumulated, such as on floors, carpets and hard surfaces• Do not use when sufficient liquid is not present
Damp Wipe	<ul style="list-style-type: none">• Wipe or scrub non-porous (hard) surfaces with water and detergent• Follow instructions listed on the product label
High Efficiency Particulate (HEPA) Vacuum	<ul style="list-style-type: none">• Final clean-up after thoroughly dry and contaminated materials are removed• Recommended for cleanup of dust outside of the remediation area• Properly seal HEPA filter• Personal protection equipment is highly recommended; filter and contents must be disposed of in well-sealed bags
Discard	<ul style="list-style-type: none">• Use for building materials and furnishings that cannot be remediated• Seal contents in two bags using 6-mil polyethylene sheeting• Cover large items in polyethylene sheeting and seal with duct tape• Sealing materials must be within containment area to limit further contamination

Summarized from Indoor Environments Division of the U.S. Environmental Protection Agency, "Mold Remediation in Schools and Commercial Buildings": www.epa.gov/mold/mold_remediation.html.

Application of Remediation Methods

The following list outlines typical mold remediation actions.

Water Damaged Material	Action
Books and paper	<ul style="list-style-type: none">• Non-valuable items – discard• Valuable/important – photocopy and discard originals• Invaluable items – freeze in frost-free freezer or meat locker, or freeze dry
Carpet and backing	<ul style="list-style-type: none">• Wet vacuum• Reduce ambient humidity levels with dehumidifier• Accelerate drying process with fans
Ceiling tiles	<ul style="list-style-type: none">• Discard and replace (replacement only eligible as Permanent Work)
Cellulose insulation	<ul style="list-style-type: none">• Discard and replace (replacement only eligible as Permanent Work)
Concrete or cinder block surfaces	<ul style="list-style-type: none">• Wet vacuum• Accelerate drying process with dehumidifiers, fans, and/or heaters

Water Damaged Material	Action
Fiberglass Insulation	<ul style="list-style-type: none"> • Discard and replace (replacement only eligible as Permanent Work)
Hard surfaces, porous floorings (linoleum, ceramic tile, vinyl)	<ul style="list-style-type: none"> • Vacuum or damp wipe with water and mild detergent • Scrubbing may be necessary • Allow to dry
Upholstered furniture	<ul style="list-style-type: none"> • Wet vacuum • Accelerate drying process with dehumidifiers, fans, and/or heaters
Wallboard (drywall and gypsum board)	<ul style="list-style-type: none"> • If obvious swelling and seams are not intact – discard • If no obvious swelling and seams are intact – may be dried in place • Ventilate wall cavity
Window drapes	<ul style="list-style-type: none"> • Launder or clean according to manufacturer's instructions
Wood surfaces	<ul style="list-style-type: none"> • Remove water with wet vacuum • Accelerate drying process with dehumidifiers, fans, and/or heaters • Wet paneling – discard and ventilate wall cavity

Summarized from Indoor Environments Division of the U.S. Environmental Protection Agency, "Mold Remediation in Schools and Commercial Buildings": www.epa.gov/mold/table1.html.

APPENDIX J: COST-EFFECTIVE PUBLIC ASSISTANCE HAZARD MITIGATION MEASURES

FEMA considers the following mitigation measures to be cost-effective Public Assistance (PA) mitigation if the measures do not exceed 100 percent of the eligible repair cost (prior to any insurance reductions). The mitigation measures must meet all eligibility requirements described in [Chapter 8:IV, Hazard Mitigation](#). There may be instances where these measures are required by codes or standards. In such cases FEMA first evaluates whether the work is eligible as a code or standard (See [Chapter 8:II, Codes and Standards](#)).

I. Drainage Structures:

For I.A. and I.C. (below), PA and environmental and historic preservation (EHP) staff coordinate to determine whether a hydrologic and hydraulic (H&H) study is needed. The Applicant must submit an H&H study to determine the appropriate culvert size with no adverse up or downstream impacts and National Flood Insurance Program regulations when:

- The facility is in a special flood hazard area,
- There is a potential adverse impact to the floodplain⁴¹²,
- There is a potential adverse impact to a federally listed threatened or endangered species, critical habitat, or essential fish habitat⁴¹³, or
- It is required to demonstrate compliance with the Clean Water Act

A. Replace the structure with multiple structures or a larger structure. The Applicant may use existing State, Tribal, or local drainage criteria for sizing replacement culverts. The Applicant must consider replacement structures with regard to the total drainage system.

B. For the purpose of erosion control, add properly designed entrance and exit structures, such as a headwall, wingwalls, flared aprons, or energy dissipation measures to increase efficiency and help to minimize scour and erosion. Depending on the severity of erosion, solutions for bank protection may include gabion baskets, rip rap,

Example

Adding a relief culvert located at the same crossing site as a damaged culvert and in the embankment above the flow line of the primary culvert or located upstream of the main culvert. A relief culvert provides an alternate route for the flow if the main culvert is over capacity or gets plugged and prevents sedimentation through the high-flow scouring action.

⁴¹² 44 C.F.R. §§ 9.11(d)(4) and 60.3(b)(7), (c)(10), and (d)(3).

⁴¹³ Endangered Species Act 16 U.S.C. §§ 1531-1544 and Magnuson-Stevens Fishery Conservation and Management Act.

cast-in-place concrete, crushed stone or rock, grouted rip rap⁴¹⁴, sheet-piling, geotextile fabric, or similar measures to control erosion. Alternatively, the use of vegetation or a combination of vegetation and construction materials such as live fascines, vegetated geogrids, live crib walls, brush mattresses, root wads, or similar measures are eligible. The Applicant should consider using green infrastructure techniques such as bioswales, bioretention, rain gardens and similar techniques that may be used in public drainage systems.

C. Culverts:

1. Where the alignment of a culvert is inconsistent with existing water flow, realign the culvert vertically or horizontally or relocate the culvert to improve hydraulics and minimize erosion and scour. The Applicant must consider realignment of structures with regard to the total drainage system.
2. Extend the culvert discharge to mitigate erosion and scour by extending the discharge end beyond the toe of the embankment.
3. Install a debris barrier to prevent debris blockage or fins designed to orient floating debris for passage through the culvert.
4. Install a debris barrier riser to allow debris to float up with the rising floodwaters without blocking flow into the culvert.

II. Transportation Facilities:

A. Bridges:

1. Where traffic counts are low, replace with low-water crossings.
2. Install cables to restrain a bridge from being knocked off piers or abutments during floods or earthquakes.
3. Install girder and deck uplift tie-downs to prevent their displacement from the substructure.
4. Install Longitudinal Peaked Stone Toe Protection with nature planting, upstream of a failed abutment, to provide a stable floodplain bench for the protection of the abutment and the adjoining bridge approach. Consider other relevant Bio-engineering applications such as engineered logjams, log vanes or log bendway weir.

B. Marine Pier Ramps: If attached to decking, install open decking or floating decking with uplift-resistant tie-downs and fasteners.

C. Roadways and Railways: Where shoulders are susceptible to overflow from adjacent water courses, stabilize shoulders and embankments with geotextile fabric and revetments.

D. Roadways: Use geotextile drainage blankets between the pavement section and subbase to strengthen subgrade.

⁴¹⁴ Projects involving grouted rip rap may be subject to an environmental assessment and may not be allowable in all instances.

III. Mechanical, Electrical, Plumbing (MEP) Components

- A. Provide seismic bracing for electrical lines, conduit, piping, duct-work, water heaters, and other MEP equipment. Components can be wall mounted, floor mounted, or suspended.
- B. Roof-Mounted Equipment: Secure to roof top via a continuous load path, using tie-downs, straps, or other anchoring systems that will resist expected wind forces.
- C. Elevate or dry floodproof components or systems vulnerable to flood damage, including equipment controls, electrical panels; heating, ventilation, and air conditioning/machinery rooms; emergency generators; and fuel tanks. When wiring cannot be elevated, replace with equipment suitable for submerged applications.
- D. Install switches, circuit isolation and/or quick connect capability to facilitate rapid connection of backup power for any damaged or susceptible mechanical and electrical components.
- E. Install camlocks, transfer switches, and electrical panels to facilitate the connection of portable emergency generators.

IV. Pipes:

- A. Install pipe joint restraints, flexible piping at pipe/conduit connections, or replace pipes with more ductile material.
- B. Install continuous lining or encasement to prevent infiltration or structural collapse.
- C. Underground Pipes: Install shut-off valves so that damaged sections of pipe can be isolated.

V. Water/Wastewater:

- A. Pumps: If pumps and their attached motors are damaged by stormwater inundation, replace them with submersible or inline pumps as appropriate.
- B. Sewer Access Covers: Elevate to the hydraulic grade line. When elevation is not feasible or practicable, install devices to prevent infiltration into access holes such as cast-iron watertight frames and covers.
- C. Well Systems: Seal exposed portions of well casing or raise the elevation of the well head to prevent infiltration of flood waters.
- D. Raw water intakes: Install buttressing to prevent damage from erosion, scour, and flood debris.

VI. Electric Power Systems:

- A. Provide looped distribution service or other redundancies in the electrical service to critical facilities, such as hospitals and fire stations.
- B. Install surge suppressors and lightning arrestors.
- C. Transformers:

1. Elevate pad transformers above the Base Flood Elevation.
2. Support pole-mounted transformers with multiple poles.

D. Power Poles:

1. Replace damaged poles with higher-rated poles (preferably two classes stronger) of the same or different material. When replacing poles with higher-rated poles, install guys and anchors to provide lateral support for poles supporting pole-mounted transformers, regulators, capacitor banks, reclosers, air-break switches, or other electrical distribution equipment.
2. Remove large diameter lines.
3. Add cross-bracing to H-frame poles to provide additional strength.
4. Power Lines: Add guy-wires or additional support.

VII. Storage Tanks:

- A. Anchor or otherwise protect from movement by strengthening or stiffening base connections.
- B. Install self-initiating disconnects and shut-off valves between tanks and distribution lines to minimize damage and leaks.

VIII. Buildings and Structures:

- A. For small support buildings subject to uplift or rollover from high winds, securely anchor the buildings to foundations to prevent toppling or becoming missile hazards.
- B. Elevate or dry or wet floodproof buildings.
- C. Footings: Where spread footings have been undercut by scour, underpin footings.
- D. Siding: Replace with a stronger siding with stronger attachments to the wall sheathing and structure.
- E. Vents: Replace with water-resistant vents.
- F. Non-structural Building Components: Brace interior walls, partitions, parapets, anchor veneer or cladding, suspended light features, drop ceilings, soffits, and other non-structural elements that could collapse and cause injury or block safe exit of a building during an earthquake or high-wind event.
- G. Furnishings: Provide seismic ties, straps, or clips to secure replaced furniture, cabinets, computers, bookcases, and other furnishings.
- H. Roofs
 1. Install hurricane clips, fasteners, anchors, straps, and connectors that are compatible with the roof system and corrosion-resistant in coastal areas.
 2. Strengthen the high-wind pressure areas (e.g., corner zones, roof soffits, overhangs).
 3. Strengthen roof openings, such as hatches and skylights.

4. Low Slope Roofs: Replace entire roof covering with a fully adhered roof covering, such as a modified bitumen membrane roof. FEMA does not provide PA mitigation funding for mechanically fastened or loose laid insulation or membranes as punctures can cause large amounts of water intrusion. Additionally, FEMA does not provide PA mitigation funding for loose laid roof membranes with loose ballast stones as the stones can become projectiles in high winds and cause damage.
 5. Gable Roofs: Replace the gable-end framing with hipped roof framing to reduce wind forces (lower edge pressure; reduced projected wind area) and strengthen the roof framing.
 6. Gutters and Downspouts: Upgrade to direct water away from the structure to prevent interior or basement water damage.
- I. Doors and Windows:
1. Upgrade the weather stripping to prevent water infiltration.
 2. Replace doors, door frames, hinges, and hardware with wind-resistant units.
 3. Strengthen windows.
 4. Replace glass with impact-resistant material.
 5. Install shutters on windows:
 - a. Of critical facilities, such as hospitals.
 - b. On the lower floors of noncritical facilities most likely to be struck by debris.
 - c. Of buildings with very high-value contents that can be damaged by water (such as libraries and document centers).
 - d. Of buildings when failure of roofing materials or other portions of nearby structures could create impact hazards.
- IX. Signage: Replace sign panels and their supports with a stronger type of system of supports and panels. Consider using multiple support posts and stronger panels and fasteners.

APPENDIX K: CONTRACT PROVISIONS

The following is a list of frequent compliance issues with Federal procurement requirements when Tribal or local government or private nonprofit (PNP) Applicants use cooperative purchasing programs for procurements.

If an Applicant plans to use Federal funds to pay or reimburse equipment expenses or services under a contract, that contract must contain the applicable clauses described in [Appendix II to the Uniform Rules](#) (Contract Provisions for Non-Federal Entity Contracts Under Federal Awards) under 2 C.F.R. § 200.326. Additionally, FEMA recommends certain contract clauses recommended by FEMA.

This document outlines the federally required contract provisions in addition to FEMA-recommended provisions applicable to PA applicant contracts. For some of the required clauses, sample language or references to find sample language are listed below. Sample language for certain required clauses (remedies, termination for cause and convenience, changes) is not listed since these must be drafted in accordance with the non-Federal entity's applicable local laws and procedures. For the clauses which require that exact language be included, the required language is specifically identified below.

The non-Federal entity alone is responsible for ensuring that all language included in their contracts meets the requirements of 2 C.F.R. § 200.326 and 2 C.F.R. Part 200, Appendix II.

REMEDIES: Applies to all FEMA grant and cooperative agreement programs.

Contracts for more than the simplified acquisition threshold, currently set at \$250,000, must address administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as appropriate. See 2 C.F.R. Part 200, Appendix II, A.

TERMINATION FOR CAUSE AND CONVENIENCE: Applies to all FEMA grant and cooperative agreement programs.

All contracts exceeding \$10,000 must address termination for cause and for convenience by the non-Federal entity, including how it will be affected and the basis for settlement. See 2 C.F.R. Part 200, Appendix II, B.

EQUAL EMPLOYMENT OPPORTUNITY: This requirement applies to all FEMA grant and cooperative agreement programs and exact language below is required.

Standard: Except as otherwise provided under 41 C.F.R. Part 60, all contracts that meet the definition of “federally assisted construction contract” in 41 C.F.R. § 60-1.3 must include the equal opportunity clause provided under 41 C.F.R. § 60- 1.4(b), in accordance with Executive Order 11246, *Equal Employment Opportunity* (30 Fed. Reg. 12319, 12935, 3 C.F.R. Part, 1964-1965 Comp., p. 339), as amended by Executive Order 11375, *Amending Executive Order 11246 Relating to Equal Employment Opportunity*, and implementing regulations at 41 C.F.R. Part 60 (Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department

of Labor). See 2 C.F.R. Part 200, Appendix II, C.

Key Definitions.

- i. Federally Assisted Construction Contract. The regulation at 41 C.F.R. § 60-1.3 defines a “federally assisted construction contract” as any agreement or modification thereof between any applicant and a person for construction work which is paid for in whole or in part with funds obtained from the Government or borrowed on the credit of the Government pursuant to any Federal program involving a grant, contract, loan, insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan, insurance, or guarantee, or any application or modification thereof approved by the Government for a grant, contract, loan, insurance, or guarantee under which the applicant itself participates in the construction work.
- ii. Construction Work. The regulation at 41 C.F.R. § 60-1.3 defines “construction work” as the construction, rehabilitation, alteration, conversion, extension, demolition or repair of buildings, highways, or other changes or improvements to real property, including facilities providing utility services. The term also includes the supervision, inspection, and other onsite functions incidental to the actual construction.

Required Language: 41 C.F.R. Part 60-1.4(b) requires the insertion of the following contract clause.

During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following:

Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

(3) The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.

(4) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(5) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(6) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(7) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(8) The contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (8) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance:

Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering

agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted construction work: *Provided*, That if the applicant so participating is a State or local government, the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance.

The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to the Executive Order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive Order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings.

CONTRACT WORK HOURS AND SAFETY STANDARDS ACT: This requirement applies to all FEMA contracts awarded by the non-federal entity exceeding \$100,000 under grant and cooperative agreement programs that involve the employment of mechanics or laborers. It is applicable to construction work. These requirements do not apply to the purchase of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

Standard: Where applicable (see 40 U.S.C. §§ 3701-3708), all contracts awarded by the non-Federal entity exceeding \$100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. §§ 3702 and 3704, as supplemented by Department of Labor regulations at 29 C.F.R. Part 5. See 2 C.F.R. Part 200, Appendix II, E. Under 40 U.S.C. § 3702, each contractor must be required to compute the wages of every mechanic and laborer based on a standard work week of 40 hours. Work exceeding the standard work week is permissible provided that the worker is compensated at a rate of not less than one

and a half times the basic rate of pay for all hours worked beyond 40 hours in the work week. Further, no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous.

Suggested Language: 29 C.F.R. § 5.5(b) provides contract clause language concerning compliance with the Contract Work Hours and Safety Standards Act. FEMA suggests including the following contract clause:

Compliance with the Contract Work Hours and Safety Standards Act.

(1) *Overtime requirements.* No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.

(2) *Violation; liability for unpaid wages; liquidated damages.* In the event of any violation of the clause set forth in paragraph (b)(1) of this section the contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph (b)(1) of this section, in the sum of \$26 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in paragraph (b)(1) of this section.

(3) *Withholding for unpaid wages and liquidated damages.* The **(write in the name of the Federal agency or the loan or grant recipient)** shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor under any such contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in paragraph (b)(2) of this section.

(4) *Subcontracts.* The contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraph (b)(1) through (4) of this section and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in paragraphs (b)(1) through (4) of this section.

CLEAN AIR ACT AND THE FEDERAL WATER POLLUTION CONTROL ACT: This requirement applies to contracts awarded by a non-Federal entity of amounts exceeding \$150,000 under a federal grant.

Standard: If applicable, contracts must contain a provision that requires the contractor to agree to comply with all applicable standards, orders, or regulations issued pursuant to the Clean Air Act (42 U.S.C. §§ 7401-7671q.) and the Federal Water Pollution Control Act as amended (33 U.S.C. §§ 1251-1387). Violations must be reported to FEMA and the Regional Office of the Environmental Protection Agency. See 2 C.F.R. Part 200, Appendix II, G.

Suggested Language: The following provides a sample contract clause.

Clean Air Act

1. The contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act, as amended, 42 U.S.C. § 7401 et seq.
2. The contractor agrees to report each violation to the **(name of applicant entering into the contract)** and understands and agrees that the **(name of the applicant entering into the contract)** will, in turn, report each violation as required to assure notification to the Federal Emergency Management Agency, and the appropriate Environmental Protection Agency Regional Office.
3. The contractor agrees to include these requirements in each subcontract exceeding \$150,000 financed in whole or in part with Federal assistance provided by FEMA.

Federal Water Pollution Control Act

1. The contractor agrees to comply with all applicable standards, orders, or regulations issued pursuant to the Federal Water Pollution Control Act, as amended, 33 U.S.C. 1251 et seq.
2. The contractor agrees to report each violation to the **(name of the applicant entering into the contract)** and understands and agrees that the **(name of the applicant entering into the contract)** will, in turn, report each violation as required to assure notification to the Federal Emergency Management Agency, and the appropriate Environmental Protection Agency Regional Office.
3. The contractor agrees to include these requirements in each subcontract exceeding \$150,000 financed in whole or in part with Federal assistance provided by FEMA.

DEBARMENT AND SUSPENSION: This requirement applies to all FEMA grant and

cooperative agreement programs.

Standard: Non-Federal entities and contractors are subject to the debarment and suspension regulations implementing Executive Order 12549, *Debarment and Suspension* (1986) and Executive Order 12689, *Debarment and Suspension* (1989) at 2 C.F.R. Part 180 and the Department of Homeland Security's regulations at 2 C.F.R. Part 3000 (Non-procurement Debarment and Suspension).

Requirements:

1. These regulations restrict awards, subawards, and contracts with certain parties that are debarred, suspended, or otherwise excluded from or ineligible for participation in Federal assistance programs and activities. See 2 C.F.R. Part 200, Appendix II, ¶ H; and 2 C.F.R. § 200.213. A contract award must not be made to parties listed in the SAM Exclusions. SAM Exclusions is the list maintained by the General Services Administration that contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549. SAM exclusions can be accessed at www.sam.gov. See 2 C.F.R. § 180.530.
2. In general, an “excluded” party cannot receive a Federal grant award or a contract within the meaning of a “covered transaction,” to include subawards and subcontracts. This includes parties that receive Federal funding indirectly, such as contractors to recipients and subrecipients. The key to the exclusion is whether there is a “covered transaction,” which is any non-procurement transaction (unless excepted) at either a “primary” or “secondary” tier. Although “covered transactions” do not include contracts awarded by the Federal Government for purposes of the non-procurement common rule and DHS's implementing regulations, it does include some contracts awarded by recipients and subrecipients.
3. Specifically, a covered transaction includes the following contracts for goods or services:
 - a. The contract is awarded by a recipient or subrecipient in the amount of at least \$25,000.
 - b. The contract requires the approval of FEMA, regardless of amount.
 - c. The contract is for federally-required audit services.
 - d. A subcontract is also a covered transaction if it is awarded by the contractor of a recipient or subrecipient and requires either the approval of FEMA or is in excess of \$25,000.

Suggested Language: The following provides a debarment and suspension clause. It incorporates an optional method of verifying that contractors are not excluded or disqualified.

Suspension and Debarment

1. This contract is a covered transaction for purposes of 2 C.F.R. pt. 180 and 2 C.F.R. pt. 3000. As such, the contractor is required to verify that none of the contractor's principals (defined at 2 C.F.R. § 180.995) or its affiliates (defined at 2 C.F.R. § 180.905) are excluded (defined at 2 C.F.R. § 180.940) or disqualified (defined at 2 C.F.R. § 180.935).
2. The contractor must comply with 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C, and must include a requirement to comply with these regulations in any lower tier covered transaction it enters into.
3. This certification is a material representation of fact relied upon by **(insert name of recipient/subrecipient/applicant)**. If it is later determined that the contractor did not comply with 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C, in addition to remedies available to **(insert name of recipient/subrecipient/applicant)**, the Federal Government may pursue available remedies, including but not limited to suspension and/or debarment.
4. The bidder or proposer agrees to comply with the requirements of 2 C.F.R. pt. 180, subpart C and 2 C.F.R. pt. 3000, subpart C while this offer is valid and throughout the period of any contract that may arise from this offer. The bidder or proposer further agrees to include a provision requiring such compliance in its lower tier covered transactions.

BYRD ANTI-LOBBYING AMENDMENT: This requirement applies to all FEMA grant and cooperative agreement programs. Contractors that apply or bid for a contract of \$100,000 or more under a federal grant must file the required certification. See 2 C.F.R. Part 200, Appendix II, I; 31 U.S.C. § 1352; and 44 C.F.R. Part 18.

Standard: Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, officer or employee of Congress, or an employee of a Member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. § 1352. FEMA's regulation at 44 C.F.R. Part 18 implements the requirements of 31 U.S.C. § 1352 and provides, in Appendix A to Part 18, a copy of the certification that is required to be completed by each entity as described in 31 U.S.C. § 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier-to-tier up to the Federal awarding agency.

Suggested Language:

Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352 (as amended)

Contractors who apply or bid for an award of \$100,000 or more shall file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, officer or employee of Congress, or an employee of a Member of Congress in connection with obtaining any Federal contract, grant, or any other award covered by 31 U.S.C. § 1352. Each tier shall also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier-to-tier up to the recipient who in turn will forward the certification(s) to the awarding agency.

Required Certification: If applicable, contractors must sign and submit to the non-Federal entity the following certification.

APPENDIX A, 44 C.F.R. PART 18 – CERTIFICATION REGARDING LOBBYING

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.
2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

The Contractor, _____, certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the Contractor understands and agrees that the provisions of 31 U.S.C. Chap. 38, Administrative Remedies for False Claims and Statements, apply to this certification and disclosure, if any.

Signature of Contractor's Authorized Official

Name and Title of Contractor's Authorized Official

Date

PROCUREMENT OF RECOVERED MATERIALS: This requirement applies to all contracts awarded by a non-federal entity under FEMA grant and cooperative agreement programs.

Standard: A non-Federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. See 2 C.F.R. Part 200, Appendix II, J; and 2 C.F.R. § 200.322.

Requirements: The requirements of Section 6002 include procuring only items designated in guidelines of the EPA at 40 C.F.R. Part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds \$10,000 or the value of the quantity acquired by the preceding fiscal year exceeded \$10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

Suggested Language:

1. In the performance of this contract, the Contractor shall make maximum use of products containing recovered materials that are EPA-designated items unless the product cannot be acquired—

- a. Competitively within a timeframe providing for compliance with the contract performance schedule;
 - b. Meeting contract performance requirements; or
 - c. At a reasonable price.
2. Information about this requirement, along with the list of EPA-designated items, is available at EPA's Comprehensive Procurement Guidelines web site, <https://www.epa.gov/smm/comprehensive-procurement-guideline-cpg-program>.
3. The Contractor also agrees to comply with all other applicable requirements of Section 6002 of the Solid Waste Disposal Act."

RECOMMENDED CONTRACT PROVISIONS

The Uniform Rules authorize FEMA to require additional provisions for non-Federal entity contracts. Although FEMA does not currently require additional provisions, FEMA recommends the following for PA applicant contracts:

ACCESS TO RECORDS.

Standard: All recipients, subrecipients, successors, transferees, and assignees must acknowledge and agree to comply with applicable provisions governing DHS access to records, accounts, documents, information, facilities, and staff. Recipients must give DHS/FEMA access to, and the right to examine and copy, records, accounts, and other documents and sources of information related to the federal financial assistance award and permit access to facilities, personnel, and other individuals and information as may be necessary, as required by DHS regulations *and* other applicable laws or program guidance. See DHS Standard Terms and Conditions: Version 8.1 (2018). **Additionally, Section 1225 of the Disaster Recovery Reform Act of 2018 prohibits FEMA from providing reimbursement to any state, local, tribal, or territorial government, or private non-profit for activities made pursuant to a contract that purports to prohibit audits or internal reviews by the FEMA administrator or Comptroller General.**

Suggested Language:

Access to Records. The following access to records requirements apply to this contract:

1. The Contractor agrees to provide **(insert name of state agency or local or Indian tribal government), (insert name of recipient)**, the FEMA Administrator, the Comptroller General of the United States, or any of their authorized representatives access to any books, documents, papers, and records of the Contractor which are directly pertinent to this contract for the purposes of making audits, examinations, excerpts, and transcriptions.
2. The Contractor agrees to permit any of the foregoing parties to reproduce by any means

whatsoever or to copy excerpts and transcriptions as reasonably needed.

3. The Contractor agrees to provide the FEMA Administrator or his authorized representatives access to construction or other work sites pertaining to the work being completed under the contract.
4. In compliance with the Disaster Recovery Act of 2018, the (**write in name of the non-federal entity**) and the Contractor acknowledge and agree that no language in this contract is intended to prohibit audits or internal reviews by the FEMA Administrator or the Comptroller General of the United States.

CHANGES: FEMA recommends, therefore, that a non-Federal entity include a changes clause in its contract that describes how, if at all, changes can be made by either party to alter the method, price, or schedule of the work without breaching the contract. The language of the clause may differ depending on the nature of the contract and the end-item procured.

Standard: To be eligible for FEMA assistance under the non-Federal entity's FEMA grant or cooperative agreement, the cost of the change, modification, change order, or constructive change must be allowable, allocable, within the scope of its grant or cooperative agreement, and reasonable for the completion of project scope.

DHS SEAL, LOGO, AND FLAGS: FEMA recommends that Applicants include a provision that a contractor shall not use the DHS seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific FEMA pre-approval.

Standard: Recipients must obtain permission prior to using the DHS seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials. See DHS Standard Terms and Conditions: Version 8.1 (2018).

Suggested Language: "The contractor shall not use the DHS seal(s), logos, crests, or reproductions of flags or likenesses of DHS agency officials without specific FEMA pre-approval."

COMPLIANCE WITH FEDERAL LAW, REGULATIONS, AND EXECUTIVE ORDERS: FEMA recommends that Applicants include an acknowledgement that FEMA financial assistance will be used to fund the contract along with the requirement that the contractor will comply with all applicable Federal law, regulations, executive orders, and FEMA policies, procedures, and directives.

Standard: The recipient and its contractors are required to comply with all Federal laws, regulations, and executive orders.

Suggested Language: "This is an acknowledgement that FEMA financial assistance will be used

to fund all or a portion of the contract. The contractor will comply with all applicable Federal law, regulations, executive orders, FEMA policies, procedures, and directives.”

NO OBLIGATION BY FEDERAL GOVERNMENT: FEMA recommends that the non-Federal entity include a provision in its contract that states that the Federal Government is not a party to the contract and is not subject to any obligations or liabilities to the non-Federal entity, contractor, or any other party pertaining to any matter resulting from the contract.

Standard: FEMA is not a party to any transaction between the recipient and its contractor. FEMA is not subject to any obligations or liable to any party for any matter relating to the contract.

Suggested Language: “The Federal Government is not a party to this contract and is not subject to any obligations or liabilities to the non-Federal entity, contractor, or any other party pertaining to any matter resulting from the contract.”

PROGRAM FRAUD AND FALSE OR FRAUDULENT STATEMENTS OR RELATED ACTS: FEMA recommends that the non-Federal entity include a provision in its contract that the contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to its actions pertaining to the contract.

Standard. Recipients must comply with the requirements of The False Claims Act (31 U.S.C. §§ 3729-3733) which prohibits the submission of false or fraudulent claims for payment to the federal government. See DHS Standard Terms and Conditions: Version 8.1 (2018); and 31 U.S.C. §§ 3801-3812, which details the administrative remedies for false claims and statements made. The non-Federal entity must include a provision in its contract that the contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to its actions pertaining to the contract.

Suggested Language. “The Contractor acknowledges that 31 U.S.C. Chap. 38 (Administrative Remedies for False Claims and Statements) applies to the Contractor’s actions pertaining to this contract.”

APPENDIX L: VALIDATION OF APPLICANT-PROVIDED COST ESTIMATES

This Appendix provides a checklist that FEMA Public Assistance (PA) staff must use to review and validate cost estimates submitted to FEMA for Permanent Work. FEMA staff may also use relevant portions of this checklist for Emergency Work. FEMA includes this checklist in the associated subaward file in PA Grants Manager.

The steps for validating Applicant-provided cost estimates are as follows:

1. Verify that the estimate:

- ☐ Is prepared by a licensed Professional Engineer or other estimating professional, such as a licensed architect or certified professional cost estimator⁴¹⁵ who certifies that the estimate was prepared in accordance with industry standards.
- ☐ Includes certification that the estimated cost directly corresponds to the repair of the agreed upon damage.
- ☐ Is based on unit costs for each component of the scope of work (SOW) and not a lump sum amount.
- ☐ Contains a level of detail sufficient for FEMA to validate that all components correspond with the agreed-upon SOW.

2. Review the scope of work and cost estimate to verify that only eligible items are included:

- ☐ The scope of work items in the cost estimate are required based on the agreed-upon damage description and dimensions.
- ☐ The scope of work included ineligible items, and FEMA has removed the ineligible components from the estimate (documentation detailing the components removed and reason for removal is attached).
- ☐ The scope of work included ineligible items, and FEMA is returning the estimate to the Applicant to revise.

3. Determine whether unit costs are from an approved source of industry standard information and whether current cost data publications were used:

There are numerous sources that may be used in the preparation of cost estimates.

- ☐ The Applicant used the following appropriate cost estimating resource(s):
 - ☐ Industry standard construction cost estimating resource
 - ☐ RSMeans

⁴¹⁵ In lieu of a license or certification, an individual with professional experience and proficiency in the field of cost estimating may prepare and sign the cost estimate.

- ☐ XActimate
- ☐ BNi Costbooks
- ☐ Marshall & Swift
- ☐ Sweet's Unit Cost Guide
- ☐ Other _____
- ☐ Local cost data from _____
- ☐ Contract unit costs from recently completed projects
- ☐ Other: _____
- ☐ FEMA returned the estimate to the Applicant to revise as the Applicant did not use an appropriate cost estimate resource.

4. Determine the components of unit costs:

Ensure that the components that make up the unit costs are fully understood. The purpose of this review is to ensure that components of the unit costs are not duplicated elsewhere in the cost estimate.

- ☐ The estimate contained sufficient information related to the components of the unit costs:
 - ☐ Each unit cost represented a complete and in-place cost that included all labor, equipment, materials, small tools, incidentals, and hauling costs necessary to complete that element of work.
- ☐ Unit costs were analyzed to determine if general contractor overhead and profit were included in the unit costs:
 - ☐ Both general contractor and subcontractor overhead and profit are included in the unit costs and these costs are not duplicated elsewhere in the estimate or in the Cost Estimating Format (CEF).
 - ☐ Overhead and profit are not included in the unit costs.
 - ☐ Overhead and profit are duplicated in the estimate.
 - ☐ Costs for surveying, construction inspection, and permit compliance fees are not duplicated (i.e., not included within a unit cost and separately in the estimate).
- ☐ The estimate did not contain sufficient information related to the components of the unit costs. FEMA requested additional information from the Applicant.

5. Validate the cost estimate for completeness and reasonableness.

- ☐ The costs of work items are reasonable based on a representative sample.
- ☐ FEMA has determined costs for items of work in the estimate to be unreasonable (see attached). Therefore, the estimate was returned to Applicant to revise.
- ☐ All items of work included in the cost estimate are eligible.
- ☐ FEMA has removed ineligible items of work from the cost estimate (see attached).
- ☐ All work activities required to complete the work are quantified with unit costs.

- ☐ The cost estimate included lump sum amounts for work activities that need to be adjusted to unit prices. FEMA has returned the estimate to the Applicant for revision.
- ☐ The appropriate locality adjustment factor from the cost estimating publication is used for each line item, as applicable. Where historical costs were used, a locality adjustment was not applied, but cost escalation factors were added.
- ☐ The appropriate locality adjustment factor from the cost estimating publication was not used (see attached) or, as historical costs were used, a locality adjustment was inappropriately applied.
- ☐ Cost items checked are within 10 percent of the local average weighted unit prices or industry standard construction cost data (based on a review of at least six of the ten largest cost items against local average weighted unit prices or industry standard construction cost data (or there were less than ten cost items and all were reviewed) and based on reviewing at least 25 percent of the remaining cost items against local average weighted unit prices or industry standard construction cost data.
- ☐ Cost items checked are not within 10 percent of the local average weighted unit prices or industry standard construction cost data; therefore, the estimate was returned to Applicant to revise.

APPENDIX M: ALTERNATIVE PROCEDURES FOR PERMANENT WORK

Alternative Procedures for Permanent Work under Section 428 of the Stafford Act is designed to achieve better recovery outcomes and simplify the delivery of assistance.

Objectives

- Focus on outcome-based recovery;
- Enable applicants to use funds in a manner that best meets their specific needs for recovery;
- Promote long-term resiliency;
- Improve future preparedness; and
- Simplify the delivery of assistance.

Benefits of using the Pilot

- No requirement to rebuild communities back to what existed prior to the disaster.
- Applicants can share funds across all Permanent Work Pilot Projects.
- Excess funds may be used to reduce risk and improve future disaster operations.
- Hazard mitigation funding may be added to Replacement Projects.

Project Requirements

- In order to receive the benefits:
 - ✓ The project must be a Large Project.
 - ✓ Applicants must accept a fixed cost offer.
- The fixed cost is based on the estimated amount to rebuild to pre-disaster design and function.
- FEMA processes any project that does not have a fixed cost accepted within 18 months of the declaration date using standard PA policies.
- FEMA will consider time extensions on a case by case basis.

The attached table summarizes the differences between the Alternative Procedures and standard PA procedures:

<i>Alternative Procedures</i>	<i>Standard Procedures</i>
Fixed-cost project with use of excess funds.	Actual cost project. No retention of excess funds associated with the approved estimate.
May use funds across all Alternative Procedures projects.	Can only use funds toward the specific work identified in each specific project.
After FEMA approves a SOW, FEMA only requires approval for changes that involve buildings or structures aged 45 years or older, ground disturbing activities, or work in or near water.	After FEMA approves a SOW, FEMA requires approval for any change to the SOW.

Do not need to track costs associated with changes to the SOW.	Must track costs associated with all changes to the SOW.
Do not need to track costs to specific work items. Only need to track the total costs associated with the Alternative Procedures Projects.	Must track costs specific to each work item within each individual project.
Do not need to track work to specific Projects. Only need to substantiate that the work is related to the approved SOW covered in the Alternative Procedures Projects.	Must track all work to each individual project.

APPENDIX N: WORK ELIGIBILITY CONSIDERATIONS BY TYPE OF FACILITY

Work Eligibility Considerations: All Facilities		
PAPPG Reference	Topic	Applicability
Chapter 4:II, <i>Facility Eligibility</i>	Facility Eligibility	All Permanent Work.
Chapter 4:I, <i>General Work Eligibility</i>	General Work Eligibility <ul style="list-style-type: none"> ○ Result of Declared Incident ○ Within Designated Area ○ Legal Responsibility 	All work.
Chapter 6, <i>Cost Eligibility</i>	Cost Eligibility	All work.
Chapter 7, <i>Emergency Work Eligibility</i>	Emergency Work Eligibility	All Emergency Work.
Chapter 7:I, <i>Debris Removal (Category A)</i>	Debris Removal Eligibility	All Debris Removal Work.
Chapter 4:I.C; Chapter 7,I, and II, and ; Chapter 2:VII, VII.B.4 and 7, and VII.G; Appendix A	Environmental and Historic Preservation (EHP) Compliance	All work (including ground disturbance for any staging areas, access roads, parking, landscaping, grading, or utilities).
Chapter 8:III, Codes and Standards	Codes and Standards	Upgrades to pre-disaster design required by codes or standards.
Chapter 8:IV, <i>Hazard Mitigation</i> ; and Appendix J	Hazard Mitigation	Work to reduce or eliminate similar damage to the facility from a future incident.
Chapter 8:V, <i>Repair vs. Replacement</i>	Replacement	When cost to repair disaster-related damage exceeds 50% of cost to replace facility.
Chapter 8:VI, <i>Relocation</i>	Permanent Relocation	Destroyed facilities.
Chapter 8:III.E, <i>Floodplain Management and Wetland Protection</i> and VII, <i>Facility Located in or Impacting a Floodplain</i>	Floodplain Considerations	All Permanent Work in or impacting the floodplain
Chapter 8:IX.F, <i>Landslides and Slope Stabilization</i>	Landslides and Slope Stabilization	Facilities damaged due to a landslide or slope instability triggered by the incident.
Chapter 7:II.V, <i>Temporary Relocation of Essential Services</i>	Temporary Relocation	Certain essential community service facilities.

Work Eligibility Considerations: Roads and Bridges				
Road (including surface, base, shoulders, roadside ditches, guardrails, lighting, signage, sidewalks, etc.), drainage structure (culvert, low-water crossing), bridge (including, but not limited to, decking, pavement, piers, girders, abutments, slope protection, approaches, guardrails, lighting, signage, sidewalks)				
EHP laws, regulations, and executive orders (EOs) that frequently apply: NEPA; NHPA, ESA, CWA, CAA, EOs 11988 and 11990; projects involving work in waterways usually require Section 404 permits – permits issued by the USACE as required by the CWA.				
PAPPG Reference	Category	Eligible Work (including, but not limited to):	Ineligible Work and Costs	Other Considerations
Chapter 7:I	A	Debris removal and disposal to eliminate an immediate threat		Must distinguish between incident-related debris versus debris generated by other recent events.
Chapter 7:II.J	B	Emergency access <ul style="list-style-type: none"> Debris clearance or emergency repairs to restore access. 	<ul style="list-style-type: none"> Removal of debris from a privately-owned access facility UNLESS no other access point exists, and damage or debris impedes emergency access. Emergency repairs to privately owned roads UNLESS no other access point exists, damage impedes emergency access, and repair eliminates temporary housing needs. 	
Chapter 7:II.X	B	Emergency repairs to address an immediate threat	<ul style="list-style-type: none"> Emergency repair of Federal aid roads. 	
Chapter 8:IX.A	C	Restoration: Permanent repair or replacement	<ul style="list-style-type: none"> Loss of useful service life. Loss of toll revenue. Construction of additional lanes even if required by a code or standard, except when code requires changing a one lane bridge to two lanes. Normal maintenance. Restoration of Federal aid roads. 	<ul style="list-style-type: none"> Must distinguish between minor incident-related damage and damage related to age of the road, traffic flow, and frequent rain events. Need date of construction for culvert and any nearby structures that may be altered or affected by the project. Hydrology and hydraulic study to evaluate upstream and downstream impacts are necessary if replacing culvert with larger culvert.

Work Eligibility Considerations: Water Control Facilities

Dam or reservoir, irrigation and water conveyance (canal, pipeline, lateral, pump station, siphon), aqueducts, drainage channels, sediment and debris basins, stormwater retention and detention basins, coastal shoreline protection facilities (seawall, revetment), flood control work (levee, floodwall, flood control channel, dam, or basin, and other structure primarily used for flood control), navigational waterways, and shipping channels

EHP laws, regulations, and EOs that frequently apply: NEPA; NHPA, ESA, CWA, EOs 11988 and 11990; projects involving work in waterways usually require Section 404 permits – permits issued by the USACE as required by the CWA.

PAPPG Reference	Category	Eligible Work (including, but not limited to):	Ineligible Work and Costs	Other Considerations
Chapter 7:I.C	A	<p>Debris removal and disposal (from natural feature or engineered facility) to eliminate an immediate threat</p> <ul style="list-style-type: none"> ○ For navigable waterways, debris removal eligibility is limited to a max depth of 2 feet below the low tide draft of the largest vessel that utilized the waterway prior to the incident. ○ For non-navigable waterways, debris removal is only eligible to the extent that it is necessary to eliminate an immediate threat if the debris: <ul style="list-style-type: none"> - Obstructs, or could obstruct, intake structures; - Could cause damage to structures; or - Is causing, or could cause, flooding to property during the occurrence of a 5-year flood. 	<ul style="list-style-type: none"> ○ Removal of debris to eliminate a threat of flooding to agricultural land. ○ Random surveys to look for debris. ○ Debris removal from flood control works that are under the specific authority of NRCS. 	<ul style="list-style-type: none"> ○ Must distinguish between incident-related debris versus pre-existing debris and debris generated by other incidents. ○ Cannot duplicate funding provided by another Federal agency (e.g., USACE or NRCS).

Work Eligibility Considerations: Water Control Facilities

Dam or reservoir, irrigation and water conveyance (canal, pipeline, lateral, pump station, siphon), aqueducts, drainage channels, sediment and debris basins, stormwater retention and detention basins, coastal shoreline protection facilities (seawall, revetment), flood control work (levee, floodwall, flood control channel, dam, or basin, and other structure primarily used for flood control), navigational waterways, and shipping channels

EHP laws, regulations, and EOs that frequently apply: NEPA; NHPA, ESA, CWA, EOs 11988 and 11990; projects involving work in waterways usually require Section 404 permits – permits issued by the USACE as required by the CWA.

Chapter 7:II.H and X	B	<p>Flood-fighting (on natural feature or engineered facility) or emergency repairs (engineered and maintained facility only) to address an immediate threat</p> <ul style="list-style-type: none"> ○ The repair of deliberate breaches or removal of flood-fighting measures is eligible as part of the Category B emergency protective measure project. 	<ul style="list-style-type: none"> ○ Emergency protective measures to reduce the threat of flooding to agricultural land. ○ Emergency repair of flood control works that are under the authority of USACE or NRCS. ○ Flood-fighting measures on a flood control work that is under the authority of the NRCS. ○ Permanently increasing height or capacity of a flood control work. ○ De-watering of flooded areas primarily for the purpose of drying land. ○ Emergency repair of a secondary levee riverward of a primary levee. ○ Emergency repairs of flood control works under the authority of NRCS and USACE and of federally constructed coastal shoreline protective features under the authority of USACE. 	<ul style="list-style-type: none"> ○ USACE can conduct flood fighting activities. USACE cannot reimburse Applicants for flood fighting efforts.
Chapter 8:IX.B.1 and 2	D	<p>Debris and silt removal required to restore capacity (engineered and maintained facilities only)</p> <ul style="list-style-type: none"> ○ Eligible, but only if the Applicant provides documentation to establish the pre-disaster capacity of the facility AND that the facility was actively used and maintained with a regular clearance schedule. 	<ul style="list-style-type: none"> ○ Restoration of flood control works under the authority of USACE or NRCS. 	

Work Eligibility Considerations: Water Control Facilities

Dam or reservoir, irrigation and water conveyance (canal, pipeline, lateral, pump station, siphon), aqueducts, drainage channels, sediment and debris basins, stormwater retention and detention basins, coastal shoreline protection facilities (seawall, revetment), flood control work (levee, floodwall, flood control channel, dam, or basin, and other structure primarily used for flood control), navigational waterways, and shipping channels

EHP laws, regulations, and EOs that frequently apply: NEPA; NHPA, ESA, CWA, EOs 11988 and 11990; projects involving work in waterways usually require Section 404 permits – permits issued by the USACE as required by the CWA.

Chapter 8:IX.B.2	D	Restoration: Permanent Repair or Replacement <ul style="list-style-type: none"> ○ PNP irrigation facilities are only eligible if they provide water for essential services of a governmental nature to the general public for fire suppression, generating and supplying electricity, and drinking water supply. 	<ul style="list-style-type: none"> ○ Restoration of natural channels, lakes, and shorelines—that is, any feature that is not improved and maintained. ○ Restoration of private nonprofit irrigation systems that provide water for agricultural purposes. ○ Restoration of federally constructed coastal shoreline protective features. ○ Restoration of flood control works under the authority of USACE or NRCS. 	
------------------	---	--	--	--

Work Eligibility Considerations: Buildings, Vehicles, and Equipment

EHP laws, regulations, and EOs that frequently apply: NEPA, NHPA, CAA, ESA and EOs 11988 and 11990

PAPPG Reference	Category	Eligible Work (including, but not limited to):	Ineligible Work and Costs	Other Considerations
Chapter 7:II.B	B	Extracting water and removing mud and silt from interior to address immediate threat of additional damage or for access for assessment.	<ul style="list-style-type: none"> ○ Conducted on private property UNLESS FEMA approves the work because: <ul style="list-style-type: none"> - The immediate threat is widespread, such that it is a threat to the health and safety of the general public; - The Applicant has legal authority to perform the work; and - The Applicant obtained rights-of-entry and agreements to indemnify and hold harmless the Federal Government. 	
Chapter 8:IX.C.1	E	Extracting water and removing mud, silt, or debris from interior in conjunction with repairs.		
Chapter 7:II.B	B	Mold remediation to address immediate threat of additional damage <ul style="list-style-type: none"> ○ Post-remediation sampling to confirm remediation is complete. 	<ul style="list-style-type: none"> ○ Mold remediation required as a result of poor facility maintenance or failure to take protective measures in a reasonable amount of time following the incident. 	<ul style="list-style-type: none"> ○ Pre-remediation mold sampling is only eligible when sampling reveals presence of mold.
Chapter 8:IX.C.1	E	Mold remediation when conducted in conjunction with restoring the facility <ul style="list-style-type: none"> ○ Post-remediation sampling to confirm remediation is complete. 	<ul style="list-style-type: none"> ○ Mold remediation required as a result of poor facility maintenance or failure to take protective measures in a reasonable amount of time following the incident. 	<ul style="list-style-type: none"> ○ Pre-remediation mold sampling is only eligible when sampling reveals presence of mold.

Work Eligibility Considerations: Buildings, Vehicles, and Equipment

EHP laws, regulations, and EOs that frequently apply: NEPA, NHPA, CAA, ESA and EOs 11988 and 11990

PAPPG Reference	Category	Eligible Work (including, but not limited to):	Ineligible Work and Costs	Other Considerations
Chapter 7:II.B	B	Emergency protective measures to address an immediate threat <ul style="list-style-type: none"> ○ Buttreassing, bracing, or shoring. ○ Barricading and safety fencing. ○ Flood protection, such as sandbagging. ○ Emergency repairs. 		
Chapter 7:III.U	B	Demolition to address an immediate threat <ul style="list-style-type: none"> ○ Demolition of private structures may be eligible when collapse is imminent, and an immediate threat exists to the general public subject to additional requirements. 	<ul style="list-style-type: none"> ○ Removal of slabs or foundations that do not present a health or safety hazard. ○ Removal or covering concrete pads and driveways. ○ Exception to both – Structures in a buyout program funded by FEMA through the HMGP. 	<ul style="list-style-type: none"> ○ If securing a damaged building to prevent access is sufficient to alleviate the threat to public safety, demolition may not be necessary or eligible.
Chapter 7: II.S	B	Safety inspections <ul style="list-style-type: none"> ○ To establish whether a building is safe for entry, occupancy, and lawful use, as well as posting appropriate placards. ○ Eligible for both public and private buildings. 	<ul style="list-style-type: none"> ○ Inspections associated with: <ul style="list-style-type: none"> ▪ A determination of Substantial Damage under the community's floodplain management ordinance. ▪ A determination of whether the building needs to be elevated or relocated. ▪ Ensuring repairs are completed in accordance with building codes and standards. 	

Work Eligibility Considerations: Buildings, Vehicles, and Equipment				
EHP laws, regulations, and EOs that frequently apply: NEPA, NHPA, CAA, ESA and EOs 11988 and 11990				
PAPPG Reference	Category	Eligible Work (including, but not limited to):	Ineligible Work and Costs	Other Considerations
Chapter 6:XVII, 8:IX.C.1 and Appendix C	E	Post-earthquake inspection and evaluation of welded steel moment frames in buildings <ul style="list-style-type: none"> To determine the level of disaster-related damage requiring repair. 	<ul style="list-style-type: none"> Preliminary assessment to determine which buildings are likely to have sustained damage to welded steel moment frame connections. Detailed analytical or experimental studies. Inspection that does not yield earthquake-related connection damage. 	
Chapter 8:IX.C, C.1 and C.2	E	Restoration – Permanent repair or replacement <ul style="list-style-type: none"> Repair or replacement of buildings Repair or replacement of building components, vehicles or equipment with items similar in age, condition, and capacity. 	<ul style="list-style-type: none"> Tax assessments. Additional capacity necessary due to increased population or use, even if required by code. Americans Disabilities Act (ADA) upgrades related to a violation that the Applicant was notified of prior to the incident. 	<ul style="list-style-type: none"> Need date of construction. Check National Register of Historic Places or a State historic register. Identify whether the building is located in the 100-year floodplain (500-year for critical actions). FEMA provides assistance for Public Housing Authority facilities, unless Congress appropriates funds to HUD for emergency capital needs for specific PHA facilities. Must consider the age of the building, roof, and building systems; evidence of regular maintenance; severity and impacts of incident when distinguishing between incident-related damage and pre-existing damage. Comply with federally required minimum codes and standards when repairing or replacing building.

Work Eligibility Considerations: Contents

Furnishings, equipment, consumable supplies, files, records, research-related contents, animals, irreplaceable collections and individual objects, library books, and publications.

PAPPG Reference	Category	Eligible Work (including, but not limited to):	Ineligible Work and Costs	Other Considerations
Chapter 7.II.B	B	Address an immediate threat <ul style="list-style-type: none"> Removal and storage of contents to prevent additional damage 		
Chapter 8.IX.C	E	Restoration – Permanent repair or replacement <ul style="list-style-type: none"> Replacement of destroyed contents with items similar in age, condition, and capacity. Recovering and stabilizing records. Stabilization of irreplaceable collections and individual objects is eligible. Re-shelving, cataloging, and other work incidental to the replacement of library books and publications. 	<ul style="list-style-type: none"> Replacing used items with new items, unless a used replacement item is not reasonably available. Establishing new information databases. Manually re-entering data into new computers Scanning re-established hardcopy files into computers to create digital files. Deciphering photocopies of damaged hard copies. Research-related contents and animal replacement, if a comparable item/animal is not available for purchase at a reasonable cost. Replacement of rare books, collections, or objects. 	<ul style="list-style-type: none"> Applicants may replace contents with different items used for the same general purpose. Eligible funding is capped at the estimated cost for equivalent items.

Work Eligibility Considerations: Utilities				
Water storage, treatment plants, and delivery systems; power generation, transmission, and distribution facilities, including, but not limited to, natural gas systems, wind turbines, generators, substations, and power lines; sewage collection systems and treatment plants; communication systems				
EHP laws, regulations, and EOs that frequently apply: NEPA, NHPA, ESA, CAA, CWA, and EOs 11988 and 11990				
PAPPG Reference	Category	Eligible Work (including, but not limited to):	Ineligible Work and Costs	Other Considerations
Chapter 7:II.X	B	Emergency protective measures to address an immediate threat <ul style="list-style-type: none"> Buttressing, bracing, or shoring. Barricading and safety fencing. Flood protection, such as sandbagging. Emergency repairs. Residential electrical meter repair 	<ul style="list-style-type: none"> Revenue lost due to shutdown of a utility. Increased operating costs, such as increased costs for obtaining an alternative source of power because of the shutdown of a power generation plant. 	<ul style="list-style-type: none"> If repairs conducted under emergency circumstances restore the pre-disaster design and function of the facility, the repairs are ineligible as Category B, but are eligible as Category F.
Chapter 6:XVII and 8:IX.D	F	Restoration <ul style="list-style-type: none"> Permanent repair or replacement of any component of system, including buildings, structures, or systems, even if not contiguous. Electrical conductor replacement subject to specific criteria. Inspection or assessment of damaged components of a system. Inspection or assessment of an inaccessible structure or component of a system may be eligible, but only when there is evidence of damage, such as when sunken ground appears above a water pipeline. 	<ul style="list-style-type: none"> General post-disaster surveys, inspections, and assessments, such as video inspection of sewer lines. 	<ul style="list-style-type: none"> Rural electric cooperatives, municipal utilities, and public power districts frequently use time and equipment contracts for power distribution system repairs. Costs under these contracts are subject to certain criteria. Limited ROW clearance required to access a damaged facility may be eligible.

Work Eligibility Considerations: Parks, Recreation, and Other				
EHP laws, regulations, and EOs that frequently apply: NEPA, NHPA, CZMA, CBRA, ESA, CWA, and EOs 11988 and 11990				
PAPPG Reference	Category	Eligible Work (including, but not limited to):	Ineligible Work and Costs	Other Considerations
Chapter 7:II.X.4	B	Emergency protective measures to address an immediate threat <ul style="list-style-type: none"> Buttressing, bracing, or shoring. 		

Work Eligibility Considerations: Parks, Recreation, and Other				
EHP laws, regulations, and EOs that frequently apply: NEPA, NHPA, CZMA, CBRA, ESA, CWA, and EOs 11988 and 11990				
PAPPG Reference	Category	Eligible Work (including, but not limited to):	Ineligible Work and Costs	Other Considerations
		<ul style="list-style-type: none"> ○ Barricading and safety fencing. ○ Flood protection, such as sandbagging. ○ Emergency repairs. 		
Chapter 8:IX.E.1	G	Restoration – Permanent repair or replacement <ul style="list-style-type: none"> ○ Restoration of engineered beaches is subject to specific eligibility criteria. 	<ul style="list-style-type: none"> ○ Restoration of federally constructed beaches or shoreline protection facilities. ○ Restoration of PNP parks and recreational facilities, including supporting facilities such as roads, buildings, and utilities. ○ Restoration of natural, unimproved features. ○ Replacement of dead trees, shrubs, and other vegetation (unless necessary for slope stabilization, erosion control, minimizing sediment runoff, or restoring the function of the facility). ○ Replacement of destroyed crops; cosmetic or aesthetic vegetation.
